

Fifty Animated Years

THE NEWSLETTER
ARCHIVES

VOLUME TWO

2018 - 2025

Brief Note for this Collection

When the ASIFA Central chapter was organized in 1975, it was a Chicago-centric gang of enthusiasts. It now has membership reaching from Oregon to Pennsylvania; and thanks to the internet, our zoom “coffee break” gatherings attract visitors from across Europe, Asia, and India.

What emerges in these pages is a rich history of animation lore, community dispatches, and the small miracles of frame-by-frame life. From festivals and archival discoveries to the quiet alchemy of drawings and motion studies, these newsletters reflect a love of animation for anyone who believes that a ritually-destroyed retreat cake may truly enhance anyone’s life.

Thanks for the memories, everyone at ASIFA Central.

You may notice a jump between the two volumes in this assembly of newsletters. Yes, we did have a 15 year gap! So many changes took place after 2003, with members moving, changing jobs, following different paths, that our communications were mostly by email, the infamous Google Docs, and social media. The newsletter reappeared in 2018 as an effort to create a more tangible trail of the accomplishments of ASIFA Central. A digital presence can become easily erased, we have all learned, so we hope to carry on with this form of communication – for as long as fingers can annoy keyboards, and so members may express themselves to animators of the future.

Yr hmbl typst and editor

Jim Middleton
ASIFA Central Secretary

ASIFA Central Newsletter and Currents au Courant SumSumSummertime 2018

Greetings from The President, *Brad Yarhouse*

We have had a busy winter and lots of exciting opportunities in the works for Summer and this coming Fall. Our newly expanded board is very active having met every month this year to discuss and work on upcoming events. I am so excited to be part of such a dynamic team!

As president, my main concern is with building community. I believe that with community, artists flourish. History is laden with artists, scientists, musicians, writers, etc. joining together and transforming themselves and the world. Excellence doesn't happen in a vacuum. Whether we are networking for jobs, looking for moral support for our dreams and visions, collaborators to create with or just people to hang out with and have fun, community is what allows an organization to live and breathe. Facebook and other online systems help, but gathering in person can enrich us in ways more dimensional and nuanced.

Finally, a number of our members are professors and at this time of year, giving a gift membership to encourage a graduate is a nice way to celebrate their accomplishments and connect them with our community of animators.

If you have questions, (or answers!) please don't hesitate to contact me either through Facebook or via email:

brad@yarhouse.com

Happy Animating!

Report on the Celebration of Women Animators Event and Workshop - *By Charles Wilson*

Lotte Reiniger

On Saturday, March 30th, Charles Wilson and Gretchen Vinnedge hosted "A Celebration of Women Animators" at the Grand Rapids Community Media Center and the Wealthy Theater. The morning event had Charles teaching a history of women animators using an interactive quiz and showcasing some original artwork from his private collection that was created by Helena Smith Dayton, the world's first woman animator. Afterwards, he spoke about Lotte Reiniger's history, which included showing some rare films of hers, as well as revealing some historical artifacts of Lotte's that have survived to this day--like an animation trick-table where she created one of her last films in Canada and the only surviving copy of her first animated film "Ornament of the Lovestruck Heart" circa 1919, currently residing at the George Eastman House in Rochester, New York.

Following the morning presentations, Charles and Gretchen hosted a silhouette/cut-out animation workshop where students were taught a little history about animators Lotte Reiniger, Lynn Dana Wilton, and Evelyn

Lambart, and then given a crash course on the DragonFrame animation software. For the rest of the afternoon, the students set to work creating their own films using silhouette and cut-out animation techniques. The films created by the students are available for viewing on the GRCMC's YouTube page at the following link: https://youtu.be/Igij_cNu_08.

Prince Achmed

Upcoming Events and New Initiatives

ANI-JAM 18 Our first foray into a collaborative animation will start on June 9th. It's happening physically in Grand Rapids, Michigan at the Community Media Center. 12:00- 3:00. Members will be able to connect long distance through Skype. Theme, length, structure to be determined.

(See Facebook for more information and ongoing discussion on ideas) examples -

Mo Willem's *Life anijam*: <https://www.youtube.com/watch?v=2Tpdwr58KA>

SUMMER RETREAT August 11 at the Wealthy Theatre and Community Media Center. Details will be announced on Facebook shortly. If last year's success was any indication, this year will probably involve workshops, animation screenings, Members Talks, & Food.

ANI-MEETUP (formally Animators Open Mike): we had a number of successful get-togethers in 2017 and this year in January. Our goal is to run these bi-monthly. At our Ani-Meetup's we watch animation from other ASIFA chapters and then spend time screening works-in-progress or finished works from our members. It's a great time to ask questions about something you're stuck on, talk about a challenge you overcame during production, and/or just show off the project you're working on.

IAD (International Animation Day) the announcements for IAD will be happening in the next couple weeks, look for it on our Facebook page. This years poster is being designed by René Castillo, an award winning animator from Mexico. Brad Yarhouse has been asked to act as Interim Coordinator for ASIFA and will continue as IAD coordinator for ASIFA Central.

NEW WEBSITE

Board Member, *Julie Goldstein* has been working on a new mobile friendly Central website. Expected to launch before the August picnic.

NEWSLETTER

Board Members *Jim Middleton* and *Robert Swieringa* are working on our newsletter. Look for deadlines and publication dates soon. If you are interested in contributing to the newsletter contact Jim at: jim.middletonrx@gmail.com.

CENTRAL NEWSLETTER - *Really* Late Autumn 2018

Notes from the President - Brad Yarhouse

Here in the great midwest the fall is quickly giving way to winter as we move from one season to another. The fall for me is marked every year by not just the turning of the leaves but by International Animation Day. I have been celebrating and organizing IAD for ASIFA Central for the past six years. Last year we showed in 2 locations. This year was one of our most successful with showings in 7 locations: South Bend Indiana, Detroit, Allendale, Mt. Pleasant, and Grand Rapids, Michigan, St. Louis Missouri, and Rochester, Minnesota.

While this was going on throughout the midwest, I had the opportunity to travel to Xiamen China and act as a judge for the Xiamen International Animation Festival. International Animation Day happened to fall during my time in Xiamen and I had the opportunity to celebrate it with the ASIFA leadership from China.

Surprisingly, we watched few animations, much of our time was spent with a question and answer session between animators, students, visiting judges, local professors, and general public. It was amazing to be sitting in China watching films from Poland and Mexico and sharing ideas, concerns and information across cultures.

This year I took on the position of interim coordinator for the global ASIFA IAD and we are already preparing for next year's events. With the success of ASIFA Central's ANI-JAM based on this year's IAD poster I will be proposing a new ANI-JAM for 2019 potentially based on the new poster being developed in Greece by Giannis Koutsouris. Look for information about how you can participate after the first of the year.

Also launching after the first of the year will be our new updated website for ASIFA Central. Look for an announcement early in January about the relaunch.

While I was in Xiamen celebrating International Animation Day I was struck by how connected I felt to all these people for whom I couldn't even speak their language. We were gathered for our love of animation. Animators are the storytellers, the communicators of ideas and emotions. We inspire, and move people young or old, rich or poor from all ethnicities. Around the world, the pursuit of animation is an opportunity for our many voices to be visually expressed. I am excited about how we at ASIFA Central are sharing our vision with the rest of the world. My thanks to all of you for contributing and making our community possible.

***ASIFA Central Retreat - Floating in the Lip Synch* - Jim Middleton**
The Retreat Date, encoded: 81118, or as it appears upside-down, 81118
Regardless, it was August 11, 2018.

On the moon
Marooned baboons
Consume balloons
To make cartoons"

Repeat after me, "On the moon, marooned baboons consume balloons to make cartoons." These words became a part of the ASIFA Central DNA during the first day of its August Retreat of 2018. The artists-in-their-new residence gathered in triumphant triumvirates to dissect and digest Dragonframe at the Grand Rapids Community Media Center. Each team was given the magic lunar incantation and all the resources and carbohydrates necessary to complete their mission.

Snowball iCE microphonetics captured the aural moment, and everyone had until lunch to wrap up their respective contributions for an afternoon showing. Some cut it close, some just skipped lunch. Some may still be there, pondering the meaning of marooned baboons.

After the consequences of undiluted animatistic activity, came the lively stepping of seeking undiluted technical difficulties, because as we all know, there is a war amid computers to prove which system is the most loaded with obsequious convolutions (that last phrase appeared in your humble typist's head following some general anesthesia, and it demanded inclusion somewhere in print. That somewhere is here. The humble typist apologizes).

In a darkened, hushed, expectant micro cinema, the "marooned baboons" came to life, the ASIFA Central anijam was premiered in its IAD format, and then came some "open mike" screenings:

Jim Middleton shared scar tissue from his Photoshop-centric Anijammery process, one he has promised himself to never attempt again.

Chris DeWitt discussed animation history and theory, with a theme of common growth in the process.

Dylan Shay went positively pickles with his "dirty farm animals" using TV Paint and an emphasis on hitting deadlines and completing the workflow.

Chris Sagovac brought out strips of blank 16mm film and dared the attendants to get all inky on them, with enhancements from 1980s era press-on letters (with Bombay

India Ink being all that and a bag of chips, I can tell you!) for an upcoming analog experience he is working on. This is the first mail-order animation, and Blue Cross doesn't cover the copays.

Mack Mayo shared a six week project with a nod to Napoleon Dynamite and Sweetwater Sound.

Lindsay Moore of CMU modestly shared her delicate watercolor abstractions, animated to accompany a soundtrack she also wrote and performed.

And to round things up, Steve Leeper shared his process within Photoshop to create sequential animation cut from rectangular snips of a 1920 x 1080 size abstraction he created. The file size was immense, but with very satisfying results (this could be a group tutorial in itself).

The final keyframe was a nearly complete presentation of the Ottawa '18 showreel. The snoozing gremlins returned to wreck plans with their diabolical sabotage (gremlins...oh murder).

Nothing remained but to plan for the Sunday picnic, the three-legged races, the official falling cake ceremony, and a shared discussion of essential animation library basics, and whether cheese or humus makes for a better dip with nacho chips. It will take a few more picnics to reach a consensus on that controversy.

72 frames from each contributor created this Jam Session for ASIFA Central's tribute to the IAD 2018

The Amazing Storyboarding Notebook - It Practically Tells its Own Story

Steve Leeper, now guiding the expanding animation program at Central Michigan University, premiered his storyboarding notebook at the August retreat as well - a template aligns the image, the binder stores the ideas, and it's very analog and very portable! It was put to immediate use during the lip synch exercise. Holy Maroon baboons, Batman, it came with its own mechanical pencil!

Notes from Canada - Another Festival Experience - Charles Wilson

There are a lot of great festivals in Ontario, like the Ottawa International Animation Festival, the Toronto International Film Festival, and even the Montreal Stop Motion Festival in neighboring Quebec. However, there are also some smaller festivals out there in Canada that are worth a look. For example: the Toronto Animation Arts Festival International, where I spent the first weekend in November.

The Toronto Animation Arts Festival International will always hold a special place in my heart.

Back in 2014, after seventeen years of monthly payments, I had finally paid off my student loans. And as I wanted to do something special in order to celebrate my newfound financial freedom, and since I had been previously invited to TAAFI by friend and fellow animator Ben McAvoy (one of the co-founders of TAAFI), forty-eight hours after sending in that final payment and seeing that "\$0.00" balance on my account, I found a cheap hotel, bought my festival pass, and high-tailed it to Canada yelling "Freedom" at the top of my lungs as I crossed the border.

Four years ago, TAAFI was a weekend event filled with presentations from industry insiders, short film screenings (and the occasional feature), a robust artists alley where students and professionals sold their art, a relaxed figure drawing arena where you could hang out and draw models, and the ever entertaining Nelvana bouncing ball party on Saturday night -- where I first saw the Cybertronic Spree.

This year was different. As I encountered Ben in the Corus building down by the harbor on Saturday morning, he stated that the responses which they had been receiving indicated there was so much to see and do at TAAFI that it was becoming a little challenging for attendees. If you wanted to see a film screening, it meant that you would miss out on one, or more, of the industry insider presentations (and vice versa). So this year, the leadership of TAAFI decided to test out an idea: break the festival into two dates and hold them several months apart.

The iconic CN tower identifies Toronto

This worked out well for me as the first weekend of November was the newly christened "TAAFI Industry Animation Conference" filled to the brim with the industry presentations I love so much. And as always, TAAFI did not disappoint!

The opening keynote was headlined by none other than Fred Siebert who delighted us with stories about how he fell into a career in animation almost by accident. My schedule then followed with a presentation from Jessica Borutski and Dan Haskett, all dealing with the challenges of character design. For those who don't know, Jessica is the Canadian animator whose work includes Ren and Stimpy, the Looney Tunes, and Bunnica. And you may know Dan Haskett from his character designs seen in this little arthouse film produced by Disney called 'The Little Mermaid'. Yes, Dan was the man who did the initial designs for Ariel, Sebastian, and Ursula. And Belle for Beauty and the Beast.

Jessica Borutski and Dan Haskett from Friday's Character Design discussion with Barry Sanders moderating

Linda Siemensky, Jen Oxley, Austen Payne, and Michelle Melanson

Saturday was also filled with presentations about the state of the Canadian animation industry which left me interested in checking out the web series 'Gary and his Demons' and the show hilariously named 'Captain Canuck' -- both darkly humorous looks at the horror and superhero genres respectively. Fun fact: The Canadian comic book industry imploded shortly after World War II due to the lifting of trade restrictions and the imposition of censorship. So when "Captain Canuck" debuted in 1975, it became 'the first successful Canadian comic book' since 1947, according to Wikipedia anyways.

The last presentation for the day was "The Big Pitch". Moderated by animation director Barry Sanders, two teams presented their ideas for animated shows to a jury consisting of Jessica Borutski, Jen Oxley, and Linda Siemensky. The winner was Hamin Yang, a scriptwriter who was working on a pilot for his show idea. For those interested, Hamin's show is about an aging movie star who wants to

be in the reboot of the show that launched his now flagging career. But in his misguided quest for a treatment that would make him young again, he ends up becoming a white man trapped in a young Chinese man's body. The rest of Yang's pilot was a funny and touching series of events as the main character learned the trials and tribulations of navigating Hollywood as an Asian. Hamin Yang filled his time telling stories relating frustrations with Asian stereotypes, dealing with the hypocrisy in PC culture, and the problems of trying to find an Asian woman who is interested in dating an Asian man -- most of which made it into the animated clips seen in his self-financed pilot. Afterwards, I had to congratulate him and thank him for pitching a show that I found immediately relatable given that part of my extended family is Vietnamese.

My Saturday ended early as I skipped the annual Bouncing Ball party -- was fighting a sore throat so figured a couple extra hours of sleep would do me some good.

Sunday began on a very strong note as, for two-and-a-half hours, Dan Haskett detailed his career in animation working on such varied properties as the Little Mermaid, Alvin and the Chipmunks, Looney Tunes, Raggedy Ann & Andy: A Musical Adventure, and the Simpsons, among others. Soft spoken and engaging, Dan punctuated his presentation by drawing characters under the camera and gifting students and professionals alike advice from his forty-two years of life spent working in animated film.

Next, TAAFI brought Michelle Melanson, Jen Oxley, and Austen Payne to the stage for a discussion on women working in the field of animation ably moderated by Linda Siemensky. Austen, the youngest of the group, talked about facing the challenges of breaking into the industry as a young woman. The more mature Michelle and Jen discussed the work/life balance especially when you want to have a family but still maintain a career. All the while, Linda would interject stories about what the American animation industry was like for women ranging from the 1980's to the present day.

The rest of the day was a blur as attendees shuffled from one lecture hall to the other in order to hear about building an animation career in the Canadian market and working (and surviving) as an independent animator.

When I left Toronto for my five hour drive back to Michigan, I was already constructing plans for making the drive back in February for TAAFI part two: the animation screenings.

Dan Haskett discussing his animated career

International ASIFA - Compai! Cheers! Domo Arigato Gozaimasu! Thank you!
Some notes from the Hiroshima International Animation Festival 2018 - Deanna Morse

This year marked the 17th International Animation Festival, held in Hiroshima, Japan at the end of August. Founded in 1985 by husband and wife animators Renzo and Sayoko Kinoshita, the festival runs every two years, with the theme Love and Peace. It is one of a very few festivals sanctioned by ASIFA. This honor comes from the way the festival is organized, honoring filmmakers and animation art.

I have had the honor of attending every festival since 1998, when I served on the selection committee viewing 1127 entries and selecting only 64 for competition. This year, they screened 2,842 entries, with only 75 selected for competition. It is a very competitive festival!

However, some of the films are in other programs, too – Student Programs, Animation from the World, Animation for Children, Animations for Peace. And the Animation Workshop Group Premiere! ASIFA/Central was represented with our children's film under the theme "A Funny Story." There are three screening halls with programs all day, each day.

In addition, there are more informal ways to connect with others. There is the annual picnic, hands on activities, art exhibits, a school exhibition area, two meeting rooms for behind the scenes talks with filmmakers. There are DVD and book sales, and snacks. There is a Seven Eleven store right across the street.

The festival mascot is a sort of a white seal like character, with a big red nose, called Lappy, and the local Lappy club organizes some cultural activities – visit a temple, have a tea ceremony, tour the Peace Park, how to wear a kimono. The last night, a young Estonia animator proudly wore his kimono to the bar after party, held at the tex-mex bar across the street. It is a bustling festival, with much to do. Lappy made several on stage and lobby appearances, and that ballooned up mascot can dance! There is always something happening. The main lobby had a great seating area for meet and greet.

Lappy and a full moon!

Deanna with festival volunteers

Oh, and this year, there was the ASIFA General Assembly, held every three years, and we had preparatory board meetings and executive board meetings.

And, of course, the traditional parties. The rooftop party, the ASIFA Japan party, and the elegantly catered opening and closing receptions. You won't go hungry at this festival.

All of this based just steps away from the Hiroshima Peace Park, such a profound and beautiful memorial of war and destruction. It is hot and muggy outside in August, and the cicadas are in concert. But in the air-conditioned festival hall, the warmth comes from the friendships and the connections with other animators.

Next festival is August 2020. Put it on your calendars. You will be so welcomed there. It is a bucket list festival, well worth the long flight to go there.

Potential CMCFunding Disaster

The date has passed for public comments, but it is important that we are all aware that, even with a slight tilt to governmental direction in November, there remain many things being manipulated to tighten access and release of information. Here are some excerpts from a letter recently sent to Gretchen Vinnedge, Education Director for the CMC, who has always been open to hosting activities for ASIFA Central.

Jim Middleton, ASIFA Central Secretary

We here at Community Media Center want to let you know about a threat to the organization's funding that is on the verge of being implemented.

A proposed policy change from the Federal Communications Commission (FCC) could have the effect of eliminating a primary source of funding for Community Media Center. That threatened funding is referred to as "franchise fees," and pays for the Public and Education cable television channels operated by CMC's GRTV. These channels are free speech platforms and exist for providing a place for the voices of our community.

Here are some of the details:

The proposed FCC policy would significantly change the structure in place for "franchise fees" – a structure that has been in place since the 1980s. The change would allow cable companies to essentially charge local municipalities for access to historically "in-kind" resources such as cable channels, I-net services, and access to the system to deliver content over these channels.

These in-kind resources are part of the public service obligation of cable companies for the ability to use public land to run their cable and fiber network for profit.

The ability for a cable company to charge municipalities for these in-kind services would cost our local governments millions of dollars. Local governments would be forced to choose between supporting community media or the millions of dollars of lost revenue.

This policy could eliminate the free access that community media centers provide to people to create their own media and broadcast it over the cable system. You could lose government transparency provided through televised local government meetings. This policy change could reduce your access to diverse information, the arts, and local voices in media. One of our most powerful and democratic community resources could be lost.

This is a historic decision-making process and today is the deadline for you to comment with your concerns.

CMC is working diligently to protect this community-benefit funding, and will continue to protect free speech platforms. With your help, we are here to do the vital work of "Building Community Through Media." Linda Gallesch, Executive Director, Community Media Center

The Very Late ASIFA Central Autumn Newsletter - typist, edit, technical difficulties and errors by Jim Middleton, ASIFA Central Secretary (jim.middletonrx@gmail.com)
Contributors - Brad Yarhouse, Chuck Wilson, Deanna Morse, Gretchen Vinnedge, Gary Schwartz

Newsletter for April 2019

Welcome to ASIFA Central! We are the midwest chapter of ASIFA, the oldest organization of animators in the world. Our chapter was established in 1975.

While our community is separated by our far-flung geography, we are united by our love of animation. Our diverse membership is made of independent animators, animation artists, professors, seasoned pros, students, and fans of the art of animation. We have a robust board working on a number of initiatives for 2019 including Ani-Jam's, Bi-monthly get-togethers, and an annual midwest retreat. ***The retreat this year is being hosted at Webster University in St. Louis MO, July 20-21, 2019.*** I hope you can join us in workshops, viewings, a symposium, and food! For up to date information follow us on our active Facebook page.

The Next AniJamination Project from ASIFA Central

Never wavering from a challenge, the intrepid membership of ASIFA Central has taken on the upcoming International Day of Animation poster (#18 in a series, collect the set!) as its subject of its next group project. Shy of a dozen participants, some doubling up, some doubling over, all leaning ahead in anticipation of the outcome, the design by Giannis Koutsouris is a mission from the muses. Brad Yarhouse has built a 3D template as the guide for this animated endeavor. Let the caffeine and creative endeavor. Let the caffeine and creative juices flow!

Speaking of which...

About the Poster Designer, Giannis Koutsouris

Robert Swieringa

With eye-popping, swirling color, Giannis Koutsouris's poster for 2019's International Animation Day celebrates the spirit of the unknown, as tubes and spouts from the earth provide for free-flights of our imagination.

As a child, Giannis was intrigued by the wells in the home courtyards, "the holes that derived from the earth's depths," inspiring feelings of awe and questions about the underworld of the earth. With the pumping of water, the many types of extractions we pull from the earth, and the machinery needed for it all, Giannis questioned the survival of the Earth for the future.

Giannis' path to animation, from small village in the countryside to founding (along with Nassos Mirmiridis) *Kounoupi Animation* production company in the 1970s, based in Athens.

At five, he saw the Disney animated film *Peter Pan* and was impressed by the images. Learning that it was made by a series of sketches, he decided to become an animator himself.

His output has included animated commercials, short animated films for festivals, sculpting, and illustrating children's books.

The Earth, with its wells of imagination, the depths of its unknown inspire Giannis. He believes that animation will continue to fascinate audiences, especially with the personal imperfections of traditional techniques creating new aesthetics, meanings, and feelings.

(For more fascinating variations on a theme of entomology, see Giannis' Facebook page - www.facebook.com/profile.php?id=100011067482742)

Tumo Center for Creative Technology - Armenia Needs Animators!

Gary Schwartz wishes to remind all world travelers (or those collecting passport stamps) that the Tumo Center for Creative Technology wants you! Gary wants to jam the country with his friends. If you have two or more weeks to spare, they provide translators and eager students. Bring a caravan to Yerevan! Check out their website for details. (<https://tumo.org/en/whatistumo/>)

Chuck Wilson - Women in Animation - Pilar Newton-Katz

Chuck's ongoing series of women in animation continues with a profile of Pilar Newton-Katz on his Smudge Animation blog. If you have ever had the pure pleasure of meeting her, you quickly appreciate his comment that *Pilar is one of those bundles of positive energy who seems to be guided by the philosophy that "every stranger is a friend I haven't made yet."* The complete interview, punctuated with generous clips from her animation work, is located at:

<http://smudgeanimation.blogspot.com/2019/03/women-of-animated-film-pilar-newton-katz.html>

Lest We Forget:

Eadweard Muybridge took the concept of persistence of vision one step further through the photographic process in 1878.

He was born in 1830, when Jackson was president, and died in 1904, when Teddy Roosevelt was busting monopolies and pushing for the FDA. He saw a lot in his 74 years, and helped illustrators see a whole lot more. His birthday was April 9.

Larry Cudney Larson (January 24, 1946 - March 22, 2019)

The cold, crisp efficiency of a funeral announcement presents the bare facts that bracket and populate a life - the birth, the jobs, the death, the survivors - and leave it to others to polish the patina for meaning and understanding about what it means to be alive.

Larry Larson, the animator, the musician, the instructor, shared 73 years within this blink of infinity, among so many he guided to see themselves from within, that they may marvel at the hidden spark he recognized in them.

His instruction passed through Detroit's CCS for 15 years, his music through 30 years with the Gaelic League. His silent masses moved frame by frame and populated films of the 1980s.

By the time this appears, his service will have already taken place, but those who crossed his path have been generous with their impressions:

Larry told me once, "Don't forget your love." I was in an intensely dark space when he said that to me quietly at the Gaelic League one night- a moment where he could sense the deep pain I was hiding. It shot a light into my life. Those words gave me something to hold onto in the following year during my most awful days, and I think about those words often. - Sami Kerwin

In our younger days we collaborated on several projects, among them the stop-motion animated films BARRINGTON BUNNY and CAN YOU FEEL THE SPIRIT, a television PSA celebrating Detroit's 275th birthday that featured an animated Spirit of Detroit statue coming to life to help inspire the city's residents. In addition to being a good friend, Larry was a gifted animator and an inspiring teacher. He will be terribly missed by friends, colleagues and current and former students. - Harvey Ovshinsky

The Motor City music community was rocked by the passing of a real and true legend, Larry Larson. If you've ever been to an Irish pub in Detroit, Dearborn, or elsewhere in town, if you looked up and saw a man smiling in a floppy hat, that was Larry. A more hospitable, more talented man, you'll never meet. - Joe Kidd

2019 - The Year of PUBLIC DOMAIN

Jim Middleton

If the current copyright laws had been in place back in 1928, much of the music behind *Steamboat Willie, Jr.* would likely have been unavailable to a frustrated Walt Disney trying to forge ahead with his first sound Mickey Mouse cartoon. For the past 20 years, access to material that should have entered the public domain has been an equally frustrating challenge. Want to sing a popular torch song from the 1920s? Open your wallet. Want to use a clip from a Chaplin film? Get a lawyer. This year, however, the first copyright thaw began in earnest, and so far, there have not been efforts to squash access by the uberCorp cops.

The magic year is 1923. And next year, the magic year will be 1924. And onwards.

This seems like a big "so what?" to include a bit from "Who's Sorry Now?" in a soundtrack, but you can do it. You can have your characters sing, "Yes! We Have No Bananas!" And next year, you can luxuriate in variations on "Rhapsody in Blue." You're itching to have some of Chaplin's "A Woman of Paris" run in the background of a

period movie theatre? Have at it!

Of course there are caveats. The material is public domain - but the *performance* is not necessarily public domain. That means you can freely copy your personal print of Harold Lloyd in *Safety Last*, but you'd better not use the soundtrack that was added on later.

It does get a bit complicated, but there are resources. Duke University School of Law has created a website with access to a lovely spreadsheet showing what is certainly up for grabs and what is *very likely* up for grabs....

<https://law.duke.edu/cspd/publicdomainday/2019/>

So, feeling itchy to edit your own version of the silent DeMille *Ten Commandments*, perhaps with some colorization beyond the two-strip Technicolor pieces? Go to it! And put on a 1923 recording of "Yes! We Have No Bananas" as the Red Sea parts in all its jiggling Jello splendor!

<https://publicdomainreview.org/internet-archive/> and <http://archive.org> - a monster of public domain material, certain to be growing by Douglas Fairbanks-style leaps and bounds. And speaking of Douglas Fairbanks, *Robin Hood* is in the public domain now.

Want to be creative with cylinder recordings? Hit the USCB Cylinder recording archive. Scratchy, sure, but the material 1923 and before are yours. And there is a *lot* of material. Edison and Columbia recorded *everything*.
<http://cylinders.library.ucsb.edu>

Have a long production schedule? Well, "Someone to Watch Over Me," and "Maybe" from the Gershwin Musical *Oh Kay!* will be available in 2022. Just bide your time...And as far as "Rhapsody in Blue" is concerned, the composition is in the public domain next year, and there was a recorded performance in 1924 as well.

I'll be providing more examples in upcoming newsletters, and our website will have links or mp3 versions of sound clips as time (and, especially, my learning curve) permits.

Deanna Morse Takes Ann Arbor by Storm! Or by YouTube!

"Let's Watch with the Ann Arbor Film Festival" - Deanna gets interviewed about nature! Animals! Animation! Monkey's T-Shirt! The link is at the ASIFA Central FB page, or here it is for linkage fans:

<https://youtu.be/BEm-Fy4mLck>

Julie Goldstein - Virtual Memory

Julie has been earning kudos! Accolades! Media exposure! Monster hits on YouTube. Better still, *Virtual Memory* is an official selection for the Los Angeles Short Film Festival, Independent Shorts Awards, *and* was honored with the Silver Award for Best Director (Female) *and* the Bronze Award for Editing. *Virtual Memory* is a multilayered visual survey of what baby boomers certainly feel the 50s and 60s looked like.

As we approach the end of analog television in 2009, and enter a new era in the evolution of digital media, our experience of images and information becomes increasingly intangible. One part history and one part poetry, Virtual Memory is a meditation on the essence of mechanical image-making and its impact on human consciousness, from the physical process of photography and film, to the alternate universe created by computers and virtual reality. Using a compilation of found material, the film bids a kind of fond farewell to the 20th century.

Have ASIFA Central News? Photos? Shameless self promotion? Any recipe that makes cauliflower pizza not taste so cauliflowery? Email jim.middletonrx@gmail.com and he'll make a mess of reporting it. Honest. It's what he does. Till next time!

REMEMBER - SUMMER RETREAT AT WEBSTER UNIVERSITY, St. Louis MO July 20-21, 2019 - Details to follow!!!

Newsletter for Summer, 2019

"Webster U is a great host - film at 11"

Welcome to ASIFA Central! We are the midwest chapter of ASIFA, the oldest organization of animators in the world. Our chapter was established in 1975. While our community is separated by our far-flung geography, we are united by our love of animation. Our diverse membership is made of independent animators, animation artists, professors, seasoned pros, students, and fans of the art of animation. We have a robust board working on a number of initiatives for 2019 including Ani-Jam's, Bi-monthly get-togethers, and an annual midwest retreat.

R. Brad Yarhouse President ASIFA Central USA

W. Brad Yarhouse, for IAD 2019 AniJam

ASIFA Central Board (but never bored)

President and IAD World Traveler -
Brad Yarhouse

Secretary of Confused Distractions
and Cracked Fonts - *Jim Middleton*

Coordinator for Membership and
Technological Phenomena - *Charles Wilson*

Treasurer and International ASIFA
Star of Stage, Screen, and Free
Range Chickens - *Deanna Morse*

Convergence Coordinator - *Gary Schwartz*

Update on the ASIFA Central IAD AniJam!

Andrew Zesiger

Robert Swieringa

Alexis Kole

Chuck Wilson

Through the spring of this year, ASIFA Central members contributed to a buggy sequential series of clips based on the 2019 IAD poster by graphic artist Giannis Koutsouris, with support from Anastasia Dimitra and *ASIFA Hellas*. Animators included Brad Yarhouse, Jim Middleton, Andrew Zesiger, Dylan Shay, Robert Swieringa, Julie Goldstein, Alexis Kole, Chuck Wilson, and Joshua Harrell. Brad Yarhouse provided the templates for each three-second piece and assembled the whole project, introducing a sound design layered atop a unique rendition of "Flight of the Bumblebee" discovered by Julie Goldstein. The final production incorporated multiple techniques, using antiquated Flash programs and more contemporary 2D and 3D software, stop-motion cutouts, watercolor techniques, and a few well-placed paper cuts.

(The IAD commemorates the premiere of Emile Reynaud's "Theatre Optique" in Paris, on the 28th of October 1892. His projected hand-drawn image performances predated the filmed "actualities" of the Lumiere brothers by three years.)

Meet Me In St. Louis, Louie....

Intrepid - inspired - and with the weather approaching 115 degrees, perhaps somewhat insane!

They flew, they drove, they drew, they strove, they sat in the stove of Webster University for a summer retreat, these seekers of techniques, styles, and some non-sticky BBQ and delicious Mexican food..

Because of host with the most Chris Sagovac, the ASIFA cake was not upended, nobody's eyes were put out in the inking of raw celluloid, and everyone did animation yoga with a 7th hour stretch. Steve Leeper conducted two workshops using his abstract film creation techniques in Photoshop. No puppets were harmed in the meat-puppetry exercise, and only one wizard was lost, last seen heading toward Kansas in his hot-air balloon.

Draw on memory, draw on film...draw! Draw! DRAW, dawgunya!

Excerpt from the Blog of Sir Charles of Wilson

Remembering Suzan Pitt - As you longtime readers of my blog know, every March I post interviews and little tidbits of history about women animators. Well, it pains me to report this, but I have just learned that veteran animator and instructor Suzan Pitt passed away this weekend at her home in New Mexico. For those who are unfamiliar with Suzan's work, I recommend watching the video, 'Persistence of Vision,' created by Blue and Laura Kraning.

Four of Suzan's films can be viewed on the streaming service Fandor via - https://www.fandor.com/cast_and_crew_members/suzan_pitt.

The musings of Sir Charles (Chuck) about animation can be reached at - www.smudge.biz - bookmark and reference often!

Webster College opened its air-conditioned portals to midwest ASIFA animators, students, and faculty in July.

Steve removes a smudge the old fashioned way.

Stretch up! Stretch out!

Exercise in animation - literally!

Animation for the Ear (public domain music series) - with Jim Middleton

A rich musical resource, featuring Leopold Stokowski and his acoustic recordings between 1917 and 1923 (public domain by material, public domain by performance) is available for review and download from:

https://www.stokowski.org/1917-1924_Stokowski_Acoustic_Recordings.htm

For acoustic performances (recorded through a horn to the wax blank, and not with a microphone), these are quite sophisticated and well engineered. I suspect that the unusual, comparative roundness of the sound from the strings in these selections is due to the large size of the orchestra, with the additional violins working in close synchrony. The engineers were giving it all for their attention as well, squeezing as much as possible onto the 12 inch matrices without sacrificing groove width and flexibility.

On the down side, they are all acoustic, with increased surface noise and muted fidelity.

On the plus side, they're public domain, and of the available examples, are among the best. Using some creativity with filters and speed adjustment, and you have some impressive sound beds. The selections come as mp3s, along with the date of recording, just to smear the info into the faces of youtube or FB monitors.

I have many of these 78s in my shellac-and-wax-based archive, but these already-converted recordings are a remarkable collection of some very familiar selections waiting to join your digital library. Through 1923, they include some familiar selections:

Hungarian Dances #1,5, 6, Brahms
Dance of the Blessed Spirits, from Orpheus and Eurydice, Gluck
Anitra's Dance from Peer Gynt, Greig
Midsummer Night's Dream, Scherzo, Mendelssohn
Symphony #40, 3rd movement, Mozart
Carmen, Prelude to Act 1, Changing of the Guard, The Smugglers, Bizet
Blue Danube Waltz, Strauss
Hungarian Rhapsody #2, Liszt
Largo from the New World Symphony, Dvorak
Finlandia, Sibelius
Faust, Waltz from Act II, Gounod
Dance of the Tumblers, Rimsky-Korsakov

Remember, if the recording's in these books, it's fair game!

Next year, when 1924 opens its public domain vaults, Rachmaninoff's *Piano concerto #2*, performed by Rachmaninoff, is at your service. Like the acoustic version of Gershwin's *Rhapsody in Blue* (which is another 1924 release), this first recording provides what some (including your humble typist) consider the better piano performance of the piece.

The website is of the nice, old fashioned html variety, and the links were all still connecting to mp3 versions of these recordings as of 30 July 2019. I had no problem downloading the files for my thumb drive (*formerly called*, according to my students, as a “memory stick”) of road tripping material. The site also has in-depth information on early recordings, the evolution of Stokowski’s style, and his influence throughout the acoustic and early electric era of recorded sound. Someone spent hundreds of hours putting this all together, and you can easily spend a couple of hours here, too.

Jim Middleton, for IAD 2019 Anijam

Deanna Morse Reports....We Have Jewel-Worthy ANNIVERSARIES

“And back to you, Jimbie!”

2020 is ASIFA’s 60th Anniversary
 2020 is also the 60th anniversary of the Annecy International Animation Festival,
and
 2020 will be the 75th Anniversary of the United Nations
 ASIFA/Central, founded in 1975, will be 45 years old next year!!! Wow! We persist!
 The 45th is *Sapphire*, the 60th and 75th *are both Diamonds!*

And More Rare Photos from St. Louis! *Because We CAN!*

Chris Sagovac and his magic Dr. Ph. Martin’s Bombay India Ink (now available without a prescription) along with his audio-visual mastery of 16mm brought him into the out-of-body, 11th hour experience, of electron-free projection. True prestiDIGITATION!

Genuine projection

So shy...

PFAS free!

“WE want to be WEBSTER UNIVERSITY students!”

Dazzling photography by Gary

Schwartz

Mike Long and Chris Aaron, also hidden among the smiling faces at the retreat above, were deeply involved in sending the event at Webster University to lofty heights heretofore unknown by mere mortals. Clear 16mm stock available at <https://www.christys.net/film-editing-supplies>

ASIFA Central Summer Newsletter (cc) September 2019

As usual, send any suggestions, comments, or recipes for zucchini bread, along with the usual castigations to yr hmbl typist, at jim.middletonrx@gmail.com ... This is a Summer 2019 bit of printage, even if it’s at the end of it. The next issue will include prattle and pix about IAD, Retreats in Grand Rapids, and the OLAF. Stay Tooned!

Newsletter for Winter, 2019-2020

Welcome to ASIFA Central! We are the midwest chapter of ASIFA, the oldest organization of animators in the world. Our chapter was established in 1975. While our community is separated by our far-flung geography, we are united by our love of animation. Our diverse membership is made of independent animators, animation artists, professors, seasoned pros, students, and fans of the art of animation. We have a robust board working on a number of initiatives for 2020 including Ani-Jam's, Bi-monthly get-togethers, and an annual midwest retreat.

Now THAT's What I Call a MESSAGE!

A Few Words from R. Brad Yarhouse, ASIFA Central President

Dear ASIFA friends,

As I am thinking forward to next year, I want to let you know some of the great events and activities that your membership contribution provides for central U.S. chapter and ASIFA international. We are a volunteer run, 501c3 non-profit that supports the midwest of the United States with the goal to help promote progress towards peace and mutual understanding between all people as part of the *Association Internationale du Film d'Animation*. This coming year marks the 60th anniversary of our international UNESCO chartered organization!

"I will never reveal the contents of my travel mug."

This past year, members had the opportunity to animate in an internationally shown **ANI-JAM**, submit their films for showing around the world, make films together, explore techniques, and deliver papers at our annual retreat at Webster University in St. Louis. Our members organized and showed animation as part of *Site Lab* event in Grand Rapids, MI called **Project 1**. ASIFA partnered with the *Thriller Chiller Film Festival* to show *Evil Dead* with guest animator/effects guru **Tom Sullivan**. We celebrated **International Animation Day** this year with animation showings in Grand Rapids, Detroit, and St. Louis! Our chapter also launched a newly redesigned web site.

Our chapter is in the planning stages for doing a series of workshops, along with member meet and greet animation showings. Plans are already underway for our 2020 retreat—which will be announced soon (*spoiler alert - think MOTOWN*). There are many international plans in the works for the 60th anniversary of ASIFA, including the creation of a short film to represent our Central chapter in a special celebration for International Animation Day. It will be shown with other short films around the world! We even kicked off the new year with a fun Christmas Card animation party on January 3rd in Grand Rapids, MI.

My goal as president is to find ways to collaborate and spread the opportunities around our region. I would love to hear your ideas on how we can make ASIFA Central connect with you and your area of the great midwest. Please note that your membership or end of year donation is potentially a tax deductible contribution to our 501c3 depending on your local state laws.

The Best Wishes in 2020!
— Brad

MARK YOUR CALENDARS FOR SATURDAY AND SUNDAY, JULY 18-19! THE ASIFA CENTRAL SUMMER RETREAT WILL TAKE PLACE IN DETROIT!! DETAILS SOON!

Tom Sullivan in Thriller! Chiller!

The Thriller! Chiller! Film Festival has been an October Grand Rapids staple since 2006, presenting films and discussions ranging from classic horror to skewed animation. This year, ASIFA Central was able to sponsor the participation of Michigan animator and special effects artist, Tom Sullivan, just in time for the presentation of a 4K

restoration of the 16mm classic, *Evil Dead*. Tom Sullivan created the effects and new uses for oatmeal while animating the deliciously gooey experience, while the unpadded pacing of director Sam Raimi made the film feel fresh even as it approached its 40th birthday.

Tom was a ubiquitous presence at the Wealthy theater the entire evening of October 12, before, after, and during the film, discussing pre-computer techniques and the challenges of producing a masterpiece on a shoestring budget. Tom has always been generous with his time to local schools and community colleges, adding insight to film production and championing the creative spirit.

Tom Sullivan describes the best formula for fake blood - It's delicious!

Julie Goldstein and *Allegro non Troppo* - at the Muskegon Block Film Festival (press release)

Directed by Bruno Bozzetto, this film is a "gorgeous send-up of *Fantasia*" with a sly sense of humor. It features six animated shorts synchronized with six iconic classical music works, including Debussy's *Prelude to The Afternoon of a Faun*, Ravel's *Bolero*, and music by Tchaikovsky, Dvóřák, Sibelius, Stravinsky, and Vivaldi. In between each short are vignettes featuring a sleazy promoter, a bully conductor, a harried animator, and an all-female geriatric orchestra. The panelists for discussion were Andy Buelow, Executive Director of West Michigan Symphony; and Julie Goldstein, Assistant Professor and Animation Emphasis Coordinator, GVSU Film & Video Production. (And ASIFA Central member with the BEST BASEMENT!)

"It was so wonderful to have the opportunity to be interviewed on our local NPR station!" said Julie. "We talk about *Movies and Music at the Block* in Muskegon, and *Allegro non Troppo* was the first film to be shown that Wednesday night."

Craving more? Julie Goldstein, and West Michigan Symphony's Andy Beulow discuss the Italian film *Allegro non Troppo*." in this bit of creative pod castery: https://cpa.ds.npr.org/.../audio/2020/01/the_block_1-13-20.mp3

(By the way, a typist's note here - if you aren't crying after the cat's performance from "Valse Triste," you have no soul.)

A discarded Coke bottle creates an evolutionary march to

Ravel's *Bolero* in *Allegro non Troppo* (1977)

OIAF - Ottawa International Animation Festival - the reason Septembers were invented (September 24-29, 2019, anyway)

There is an ebb and flow to the animation industry. In the early 1980s, it wasn't a hot commodity to be an animator, and festivals were gatherings to swap stories about grant restrictions, doing more with less, and fretting about the projectionist scratching your only 16mm sound print. Then the success of *Roger Rabbit* and *The Little Mermaid* made animators and animation interesting (i.e., *monster profitable*), and festivals were jammed to see the latest innovation from Pixar and party with June Foray. Then *Home on the Range* and similar production saturations re-created discussions about budget restrictions, closed studios, layoffs, and worries that your codec wouldn't be compatible.

The past ten years have brought back the enthusiasm, and the OIAF experience is again a blend of electron-free styles, minimalist performances with agility trumping technology, and the sense that animation is, after all, a poetic means of self expression – and that there is no "right way" besides just diving in and doing it, with technology actually being helpful at times.

ASIFA Central member Charles Wilson, in his extensive Smudge Animation blog, <http://smudge.biz> has documented experiences attending the OIAF and other festivals, and also provides survival tips on attending a festival. His insights on that process alone are priceless. (Major hint - if you can, get a suite with a washer/dryer included - you'll be able to pack like a pro, AND you'll save time by not worrying about whether it's you or the touching film on screen bringing tears to the eyes of the audience. Bring along some detergent pods and you'll save even more time trekking around town. See the sights, not a dollar store)

Feature upon feature, short upon short, technique upon technique... and behind the scenes panel discussions from Disney, a pumpkin-slaughter fest at the picnic, and poutine. Canadian poutine. Canadian poutine and a Guinness. A Guinness record for Canadian poutine. You can get poutine in Ottawa at 4am. An evening of animation, a Guinness and poutine at 4am, followed by some ketchup potato chips. Save the digestives for the next morning (another survival tip). Don't tip the Canadian customs guards, and don't bring back more than 100ml of maple syrup. There are limits even to Canadian manners.

Because you can never get enough Canadian sodium...

images courtesy of Gary Schwartz, inveterate shutterbug, and Jim Middleton, blurred by reality

Explanation of mysteries - clockwise - Chris Robinson providing cheesecake while in repose, the need for a civilization in North America, a bird giving the audience a Chris, Ottawa's sister city in the fifth dimension (mayor Mxyzptlk), Steve Stanchfield recruiting future archivists, Thomas Renoldner accepting a Major Award-The Nelvana Grand Prize for Independent Short Animation for Don't Know What; proof that you need some stinkin' badges, Lizzy Hobbs and her signal film introduction for the festival, Kathy Rose creating magic with a sheet, projector, and amazing flexibility; and a tour bicycle with certain limitations, but with a fantastic clakkety clakkety clack sound as you ride down Rideau Street. In the center is why your humble typist did not have pumpkin pie this past Thanksgiving. A final note before being distracted by all that poutine again - the 2019 festival was channeling a lot of 1980s memories, notably with the recurrence of early computer animation styles and video games - the trend continues with finding nostalgia for Whatever Was Big 40 years earlier. Apparently we sometimes miss a time without cell phones or the internet. Hmmm.....

ASIFA International Update with Deanna Morse, Vice President, ASIFA *International* - Contact: morsed@gvsu.edu
It's already 2020, and this marks the 60th Anniversary of our international organization, ASIFA.

As you probably know, ASIFA was founded at the Annecy Animation Festival, by several important animators of the time, including Norman McLaren (who was elected as the first President) and John Halas (elected as the second President). The organization was chartered under UNESCO, with the basic goals of furthering the art of animation, fostering international communication through the art of animation, and supporting world peace.

There are a number of proposed activities ... We will definitely mark this birthday at several important international festivals. There is discussion of compiling curated animation reels that represent the themes and change of animation over the decades. A few folks are researching stickers, commemorative pins and other swag options. And, as you know, IAD is mounting a special animation challenge, creating films that express our individual cultural identities. Hats off to our President and IAD Coordinator Brad Yarhouse.

ASIFA International currently has more than 30 chapters, and also has individual members from countries where there is not a critical mass of animators in one region.

Almost all the chapters are volunteer run, although some have offices and staff.

We actually have a financial reserve that we are looking to invest in activities during this next few years. If you have ideas for projects that would benefit our international organization, please let me know.

And, if you are interested in being part of the volunteer team, please let me know and I will put you in touch with Anastasia Dimitra (Hellas, formerly Greece), the 60th Anniversary coordinator.

Happy Anniversary to us!

2019 Central Retreat in St. Louis, MO

A Reboot of Grotesqueries - Steve Stanchfield and Thunderbean Animation

Steve Stanchfield, with his unending quest for obscure and historic images, works on existing projects when not battling the labyrinthine Minotaur of Felix the Cat copyrights (whose 100th birthday should have been cause for greater celebration at Universal, but that's another tail). The fun Halloween compilation entitled *Grotesqueries* has been reworked into Blu-ray format with some added features. If you haven't already worn out your previous DVD version, it remains a whimsical delight, and it's time to upgrade!

Project-1/ASIFA Central Installation at Tanglefoot

The rebranded Grand Rapids ArtPrize afforded some timesharing between Julie Goldstein and ASIFA Central the weekend before Halloween, and the temperature was - well, let's just remember it was Michigan, after all. Nevertheless, a handful of members inhabited the frosty digs of the old Tanglefoot flypaper factory building on Grand Rapids' south side. Gretchen Vinnedge set up a Dragonframe station, Brad Yarhouse ran films to test for IAD, and Julie Goldstein presented examples of her innovations and abstractions amid an overview of historic animation. After an hour or so, representatives from Project-1 came in and closed a large delivery door, wondering how we were managing with that level of Michigan fresh air. Flypaper chemicals, Michigan frostiness - but these are ANIMATORS! Pain is a foreign concept to them. Next year - stop motion ice sculptures (they may be self-portraits!).

IAD Showings -Grand Rapids

Brad Yarhouse, already serving as curator for the international day films, also arranged the venue at Kendall College's Fed Galleries for an evening of International ASIFA films interspersed with a Swiss compilation animation. The Swiss films were linked by an overall theme of a surprise birthday party. A *meta moment* in one of the Swiss films: one neolithic creature chasing another gets a phone call and has to ring off because "I'm in the middle of an animation." Anything can happen in a cartoon, including the unexpected aggression of a machine-gun mamma of animal super heroes.

Over 40 attendees experienced IAD at the Fed Gallery, with ASIFA Central's *Anijam 19* and Gary Schwartz's *Spencer's Slightly Imperfect Peep Show* introducing the evening. Chris Sullivan's *Orbit of Minor Satellites*, Steve Leeper's production *Fireflower*, and Deanna Morse's *The Gift* added to ASIFA Central's contribution. The creator of the 2019 IAD poster, Giannis Koutsouris, was given a spotlight with one of his early 16mm works, *Line*, a European parable of fighting oppression.

Art everywhere at the Fed Gallery

NEWSFLASH!!!

"The Ann Arbor Film Festival team is pleased to announce that Gary Schwartz's film, SPENCER'S SLIGHT IMPERFECT PEEP SHOW A.K.A. MICRO-BURLESQUE, has been selected for this year's 58th AAFF, held March 24-29, 2020."

The Reason is Just a Subterfuge - Julie Goldstein has a BASEMENT

OK, Deanna came back to Michigan in November - so LET'S PARTY! We brought toys! We brought film prints! We brought nachos! We drank coffee and carbonated beverages with various levels of physiological impact. We fretted over budgets! We got lost amid the one-way streets of eastern Grand Rapids! And we watched cartoons! But most importantly, we left a trail of breadcrumbs to come back in January AND DO IT ALL AGAIN. Welcome 2020 - you don't know what is about to hit you!

Upcoming Adjustments to the Chapter's By-Laws

Every few years, the ASIFA Central board reviews its organizational by-laws and looks to make adjustments reflecting the needs and involvement of its members. 2020 is going to be one of those years. Members will be getting updates on proposed adjustments, amendments, and changes in the chapter by-laws as the board's ongoing meetings progress. Mail and electronic announcements will soon populate your inboxes!

Raymond Scott Puts Up His Hair - discovery in audio

Raymond Scott's works are very familiar to fans of Warner Brothers animation - his compositions were arranged by Carl Stalling and punctuate nearly every move in a typical Roadrunner cartoon, among many others. He was amazingly popular with his atypical rhythms and audio experiments, right in the middle of the great Depression, and influenced a lot of musicians with his style and multilayered melodies.

So this portion of my column isn't really a public domain issue, as the material is more a mid-century vintage, but a small album entitled, *Raymond Scott and His Orchestra play...*, appeared among some 10 inch LPs. I was expecting, well, a *Twilight in Turkey* or *Devil Drums* adventure. Um, not so much...

It made me recall an interview with Frank Zappa where he said he was pleased to create arrangements for his compositions that would wedge nicely into an elevator or dental experience. This early LP of Raymond Scott performing "for your listening and dancing pleasure" comes as a similar aural shock, especially from the man who brought us *Powerhouse* and *Dinner Music for a Pack of Hungry Cannibals*. He does get to include two of his own compositions (*Huckleberry Duck* and *Coming Down to Earth*), but each euphonic arrangement could have been comfortably performed by the Glenn Miller or Benny Goodman bands. I suspect he was bankrolling some of his Clavivox experiments, or just making use of his experience conducting for the "Your Hit Parade" orchestra. It was a pleasant discovery.

Animation for the Ear (public domain music discussion series) - with Jim Middleton

First of all, what does *public domain* look like, if you are dealing with early recorded material? In 2019, the magic year for PD was 1923. This year, it's do the math.... wait for it.... 1924.

It can be a bit tricky to identify a year, since early 78rpms were cluttered with patent dates and no indication of when things were recorded. However, Columbia recordings provide certain visual signals to their age. It appears that in 1917, their studios were working overtime to fill dealer shelves with classical selections. So if you see a record with the "banner label" on your right, you're looking at material from 1917 to 1922. These are acoustic recordings, so that means the fidelity is a bit "soft" (ok, absolutely archaic), but they can serve as a basis for projects - or "background" sounds.

For 1923 to 1925, Columbia used this "flag label" on the left for their recordings. Again, these are all acoustic, as the company was preparing to switch to its electric systems in 1925 under a new "Viva-Tonal" label. That material will have to wait for public domain status, but it's coming quickly....until then, thrill with the notion of *Rhapsody in Blue* being public domain.

The other thing I have noticed is the challenge in tracking down copyright pathways or possible bootlegged material, and whether such can still serve a purpose. What can be the value of public domain material performed in anonymity, sandwiched between material where licenses to perform have apparently never been procured?

Over 20 years ago, I found a four-CD set entitled *Classics for Children*, featuring music "As Performed By The World's Greatest Orchestra's" (sic). The (sic) was my first red flag. The listing of selections was my second - *The Lion King*, *Pocahontas*, *Cinderella*, *Pinocchio*, *Aladdin* were among the cover listings. The images on the cover were generic, cartoony animals, with no artist identification.

It had no booklet, no "listing of Orchestras, Soloists, and Conductors" as promised on the backside. But most tellingly, it had no mention anywhere of Disney or any licensing agreement with the Disney company. My third red flag.

The "suites" on each CD are certainly Disney material - *The Lion King Symphonic Suite*, *Beauty and the Beast Symphonic Suite*, all broken into sub-category descriptions of the songs included - *The Circle of Life*, *Whistle While You Work*, and so on.

After each "suite" are some standard public domain musical pieces - *William Tell Overture*, *Nutcracker Suite*, *Swan Lake*, *In the Hall of the Mountain King*. Nicely performed, but again, no credit to an orchestra, soloist, or conductor. And there was still that troubling apostrophe "s" on the cover for a plural of orchestra.

The discs themselves were colorfully produced and the sound balanced, but no credit to composers or mention of Disney.

There were some names mentioned on the back of the box - GSC Music, Michele Audio Corporation, Entertainment Distributing, and Jerry Ward Design. The latter two mentioned Oregon as an apparent home base. It was even assigned a catalogue number - 15245. EDI claimed © of 1996, and Michele Audio Corporation claimed a (P) of 1996.

And, so, the exploration began. Twenty three years had passed since these discs were issued, on the edge of the internet explosion. What sort of online footprint could be found?

To sum it up, extremely little about any of the parties could be uncovered. The image above is the Google location for an empty building representing the only physical address for any of the sites, and it isn't in Oregon.

Ultimately, I'm not really interested in getting access to Disney rights to their music - far from it. If, however, it can be determined that these performances of public domain symphonic pieces has been gleaned from Indian, Chinese, or Korean orchestras (none are named) or from areas that don't share copyright concerns with the rest of the planet, well, that's one nice piece from *Swan Lake* I'd love to use...

Stay tuned!

Newsletter for Springtime 2020

Welcome to ASIFA Central! We are the Midwest -US chapter of ASIFA, the oldest organization of animators in the world. Our chapter was established in 1975. While our community is separated by our far-flung geography, we are united by our love of animation. Our diverse membership is a blend of independent animators, animation artists, professors, seasoned pros, students, and fans of the art of animation. We have a robust board working on a number of initiatives for 2020 including Ani-Jam's, Bi-monthly get-togethers, and an annual retreat, set to be a virtual event in 2020!

MARK YOUR CALENDARS FOR JULY 18-19! THE ASIFA CENTRAL SUMMER RETREAT WILL TAKE PLACE ON A COMPUTER NEAR YOU! Details Soon!

While the Center for Creative Studies in Detroit had generously opened its gates to the flood of animation enthusiasts for this summer's retreat, the CoVid pandemic had other plans. Charging into a retreat had a rather antithetical sound in this environment anyway, if one were to impose a collegiate spin to the concept...but the digressions continue from this keyboard.

As a result, many other gatherings have already been presented by video conferencing (ie, the recent Ann Arbor Film Festival) this year, and many others have begun to make the conversion or have flat-out cancelled long-standing conferences and festivals.

There will be an ASIFA Central retreat in July - the board met at the end of April to brainstorm options and will be presenting its reorganized concepts soon. Technological options will help unite our diffuse membership for a truly unique experience.

Upcoming Adjustments to the Chapter's By-Laws

And not only that, but we need to conduct elections! Here is the latest word from our Membership Coordinator and Technological Phenomenon, Charles Wilson: *As we of the ASIFA Central board were reviewing our membership numbers last year and looking back to when we last held elections for officer positions, we noticed two things. The first was that there was a lot of time passing between our holding elections for officers, even though our charter specifies that we should be electing new officers every year. The second is that our charter is not in line with that of ASIFA International, whose officers are elected for three year terms. Now, while ASIFA chapters are afforded certain measure of autonomy, when we discussed the issue in light of the fact that we now have a number of members who are eligible for running for office, we made the decision to a) hold an election in 2020, and b) modify our charter so as to bring it in line with ASIFA International such that our elected officers will now be elected for a*

three-year term.

Another reason we'd like to do this is so that the officers will have the opportunity to do more long-term strategic planning, which we believe will better serve our membership. And since we're pretty much doing this already due to the fact that up until recently we didn't have enough members eligible to become officers, the changeover is going to be relatively unnoticeable to our membership.

However, in the spirit of full transparency, we wanted to bring this change to you, our members, and open the matter up for dialogue. In the upcoming months, we would like to hear from all of you what your thoughts are so we can make a decision that best fits our membership.

And for those of you who have been a member of ASIFA Central for at least one-year, you are eligible to run for an officer's position on the board. If you're interested, please download and read the ASIFA Central charter and reach out to us before the upcoming elections this Fall so that you can be listed on the ballot.

We will be discussing this matter further at our upcoming MidWest Animators Retreat, so stay tuned for more information.

International Animation Day Update - October 28, 2020

The international ASIFA animation challenge accompanying IAD will involve up to 15 ASIFA chapters, each contributing two minutes of animation to introduce and promote this year's IAD festivities. The collective films will become part of *Spiritus Mundi: Animating the World*, a title inspired by Irish poet W. B. Yeats. Each ASIFA chapter will create a piece representative of its region. The theme chosen by ASIFA Central is the "Moveable Feast," with ten contributors thus far signing on. One large table with a collection of dishes will ultimately represent the central US life and lifestyles, through use of

literal or metaphorical sounds and visuals.

Coordination of the films celebrating IAD will become another online transition, with details being finalized. The current deadline for film submissions is July 1, 2020.

Since the project aligns with the 60th anniversary of ASIFA, that theme will also be woven into the production.

And speaking of ASIFA and its anniversary –

The Illuminating Light from Regina Pessoa by Bob Swieringa

Emitting from a magical hat, the light of animation illuminates the world, celebrating International Animation Day 2020 and the 60th anniversary of ASIFA. The hat is held aloft by Abi Feijó, creator of International Animation Day and former president of ASIFA. With this image, Regina Pessoa's IAD poster draws our attention to the magic and history of animation.

Regina gets her visual inspiration from painting (which she studied before encountering animation), alternative comic books, and literature.

"I was fascinated by the possibility of adding movement to the rich visuals and textures that I was developing in painting," to blend with the arts of cinema language, sound, music, and writing. In her films she thus turned to her lived experiences or to common themes that can be universally recognized (being young, being afraid of the dark), but from her unique perspective. "I continue to explore that path, taking inspiration from my own childhood and the people around me," such as her eccentric *Tio Tomás*, whose hat Abi holds.

The poster references histories that are personal and those that may be familiar but remain in danger of fading. "I think that more than ever it is necessary to teach the history of art and animation to young generations... What paper and pencil are and the power they represent... that an abstract concept existing only in the mind/idea/imagination might be physically and materially materialized through that perfect communication/connection and domain between brain and hand/body." For Regina, the short animated film is a "precious kind of laboratory" in which boundaries of technique, narrative, and content are explored.

Highlighting this play of light and shadow, the poster encapsulates the wish expressed by Regina, "that animation can be recognized and respected by the general public as the great art form that in fact it is."

Cover for *Das Loch im Vorhang*

Adventures in (Armchair) Historical Research by Charles Wilson

One of the direct benefits of the Internet is the ability for researchers like myself to track down rare material in other countries. Not only is there a plethora of films from other countries being uploaded to sites like *YouTube* and *Vimeo*, but sites like Google Translate lower the communication barrier with their tools for translating foreign languages and in some cases, the ability to translate entire websites into English on the fly.

An example occurred earlier this year, when I was looking through my collection of works that involved Lotte Reiniger. Among the books I've located in the past were an original German copy of *Venus in Seide*, which featured Lotte's silhouette illustrations, or an old library copy of *Walking Shadows* from a bookseller in England -- *Walking Shadows* being a hardback essay written about

Lotte by Eric Walter White, one of her former assistants. This essay is particularly interesting as it gives details into Lotte's animation process – along with a few plates with images of models that she created but never used in her films.

Well, while I was looking at the short list of publications that Lotte directly worked with, one that has eluded me for years piqued my interest. A quick visit to the normal sites that sold international books, such as Abe Books or the German antiquarian who sold me *Venus in Seide*, proved fruitless. Then, for some reason, I decided to switch gears. A quick search on the German-language version of Amazon.com, and there it was: a copy of Helmuth Krüger's *Das Loch Im Vorhang* (English

translation: *The Hole in the Curtain*). It's the only other book, that I am aware of, for which Lotte created silhouette illustrations (there may be more, I'm just not aware of any other than the aforementioned two). However, purchasing from Amazon.de proved fruitless. Google Translate wouldn't work on the Amazon website, and I couldn't figure out how to a) select international shipping or b) ask the bookseller if they even would ship to America.

After thinking about it for a day, I went back to Amazon and puzzled out the bookseller's name then tracked down their website. Lo and behold, there it was, listed on their website. And while struggling to figure out the German website, I made the welcome discovery that their shopping cart *had an English-language feature*.

A month later, I had a very weathered copy of this book from 1922 sitting on my desk, and a smile across my face as I tried to translate the handwritten dedication that the author -- Helmuth Krüger -- had written to someone named Rolf.

Lotte's silhouette with Krüger's dedication

'Sumurun' illustration on page 89

The images included in this article are taken of Lotte's silhouette illustrations to give readers an idea of how detailed her work was back then. For those interested in looking at all the illustrations in this book, a copy of *Das Loch im Vorhang* was scanned and posted on the Deutsche National Bibliothek website, which is accessible at the following link:

<https://portal.dnb.de/bookviewer/view/1128443937>.

Ain't modern life grand?

Illustration from 'Flucht in die Rulissen' English translation: 'Escape to the backdrop'

Public Domain Feast for the Eyes, or "A Wave Merely Returns to the Water"

The stunning 1903, two-volume wood block book on wave designs, *Hamonshu*, is now available online.

Examples bracket the page, and the overall, the images range from baroque to surreal, to art nouveau. Each page is a visual treat.

The pdf can be downloaded through the *Public Domain Review* site at:

<https://publicdomainreview.org/collection/hamonshu-a-japanese-book-of-wave-and-ripple-designs-1903>

Fun Philately and Forbidden Films - The Song of the South - by Jim Middleton

Disney did have a special release *Song of the South!* - on postage stamps, that is, and only for the Turks and Caicos Islands, and *that* was in 1981. According to the internet, and we know that is never wrong, "Turks and Caicos is an archipelago of 40 low-lying coral islands in the Atlantic Ocean, a British Overseas Territory southeast of the Bahamas."

While generally unavailable today, and thought to be unseen for generations, *Song of the South* has been re-released to theaters

several times after its original premiere, often to coincide with milestones in its own, or corporate, history: in 1956 for its 10th anniversary, in 1972 for the 50th anniversary of Walt Disney Productions, in 1973 as the second half of a double bill with *The Aristocats* (twice in two years, and *that* split billing?), in 1980 for the 100th anniversary of Harris's Uncle Remus stories, and in 1986 for the film's own 40th anniversary – and as promotion for the *Splash Mountain* attraction at Disney theme parks.

It is interesting that you can *experience* a portion of the film, *hear* music and observe references to the film, but not really *see* the film any more. In the meantime, the entire, uncut *Song of the South* has been broadcast on European and Asian television networks (and is likely the source for any circulating video material these days in the US. The first print of it I ever saw on blurry VHS video came with Japanese subtitles).

It was between the 1980 and the 1986 releases that these stamps were licensed and printed.

See the Jim Korkis book, *Who's Afraid of The Song of the South* for details on the film you will never see on Disney +.

Deanna Morse and Organic Art with Kaylee

The CoVid lock down has not really been all that dreadful for animators and artists - in fact, animation studios are *actually hiring*. To keep the crop of artists ever growing, Deanna Morse, safe in her Oregon compound, has enlisted neighbor and niece Kaylee in the creation of budding art with regional wildflowers and paper plates. *Kids, by all means, try this at home!*

Surely some revelation is at hand;
Surely the Second Coming is at hand.
The Second Coming! Hardly are those words out
When a vast image out of Spiritus Mundi
Troubles my sight: a waste of desert sand;
A shape with lion body and the head of a man,
A gaze blank and pitiless as the sun,
Is moving its slow thighs, while all about it
Wind shadows of the indignant desert birds.

- W. B. Yeats

Festivals Continue to Move Online, Cancelling Face-to-Face Gatherings

Anne cy's 2020 festival has made its move online official, according to a report from April 15. Details and jury selections are to be revealed by mid-May. The biennial Hiroshima international animation festival (August 20-24) has opted not to hold a physical event for its 18th festival. Nonetheless, film selection will begin May 1, and the competition selections will be revealed before the start of June. Award winners will be announced at the end of August. The Ottawa International Animation Festival (OIAF) is also transforming itself into a likely online experience. Their official release states it "will happen in September. It might not look like it usually does, but maybe it will. No matter what happens, the OIAF will go forward. You can bet you'll see a lot of familiar OIAF programs and opportunities in one form or another."

The list of changes will continue to grow. If you have a film in competition, be sure to get the latest news from the specific festival website.

Zoom Becomes Our Rotogravure

With the need for online meetings, we're getting pretty savvy with our Zoom experiences. It all began with the Ann Arbor Film Festival and Gary Schwartz and Deanna Morse adapting like bosses...

Gary Schwartz rules and schools at the Ann Arbor Film Festival.

Deanna Morse keeps the conversation alive with sprightly! insightful! illuminating! observations, probing questions, also during the Ann Arbor Film Festival.

But Wait! There's MORE!!!

Brad Yarhouse and Deanna Morse reach across to France, Australia, and a half-dozen other time zones to coordinate the IAD brainstorm. Jim Middleton's camera chose not to cooperate in the exercise. We learned that "anijam" in French is still probably "anijam."

ASIFA Central's Board all joined to send the month of April packing in a full-throated farewell! Jim's camera worked, but he went with hand-written notes vs word processing (it was still quieter than using a Remington portable...)

And now, an analog, electron-free, farewell....'til the next issue!

Charging Into the 28th ASIFA Central Retreat - July 17-19, 2020, on a Computer Screen Near Practically Everyone

"It's Virtual" – by Jim Middleton and Bob Swieringa, ASIFA Central Board Members

FRIDAY, July 17:

ASIFA is now 60 years old, and the Central chapter celebrates 45 years in just a matter of months. Its summer retreat was initially intended for Detroit, but an uncontrolled virus that doesn't care about animation techniques (besides stop-motion) had other plans.

ASIFA Central President Brad Yarhouse began the evening by acknowledging the challenges of creating a Zoom-based collection of programs – and offering sincere thanks for the tech-savvy members who made it possible. He added appreciation for first-responders battling the ongoing pandemic and a moment to reflect on those we have lost to its virulence.

Deanna Morse - now an official member of the Academy of Motion Pictures Arts and Sciences – <https://www.oscars.org/news/academy-invites-819-membership> – spoke on behalf of the international chapter and future activities and offered the ceremonial dropping of the official ASIFA Central retreat cake.

Whoopsie doodle!

One thing you can say for CoVid technology - for matters such as this retreat, it certainly enhanced sign up and attendance. Generally, a well-attended, in-person gathering will bring in two to three dozen attendees. This year's retreat clocked in 97 for the weekend, and 30-45 attended the daily special events, beginning with a lively presentation by Atomic Animation director, James Suhr.

James Suhr took the screen from his California location, using experiences gathered from a vast portfolio of his own, and

provided his "28 and ½ Tips – or – How to Stop Worrying and Become a Professional Artist" (he said there were actually more, but confessed that math wasn't his best subject). From general observations to specific guidance, he offered direction to aspiring animators and storyboards, championing a well-curated and dynamic portfolio over a college degree. "Your portfolio is your resume," he stated with conviction, so show your prospective employer "what is in your bucket!" (For those getting the electronic version of this newsletter, the "28 and ½" essay is attached).

Many items on Suhr's bucket had the olfactory property of experience, especially with the reminder that even the most talented employee is still just

From <https://www.iamessuhr.com>

one part of a larger company, and ultimately (1) You are your own business, and (2) where you are is not forever. To prevent burnout, it is just as important to budget time for yourself and retain resources to feed your own business.

And speaking of the ol' factory, the refreshing mantra of, *"Be On Time, Bathe Often, and Be Easy to Work With"* should never be forgotten. As part of a larger team, co-workers should want to root for you, just as you should be appreciative for every production assistant. Production assistants circulate, and you may rediscover them often in the churning cataract of the corporate world.

Suhr encouraged fresh animators to craft themselves into better artists by studying body construction, understanding perspective and camera placement, finding the blessings of work restrictions, and deconstructing films for staging inspiration, especially with the sound turned off. Find the humor in tragedy, bounce every idea around before dismissing it, and please, please don't send around trailers for epics you can never produce ("If you want to make commercials, go into advertising.").

There is so much information to incorporate into every successful scene or sequence. "Forgive yourself. You'll have bad days." Animation can be akin to "a street fight."

And when creating thumbnails, "PULL BACK! YOU'RE IN TOO CLOSE!"

Don't be afraid of tracing other animation or motion in your pursuit of proper posing (As an example of this, your secretary uncovered an interview with Tony White, who was given the "I say" portion of Milt Kahl's Shere Khan in *The Jungle Book* as a tracing assignment from Richard Williams).

More Suhr things:

- See the website animationscreencaps.com for screen captures of Disney productions to give the feel for proper composition.
- Animation students who stream films only miss out on the old DVD "extras" that usually incorporated

James Suhr - get those pens out!

Motivational Posters, Suhr style

storyboards for the productions (Hayao Miyazaki releases generally have the entire feature storyboard as part of the DVD release). And, to the relief of many, more and more women are becoming storyboard artists.

- Building a story straight ahead can create roadblocks and write you into a corner. It is better to break things apart and see how the individual pieces work as part of the whole.
- Try an exercise - take any topic, ie. "keys," and build a 20 shot narrative about it. Imagine a night watchman checking the locks inside his building, suddenly beset with a zombie apocalypse, who races to his locked car, only to remember that he left his keys in the door where the zombies first appeared.
- Deadlines are always important, regardless of the project - you can have too much time on your hands. A deadline will get you past the brick wall of perfectionism.
- Work on many small possible failures and learn from them, rather than invest a long time on one single possible failure. It's ok to fail.
-

*And pull back from overarching concerns while working:
"Remember – why can't it be fun?"*

Fun fact: *The furthest participant in the ASIFA Central Summer Retreat was from Panama City, Panama!*

SATURDAY, July 18:

The Saturday Morning Cartoon Show - Ten minutes into the carefully programmed event by Chuck Wilson, YouTube decided to pull the program "for copyright violations" because the play list included a Mickey Mouse cartoon *already freely available* on YouTube. However, we soon discovered that starting in the playlist after The Mouse created an uninterrupted presentation. *OM triple G – Kitbull* - cue the waterworks!

(Once the play list was finished on YouTube despite itself, the next film in automatic rotation was a mini-documentary about IT'S A MAD, MAD, MAD, MAD WORLD with examples of that movie's stop motion, the last work of Willis O'Brien. Animation RULES, even in a Mad World.)

Lightning rounds - Five minute speed talks on upcoming events and techniques set the afternoon in motion

Deanna Morse - ASIFA International Update - the technical challenges of the websites and communication pipelines for ASIFA International were only complicated by the ongoing CoVid pandemic, but films are being recognized and rewarded, workshops are ongoing, and a hard copy of the ASIFA journal will continue to be alive in our mailboxes.

Christine Veras presented her research and new findings on the Zoetrope's History. She traced the origins from William George Homer's hypothetical Daedaleum to the Zoetrope's multi-patented versions in 1867, uncovering that the original patent and name of the device were first registered the United States by a young sophomore named William Ensign Lincoln. He patented and licensed the invention to the Milton Bradley Company, which

Time for some Grecian umbrage on YouTube crashes:

The rage! The cardiac tumult! Psychic disasters!
The fury of the thunder kissing bard when he perceives
His piddling opponent picking his dentures with dactyls!
Regard his orbs: how they roll; one this way, one the other!
Ah, the logotomy! Verb breasting adverb, the cristate nouns
Plunging gainst pavid pronouns! Let the bull stylistic
(Husband of cows) rise up and whirl his whiskers!
Ah the lambent raiding of verse, the (my God) tripsis
Of boant anapests leaping in lucent line
Against the skiaphagous luculent relulant
Phalanges of the foe! Yet must we bear in mind
The hepatic ingenium of the adversary, whose
Herpetic tongue knows too well how to rive
The hyaline dynamics of our arch-architect!
The Rest is SILENCE!

(The 'Croaking Chorus' from The Frogs by Aristophanes)

*Kitbull, Pixar 2020, *snif, sniff**

William George Homer,
hypothesizer of the
Daedaleum (from Christine
Veras' lightning round)

Brad Yarhouse - he provided IAD information, past and present - with upcoming deadlines for participation (the new deadline is September 1 for this year's assembly). In 2018, there were 7360 participants in the IAD, in 2019, there were 9355. Who knows what October will bring in 2020!?

Jim Middleton - Distorting Two Compositions - he used Audacity for fun with public domain music, making a Gershwin solo sound like honky-tonk and cutting a 1922 performance to only its aural frills.

Zoetropic editing! These machines could do anything but make coffee! (Image also from Christine Veras' lightning round)

was also responsible for patenting the device in the UK and France to guarantee its commercial exploitation in the international market. The details of her findings will appear in a peer-reviewed article this Fall.

Steve Leeper - he is animating on toast, crackers, toasted crackers, and we still think Kellogg should take notice -

his multiple images on toast took up to 100 minutes per sheet, and he had to develop the frames to hold the crackers, and it all justified the investment in some super expensive crackers - rice cakes nearly burned through!

Josh Harrell - The Ultimate Multiplane Setup - ASIFA Central's Ub Iwerks created his multiplane setup using 15 discarded glass panes where he teaches at Detroit's CCS, adapted a stand from IKEA, and worked through reflective glass and parallax challenges for his very deep dive into an analog technique that can track its path to the 1930s. Welcome to the 15th dimension - animation visualizes quantum mechanics!

SATURDAY AFTERNOON'S LIGHTNING ROUND PHOTO GALLERY

Steve Leeper's elegant bread toasting apparatus took up to 100 minutes to process a frame of laser etched deliciousness

For comparison, a mid-century analog toast etching effort by CBS proved disappointing and didn't animate very well (CBS Sunday Morning, 2 August 2020)

Brad Yarhouse reported record attendance and participation to IAD 2019

Josh Harrell's 15 level multiplane camera with special effects lighting in place

Jim Middleton put the tin into tin pan alley by altering the Gershwin solo in Rhapsody in Blue, a 1924 composition now in the public domain

*Meet and Greet*s via Zoom followed, with reacquainted faces and scattered stories, finding alternates to expensive digital tablets and screens, and the benefits and use of Open Toonz, Krita, and Blender software. This was another Zoom experience, and the process was becoming nearly second nature by this time. Logged in participants were divided into smaller groups for –

Then the Break-Out Workshops – with Nearly Instantaneous Show-and-Tell

Zoom Pixilation - *or* - **ANIMATING CONNECTIONS ACROSS SOCIAL DISTANCES**- orchestrated by Steve Leeper and Christine Veras, a lively series of spontaneous frames were paced by a percussive soundtrack. The final Zoom Pixilation Animation is available on Vimeo : <https://vimeo.com/440136518>

Here's a peek:

Stop motion cutouts - coordinated by Chris Sagovac - "What do animators want? Time!" A CoVid pandemic helped provide that this year... Deanna noted that the recurring theme in this workshop of paper dolls was apparently "Off With Their Heads!"

The Premiere of the IAD 2020 ASIFA Central Anijam

- An ongoing project since this spring, the anijam had its two minute showing, and it was a hit! Random voices extolled, "It was nice to see it all together - we've only seen bits of it before - it's like watching a new film."

The final version will join the IAD celebration in October.

Christine Veras was also able to demonstrate her invention, the silhouette zoetrope, complete with a turntable powered by a manual mechanism, much like very early phonograph. The insect cut-outs were on the outside of the eight slit cylinder, giving a final hypnotic effect of floating butterflies! An earlier version was a finalist for *Best Illusion of the Year* in 2016 and can be seen at –

<http://illusionoftheyear.com/2016/06/silhouette-zoetrope>

Saturday, July 18, 7:30pm - Nina Paley and Seder-Masochism

A father-daughter heart-to-heart

After a quick and quixotic introduction, independent animator, cartoonist, and producer Nina Paley directed President Yarhouse to *Pull The String!* and *Seder Masochism* began its 80 minute ASIFA Central Zoom premiere performance, followed by an extensive Q and A session moderated by Julie Goldstein.

The incorporation of interviews with her late father, appearing here as "God" lent a poignancy to her unblinking look at Exodus and the rituals of the Passover Seder. Where her previous feature, *Sita Sings the Blues*, took on copyright issues at great personal expense, she said this time there was absolutely *no* intent to obtain permission for any of the songs used, including one from a local Urbana band who would have gladly given it. By going without a distributor, Paley's viewer ship increased ten fold; and, by freely sharing, she finds that her contribution-based income exceeds the comparative pittance handed down from a distributor.

Nina Paley encourages safe animation

Paley was very direct about her challenges with the film - "I couldn't relate to Moses," she explained, finding a closer relation to the Merlin

Stone book, *When God Was A Woman* (available used from many online sources). The film's theme of the "goddess goes underground" didn't emerge until late in her production, but the Passover story had already become a main portion of the film by then.

Paley's current, comparatively simple lifestyle in Illinois allows her time with her mother and permits her to "make art because it's healthy for me."

Her current project, based on Armageddon (the biblical account, not the 1998 film with Bruce Willis) and called *Apocalypse*, will likely be a short film (however, it should be noted, that both *Sita* and *Seder* began as short films).

Chris Sullivan, set to discuss his *Orbits of Minor Planets* on Sunday, made the point that Nina Paley has inspired other animators through her creation of a truly unique animation style.

Much of *Seder* was created in Flash, but a significant portion was

built using Moho animation, a descendant of

Anime Studio with a steeper learning curve.

Palegraylabs.com is Paley's merchandising site featuring her current fascination with embroidery and embroiderment - and a few matzoh covers are left!

The earlier YouTube challenge with the Saturday morning cartoons prompted *Seder* to be run through the Yarhouse computer complex onto Zoom, which worked out very well - there were some bumps in the sound, and an occasional appearance of the video control panel, but overall, it felt true to a theatrical viewing, even if it was on a computer screen. The popcorn was *fantastic!*

An apocalyptic vision by Nina Paley, probably not part of the film, and not used with permission.

SUNDAY, July 19: Noon-1pm -

The Meeting of the Board, but Never Bored

In his patient effort to herd kittens, Chuck Wilson created a special Zoom presence for ASIFA board members at noon.

Yes, the board is that adorable

In a win for whimsy, directions for proper handling of telegram and pony express announcements will remain part of the by-laws.

In a win for efficiency, board members will serve three year staggered terms, committees will be ad hoc and not permanent, gender neutral pronouns will now be a part of the by-law environment.

Still another Fun Fact: Synonyms for *ad hoc* include ad-lib, down and dirty, extemporaneous, extemporary, extempore, impromptu, improvisational, improvised, off-the-cuff, offhand, offhanded, snap, spur-of-the-moment, unplanned, or unpremeditated (not unpremedicated, that's something entirely different)

Sunday, 1-2 pm - A Roundtable Discussion on Remote Production Pipelines
The challenge! The angst! The need for stronger

coffee at 1pm! Thirty attendees squeezed into the compressed Zoom screen to discuss the challenges of:

- Hybrid classes - The short answer to "How?" is "50:50." The long answer is "I don't know." A thought experiment: Should a student move to another state to stay in a dorm in order to take one on-site class?
- Run half-sized classes, clean and sanitize everything in-between sessions?

Gary Schwartz keeping the communication pipeline open

- How to address the time zone challenges of at-distance students
- If all remote - the challenge of on-site licensed software access
- Some software licenses (ie, *ToonBoom*) are being extended by their respective managers
- The spectre of students *Ghosting* - and how to pull information from them and keep communication channels open, with the consideration for the amount of effort that entails

"We're perceived to have authority we don't really have."

2-2:30 - Public Domain Music Update - A Jim Middleton Babble-On

The big question from the presentation was: just how do you make MIDIs out of mp3s? (Answer: we still don't know - a priest may have to be summoned.)

1924 is now the magic year for material entering into the public domain. However, for music, that represents the composition, not the performance, and even if the performance is from 1924, if it's a reissue, or not in your possession, it could be litigated on a state-by-state basis. SO, you can now perform *Rhapsody in Blue*, for example, but you cannot use a 1980 production of it. And even if it's a reissued 1924 recording (near the end of the acoustic era of production), whoever may have released it would still hold the rights to *that* particular "performance" (ie, as a "stereo enhancement" or with "static removed").

In 2021, material from 1925 enters into the public domain - that includes *Always* by Irving Berlin, the *broadway* script to the Marx Brothers' musical *The Cocoanuts*, and material recorded electrically (via microphone) which tends to be of greater interest to corporate copyright lawyers. By 2024, the first films featuring Mickey Mouse fall under that category, but again, only if you have an early print to work from - every subsequent Disney iteration or reissue contains within it some "enhancement" that creates a new performance with a new copyright starting point.

In short, there are a lot of opportunities, but be careful, and when it comes to music, appreciate the 19th century composers and their more obscure performances.

A noisy studio

Not a turntable, but Jim wants to build one someday, because one cannot have too much electrostatic cling.

Sites of possible interest for further Public Domain information:

archive.org, - but beware, much of their material has not been vetted

UCSB Cylinder Audio Archive -
<http://cylinders.eks.dld.library.ucsb.edu/>,
1890-1925 material, but they charge a fee for commercial use of their material

The Duke University Law School
web.law.duke.edu/cspd/publicdomainday/2020
(or, just Google "Public Domain Day") keeps the latest on copyright law available, along with listings of what is up for grabs.

Nauck's Vintage Record Auction - 78rpm.com
(rare, mostly PD recordings in mp3 format from their Dismuke radio broadcasts). Nauck's sample show discs #39 - 67 each contain 7-14 hours of programming, with tons of information and obscure background on historic speeches, popular jazz, and even mysterious hillbilly issues from the early 1930s that auction out at \$500-\$1000. However the CDs are \$20, and the series hits its stride at #45. More recent releases contain an index for all available material on the

discs and where to find the selections. ***Sunday, 2:30 - 3pm - Coffee meet and greet, the sequel***

Steve Segal revealed production secrets behind his 1984 production of *Futuropolis*, Melissa Bouwman told how she made use of UICA's band when her film's music rights were gobbled up by BIG BUSINESS, and Deanna Morse described the convolutions in obtaining her music for *Charleston Home Movie*....and the break was OVER! But wait, there was MORE!

Charleston Home Movie, 1980, by Academy of Motion Pictures Arts and Sciences member, Deanna Morse!

3pm - Chris Sullivan and The Orbit of Minor Satellites

Keeping the retreat's Midwestern theme going, Chicago based Chris Sullivan provided an update on his work-in-progress for *The Orbit of Minor Satellites*, with a series of completed sequences.

Amid the sharing of production processes, including funding sources, Sullivan provided some experiences and words of wisdom:

The Amazing Chris Sullivan

On Health: "If you don't have cancer by now, you have something wrong with you." This seems to be the curse of entering life's third act. Accept the diagnosis as another new normal, and don't let it rule your life, but do take every opportunity to show this uninvited guest it is quite unwelcome (editor's comment).

On unrealistic expectations: When you're middle aged or beyond, "accept your mediocrity." In other words, build upon the skills you already have.

On story: Film editing creates "causality between the shots." This statement should be embroidered into every animator's pillow.

On film festivals: If you create feature films, you are more likely to get free festival transport and rooms. "I make feature films, but I don't really watch them." However, Sullivan appreciates films that can generate "cathartic tears."

On audiences: "The wonderful thing about film festivals is that the audience isn't filmmakers." This gives the producer the opportunity to experience an audience vs a peer reaction to the final product.

On covering expenses: Crowdfunding is a surprising source of production revenue, often from unexpected donations. "Crowdfunding critics have never really done it." Nevertheless,

Image from *The Orbit of Minor Satellites*, Chris Sullivan's work-in-progress

Sullivan recommends having a significant amount of work done before seeking crowd funding for any film project.

On recreation: Sullivan reads Nancy Drew stories to unwind, noting, "They're all adventure and no danger. The worst thing that ever happens to her is she gets tied up." He pondered what sort of father she must have. It takes a strange dad to say, "I send little girls into abandoned houses to find the bad man." As Sullivan wrote and rewrote the feature, the realization of a Russian-American subtext came late into the production of *Orbit*, creating a "cold war in the house" for its characters. It wasn't an expectation going into the production - but as Dickens discovered, created personalities can often take over the quill.

The production was constructed around the voice of Boris Karloff, pulled from several sources, and Sullivan procrastinated on getting rights to use the Universal Studios legend. Luckily, Boris Karloff's daughter, now 86 and custodian of all film, image, and verbal performances of her father, gladly gave him permission after hearing the full story of *The Orbit of Minor Satellites*.

The crowd funding for the feature is at www.orbitkickstart.com - remember, when it comes to animated features, no donation is too large!

When Chris Sullivan gave the answer to his last question, Brad looked out at everyone through his ZOOM portal, and let us know we could all go home now, but we were already home, so we all stood for a few seconds, reached over to the "leave meeting" button, and had to face the rest of the day on our own.

Members of ASIFA Central have decided to keep this ZOOM experience going - there will be subsequent meetings over the next several months, the first being around a discussion of the UPA films and their influence. In reality, it's all about the pizza, but a McBoing Boing with pepperoni sounds pretty nice, too.

Open-source and alternative production packages discussed during the 2020 ASIFA Central retreat: Opentoonz, Krita, Blender 2.8, Moho (formerly Anime Studio), and the grease pencil function in the latest version of Blender that creates 2D animation. Alternate for a Cintiq tablet - Kamvas Pro 16

Till next time, you're on your own best behavior.

James Suhr shares his 28½ Tips

Pondering the shelf life of laser etched toast

From - INSTRUCTIONS FOR A GROUP PIXILATION by Steve Leeper and Christine Veras **In case some other adventurous souls wish to create similar Big Fun:**

At the beginning of the workshop review the instructions and give time to orient ourselves but you'll want to review the following steps beforehand:

Once we begin an animation **DO NOT TURN OFF YOUR CAMERA** or leave the Zoom space! Removing or adding members completely reshuffles the Zoom grid.

SETTING UP

Your video camera should be set to the default "Mirror Camera". This will help you keep oriented to your space. (If you have never changed this setting on Zoom, this is the default mode and you. **Make sure you have enough space to move around in front of the camera.** Your web-cam should be situated in such a way that you can look closely into the camera for an extreme close-up and step back from your camera for (if possible) a full body shot.

Use a post-it note or tape to label your Right and Left on the edges of your screen for quick reference. Once we begin, things can get confusing. All instructions during the workshop will refer to your personal Right and Left.

Virtual backdrops are not a good idea. As cool as they are, for this workshop as they will conflict with and distort the final image.

Check your Zoom Settings. Turn your video on and mute your microphone before entering the Zoom space. Check that your audio is turned on.

Set your display to gallery mode. So you can see all the participants in a grid view. You'll find this on the upper right corner of screen.

Finally. Be aware that what you see is not what you get. The capturing image will follow Steve's computer and that is why it is extremely important to follow the verbal instructions given and post-it markers on the sides of your screen.

Let's start animating!!

28 1/2 Tips: Or How I Learned To Stop Worrying and Became A Professional Artist - by James Suhr

(All tips included are for your safety)

Prologue: Everyone at one point or another in their life wishes they could travel back in time to tell a younger version of them self what you now know in order to save yourself a bunch of grief and heartache that comes with learning. Well guess what? I'm your future self. Surprise! You're a lot hairier and uglier than you expected to be in the future, but I'm here, I'm now, and I'm willing to help! You see, back when I was in school 1.0, I went to Kendall, your sister school. Back then they didn't have an animation department. Actually, they did, was just me. I wanted to go into animation, got except to those schools, but couldn't afford those schools, but I got a scholarship to Kendall and I was determined to use the Illustration program to help me reach my goal. In addition to the obvious Illustration classes, I took Independent Studies for basically all my electives in the vain hope of trying to figure out how to animate and storyboard—knowing nothing, and having no one to guide me. It has been a long and arduous road to get where I am, and this presentation is based on tips and information I wished I had learned sooner rather than later. But that's the point of teaching (and stories in general), to share experiences so that another has it easier than you did. Some of these are hard truths that at first may sound discouraging, but I feel are important to respect you as a budding artist, and give you a more rounded preparation of reality beyond just the usual "Being a professional artist is fun! (giggle, giggle)" I mean it can be (A LOT!) but mainly when you understand and respect all aspects of, social, business, learning, and playing—otherwise it can be a miserable pain with lots of heartache. What I'm saying will not Hallmark Card over important stuff, disrespecting you as adults and releasing you into the world with just the idea that your dreams will take you where you want to go. Also to save you pain, I've done my best to leave out the gag inducing point of purchase bullshit wisdom that we hear all the time like, "When life hands you lemons, make lemonade." As we go along, I want you to notice that this talk will try to follow the process of drawing: moving from from general to specific. It will start off as advice for every artist here can use regardless of individual discipline, and we'll slowly work our way into animation, and end talking about storyboard specific information. Take what you need from this, and to hell with the stuff you can't. (Actually all the stuff here is good advice so don't 'to hell' with any of it.)

Disclaimer #1: I tend to use swear words a bit in person, and while I'll do my best to reign it in during this talk, if you are squeamish about certain words, I am truly sorry for your pain, but let's keep something in perspective: You are in college. You are at least 18 or older, which makes you an adult. That means you can buy cigarettes, have sex, create a kid, get married, get divorced, have to pay rent, need to get a job, be responsible for taxes, and vote. When compared to all that, how big do two little words like 'shit' or 'damn' seem now? So long story short, I'm gonna probably say some fucking shit.

Disclaimer #2: Sometimes I may share opinions in ways that at times might sound harsh or strong. I may trash a show, movie, a comic, an artist, a game, or a musician, etc.. that you might like. Half of the time I try to tell my opinions in a hyperbolic way hoping to either be silly or comedic (sometimes even highlighting how dumb my own opinions are in the process), but also in the hopes of inviting debate. I always believe that two minds are better than one, and we learn when different thoughts come together. But I recognize that not everyone may enjoy my delivery or the opinion shared, and they may think I am putting them down by way of putting down what they like. If you disagree, know that I think that that is wonderful. I can say that a show, movie, or whatever else you like is garbage without meaning you are garbage. Don't be afraid of what you love. And don't be afraid to tell me what you love. I know for certain that there are things I love that you would definitely say is awful and garbage. And if you did, know that I'd still love what I love, while valuing your opinion on the subject. I value you. I value that you like what you like—even if I disagree about it.

Disclaimer #3: I don't always math good, or language well, so the actual number of tips in this handout is arbitrary. Don't be holding me to exactly 28 and 1/2 tips exactly because, because I don't care. Focus on the information being shared, not the vessel delivering it.

If we are all ready, let's get started...

Part I. In the beginning...

1. Your degree means nothing. Now that I have your attention, and a short amount of time before the teachers here kill me with a poisoned blowdart, let's get into what I mean. That doesn't mean you shouldn't have gone to college or that you are waisting your time here. Just don't expect anyone on the industry beyond small talk to care or be interested when it comes to employing you. You are hired for the work you make. We are in the position to create. We produce tangible and usable things with our skills, and is what you are being hired for. The fact you went to an ivy league school, to CalArts, or to Redneck Bumpkin High in the middle of No-where doesn't matter to us. Your portfolio all we care about. Your portfolio is your degree. Your portfolio is your resume.

1 1/2. BTW, your resume doesn't mean shit either. That's just for recruiting and HR to feel like they did their jobs. Again it's all about your portfolio. You do need to make one, make it easy to read, and try to have a little sense of design about it without going too overboard—you're an artist after all, let the art seep into all aspects of your life and be one with who you are.

2. You are your own business. This lesson I actually learned from an interview with Walt Disney. He was asked about what he did with his vast wealth that he made from his company. He said that he would take a lot of his own money and put it back into the company to fund and grow the projects he wanted the company to do. So I got to thinking... "Can I do that on a poorer level?" That was a game changer for me. I would put a certain amount of money aside for classes or technology to help me grow. Not savings for a rainy day. Not just money aside when I needed to buy things, but an actual business and technology budget to pay for promotion and upgrades. A certain amount of time was also set aside so that I would continue to learn. I grew both a movie library and a literary one too. I know you are starting out and money is tight in the beginning, I've been there. This is anytime you get a surplus or surge of cash. Now as lighter in affair as all this sounds, there is another side of this lesson that is a little darker.

No matter who you work for, or what company you are have printed on your paycheck, you are your own business. They hired you because of what you can deliver to them. But know the company doesn't care about you. If you fail to be able to provide work for them, they will let go of you. They don't care about your debts, they don't care about if you are paid enough or not, they don't care about if you have health insurance, they just to keep you to get your work. Many of these companies in the past have paid thugs and have threatened workers who tried to form unions asking for better working rights—even though interfering with the forming of unions is illegal. They been agist, sexist, and racist repeatedly in the past (and by the past I mean anytime before when I typed this). And don't think it won't happen again just because it is you. I have seen it firsthand. You need to treat them like you are a snake charmer: Entertaining others with your weird skills and making a living doing it, but never forget that you are sitting right across the way from something capable of striking you and killing you. Lawsuits over wage fixing, outsourcing work to overseas whenever possible, trying to skirt around labor laws and negotiated contracts to pay you less and less and less. When it comes to negotiating contracts for the entertainment unions, the companies send a whole team of lawyers whose sole purpose is to do nothing but negotiate your rights away if possible. They do not care about you... but they need you. You make what they don't know how to make, and can't make, so take advantage of that to get what you need to survive as a business.

3. Where you are is not forever. This is probably the closest that I will get to that dime a dozen b.s. wisdom I mentioned earlier, but I have more to say about it than just being a slogan. A person's career is like a game of chess. Sometimes you get to advance and move ahead, other times you have to sacrifice something to survive. While some setbacks are frustrating, they won't be forever if you are willing to put in the time to change the course of your game. I couldn't afford animation schools. I got a scholarship to Kendall and I tried to develop my drawing skills so that I could get into the training programs. They cancelled the training programs in the last 90's and I went into web design and freelancing illustration work for several years. I used the money from that to pay for animation school. I continued to do that kind of work throughout UCLA (where I studied animation), and then I finally got into animation in my late 20's. You might sometimes have to be willing to take a large risk, but you don't have to settle for where you are now as your final place.

4. Email people like you are talking to them. I have gotten emails from students, and while being polite—which is nice and respectful, y'all all talk like a bunch of lifeless robots in your emails. Don't be so afraid of offending the person you are talking to that you forget that the greatest offense is not acting like a human at all. Don't swear like I goddamn do, but act like there is a person sitting in front of you when you are typing. That is the secret to sounding like you have a bit of charm and personality in your emails. Personality is memorable, stiffness isn't. Your emails sometimes are your first ways of someone getting to know you, and sounding wooden and lifeless is a great way to be overlooked. We don't like it when CGI is in an uncanny valley of realism, and it also works the same in emails. We know when we are talking to a human being, and we like talking to a person, not a robot. Also, don't sound so desperate! Jeez!

5. Lean on each other in school, but don't need each other to reach your goals. I have some great friends from college that are like brothers and sisters to me. We still talk and even hangout together. Some I message all the time. We still push each other and encourage each other all the time with our art, but our focuses and fields are drastically different. I have seen students that were great as a group in school, but after graduation some kept putting off plans to their future because they were waiting on someone else in the group to be ready to put a plan in motion... and it never happened. Everyone has their own needs and responsibilities. If you want to move somewhere, don't be co-dependent, do that on your own. If your friends can follow, that's icing on the top, but you are responsible for your future—they aren't and shouldn't.

6. Be on Time. Bathe often. Be easy to work with. My life drawing instructor, the great Glen Vilppu, told me that those three things are the key to staying employed. In my early years in the industry, those three things are all I had to get my next job. I've built a reputation that has people asking for me. People need you to show up and do your job, and to deliver your work on time. You work around others, be respectful of them and yourself by doing at least the basic hygiene. Everyone works 40 hours+ a week, and deadlines are stressful, so try to make it easier for the people around you to achieve their goals. Don't be a prima donna jerk. Humble yet confident. Now you may notice that Glen didn't include in his list the word talent or skill. He said that that will come in time, but everyone can control the first three requirements.

7. Be nice to production! Your Production Assistants, Production Coordinators, and your Production Managers are usually more excited to be on the project you are on than you, more excited to work at the company you are at than you, and they are probably a better person than you will ever be... But they are also paid way less than you. They are some of the first employees in on a production, and some of the last to finish at the end of the production. Some of them might rise through the ranks and be your boss one day. They might be the ones remembering you and suggesting your name for a job. So from a business standpoint, don't be douchebag. From a humanity standpoint you treat them with the dignity they deserve because they are working just as hard to make a huge goal possible. Remember,

a great artist—a great person—treats all around them with respect. Except for John Stadlemeyer. That guy is an ass. Be mean to him at every turn.*

*John Stadlemeyer doesn't exist. He was created for this joke.

7 1/8. Don't chase competitions!!!!!! I can't stress this enough. I've done it, and so have many others, but if you hear of a competition, or a call for artists, only submit work that you have on hand now, don't think you can make something in the week or two before the deadline and think it'll look good enough to go up against someone who's been putting weeks into their portfolio. Yes, the deadline will push you, and you may be proud you met the deadline, but seriously, you ramp up stress for nothing, and I guarantee you it doesn't look as good as you think it does. As a professional, it takes time to develop a story. It takes time to animate something top tier. For students you are are still learning, so it takes even longer. Don't take time and energy away from running after a what amounts to a get rich quick type of thinking and abandon the projects that you have time to get done with better quality. Be confident in what you already have—or don't apply. Don't chase the competitions, apply with what you have—or don't apply at all.

8. You don't need to accept every promotion that comes your way. I am finally becoming a director. It has been a long and winding road to that accomplishment, and many people have wondered why I haven't been one sooner. I have had a couple of offers, but I turned them down. You see, I started in industry straight out of school from UCLA. While my directors liked my work and working with me, I learned that I was still missing important information needed to be a more efficient and better artist. Now I didn't know what I was missing, because how could I know what I didn't know, but I did have sense and awareness that I was missing something. I eventually took a job down from the Storyboard Artist level to that of a Storyboard Revisionist. It was one of the best moves I have ever done! As a board artist you can be overwhelmed trying to meet your deadline—especially when first starting out in the field. But as a revisionists you have time to look around and learn about the workflow pipeline, how your drawings affect the next person in line from you, how the ones before you affect you, and learn from your director how to be a better board artist. It is a job that can allow you to hone your craft in small ways till you are ready to move up to boards. And when I moved back up to boards, I was a stronger and more valuable artist in that position. Now after moving up to boards I had been on a path to director for a while, but I have two kids, and one is a special needs kid that is autistic-nonverbal-with developmental delays. I needed to be there for my family until both kids got out of preschool. I also didn't want to be one of those dads that only sees his kids on the weekend. As a board artist or revisionist, I could get in early, and leave early to get home to see my family. That was important to me, especially in my kid's youngest years. You know what you need in your life and when you are ready, or you aren't. You know when you have the energy or not. Don't just accept something because it is there or expected—do what is best for your business.

8 3/4. There is more to life than work. I love working in animation. If I had to do it all again and choose any other job, I'd still pick this field, but we all get tired and burnout. As a professional artist we are asked to give a lot and sometimes the well seems to get dry (or is dry). Our job is also our hobby, but we need to have things outside of art to get up away from the desk and refilling the well of ideas and inspiration. I do MMA and work like a hobbit in my garden. Both get me active and both have a different way of releasing stress from my life. I beat the crap out of someone during the week and get my exercise, and on the weekends my garden gets me outside and in touch with my tender side. We are dimensional and complex—and we should be allow ourselves to be. Don't be an underdeveloped one-dimensional being. Get up and out and notice how much faster you can work when you sit down at the desk.

Part II. Shit starts to get real...

9. Try to aim for storytelling that you see on screen as your minimum goal. Things just got a bit more serious a bit quickly, huh? Well, think about this. When I was in school I looked at tv and movies. I knew they hired someone to make that, so if I wanted that person's job, I needed to be able to do AT LEAST what that person could do, or why would they hire me? (They already have a person that can do that level of work). Now from a student's point of view that sounds like a tall order. Surprise! It is! But that level of thinking will catapult you to your next level. Now in the beginning I don't mean do super cleaned up drawings when it comes to boards or rough animation. First learn to setup compositions and move the camera with loose drawings. Make studies from movies and shows you like to see how you might board that sequence. Practice perspective and acting with loose simpler drawings and let time work its course on sophistication in your drawings, but get your basics down solid, and your basics are what you see on screen.

9A. For God's sake learn construction! I know you are all learning, but there are so many mushy characters thrown at me on too regular of a basis from students. Learn how to build, draw through, and construct a character that has form and believability. Even if it is a super cartoony and graphic way of drawing, there is still construction and rules to how it is assembled. Know that as I am ridiculing you, I was told the same thing, with the same amount of frustration by the professionals of the time. Please learn how too fucking construct a drawing (for your sake).

9B. Restrictions can be a creative blessing.

10 1/8. Don't just board for class, because your competition isn't. If you want to be a storyteller, then everywhere is an opportunity to improve your storytelling skills. Walt Disney knew his artists would sometimes take breaks on a production and draw funny drawings of each other (and even Walt himself) instead of working. Now instead of dissuading it, he encouraged it because he knew it helped the artists develop their storytelling skills. I've been on productions myself where we would draw stupid jokes on post-it notes, or do caricatures of each other. I doodle sometimes in the margins of my boards, leaving surprises for the revisionists and directors who dare to look around the outside of the frame. When doing life drawing, find a story in the pose and try to tell that story in that one pose. The people who are boarding at other schools like CalArts and Sheridan didn't start boarding in their senior year, they've been boarding since their freshmen year. Some take to it faster than others, but all of them have had some experience by their senior years, and it shows in their work. Don't just think because you did one assignment you are board artist. Practice making smaller boards that just tell one or two gags, or a small action bit. While y'all are all together and sketch and make stories for each other during that hangout session. Do short exercises that hone your storytelling. It is repetition that builds experience. Experience is true knowledge because you get it. Anything less is just awareness what it is you need to work on. Telling stories should be important to you and doing just the class assignment should not be too little and not enough for you.

12. Do studies from movies. You have a couple of off the shelf choices with this that you can modify. You can just study cool compositions—which is great—or draw nasty ugly thumbnails breaking down the major story beats of camera work in a scene (or study just the the acting choices used and practice those drawing those poses). Really there are no rules, right way or wrong way, just don't be afraid to study from something that you love and inspires you. Think of this as no different than doing an old master study back in days of yore. (And I mean like yore yore.) If you feel you are lacking in areas of drama, study that. If you want to improve drawing funny faces, practice from material that can help you with that. Action. That. Camera movement. That. Make the exercise fit your needs.

11. Watch scenes from movies without the sound on. It is easy to get caught up in the

emotion of a scene from a great movie because of the music, the acting, great camera work, the sound design, and intelligent editing choices. But to understand what the director is thinking, you need to turn off the sound and just watch how they orchestrate the imagery. How does the director motivate the next cut? Why is the information on screen the chosen information to show? What is the information telling us? What is the visual rhythm of the shots? etc, etc... Be critical in your questioning. Invite friends to analyze a scene with you if it will help, but do it with the sound off.

12.85. Bounce ideas off other people. At work I notoriously show gags to other people on my crew. I use this to gauge their reaction and see if I can improve a section, or it is good enough. Sometimes they will throw out a better idea, and that gets into the board—making me look that much better of an artist (though I give credit where credit is due). BUT I AM SMART ENOUGH TO KNOW TWO BRAINS ARE BETTER THAN ONE AND THAT MAKES ME A BETTER BOARD ARTIST.

13. When coming up with stories, have an all-out “YES!” period. Coming up with stories and/or story ideas is really hard. It’s like raising the Titanic or shot putting the moon. Because of this, you need to take the pressure off to get the creativity going. The best way to lower the pressure is have a writing session (or two) where you just write anything and everything you want to see and do with your project. This is your all-out YES! period. Nothing is wrong, no idea is bad, there is no budget of time or money, just you playing around like back when you were a kid and anything is possible. Think of it as a veritable rumspringa of ideas. A wishlist of possibilities!! Then after a day or two when the high of being creative has worn off, go in and edit things down, being practical and judicious... just don’t do it in the very beginning before you have had a chance to enjoy being creative.

14. Don’t write epics! And Don’t board me a trailer! I get it, you want to be taken seriously. You have a budding deep soul that wants to tell me something big... but news flash, you don’t have the chops yet. I’ve seen tons (TONS!) of young artists that try to make a 10 minute, 20 minute, 80 billion minute film ideas. They all have 40 trillion characters that each have a library of backstory to them. Yet, the end result is always the same: They either take years to make with the artist petering out of energy and interest never finishing the project, or they finish it quickly and it looks like garbage. There is also that person that knows they have a huge story, and knows they need to tell something small, so they make a trailer of a larger story (which they say might even be a trilogy). I’m sorry, I don’t take trailers seriously—and neither do many professionals. Directors, recruiters, and studios want people that can tell stories, not make ads. Go to an ad house if you want to make trailers (there’s no shame in that), but don’t use a trailer as your way to break into the animation industry. Tell a 1-3 minute story. Have a character start one way, then change by the end (or the world around him changes). Have a story arc. Have a clear beginning, middle, and end. Keep the idea down to 1-3 characters. You don’t need to give me every damn person in the universe to tell a compelling story, just give me at least one character I can relate or sympathize with.

14 (The Addendum). Yes, you can point me to fan trailers that worked for an exceptional person. Okay obstinate person in the audience, there is an exception or two out there, but seriously look at the quality put into that project, and if you can match that, prove me wrong. If you can’t match that level of quality, the deck is extremely stacked against you to point of near impossibility. Proving there is an exception does not null and void my point—look at the context around the exception.

14B. Don’t be afraid to trace over things to learn. I used to have a bad problem of drawing torsos and upper legs way longer than they really are. Almost like an El Greco sort of thing. (If you don’t know who the artist El Greco is, please get an art education and look him and many other artists outside of animation up). The way I changed my habits was by taking photos of the figure and tracing on top of them to reprogram my thinking. Now I wouldn’t slowly trace and copy everything with 100% accuracy. I would still act like I’m

trying to gesture quickly in class, just I had a guide to help me stay on track. I did this for months using anywhere from 20 to 50 poses at a time. I still do it from time to time to pick up anatomy I would miss or overlook. I do it to study other people's styles and try to remain flexible in style. There is no shame in this if it is for learning, just don't put this stuff in your portfolio. When you get up to a level of comfortability in your tracing, go back to free handing again and see what you've learned. It's a tool for learning, so don't feel shame or embarrassment.

14C. Look at art other than animation! Animation, and especially its design, has a certain amount incestuousness to it. Animation designers sometimes look too much at other animation designers and it can all look the same. This can happen at the board level, and really every level of animation. Look at other art to inspire and add depth to your work. Like I said before, don't be one-dimensional.

15. In your portfolio, include 2-3 boards: 1 action scene, 1 acting/comedy scene, and the third one can be of your choosing. The reasoning for this is very simple, it helps a director figure out what your strengths are and how to cast you on a project. You may be proud of your action, but to the director's needs it may be ho-hum. Yet, your acting in a dialogue scene is really, really good to them. (You can still be in the running for consideration of getting work!) Or, maybe your action is balls to the walls badass, but your acting in dialogue scenes is okay at best. (Again, you can still be in the running!) With this strategy you have casted a wide enough net to have better chances of ensnaring someone to hire you. Also, to answer your question you are asking yourself right now, the length of each board should be like an entire scene. You don't need to give me your entire 20 minute long board, just the best two scenes, or the best scene from one idea, and the best scene from another idea. In animation we'd call that a sequence actually. An example might be when Miles Morales and Peter B. Parker are trying to steal the computer from Oscorp in Spideverse. Or the sequence where Remmy is figuring out how to cook using human avatar in Ratatouille. Another example might be the scene where Iron Giant where the Iron Giant decides to save the humans from the bomb. Each sequence is like a mini-story within a bigger one: it has a beginning/setup, middle/conflict, climax, and end; characters or events change in some from fashion from how they are at the beginning of the sequence versus how they are/state they are in at the end of the sequence.

16. When life gives you lemons, make a cartoon. Okay I lied, this is the piece of advice that gets closest to dime a dozen wisdom, but I don't know many artists that I work with that don't use their art to escape anxiety, other mental illness, trauma in their life, or trauma from their past. Whether they are conscious of themselves doing this up to debate, but they all are doing it to treat something that was missing in their life. We are all scarred beautiful creatures. The scars, as well as the smiles, are part of our voice. Using these experiences to make characters relatable can feel embarrassing or make you feel open and vulnerable, but that feeling is a blessing in disguise. Neil Gaiman once said in a class on writing (and I paraphrase) if you are feeling uncomfortable and vulnerable in telling your story, then you are right where you need to be to make something that connects with others. That vulnerability is important. An artist that I dearly love, Sergio Aragones, used to make tons of artwork for MAD Magazine. He once told a story about being at his mother's funeral crying. It was a rainy day and during the graveside ceremony he kept hearing this noise that sounded like, "slish, pop!" He looked over to see his aunt (in her 90's) in tall 5" heels sinking into the mud because of the rain. His uncle would then push her back up from falling over backwards, and the whole process would repeat over and over again. This made Sergio laugh and he knew that the next series he was going to do was a look at death and all the absurdities. When the pain of life tries to pull you down, pull that creative parachute you have to save you and enjoy what comes out.

17. Animation, and storytelling is done in passes. The old saying is "Rome wasn't built in a day," right? If you are trying to do it all and animate or board you might (maybe, possibly?) make something good, but you are going to burn yourself out very, very quick

fast. Do the work in passes, only focusing on a few things at a time. When animating I might make the gesture I really would like to have as my storytelling gestures, and then work only on the legs and hips. Then I might go back and animate the upper body, with facial animation last (because gestures sell so much more than the face in a wide shot). And within these halves I might only work on one thing at a time as well. When boarding, I like to draw loose garbage drawings of where I want the character to be in a shot, handle all the acting. Then I worry about camera and fielding. And then go back and do the backgrounds around the action. Then I go back to the characters after I've completed the whole board and had it critiqued to clean up the characters. Then touch up camera work and bgs if needed. Don't do it all at once like a wild maniac swinging in the wind. Be smart. Pick your targets, and hit those.

17D. Making a film is a streetfight. Nothing is off the table in terms of how to get the job done as long as it looks good at the end of the day. Don't worry so much about 'the right way' that you lock up and don't know what to do. You know more than you think. You've taken in a lot of media and your instincts are probably good, they just need polishing. So don't worry about a 'right way' or a 'wrong way'. Just worry about making it look good and figuring out a more efficient way (without losing quality) for next time.

18. Forgive yourself. At the end of the day you are going to make mistakes from time to time and that's okay—get over it. You don't have to forget what you've done (because that is how we learn), but you do need to forgive yourself.

18 (From Earth 4). Change has to happen in your story. Your either need your character to change by the end of your story, or the world around him needs to. If it is your character, they need to start with a want and by the end of the story get what they need, not what they want. (Or vice versa with the world around them.) I won't go into this much further because there are a TON of great books that address this better than I ever could, but know that this is something to seek out and want in your storytelling.

18 (The Forgotten Child). Story gets rewritten. Whether at the writing phase, the board phase, or the editing phase, a story goes through constant changes for whatever reasons. A good storyteller rolls with this and accepts this fact. A great storyteller can tell when the change is needed, and what is important to keep. When in doubt of which is which, simplify your story.

Part III. Know your craft...

18.99. Trace the model sheets. When I first start on a show, I will trace right on top of the model sheets either on the computer, or if it is printed for me, with a new piece of paper and a lightbox. I do this for the first three weeks I'm on a show minimum whenever I have a spare minute. If I am fortunate to have a ramp up week (a week where they give you time to practice the characters and read through the materials—more rare than common) I spend almost all my time that first week tracing the model sheets.

19.2. Your storytelling has to be clear. You can't be there at every viewing of your work to explain what is going on in your story, to explain every metaphor, to exposit every backstory, so your story has to be able to stand on its own two legs. If you find yourself explaining extra information not in your boards to people when you pitch, then you should know your board isn't clear, and you usually need to trim things down simpler rather than add more complexity to it—it is the complexity that is getting you in trouble.

19 Redux. It is your job to find the story in the script. You may not be a great writer, but you have to be able to know how a story works and how characters develop in order to do your job as a storyboard artist well. You can just draw what is on the page. That is called

servicing the script. It's the minimum. You can have a career doing that, but if you find yourself not getting onto the shows you want and why your boards don't stand out, I'm telling you now why—you are probably just servicing the script. It is your job to look into the script, see the structure, support it, find the emotion, add to it, find the humor, or add to it. An adequate board artist meets the script. A good board artist pluses what is there. A great board artist makes the script their own. Open that script up like looking into the hood of car and tinker around, adjust where needed if you think it makes the scene better. Move stuff around if you think something isn't flowing right. If you are starting out, ask your director if it is okay to make the changes by pitching the idea to them. The script should be seen as the beginning, and you are carrying the torch of the idea further, not just holding it in place till the next person comes along.

19 1/2. One thing at a time. To aid you in the clarity of storytelling, there is an old axiom of "one thing at a time." The human brain is a wonderfully complex organ capable of great intellectual thinking, but it can be easily overwhelmed with processing too much information at once. In art classes we talk about focal points: creating a hierarchy of information to guide the viewer. Why would that be different just because the pictures start moving? So don't have two, three, four, eighteen things going on at once. If things are moving in the bg, make it a repetitious thing so it reads as noise, and make the characters we are supposed to focus on have precedence. If there is a complex action going on, pose it out one beat at a time till you get past the complexity. Things can overlap so actions seem more natural and not so staccato, but make it happen one important thing at a time. Or I will find you.

19 2/3. Don't get too attached to your work. A finished and rendered drawing doesn't always equal a great, or more importantly, a useful drawing. This one hits right in the ego, but I see so many artists just trying to impress each other with a final rendered drawing. Cool. No, not really. I won't knock there is technical skill, but I make around 1200 panels per board. Are you capable of doing that rendering for every panel? Really? Make the drawing functional to the purpose it is fulfilling. Storyboards need construction and perspective, but that can all be done in quick sketches, not final finished paintings. And there are revisions and changes you need to make constantly till you are done. You're not the center of the universe or the production, so be prepared to have your idea cut, or changed. You'll always have the version you did, but draw quickly so the pain is less when stuff is cut or changed—which is inevitable.

19E: Paragraph 3. When drawing your thumbnails, draw small. Even some professionals draw thumbs with a large zoomed in rectangle, but I guarantee you you will draw faster, catch problems, and edit quicker if you shrink the drawing space you have down a lot. Just for thumbnails. Thumbnails are for looking at story and shot flow from a macro level. You solve a lot of your problems out here so you can worry more about the technical stuff when you board. Plus directors love to see a bunch of thumbs because they can catch issues or problems early on—and collaboration over ideas here can sometimes lead to even better solutions than any one single person would have arrived at on their own.

19 Alpha-Beta. Draw until you think overseas can animate your scene, then stop and move onto the next drawing. A former storyboard supervisor once told me that the way to think about doing a board is to imagine my work being given to someone in another country to animate the scene. Now that person may not get all of the animatic, just the scene they are to animate. They may not speak the same language as you, or know the full story. So, is all the information there to help them get the scene done right? If not, add till they can. Also, this can be a helpful guide to let you know when to stop working on a drawing and move onto the next thing.

19 9/10. Your goal as a board artist is to deliver material that a director can cut together easily. You need to create scenes that flow into each other. Screen direction needs to be maintained, you need to have your motivations for cuts or camera movement, your shots to

feel like the eye can follow where to look next. A test to see if stuff is cutting well, quickly flip through your work. If you can follow it as it moves at a hundred miles an hour, your scene is doing better than worse. This isn't the only way to test, and it isn't the end of your job, but it is one way to see if things are working.

20. Always draw a perspective grid. (Now we're getting into the technical shit.) It is nice to draw a bg for your boards. But sometimes shit happens and your deadline is fast approaching, so when in doubt, grid it out. Remember: you generally raise the perspective grid to show geography and how things spatially relate to each other, and you generally lower it to create drama.

20. Plastic Ruler. A lot of us nowadays drawing on the computer has lots of tools, but I have not found a digital ruler I like, so having a plastic ruler was suggested to me by a colleague. Why plastic? Because it won't scratch your screen.

21. Don't overlook or underestimate a head tilt. So this seems little and silly, but it works like gangbusters (I really hate that term gangbusters, but it's in my head, and now it probably is in yours). Don't tilt everyone's heads, and don't do it all the time, but say your main character is standing in the middle of a group of onlooking supporting characters. Having a couple of the characters around the main character tilt their heads. It adds interest and helps guide the eye. I like to use it on when one character is listening to another in a wide shot. Or if a character turns their head, maybe instead of an expected straight up and down turn, you have a little tilt to help make the character not feel so robot and puppet controlled—but flesh and bones. Again, don't use this all the time, but have it in your back pocket to break up stiff always upright character acting. (It's a spice, not the main cooking ingredient.) Also, please don't have the head start normal and then tilt it like a confused dog. I can't say you can never do that, but that is a rare occurrence. I'm talking about using the tilt in a static pose to help add small flair to a pose.

21 (The Sequel). Make a 'Morgue' or 'Graveyard' to hold to non-used panels. I do this on all my boards. I make a section at the end of the project called either "Morgue" or "Graveyard" for shots and panels I don't think I need—but hey, you never can tell! If I do this in Storyboard Pro, I make a funny drawing that stands out (usually in the theme of a graveyard or morgue or death—mostly darkish humor); if making in Photoshop I title a folder appropriately named and put drawings there. As I work, I store unused panels there, and from time to time something may get pulled out of that section back into the main project. Now don't include your graveyard in your final board, but while working it's a great thing to have.

21 (The Sequel's Sequel). Please number all your scenes and panels. I don't need to explain, just do it. I'll think better of you for it.

21 (The Overused Joke). As a student, you should probably add more poses than you are using. I don't want to send anyone into a crazy spiral of animating boards, but I will say that student boards typically could use a little more posing out. I get it, you are learning, and making new drawings is still long and hard, but you need to build those muscles and pose out 20% than you are currently across the board.

21 (I Swear This Is The Last One). You probably need to widen your camera some. 'Field' is an old leftover term from the days of traditional animation on paper. You would have a field guide that... this is gonna get complicated to type out... long story short, it was a guide to let the camera know how close or far away it (the camera) needed to be from the drawings—the higher the number, the more pulled out the camera is. When someone says 'Field Out', they mean go wider. Obviously the reverse it true of 'Field In'. More importantly the point, students tend to be in way too close because it is easier to draw in close-ups than wider. Please field out/widen just a little more throughout all your boards. Look for storyboard templates that have 'Action Safe' and 'Text Safe' guides on them. All action needs to be

within the action safe area, while all text... you're smart you figure that out. Storyboard Pro has those options and they are great. Use them!!

21 (Psyche, Fooled You). 2/3 Grid. A lot of cinema uses certain screen divisions to help get a more appealing composition quicker and easier. The most used method is to divide the screen into thirds. Whenever possible (not all the time, but a good chunk of the time) try to put items on one of the thirds to give it visual authority. This division is pleasing to our eyes and is a great way to instantly make your work look so much better.

22. Don't board 1 pose for an entire paragraph of dialogue. Phrase it out. For God's sake if you are holding a talking character's pose in the same pose for an entire paragraph of a giant exposition dump, congratulations, you are a board artist from the 1980's... but that won't help you 40 years later. Please don't animate everything out, but at least give a new pose for every phrase of the dialogue involved. (HA! I making you have to rely on your public school english education of what a phrase is!)

22.55 Use Speaker Deck or some other equivalent to show your pdfs. Please don't hate me and my colleagues. I don't want to scroll down through your forever non-ending pdf. I don't want to see a giant grid of panels where each panel is too small, but the overall is huge. I don't want to look at your 3 panel layout board. I can follow all these things, but I have a lot going on in my day, and the brain power needed to follow this—while critiquing your work—is more than I want to spend. Have mercy and make it easy to just click through a board.

22.59 . Don't post an animatic unless you think you have awesome fucking timing. I don't mean to be rude, but I and my fellow colleagues have a lot going on in our days and we may not have time to look through your five minute animatic—why is it always 5 minutes minimum?! We definitely don't have time for a badly timed five minute animatic. In fact if it is badly timed, it will make us angry for wasting that time, and likely get turned off within the first 30 seconds. Imagine that the person you are showing your work to has to look at 30 other boards that day. As a professional, we know in the first few shots if you have it or not, so cut us a break and helps get to that point sooner than later—don't make us have to wait through your slow ass animatic to figure it out. If we like your work, we'll look through more of it as a treat to ourselves.

22C. When drawing a BG in your boards, pick a landmark. You don't (AND SHOULDN'T) be drawing super complex BGs in your boards—unless you are insane, bored, or ahead of schedule. Outside of a grid, a helpful tip is to pick a landmark in the location of your scene and track where that landmark is in relation to where everyone involved is to get clear sense of the geography. Say for example you are in the sewers and there is one vertical pipe in the area. Track that landmark to let the audience know whether a character is closer or farther away from that item. Make sure not to forget wide shots with the landmark from time to time to really help the audience know the layout of the location.

23. Strategy 1: Draw clear simple BGS, and super rough figures. This is an approach a great board partner of mine introduced to me, while I don't always use this strategy, I want to pass it on as you usually use a bg quite a bit, but characters are always moving—rather smart.

24. Strategy 2: Draw super rough BGS, but clear figures. It's simply the reversal. This tends to be how I approach boards as I don't know what I'm doing with backgrounds a lot of the times. A grid counts as a super rough BG for sure. (but don't forget your landmark as mentioned above to help with geographical relationships!)

25. Only draw a nice BG when the focus of the shot is the BG. Self explanatory. (I get a high-five for simplicity)

25 7/8. Watch your eye direction! Have the character actually looking at what they are looking at. When characters are looking at each other, have their eyes actually meet. Don't just draw a pupil and move on, cause you'll drive directors nuts, and revisionists will curse your name as they are fixing the most easily fixable thing on the storyboard planet.

26. Try acting out the dialogue yourself. How would you do it? Draw that! Need to record that with your camera? Do it and draw that! Don't be ashamed, we all do it. Act it out! Act it out! Act it out! Make it authentic and not cliché'.

26A. Steal like an artist. Don't be afraid to use reference. Marc Davis once said that in animation can be done one of two ways: 1. The hard way, or 2. The harder way. Whenever possible, he tried to pick just the hard way. Grabbing reference from pictures, movies, or whatever is the a great way to help you meet your deadline. Some shots in animation are directly taken from shots in other movies or animation. Sometimes you are asked for too fast of a turnaround to do it all on your own. Steal from great stuff as long as it doesn't look obvious that that is what you did (the making it not obvious is the artistic part of the act).

27. Pick your battles for Thumbnails. For thumbnails, be concerned with how a character enters a scene, where they stop, where they are in location the other characters, and that's it. Save the acting for your roughs or finals. Thumbnails should be about geography and composition in a practical and functional manner that is interesting to look at.

28. Don't forget to tilt the camera during an action scene. This one really is magic. Tilt the camera to taste in an action scene and watch how much more intense your work is. Don't overdo it, but watch your favorite action cartoons to see how much they use this trick. (Remember to watch without sound when studying.)

28.1. Cuts and camera movement should be motivated. Whether by someone looking, someone is talking off screen, a noise happens, someone enters the shot, a dialogue addresses someone, or whatever else you can think of, try to motivate your cuts and/or camera movements as much as possible by a motivating factor. This will add to the flow of cutting that I mentioned earlier (Tip # 19 9/10).

28.2. Everything decision you make should be in service of the story, not what is cool. If it have to explain it further, you're not getting it and think about this one and only this one until you do.

28 & 1/2. Make it fun. At the end of the day, whether you are doing a comedy or drama, action or metaphorical, it needs to be worth your audiences time. This doesn't mean you have to make vapid shallow material lacking a message. You can educate, you can inspire, and you can debate, but make it worth the time for your audience to do so and listen to you. An old saying my mom used to tell me is, "You attract more flies with honey than you do vinegar."

Welcome to ASIFA Central! We are the Midwest -US chapter of ASIFA, the oldest organization of animators in the world. Our chapter was established in 1975. While our community is separated by our far-flung geography, we are united by our love of animation. Our diverse membership is a blend of independent animators, animation artists, professors, seasoned pros, students, and fans of the art of animation. We have a robust board working on a number of initiatives for 2021 – including Ani-Jam's, Bi-monthly virtual "coffee breaks," and the annual retreat!

International Animation Day, 2020:

Spiritus Mundi: Animating the World - R. Brad
Yarhouse, President, ASIFA Central

2020 marked the 60th anniversary of ASIFA. Each year on October 28th, ASIFA celebrates the birth of animation recognized as the first public performance of projected moving images: Emile Reynaud's Theatre Optique in Paris, on the 28th of October, 1892.

This year, as part of International Animation Day, we asked each chapter and our partners to create up to a 2 minute animated story that gives us some insight about what makes them unique, what is significant for them as people of their region, culture, land, and language. Each chapter or partner organization that participated this year decided how their segment of the film will be created and what they wish to communicate about themselves.

The combined film was called *Spiritus Mundi: Animating the World*, a title inspired by W.B. Yeats who saw Spiritus Mundi as the world spirit that provides inspiration to the poet or writer.

The film made its debut on October 28th, 2020 to coincide with International Animation Day. The event will stream on a YouTube channel with chat available for comments and well wishes. Coordinators, board members, animators and other guests were part of the celebration that then streamed out to YouTube for anyone to watch. It was a moment to speak about ASIFA as an international body. We shared stories and expressed our good wishes about the 60th anniversary. In this era of growing hate and prejudice, ASIFA as a multicultural, multinational, network of artists has the untapped potential for communicating about our shared humanity. As founder member John Halas stated, "we consider animation as a universal expression which is capable of immense contribution if given a chance."

ASIFA has over 40 chapters throughout the world supporting professional animators with a diversity of social economic backgrounds, ethnicities, genders, ages, and political systems. The ASIFA chapters involved in the 2020 Spiritus Mundi included Australia, BIH (Bosna, Hercegovinia), Egypt, Finland, Hellas, Iran, India, Lithuania, Switzerland, and ASIFA USA chapters Central, East, and South.

Spiritus Mundi: Animating the World was also highlighted at a number of International Animation Day Showings including Paris and Tehran.

It seems so very long ago....

In creating this film we were interested in exploring ways that we can bring awareness not only to our 60th anniversary but "help to promote progress towards peace and mutual understanding between all people," as stated in our ASIFA statutes preamble.

(Adapted from the press release of September, 2020)

The IAD 2020 report from ASIFA/Central USA
Deanna Morse, ASIFA/Central treasurer, Vice President, ASIFA International

We were able to have a successful “At Home ASIFA/Central Pandemic Celebration IAD 2020,” despite some challenges.

We created an on-line program, password protected on Vimeo, with 19 films representing all of the countries that offered work this year for the celebration.

Using the film freeway platform, we reviewed titles and selected films. We wrote to the filmmakers for permission to download, if needed. (In some cases, we did not receive a response, so we had to cut those films from our proposed program.)

Three people worked on the selection, title design and edit, Jim Middleton, Deanna Morse (me) and Jim Schaub.

We contacted all the included filmmakers and thanked them, and provided them the password and screening link. We required our ASIFA/Central members to request the link for screening.

Result:

We created a program of films, with images and a short description.

From Vimeo analytics, we know this IAD screening had a minimum of 32 views. Assuming at least 2 people per household, a minimum of 64 people participated.

The Future:

I think if I were to do it again in lock-down, I would offer the screening link more freely. But, it is not the number of people who taste an opportunity that counts. If this experience only touches one person deeply, and provides a context for considering our shared humanity, that is enough. The purpose of IAD is to celebrate our shared global connection, through our love of the art of animation. And, from feedback after the virtual event, I believe we were successful in that goal.

OK. You always want to make a change afterwards. Well, technically, I would have added some sound effect applause in between the films, to make it feel more like an in-person screening, a celebration. And, it would have been good to have a ZOOM with filmmakers to connect with each other.

However, I am just glad that we were able to pull this off. Happy IAD! We celebrate the diversity and richness of international animation. This year, 2021, no pandemic, we hope.

Zina Papadopoulou from Helas (Greece) provided photos of herself and her two children watching the screening.

Deanna Morse continues to recover from reviewing over 600 films for her part of this year's Academy Award (tm) membership vote. Sworn to secrecy, she did reveal that some the films were in color and a few entries involved certain familiar aspects of an art known as animation.

A 1912 one-off comic strip by Winsor McCay, from *The Battle Creek Moon Journal*

From the Department of International Poetics:

Dein roter Mund (Your Red Mouth)

*Your red mouth is a crimson gate,
the multitude of words sounds so bright and
happy.
And if the word were full of exuberance -
when you say it, everything goes bright and good.*

*Because every word flinches so, whether it knows,
that your red lips kissed it;
and every week a happy feast
when thundering it releases [from] your beautiful
mouth.*

Poem by Gustav Hochstetter (1873 - 1944)
Silhouette Illustration by Lotte Reiniger (1899 - 1981)

Jim Middleton, Editor and Occasionally Accurate Typist

Wild Minds, by Reid Mitenbuler, Atlantic Monthly Press, 2020, \$28, hardcover, 411 pages
While assembling a bibliography of animation books in the archives here, this untouched recent addition fell into my lap. Actually, it was onto my left foot. In any case, it got my attention.

Back in my educator days, I'd complete the semester on Media History by following the climax of *Anastasia* (1997) with Cohl's *Fantasmagorie* (1908) to demonstrate how far animation "industry" had developed - or, in an even tighter time frame, *Skeleton Dance* (1929) followed by the "Night on Bald Mountain" sequence of *Fantasia* (1940). Or tighter still, *Fantasmagorie* (still 1908) with *Gertie the Dinosaur* (1914) to show the leap possible in just six years between two individual artists.

The many biographies of Disney, the masterful review of McCay's life by John Canemaker, the warm reflection of the life of Walter Lantz by Joe Adamson, the Fleischer tales by Leslie Cabarga and Ray Pointer - they all give insights to the individual lives and struggles of the craftsmen and creators of the animated worlds we enjoy, but a one-source guide that sweeps along the first century of the development of animation remains a welcome addition to the bookshelf. Also, enough time has passed where some of the more unsavory tales along the way can be related, along with the friction among personalities that have percolated into legendary anecdotes.

It always seemed that the Fleischer brothers suffered from an excess of comfort. They began by earnest effort, diligent exploration, but until things started falling apart rapidly in the late 1930s, were never truly "hungry." There was Bray as a distributor, then Paramount, and a lot of pre-code resources to help market their product. Disney began as a literal struggling artist, and when success was finally in reach, was outmaneuvered by distributors almost immediately, ever-after kept on the alert while redoubling his efforts to create a better entertainment experience. Cohl and McCay had to wait over a generation after their passing to be "rediscovered"; ultimately, even the Fleischers became vague memories until television syndication brought recognition. And behind them all percolated the denizens of Warner Brothers' "termite terrace," perpetrating subversion with Bugs Bunny and Daffy Duck.

This is a lot of material to discuss in a 411 page book. Reid Mitenbuler even takes time to analyze the metamorphosis of Disney's wardrobe as he evolved into the TV persona of "Uncle Walt."

Wild Minds joins the shelf along with Maltin's *Of Mice and Magic* and Michael Barrier's *Hollywood Cartoons* as a good introductory reference for fans, educators, and students.

There is a wonderful 48 minute interview with Reid Mitenbuler by Jerry Beck on youtube -

Upcoming Festivals - burn that bandwidth!

59TH ANN ARBOR FILM FESTIVAL

Online March 23-28, 2021
Experimental film festival bending minds since 1963

<https://www.annarborfilmfest.org> - March 23 - 28, 2021

<https://www.itfs.de/en/> - online May 3 - 16, 2021

<https://www.anecy.org/home>

Online presence for all - save the travel expense! Annoy your credit card by trading in Euros! The Ann Arbor Film Festival this year will feature the amazing contributions of ASIFA Central members Christine Veras and Steve Leeper, in "Animation Connections," Saturday March 27 at 12:45pm, EST.

The next issue of the ASIFA Central newsletter will feature fun discussions from our many CoVid-inspired ZOOM coffee breaks, hosted by the techno-savvy Michael Long, who communicates with everyone *from a different time zone*. Now when Daylight Savings pays interest in March, that's nearly as good as time travel!

Another one-off McCay strip from 1912

ASIFA Central Newsletter (cc) Springtime 2021 <https://asifa.org/> And <https://www.facebook.com/groups/asifacentral/>
A personal note of thanks to members of ASIFA Central and the many friends who offered support, stuffed animals, balloons, and words of encouragement during my six month ordeal with The Turquoise Ceramic Ball and other unexpected aspects of an unexpected diagnosis of The Big C. 20 weeks of tests and chemotherapy later, and the prognosis is very good. My sincere apologies for the silence from this keyboard in the meantime, for which I hope to make amends. Or at least, add clutter to the USPS delivery systems. As usual, send any suggestions, comments, or recipes for zucchini bread, along with the usual castigations to y'r hmb1 typist, at jim.middletonx@gmail.com ...

Welcome to ASIFA Central! We are the Midwest -US chapter of ASIFA, the oldest organization of animators in the world. Our chapter was established in 1975. While our community is separated by our far-flung geography, we are united by our love of animation. Our diverse membership is a blend of independent animators, animation artists, professors, seasoned pros, students, and fans of the art of animation. We have a robust board working on a number of initiatives for 2021 – including this special ZOOM COFFEE BREAK EDITION

TIME TO ZOOM!

The ZOOM Coffee Break Experience - Deanna Morse and Jim Middleton

“Zoom” is derived from the Middle Dutch *sóom*, or from the Old Dutch *som*, or from Proto-West Germanic *saum*, or from the Proto-Germanic *saumaz*, which means something that has been sewn. Sew there. This means that you had best attend to any holes in your socks, especially in Germany or the Netherlands. Great War aviators used “zoom” to describe getting closer, quickly, and by the mid-1930s, the “zoomar” lens was contracted to the “zoom” lens, to the delight of subsequent producers of MTV videos.

[This is such a slow explanation for a word that means zippety-do-dah fast (which, as any fan of the Great Carsoni may remember, is what you do when you leave your do-dah open, but this is a family newsletter, after all).]

Since CoVid, Zoom has become synonymous with Pantsless Internet Meetings (PIMs), and the ASIFA Central board has been making monthly use of them, to the delight of at-large and long-range members, and to the chagrin of neglected gas stations. Christine Veras Martin and Steven Leeper began building experimental *anizoomation* since last year (popularized on the Book of Faces by Deanna Morse, be sure to “like” that page) and more recently, during the 59th Ann Arbor Film Festival.

Every month, ASIFA/Central members and friends gather on ZOOM around our virtual coffee pot to swap stories, show work in progress, talk about books, films, animation history... and whatever else we feel like.

These coffee breaks are a natural extension of our many PIMs when creating the 2020 IAD AniJam. We had so much fun seeing each other regularly that we wanted to continue connecting. These have been hosted by the master of foils, flunge, and magic, Michael Long from Webster University, blocks from The Gateway Arch in St. Louis. We are inviting others to join these chit chat meetings. Coffee isn't mandatory, but it does keep things moving.

If you are interested in getting on the invitation list and sharing some watercolor-java talk, please contact Michael at: michaellonglong@hotmail.com

UPA Coffee Discussion - August 2020

Speaking of *Anizoomation*, Christine Veras Martin and Steven Leeper's workshop at the Ann Arbor Film Festival was well attended and received, as documented in the screenshot entitled "20 Animators In Search of an Exposure Sheet" – better living through post-it notes and blue objects.

And Speaking of Ann Arbor and Zooming:

Deanna Morse Defines Ubiquity at the 59th Ann Arbor Film Festival

ASIFA Central's Deanna Morse, star of stage, screen, and now, ZOOM, was a nearly continuous presence at the 59th AAFF this March - still virtual, but still with international and enthusiastic participants.

The online nature of this and many upcoming festivals allows for increased exposure - visitors otherwise encased in quarantined areas or unable to take on the travel and lodging expense can still participate in a relatively stress-free viewing experience. Don't like a film? Go make some popcorn! Nobody's going to judge you for leaving the room.

This year's festival had a heavy animation presence, and the studied and steadied discipline of creating animation helped create some of the strongest entries among the many films. Even extended documentaries such as *The Annotated Field Guide to Ulysses S. Grant* included animated sequences. There was a sense of nostalgia in many of the entries this year, with either mid-1980s style CGI or frequent use of distressed film, either by source or post-production.

Deanna brought together filmmakers for the post-showing Q and A and coaxed production methods and some performance techniques, while fielding incoming viewer questions in the Zoom platform.

Don't forget the upcoming online festivals for Annecy <https://www.annecy.org/home> - online June 14 - 19, 2021 and Stuttgart - <https://www.itfs.de/en/> - online May 3 - 16, 2021

Upcoming 2021 Midwest Animator's Summer Retreat

Also, keep your eyes out for information on our Annual ASIFA/Central Midwest Animator's Retreat, which will happen late summer 2021. Virtual this year, again. There is a committee huddling together, working on ideas, and it looks exciting, as usual.

Hoo-Hah! - A Comic Compilation Magazine

A pet project of Ron Ery and Bruce Simon, *Hoo Hah!* gets its name from an early entry in the *MAD Magazine* world in its celebration of comic strips of the early 20th century. The current run from Amazon press focuses on the series by J. R. Williams, *Out Our Way*, which was already a look backward when it first appeared in 1922, and even more so with its 60 year run in many newspapers, back when newspapers used to run comic strips. In a single panel format, Williams managed to convey the mood and even the poetry of bygone eras, with a fondness for characters of the wild west. Many of the panels were redrawn from source material found on archival microfilm. It's a great source of inspiration for storyboard composition.

Everything begins with Mad Magazine

Women in Animation Department - with Chuck Wilson

The poem from *Venus en Seide* (1919) titled "I Want You" features a larger, one-page silhouette illustration created by Lotte Reiniger.

*My yearning breaks all walls and dimensions:
I want you! You!
My longing must endure life and time,
I want you! You!*

*And rocks pile up between us two -
I want you! (emphatically)
And I can forgive those who forgive your sins,
I want you! (emphatically)*

*My yearning does not flag at borders nor barriers,
I want you! You!
I mark this in the heart and in your thoughts:
"I want you! You!"*

*And I stumble, my yearning still called out of the grave:
"I want you! You!"
But I want to live, so I have you!
I want you! You!*

Poem by Gustav Hochstetter (1873 - 1944), Silhouette Illustration by Lotte Reiniger (1899 - 1981), Translation by Charles Wilson, February 22, 2018

For more backstories and accomplishments by women in animation, check out Chuck Wilson's *Smudge Animation* blog, where this particular sequence can be found at:

<http://smudgeanimation.blogspot.com/2021/03/animated-women-i-want-you.html>

The Criterion Channel is offering up a rather thorough listing of Lotte Reiniger films in its April broadcast schedule.

<https://criterioncast.com/news/april-2021-programming-on-the-criterion-channel-announced>

Including her feature film, *The Adventures of Prince Achmed*, 1926
and the shorts

The Secret of the Marquise, 1922

The Flying Coffin, 1922

Dr. Dolittle: A Trip to Africa, 1923

Dr. Dolittle: The Lion's Den, 1923

Harlequin, 1931

The Stolen Heart, 1934

Papageno, 1935

The Magic Horse, 1953

Aladdin and the Magic Lamp, 1954

The Caliph Stork, 1954

The Star of Bethlehem, 1956

The Lost Son, 1974

And, rounding up Women's Month in March, and as part of our ongoing promotion of Public Domain material, comes this rather sad tale about a graphic designer and overlooked influence on occult imagery:

Pamela "Pixie" Colman Smith secured her place in the history of Western esoterica in 1909, after she was commissioned to illustrate a new tarot deck by the author and mystic A.E. Waite. The illustrations were instantly iconic upon release, and their popularity was greatly bolstered by Waite's failure to copyright the work in the United States. Now in the public domain, her cards were widely circulated in reprint and re-purposed for other graphic projects. The Waite-Rider tarot style became a stock image of the esoteric and occult in the 20th century.

Before this, Smith began as an illustrator with projects involving William Butler Yeats and Bram Stoker, who had completed a book on the actress Ellen Terry. Smith supported the struggle for women's right to vote in Britain and donated her services for poster designs and toys for the Red Cross during World War I.

In 1903, Smith launched her own arts-and-crafts style magazine called *The Green Sheaf*, which lasted only 13 issues. These beautiful examples are assembled online at archive.org.

"Pixie" Smith, ca 1912

In 1907, photographer Alfred Stieglitz gave an exhibition her paintings in New York at his gallery, generally devoted solely to the photographic avant-garde. Stieglitz was intrigued by Smith's painted visions that came to her while listening to music. The show was successful enough that Stieglitz issued a platinum print portfolio of 22 of her paintings. The Smith paintings that did not sell eventually wound up in the Stieglitz/O'Keeffe Archive at Yale.

Although she continued writing and illustrating, after the 1930s Smith was unable to find publishers, possibly (and inexplicably) due to "changes in public taste." Smith died in her British apartment in 1951, apparently alone, and her possessions were auctioned off to pay her debts. It is likely she was buried in a nearby unmarked grave. Please celebrate Pixie's memory with a Tarot reading and an afternoon with *The Green Sheaf*. (Wikipedia and archive.org)

THE ASIFA CENTRAL SUMMER RETREAT APPROACHETH!

Friday, July 16 through Sunday, July 18, 2021 (AD)

**Plans for a Virtual Experience Moving Apace
Update Your Email or Get Egg on Your Face**

ASIFA Central Board Update

The past several meetings have centered around plans for the upcoming summer retreat, with prospective speakers, technological issues, projects and programs. The ASIFA Central website (www.asifa.org) is being expanded to include links from member and group animation projects, archival photos of earlier retreats, and newsletter scans old enough to have grandchildren. Membership continues in the 30-40 range, the treasury is solvent, and Our President R. Brad Yarhouse is reaching out to members to circulate through the board as the election approaches this summer.

Details of the summer retreat will appear soon!

Well-Read Zoomers - *A Swim in a Pond in the Rain: In Which Four Russians Give a Master Class on Writing, Reading, and Life* by George Saunders
From Penguin Press-Random House: "For the last twenty years, George Saunders has been teaching a class on the Russian short story to his MFA students at Syracuse University. In *A Swim in a Pond in the Rain*, he shares a version of that class with us, offering some of what he and his students have discovered together over the years. Paired with iconic short stories by Chekhov, Turgenev, Tolstoy, and Gogol, the seven essays in this book are intended for anyone interested in how fiction works and why it's more relevant than ever in these turbulent times." - It turns out that it was a pretty popular book among ASIFA Central Zoomers.

Our 48 Minutes of Fame in Australia - Major Awards, labeled “Fra-gee-lay.”

“Dancing Bear is where?”

Four ASIFA Central members had a brief brush with down-under recognition from a misdirected email from the AniMate Animation Festival. Originally, it indicated that their Film Freeway submissions had been selected for showing, but a few (48) minutes later, an email corrected this apparent ubersight. Nevertheless, there were recognitions posted for the contributors:

Deanna Morse - *Recipe for Birds* - nominee

Melissa Bouwman - *Connecting* - finalist

Brad Yarhouse - *I Carry the Sun* - quarter-finalist

Jim Middleton - *Compilation 2020* (including *Waiting at the Church*, a separate entry) - semi-finalist

The members celebrated their recognition with a Vegemite sandwich while admiring photos of Captain Kangaroo. (We note that the AniMate festival in Australia is a volunteer-run and amazing celebration of the international scope of animation. We’re appreciative of their industry and management of many successful festivals, but comforted in knowing we’re not the only ones to prematurely, and accidentally, press “send” on occasion.)

Little Nemo in Pop Music

A discussion of Nemo during an early April Zoom experience brought back memories of Genesis’ *Scenes from a Night’s Dream* from their album, “And Then There Were Three” (1978), and Tom Petty’s music video *Running Down a Dream* (1993), with some familiar images incorporating the singer into a Winsor McCay universe. 1993: that was a quick 28 years. Whoosh!

Chuck Wilson’s Germanic Corner

Here is Gustav Hochstetter's *Your Little Ear* with its accompanying illustration by Lotte Reiniger. I'd like to thank everyone for visiting the *Smudge Animation* blog to appreciate a little poetry and art from 1919 and for your patience with my imperfect translations. For those who are interested in this subject and would like to read more of Hochstetter's poems with an accompanying silhouette illustration, see the blog post from a presentation given at ASIFA Central in 2018 (<http://smudgeanimation.blogspot.com/2018/09/animated-thoughts-asifa-central-retreat.html>). There I cover a little about Hochstetter and Lotte's history, the translation process, and the poem *One Must be the Most Beautiful*.

Your Little Ear

Your little ear, the ultimate jewel,
Has no place for regulations nor orders.
Entry is strictly forbidden to the nobles;
Your ear hears what it likes to hear.

And yet it opens up the very best round
So nice and kind to my mouth:
For wishes, sparkling like champagne foam,
There is room for a thousand kisses.

Poem by Gustav Hochstetter (1873 - 1944), Silhouette Illustration by Lotte Reiniger (1899 - 1981), Originally published in *Venus en Seide*, 1919,
Translation by Charles Wilson, August 28, 2020

Festivals - Panels of GLAS – Recruiters and Production -Notes typed by Jim Middleton

GLAS 2021

Panel One: How to Get the Gig

Brooke Keesling - VP - ASIFA Hollywood, Bento Box
Camille Eden - Nickelodeon - Development and Outreach
Chris Leahy - Sony Pictures Animation - Preproduction Pipeline
Camille Leganza - Netflix Animation - Story and Director Position Recruiter
Robin Linn - Activision - 32 years in the business - gaming
Terrence Masson - SVA (School of Visual Arts) - moderator

In comparing the two panel discussions that were part of the GLAS festival this April (5-16, www.glasanimation.com), it should be noted that the recruiters are the keepers of wisdom, with decades of experience among them. This makes perfect sense, since they must quickly detect guano on behalf of the companies they represent, and they have heard it all. In contrast, the ones who have to bring projects in from the outside are all a bit younger and filled with that level of enthusiasm seen in a new realtor who will invest in YOU to SUCCEED!! – with, of course, enough street experience so they, too, can detect the guano. (One suspects there's a lot of guano in film production. Could *Hail, Caesar!* have been a documentary?)

Regardless, what could have been a couple of dry discussions turned out to provide some of the high points of the GLAS festival, which already had many high points to begin with. These teams comprise a unique sodality in the profession - they know what is needed to produce an amazing film and can find the “daisies in the weeds” to get it accomplished. Brooke Keesling can even provide fiberglass hamburgers! And as if to prove their commitment, Allison at Sony has been sequestered in her garage during Covid, and Katie at Netflix is in true need of some books and posters for her garret office. (I'm thinking of starting a box. Hope she likes ViewMasters.)

The Notes, How to Get the Gig:

Recruiters have been in the business for decades, and are often only a degree or two away from having worked with each other. “We want to see the spark of the artist's own aesthetic.”

There is a surge of interest in animation from recent graduates at a time when it is becoming harder to find experienced talent. They find that even experienced animators continue practicing their craft, especially if they have been associated with a long-term gig (ie *The Simpsons*).

It's a great time to be a storyboard artist - they're needed in nearly every form of production, not just in animation.

Don't make a tame, safe portfolio. “I want something to scare me a little bit.” And of portfolios, keep it updated. “A red flag for me is getting a portfolio with the same material I saw in it six months ago.”

After your initial encounter, only reach out to recruiters when you have new work to show them. Show that you have read their notes about your portfolio - address and correct any shortcomings that were noted, and then be thankful, not defensive, for their input.

Clean up and streamline your social media presence (better get rid of the *MySpace* account).

Sony Pictures
Animation

If you're wondering about pay scales, don't bring it up in the first encounter. See the Animation Guild site (www.animationguild.org) for pay rates. Some of them are pretty sweet.

Find and express something memorable about yourself - you must rise above hundreds of others - be a diamond among the lumps of coal.

If you have started a film, *FINISH IT*. Showing you can finish something is just as important as knowing the software. Network, network, network, and then mentor, mentor, mentor - once you are *in*, use your connections to *bring in* others. Show that you give as well as you take. Inspire tomorrow's animators. Your face could be on a stamp someday. (I heard they're going to require stamps on email someday - hey, I heard it on the internet, so it must be true.)

Don't get an MFA unless you plan to teach. A PhD in animation won't have your squash and stretch be any squashier or stretchier. In fact, it could be sclerosed.

Regional, identifiable animation styles are emerging with their international search for talent. During a discussion, offer *critiques* instead of *opinions* about films or styles.

Follow recruiters on social media with your *art* accounts - they aren't really interested in your cat or vacation pictures. Create a unique social media account for your artwork - make it searchable - and provide your current contact information *everywhere*.

Get a proper email account (not a "4204ever" type) that is ideally just your name and a zipcode @whatever. *If it takes more than three clicks to access you or your art, you're passed over.* Have a friend try to find you on the internet, just to check. (Don't try to find yr hmb1 typst on the internet, by the way - Google just sends you to my cousin Kate, and our families aren't talking these days)

The average first look at a portfolio is five to ten *seconds*. If you are trying to show off multiple talents, arrange them by discipline on your website, with separate tabs.

Have a blog? Get rid of it. "I'm so glad we are done with the Blog Era." It's so 2012 - and we all know the world ended that year and took every blog with it.

Make yourself and your art easily shareable - if you change your password access to your art, that's another click and another obstacle. And these folks *circulate*.

"If you have applied to us, we have your material." Recruiters cannot immediately respond and often review portfolios, not by the dozens, but by the hundreds.

"It's the community that we fall in love with, not the project." If you get the job, think where you'd want to be in three years. On the next project? It's nice to have an existing "family."

Recruiters are people, too. "Don't stalk us! Don't follow us into the bathroom! We all have horror stories." Timing is important - you may not be applying when there is an opening in your particular field or expertise, but there may be an opening later. However, don't shotgun the jobs page, because they can see you are doing this.

"We've all been through the wringer at some point in our careers."

"The first job in the industry is often the hardest to get. One in, start networking, pull in others. Be nice."

"If you are not nice, you will be remembered for it."

Animation is a very competitive field now, in spite of the increased opportunities. Remember, *"there are more professional football players than professional animators."*

Be resilient and flexible - the market is always changing.

"We will judge you by your worst work." Edit out your "filler." Get proper feedback from people other than your partners and families.

Resumes are reviewed differently, depending on the job title - if it's an artistic position, they focus on the art and project, not necessarily the spelling. However, if it is in production or along a management path, your resume must be pristine. Cover letters? Some read them, but the consensus is expressed with the statement, **"I can't remember the last time I read a cover letter."**

Don't say "email" is a software skill. That's just being silly. (Tell them you snail mail everything written with a quill and use four cent stamps. That may not help, either, but you'll be remembered.)

Tell them of your experience with *Harmony* (from ToonBoom), *Storyboard Pro* (also ToonBoom, includes sweet animatics), the *Hugo Suite* (for meeting organization), *Shotgun* (Adobe production tracking), or *Houdini* (node-based 3D procedural software for project sharing).

On your LinkedIn site, don't just say you worked at a studio. Say WHAT you worked ON at that studio. **"You could have been a janitor for all we know."** So don't tell them "Disney, 1937-1940," say "I brushed the blush on *Snow White* and curled Stokowski's hair for *Fantasia*." It's just an example. It's late. I'm getting punchy.

Sometimes studios will use a temp service - sometimes, aspirants work their way into the pipeline in that manner. And sometimes aspirants just collect random stationery on the first day and are never heard from again. This is considered naughty behavior and is remembered.

Panel Two: Pitching the Project

Jelena Popovic - NFB - English division - Montreal
Allison Mann - Sony Pictures Animation - VP of Creative Strategies
Katie Mullin - Netflix - Feature Animation Creative Team
Asalie Tanha - Cartoon Network - Director of Development
Kari Kim - Nickelodeon - VP Development
Sean Buckelew - independent animator - GLAS programmer - moderator

The Notes, Pitching the Project:

When pitching the project, consider the studio - do your research! For example:

NFB - there are 11 sites across Canada, the productions are mostly short, auteur-driven, art-house directed films. "Art with a social purpose," not just a PSA. Cats in your office are allowed (Jelena had hers).

Nickelodeon - the current environment is that "The Old Nick" is "The New Nick." They're relaunching the 5 - 8 minute shorts directed at 6 to 11 year olds.

Netflix - feature animation, they're new! Netflix seeks a "4 quadrant audience." (Male/Female/Under 25/Over 25)

They are most moved by personal, emotional stories. Watch *Klaus*.

Sony Pictures Animation - Features and television. They consider themselves "platform agnostic." Feature films are in the range of PG-13 to R, an "8 to 80" demographic as they evolve the medium. They want to move into the "big kid" and live action spaces of entertainment. **"Why animated? Why not animated!"** You'll hear birds chirping in the office. The sky's the limit, so bring a visual strategy, and expect tons of energy.

Cartoon Network - the 6 to 11 year old audience, and family space, while seeking independent voices

When reaching out to make the pitch, the first thing is *whoa, thar, pardner!* Don't make the pitch in your first email. With your initial contact, indicate you have *something* to pitch (and please don't make it Sasquatch or cats. Really. They're up to their glottis in Sasquatchery and feline frolics). With pitches, you're treading onto legal territory. Unsolicited pitches are *not accepted, especially at festivals and ESPECIALLY when they're in the middle of a conversation with someone else.* You'll get entered into a release process, and *then* you get to make the pitch.

During that first pitch presentation, remember –

- to genuinely seek understanding the process, rather than focus on getting this brilliant idea of yours in front of them
- to be mindful and thoughtful as you engage with these gatekeepers who work to flesh out your idea
- that some studios (ie Netflix) do not have a particular style. Projects there are creator-driven, and they'll want to know how you plan to move through your production, and especially in the case of feature animation, whether you can persevere for up to three years of the production process; something developed from a deep personal space will keep the creativity moving
- they want to know about you, what vision you can bring to the project, and that much comes to them by word-of-mouth in this tiny community of professionals
- some studios (ie Sony) want even the most far-fetched tale to have some grounding in reality - you may be talking aliens, but can you trace it to something set up by two brothers in 1994 Schenectady? Homework!
- to remove your own barriers for presenting your ideas - believe in manifestation (want to be a director? Then *direct! You're now a director!*) - don't wait to be "discovered." There was only one Lana Turner, and drug stores aren't what they used to be.
- that "doing the deal" is not instantaneous - it can take 2 to 30 months to get through the entire process, but along the way, you'll have support. If you're proposing a series, are you ready to outline 100 or more episodes? Can you create backstories for each of your characters? Remember - *The Simpsons* is in its 422nd season and has been renewed for another 422.
- to be flexible with the trends in the industry (remember when "Happy Tree Friends" and "Frog in a Blender" were pretty hot tickets at the dawn of the internet?)

A final note about the amazing NFB (National Film Board), aka ONF (Office National du Film) - They are unique in Canada, as they are public servants in this government-run public agency. Everything must be transparent there, everything is documented via email, and *any Canadian has access to this creative service*. (My favorite 1980s anecdote is that a Canadian could walk into an NFB retail store, request a film on VHS, and if they didn't have it on VHS, they'd find it in their national library, make a print from the stored negative if necessary, and then transfer it to VHS and send it off.) That doesn't mean automatic approval, but it makes it very nice to be Canadian.

While up to 30% of the NFB productions are internationally co-produced, it is only with those countries who have signed treaties with Canada for co-productions. And of course, which North American country has *not* signed with Canada (or Mexico, for that matter) for this? Yeah, you know who. Nonetheless, they follow the basic What (synopsis), Why (the director's statement), and How (is this unique from a non-NFB project) of an initial pitch. *O, Canada!*

Inspirational quote from Nick Cross at GLAS:
"We're not going to pay you a lot for this, but we're giving you a ton of freedom."

(at least he wasn't told, "Think of all the great exposure!")

Shameless Self Promotion Department - Links and Projects of ASIFA Central Members A New, Ongoing Feature

Steve Leeper

He has two sites for the surfers to enjoy - www.jsleeper.com (Featuring the best use of toast since Heywood Banks!) and his Br. Thomas film site - *The Temptation of Brother Thomas* – at <https://jsl-studio-animation.webnode.com/brotherthomasfilm/>

Artist's statement: "I wrote the Br. Thomas Treatment back in 2002 but didn't really begin work on development until around 2010 when I picked up a grant from the Lily Foundation to complete the boards. This allowed me to bring Michael Spooner on

for visual development. Then in 2015 I picked up the Emeritus Grant, combined with a sabbatical leave, and I was able to continue with picture development, animate three scenes and produce a short promotional teaser for the film. I've been pitching the film fairly consistently over the last two years and am currently working with the development folks at CMU to find a financial partner to help us start full, final production. My hope is to have the film completed by 2026."

And YES! Steve is fully tenured at CMU as of March, 2021!

From Promotional Teaser Reel

Christine Veras Martin

I have created a new Experimental Animation Lab in my University called *experimenta.l*. Here is its page: <https://atec.utdallas.edu/content/experimental-animation-lab/>

We have a very active Instagram account:

https://www.instagram.com/experimental_animation_lab/

And I have recently started curating articles about Animation on Flipboard, for the magazine called *Flickering News*:

https://flipboard.com/@christineveras/flickering-news-rleqpooz?from=share&utm_source=flipboard&utm_medium=curator_share

And the other site is called *Animation in Context* that I share with the UK professor Johny Byrne:

https://flipboard.com/@johnbyrne2020/animation-context-gun0kk5sz?from=share&utm_source=flipboard&utm_medium=curator_share

Deanna Morse

Anizoomations and New Website - Deanna has reworked her Deanimation site, incorporating CoVid-ZOOM inspired stop motion exercises inspired by stopping all motion and Zooming during CoVid.

<http://www.deanimations.com/services/> - includes the amazing award-winning film *Connecting* (2021) directed by, and with, Melissa Bouwman. Her namesake website continues apace, and there are always surprises waiting on her YouTube and Vimeo channels.

<http://www.deannamorse.com/Site/home.html>

<https://vimeo.com/deannamorse>

They're head-over-heels about animation!

But Wait!

There's MORE!

Chris Sagovac

Chris has a comics and animation solo show running now online and in the gallery. On exhibit now (since March 18) to May 14, 2021 with St. Louis Community College at Wildwood - Gallery of Contemporary Art - stlcc.edu - and <https://stlcc.edu/campus-life-community/cultural-arts/art-galleries/wildwood-art-gallery/ww-chris-sagovac.aspx> - featuring the “Stupendous! Fantastic!”* short film *Chanbaragogo*.

Chris Sagovac is an American independent cartoonist working in animation, comics and game art. He received his Bachelor of Arts in Media Communications from Webster University in 1997 and his Master of Arts in Studio Arts with emphasis in Alternative Media from Webster University in 2005.

* unsolicited testimonials

Gary Schwartz

“I see peepholes everywhere...”

The perpetually animated Mr. Schwartz has provided connections a pair of his recent films:

Carny Obscura - Stop-Motion film created in tandem with the 150th Anniversary of Cedar Point, Sandusky, Ohio. <https://www.youtube.com/watch?v=C-mUv0Ck6DE>
The Crown Nobody Wanted - An Animated “exquisite corpse” video made by students at the Tumo Center for Creative Technologies in Yerevan, Armenia. The on-line production was taught from 5,876 miles away - <https://www.youtube.com/watch?v=cNhy897qAMU>

Chris Sullivan

Chris continues to work on his ambitious feature *Orbit of Minor Satellites*, which is moving well for a 2022 release. It remains a very Chicago film, both for actors and animators. Updates are at his website, <https://orbitkickstart.com/>

Public Domain Update - 1925 is up for GRABS

Discovery of the Month - *The Pleiades* from 1910 - at Project Gutenberg - <https://www.gutenberg.org/files/56423/56423-h/56423-h.htm> - a delightful and brief bit of printed ephemera, with poetry and watercolors and Art Nouveau

1925 Animation - *Alice the Toreador* - the PD version is at Youtube - https://www.youtube.com/watch?v=JEn6a_TjGC4 and *Alice Solves the Puzzle* - the PD version at: https://www.youtube.com/watch?v=4-jqH_oAyWI (do not, I repeat do not use any “Alice” that has been repurposed by the Disney company. They create a slightly different version of the original, with different aperture framing and a new soundtrack, thereby creating a “new copyright” on a PD product).

“The awfulest thing that ever vet wuz ” -
from the *Pleiades* of 1910

The Public Domain Update *Continues* - still with 1925

The Lost World - 1925

The Lost World - Willis O'Brien stop motion - PD version at -

<https://www.publicdomainreview.org/collection/the-lost-world-1925>

Alice the Toreador - 1925

Felix Trifles With Time - 1925

Felix the Cat - examples from 1924-25 at -

<https://www.youtube.com/watch?v=b95azHKrUwY>

And for another film version of *The Great Gatsby*, perhaps this can be the year for someone to *finally* do it right!

And, finally, 93-year old Tom Lehrer has opened up his entire song catalogue for use in the public domain. Here is his statement on www.tomlehrersongs.com *His songs cry out to be animated!*

I, Tom Lehrer, and the Tom Lehrer Trust 2000, hereby grant the following permission:

All the lyrics on this website, whether published or unpublished, copyrighted or uncopyrighted, may be downloaded and used in any manner whatsoever, without requiring any further permission from me or any payment to me or to anyone else.

Some lyrics written by me to copyrighted music by others are included herein, but of course such music may not be used without permission of the copyright owners. (The translated songs may be found in their original languages on YouTube.)

The music of all the songs on this website that were written by me may also be downloaded and used as described above.

In other words, all the lyrics herein and all the music herein that was written by me should be treated as though they were in the public domain.

In particular, permission is hereby granted to anyone to set any of these lyrics to their own music and publish or perform their versions or parodies or distortions of these lyrics without fear of legal action.

(There is no legal way to unilaterally transfer a song into the public domain, so this disclaimer is intended as an end run around the copyright laws.)

Note: This website will be shut down on December 31, 2024, so if you want to download anything, don't wait too long.

If you are unfamiliar with the satiric genius of Tom Lehrer, check him out on YouTube. After 35 years of practice, your humble typist *almost* knows the entire "Elements Song."

*And, in case you've been sleeping well lately, a reminder that *Love Death + Robots Vol. 2* debuts on Netflix May 14.*

Profiles in Animation: Michael Long

The monthly host of our coffee break Zoom meetings has some mad skills

The dapper master of men's minds

When a resume includes magic, fencing, and animation, one can presume a rapier-like wit. With experimentation in cinema magic without knowing about Georges Melies, or stop motion with 8mm - regular 8mm - film without the benefit of a single frame button, one can presume a healthy combination of imagination with a nascent understanding of mechanics. And when one can prompt the random comment from Tom Lehrer of, "Ah, as time passes, the more I find myself living in the subjunctive," an easy presumption can be made of a truly unique life, well lived.

The collegiate man of mystery

So it is with Michael Long. An assistant professor of the Electronic and Photographic Media Department at Webster University in St. Louis, Missouri, where he both attended and now serves, Michael

continues to distinguish himself across several disciplines, any one of which could qualify as a full-time distraction of the work-a-day whorl'd that surrounds us.

In addition to all this, he advises 27 animation students and serves on multiple committees and task forces at Webster - and contributes to ASIFA Central film projects, *and* hosts a monthly series of Zoom "coffee breaks," open to our chapter members, where discussions range from UPA styles to Russian short stories.

He has Type O Emulsion

In the late 70s, a time when animation was often a self-taught or studio trained discipline, Michael was able to build his own animation stand, learn the basics from a fellow student and animation instructor Carl Willat at Santa Cruz, and then return to St. Louis to split his time between a local animation studio while assistant managing a local movie theater. *ET* turned theater management into a huge part of his life, so animation had to take on an "independent" status. A guest lecture led to an artist-in-residency to teach animation to elementary school throughout Missouri, and ultimately, a position at Webster, where he has served as *spiritus loci* ever since. When not training students who have gone on to work at Disney, Bento Box, and Insomniac Games, Michael continues to create short films,

whether for KETC TV's regional chat show *Donnybrook*, or, with ASIFA Central in "Potluck" and ASIFA Hellas' "Happy New Year 2021!" His current independent work-in-progress, *Island Hopping*, should be ready later this year.

*Dressed for Fencing or Surgery
- with Stefan Stratil of Vienna*

Opening for KETC's Donnybrook

His use of magic ties in well with his teaching style (animation *is* magic, after all), and Michael's interest in fencing began as high school drama training. That grew under the guidance of world champion foilist Charles Selberg, who taught him how to see things in motion, observe himself and others, and practice deception with fake actions (again, like animation, creating an illusion). He now teaches it as a one-credit class at Webster, "more as a zen martial art, but I disguise it as a sport."

Conversations come easily during our Zoom discussions, with no limit on subject matter. Michael Long brews a good carafe of virtual coffee.

ELECTIONS AUGUST 6TH IN AN EMAIL NEAR YOU!

Welcome to ASIFA Central! We are the Midwest -US chapter of ASIFA, the oldest organization of animators in the world. Our chapter was established in 1975. While our community is separated by our far-flung geography, we are united by our love of animation. Our diverse membership is a blend of independent animators, animation artists, professors, seasoned pros, students, and fans of the art of animation.

MEET THE CANDIDATES FOR THE ASIFA CENTRAL BOARD IN THEIR OWN WORDS

Elections are coming up, with the new Chapter Bylaws finalized and available on our website, www.asifa.org. The following candidates provided their requested brief biography as a prelude to the electronic ballots coming to active members *very soon!*

(Arranged alphabetically by last name)

Julie Goldstein

I see the art form of animation as providing the opportunity to conjure up the energy of life through time based expression. This expression can be perceived and passed on to the minds of others. It is a pure expression of the life force and provides the opportunity to visualize that which cannot be seen in the physical world.

I have been on the board of ASIFA Central since 2016 and prior to that was the President of ASIFA

Colorado from 2012-2015. I see ASIFA's mission as core to my engagement with the art of animation as a practitioner and fan, providing the opportunity to spread to the love of the art and the process of creating. As a member of the organization and Board, I embrace my leadership role in regards to assisting in maintaining the website, providing workshops on various evolving technologies, moderating guest artists at our retreats, hosting holiday stop motion productions at my house, participating in the Anijams and International Animation Day collaborations, as well as working to showcase work in local venues, such as with Project 1. In the future, I look forward to building on my leadership skills by developing new workshops, facilitating collaborations as well as expanding our online and local presence in order to amplify our outreach and grow our membership!

Julie Goldstein

Stephan Leeper

I am submitting this brief letter to express my strong desire to continue as an ASIFA Central Board Member "at large" for the foreseeable future. ASIFA Central plays a vital role in connecting animators in the greater Mid-West and I have benefited greatly from the friendships, projects and camaraderie that comes from being part of this close-knit group of animators. My contributions as a board member "at large" over the past four years stem from a deep connection to ASIFA's core mission to reach across cultural barriers and to use animation to help celebrate our shared humanity. A commitment that has played out in my willingness to run workshops, participate in retreat planning, and general involvement in many ASIFA activities over the years.

Stephan Leeper

Given the current nature of my responsibilities at CMU, a sole tenured faculty in a fledgling Animation BFA program, I am reluctant to take on any overarching ASIFA responsibilities at this time. That said, I am more than willing to continue in my current "at large" support role, participating in regular meetings, planning for events, and taking on practical (and technical) responsibilities as my schedule allows.

Thank you for your time and consideration.

Michael Long

Michael Long

I've been an ASIFA-Central member for 2 years. From my first retreat in 2019 I knew this was a talented, nurturing animation community. I volunteered for the Spiritus Mundi "Potluck" project last year, which afterwards led to my hosting monthly ASIFA Zoom "coffee breaks" to maintain our friendly, collaborative group. The "breaks" provide time to play, exchange ideas, share projects, and find inspiration among friends. If elected to the board, I'll continue to host the Zoom breaks in that spirit while encouraging more members to join in. I'd also like to help improve our connections with other ASIFA chapters here and abroad. The goal is to strengthen our community and use animation whenever and wherever we can to further the mission of ASIFA. Thanks!

Jim Middleton

When informed that this note required a single pair of graphs, I was rather stumped, since a pair is not a single, but a single can somehow be a pair? This is why I enjoy my two-volume dictionary, and even more, enjoy a couple of typewriters always polished and at the ready for whatever textual taxonomical task is placed before these digits. Of course, the actual request was for a paragraph, so up went the dictionary and down came Strunk and White. Years of typing prescription labels, correcting monstrous errors by budgetary consultants, and reading notes spilled upon Post-Its have prepared me for a secretarial position at ASIFA Central, where I delight in assembling at least a quartet of newsletters a year, now in Living Color since digital distribution negates the need for inkish behavior. Hi. My name is Jim Middleton. I have retired the "Apothecary" portion of my "Animating Apothecary" shingle. It has been an honor to serve as ASIFA Central's Secretary for three years now, helping background organizing when needed, serving as liaison among the many international chapters when possible, and enjoying it so much that my smile will outlive me by seven years. Among my future goals is an expansion of the communication process among the US and international chapters and the development of an archival network of animation fans and collectors, including material in the public domain. It is my sincerest belief that information not shared is lost.

Jim Middleton

Tracy Miller-Robbins

I've taught all forms of animation in a variety of settings for 25+ years, while also exhibiting my animated installations/films in a variety of venues around the world, and doing volunteer animation/storyboard projects when I can. I am passionate about all forms of animation, but in particular that which breaks boundaries and conventions, that which innovates. In workshops I make animation accessible to everyone, adjusting to their interests and skill levels. I believe in supporting other creatives and sharing resources, creating a diverse supportive community, and to this end I have published a blog about festivals with no entry fee, because I don't want to support a world where the best voices go unheard. It is this attitude and these interests which I would hope to utilize as a member of the ASIFA Central board, a group I have felt welcomed by, almost instantaneously. I would like to see ASIFA Central grow to include more animators and have more events, and coming out of the pandemic, I would love to facilitate these, both online and in person through community workshops, screenings, exhibits, projects or get-togethers.

Tracy Miller-Robbins

Deanna Morse

Deanna Morse

I wish to remain on the ASIFA/Central board. I have been active with ASIFA for a couple of decades, locally serving as past-President, membership, treasurer, and internationally as a V.P. for several terms. My interest is in helping to support and build our animation community. I will work to assist with our existing programs (IAD, retreat, etc.), and to help us share information and resources nationally and internationally with other groups, animators and ASIFA members. Although I now live in Oregon, my heart is still with the Midwest animation community.

Chris Sagovac

I'm Chris Sagovac, Associate Professor of Animation and Chair, at Webster University. I am a current board member and Social Media Officer. I have a vested interest in growing and being a part of the leadership of our vibrant animation community, spanning the Midwest. I have always enjoyed bringing people together and seek to broaden our connection to the region. Spanning now from Michigan to Texas, there are so many cities, institutions, and artists that could become a part of the ASIFA Central family. I wish to submit my name for consideration to serve on the board.

Chris Sagovac

Bob Swieringa

Hello! I am Bob Swieringa, a member of the ASIFA Central Board since 2017. I am an assistant professor at Grand Valley State University in Communication Studies but teach in film and animation as well. As a Member-at-Large on the Board, I contribute as my skills allow on projects undertaken by the Board. The majority of these contributions have been to help organize our annual Retreats, and to assist in/undertake writing projects. For example, I assist the Secretary in writing the Newsletter and in creating our report of the annual Retreat. I also help to promote International Animation Day by interviewing the IAD poster creator (the previous two and this year's), writing releases describing their ideas and process. As well, I help to promote ASIFA and its membership (such as through a history of its annual prize laureates). I seek to remain on the Board to continue offering support and assistance to

the goals of ASIFA Central, particularly in projects to help promote ASIFA and its membership. For example, I would like to develop a “Members’ Corner” for our Chapter Newsletter/web site which would highlight in turn the work and practice of our members individually, so we can encounter and appreciate the variety of talent, expertise, and expression embodied in our membership. Thank you for your consideration.

Bob Swieringa

Christine Veras

Christine Veras

I'm Christine Veras, an international member of ASIFA Central for the past two years. I'm originally from Brazil and currently teach History of Animation and Experimental Animation at the University of Texas at Dallas. ASIFA Central's strength lies in its friendly and supportive community. As a prospective board member, I would like to help develop further collaborations within our membership, and between us and academia, including institutions, faculty, and students passionate about animation. Creating events, special interest groups, and fostering opportunities for discussions and exchanges are my goals to reinforce our chapter's strengths. Thus, helping to increase its visibility nationally and

internationally while boosting and animating community engagement, getting us closer to our collective plan to "try to take over the world" (Brain, 1995) through animation. Cheers!

Gretchen Vinnedge

As an animation lover, creator and teacher, I have had the pleasure of being a member of ASIFA Central USA for many years. Every year, I look forward to working with youth as part of the annual Animation Workshop Group, as well as teaching workshops to students of all ages. I have been on the board for the past 6+ years helping to organize chapter events such as International Animation Day and hosting many Summer retreats and other workshops at the Community Media Center. I would love to continue serving on the board helping to bring animators together through collaboration, workshops and the love of animation.

Gretchen Vinnedge

Briana Yarhouse

Bri Yarhouse

I have had the honor of serving on the ASIFA Central Board for about 6 years and as president of ASIFA Central for the last four years. My goals as president were also my passion as a board member; to build community over a large diverse area. I have worked hard along with the rest of the board to create events such as our physical film sharing events at the Wealthy Theatre in Grand Rapids, collaborative projects such as the Ani-Jam's that we have done for the last several years including our participation in Spiritus Mundi: Animating the World last year. I've helped along with other board members spearhead our annual retreats including the last two that were

done through Zoom. My goals are to continue to build inclusivity, opportunity for community through digital tools, collaborative projects, and in person events. We are spread out throughout the Midwest and I believe we need to actively build community to help foster and support not just the art form of animation but our creativity as animators.

Welcome to ASIFA Central! We are the Midwest -US chapter of ASIFA, the oldest organization of animators in the world. Our chapter was established in 1975. Because we are volunteers, we ask our board members to take on some of the responsibilities such as social media coordinator, retreat co-organizer, doing web updates, ani-jam facilitator, party planners and more. Board members are the front line for our Midwest animation chapter and are in touch with the international board.

THE 2021 ASIFA CENTRAL SUMMER RETREAT

July 16 -18 - a Virtual Experience

from the dog-eared notebooks of **Bob Swieringa** and **Jim Middleton**

Gretchen Vinnedge provided the most delicious of virtual cakes for this year's retreat

Friday, 7/16:

That collection of shorts from OIAF. Great, varied collection of shorts, all interesting to view. Brought to us via the persistent generosity of the Polly Wolly Doodlers. Once the link to the films became available, attendees retired to watch them independently. A lively discussion followed that as participants reconvened to share reactions and ideas. It was a wonderful beginning for the Retreat, immersing us collectively even though we were geographically separate. The event set the tone well for the weekend.

The Ottawa International Animation Festival generously provided us with ten "best of" examples from their 2020 selections, in addition to making virtual attendance at this year's festival available to ASIFA members at a discount. These films ran the spectrum of brief whimsy (*Ma Mer à Boire*, a stop-motion dream where the bed becomes a living beach), absolute surrealism (*Pà kis Panelom!*) surrounding an apartment complex, to life-sized styrofoam (KKUM). *Mor*

Visste Ingenting ("Mother Didn't Know") was part of a larger project that made use of five-foot sets and elaborate puppetry. All of the films possessed some level of aesthetic uniqueness.

ASIFA discounts await members!

This composite can be created during a brief workshop? Astounding. (Photo by Deanna Morse)

Saturday, 7/17:

Retreaters regathered resoundingly on Saturday for the main day of the Retreat.

And resounding it was! Julie Goldstein was able to, within an hour, walk us through the mysteries of Adobe Aero and Character Animator, with a taste of Miximo, and had us using this suite of products to create real-time visual integration which can then be adjusted in Premiere or as a motion capture tool to create character movement from a massive library of examples. *(I had just experienced some VR games before the retreat, and I gladly profess that making these environments is a whole lot more fun than merely playing in them!)* The Adobe suite of programs is definitely robust and expanding with several of the products being extremely sophisticated even in beta mode. *(And it gave me the opportunity to split an infinitive! Mrs. Rutledge would be sooooo disappointed!)* For more info on the software – <https://www.adobe.com/products/aero.html>

The second workshop, “TP Animation,” was hosted by Michael Long and Melissa Bouwman. This was a lively workshop presenting techniques and ideas for animating all that excess tissue gathered during the previous year. After examples and guidelines (additionally provided on a handy handout), participants each set to work on our own “masTPerpiece.” When completed, we uploaded our shorts and Melissa tirelessly wove them together for our later viewing. It was a wonderful and inventive workshop, helping to get creative electricity sparking among us – a superb outcome and goal for the annual Retreat. The “how to” portion of the TP workshop, with the emphasis on “Stop Motion Studio” is a supplement to this newsletter!

With enough TP, you're never out of scratch pads

After a break, the sparks continued with a series of Lightning Talks from participants who volunteered to share their current and future creative work, their various projects with students and communities, and their discoveries of animation material that helped to fuel them during these isolating days of the pandemic. It was great to behold the ideas, activities, and creativity being undertaken by members, even under very limiting circumstances. Again, this reminded me of the importance of our chapter, and the involvement of its members in myriad manners.

Chris Sagovac gave us a walk down memory lane with his 16-bit PISKEL demo. These bouncing balls have edge.

Jorgelina Orfila gave a presentation on *Animation as Therapeutic Practice* through the *Animation Research Gang* (<http://www.animationduo.com/arg.html>), where stop-motion animation facilitates art therapy, using tactile experiences with available material to express personal narratives in one-minute personal masterpieces. Their program in Lubbock, Texas, continues to grow annually.

Frame from “Time Passing : Passing Time”

Deanna Morse, Gretchen Vinnedge, Suzanne Zack, and Jim Middleton, the “Polly Wolly Doodlers” discussed their animated ArtPrize project, *Time Passing : Passing Time*, appearing at Grand Rapids’ Water Colors Aquarium from September 16 - October 3. (Entry 70766)

Christine Veras described her *Experimental Animation Lab*, with the credo, “Come Experiment with us!” - and be *experimena.l* ! WWW.aggie.io was presented as an online, collaborative painting.

Michael Long gave a progress report on his dreamy, aquatic short film, *Island Hopping*, a metaphor for life being the journey, not the destination.

Deanna Morse gave a breathlessly paced overview of the concept of *The Exquisite Corpse*, how Renga begat Haiku, and her recent series of projects inspired by the endless number of Zoom meetings being held during the pandemic. *Anizoomation* has absorbed large portions of her bandwidth time, creating fun images with fellow animator Melissa Bouwman.

Chris Scott (<https://orrinscott.blogspot.com/>) had *Stuff to Share*, from Spike and Mike, to the Orange Years at Nickelodeon, to *Tommy Stathes Cartoon Carnival*. His library is a phenomenon unto itself.

Jim Middleton showed the progress on his short film, *Seule Töd*, stitching together about seven minutes of the 80% completed film. Christine Veras noted that, assembled, it’s “making sense now.” Jim asked her to “please explain it to me, someday.”

Gretchen Vinnedge

We broke for dinner, a virtual “going out” compared to previous Retreats when we have gathered in 3D. But there was plenty more online for us in the evening to anticipate. Evidently forgoing sustenance, Melissa stitched together our TP animations into one film for us to enjoy. It was wild! Colors, shapes, movement in such varied energy on what can be seen as such a humble medium. A wonderful reminder that the life animation brings to us is limitless in form and presentation.

With our eyeballs primed, we turned to the last event, one that truly emphasized to me the “family” nature of this year’s Retreat: an evening of members sharing animation that they love, are amazed by, are creating, find impactful, - in short, that somehow stands out and connects to each who spoke. It was a true mix highlighting the personal links we create with animation; a joy to hear among our colleagues.

Christine Veras shared her thoughts on “persistence of vision” through Dana Sink’s *Power* from 2018
 Michael Long produced the UPA classic, *Rootie Toot Toot* from 1951 (https://www.youtube.com/watch?v=EE8_ddz0XvI) definitely not an animation for the matinee crowd, as an example of innovation with limited resources
 Bob Swieringa chose the found-foam production miracle from 2010, *The Eagleman Stag* (<https://vimeo.com/41756240>) for his moving animation moment
 Deanna Morse directed us to a few moments from the fastidiously created short, *Circular*, by Páraic McGloughlin, featured recently at the AAFF. McGloughlin must have external hard drives stuffed with visual material.
 Brianna Yarhouse chose the striking graphic design of Julia Pott’s *Belly* as a personal favorite, a Sundance festival choice as well from 2012
 Jim Middleton expressed his appreciation to John Canemaker, Elfrieda Fischinger, and William Moritz for their 1977 appearance on *Camera Three* - restoring his enthusiasm for animation through Fischinger’s *Studies* and showing him that, even with spatula in hand, there is a reason to get up and be thankful for every day. (John Canemaker archive article at <https://www.awn.com/mag/issue2.4/awm2.4pages/2.4canemakernyu.html>) (Fischinger appreciation at (https://animatingapothecary.blogspot.com/2007/02/oskar-fischinger-saved-my-life_04.html))
 Gretchen Vinnedge championed Chelsea Manifold’s stop-motion film, *View O Rama*, from 2004 (<https://www.youtube.com/watch?v=s5QBSyY-RbU>) - a former area student, she recently appeared at Kendall in Grand Rapids as a visiting artist
 Julie Goldstein found *Springtime in CoVid Land*, a work in progress using motion capture from Adobe’s *Character Animator*. Again, this Adobe suite of programs is very impressive.
 David Baker wrapped up this “sense of community with our peeps” with *The Poetry Project*, where students must come up with a script and create visual assets from scratch.

Gretchen Vinnedge

And, having told each other these sweet bedtime stories, we tucked ourselves in and slid off to pleasant dreams - ending the 29th ASIFA Central Summer Retreat

FESTIVAL NEWS - Coming Up - The Ottawa International Animation Festival (OIAF)

notes by Charles Wilson, Forensic Animator and ASIFA Central Membership Coordinator

Founded in 1976, the Ottawa International Animation Festival has become the second largest animation festival in the world and the largest in the Western Hemisphere. Every September, animators from all over the world migrate to Ottawa, Ontario, Canada for five days of screenings, retrospectives, workshops, panel discussions, and parties--all about animation!

In 2020 and 2021, the festival organizers made a decision to move forward, business-as-usual, with one significant change: in lieu of holding the usual in-person festival, they extended the festival to two weeks and streamed the event online so folks all over the world could attend virtually--with the hopes to return to a physical in-person festival in the not too distant future.

The upcoming Ottawa festival will be held from September 22nd to October 3rd. *And as a member organization, ASIFA members in good standing have been offered a \$10 discount off of the normal pass price. That's right, if you want to attend the festival this year (from the comfort of your own home), it'll be \$50 instead of the \$60 price for non-members.* And this discount extends to those who would like to attend the Ottawa Festival's Television Animation Conference that occurs in the days leading up the festival. For those who want to attend both the OIAF and the TAC, the price will be \$110 instead of the non-member price of \$120.

And if you're not a member or have let your membership lapse, please consider joining ASIFA Central to enjoy this special perk of membership. Lastly, if you don't know if your membership is current, please feel free to e-mail me at asifa@asifa.org and I can see if you're on the list of current members eligible for the discount, that I'll be sending to the Ottawa Festival next month.

The box office will go live near the end of July. And in order to buy a pass for the festival, you'll need to register an account with the festival portal "eventival.com", which you should do ahead of time. The festival director will have a list of ASIFA Central members and you will receive an email from me (Charles Wilson) with the password for the discount. Don't buy the pass before you receive the password - you won't get the discount!

Information about the OIAF itself can be read on their website at animationfestival.ca which includes things like the short and feature film selections.

One important notice before we get to the e-mail from the festival:

This discount is only available for ASIFA Central members at the International level who have paid their dues for the 2021 year. If you're not sure what your membership status is, please feel free to e-mail me at asifa@asifa.org to verify, as in the next week or so, I'll be sending a list of our current members to the festival so they can validate your discount when you order your pass. As new members join (or people re-up their membership), I'll be e-mailing those updates to the festival, so you still have time to get in on the action.

The Animapass 60\$ (50\$ with Association discount) features access to:

- All Screenings and Talks.
- The Animation Exposé Fair (featuring animation schools, recruiters, and more).
- The Virtual NightOwl Party.

The TAC Pass 120\$ (110 with association discount) features access to:

The Fast Track speed meeting sessions featuring buyers from around the world.

Exclusive TAC networking opportunities and the TAC Delegate Guide

- All Screenings and Talks.
- The Animation Exposé Fair (featuring animation schools, recruiters, and more).
- The Virtual NightOwl Party.
- Option to apply for inclusion in Artist Gallery (an opportunity for OIAF participants to showcase their work to studios and recruiters in attendance)

Next issue - "A Year of Lockdown Festivals, Covid Conventions, and Animation Fund-Raising - coming as soon as this archive drive finishes its backup!"

ASIFA Central Newsletter (cc) Summertime (August) 2021 - see the updated website with more announcements and an ever expanding newsletter archive for ASIFA Central at - <https://asifa.org>

And then dive into more digital fun at <https://www.facebook.com/groups/asifacentral>

and for ASIFA International - <https://asifa.net> - be sure to check out the Facebook page on ANIZOOMATION

As usual, send any suggestions, comments, or recipes for zucchini bread, along with the usual castigations to yr hmbl typist, at jim.middletonrx@gmail.com or, for dull bloggery, <https://animatingapothecary.blogspot.com>

**BONUS FEATURE IN THIS EDITION OF THE ASIFA CENTRAL NEWSLETTER:
TP ANIMATION: PANDEMIC EDITION - with Melissa Bauwman**

WHEN ANIMATING YOUR TOILET PAPER:

You can keep the roll intact or separate the sheets and use a simple x-y axis guide to register your drawings. Abstract shapes and rhythms; color transitions; even simple narratives with objects or figures--all are possible. The invitation is to work rough and loose. Draw or paint with media that soak into the paper: water colors, sharpies, inks, etc. Rely on liquid accidents.

It's good to put something under the sheets to soak up any excess colors as you work and protect your drawing surface. You probably won't be able to stack the sheets for onion skin work or to flip them--but If you find a way, please share your technique! Trust in guessing at positioning colors, shapes, and figures and see what happens.

Other observations:

- M Thicker TP is easier to work with, tears less.
- M Using a "downshooter" method to capture is recommended, as shooting the animation on your toilet paper holder is very challenging and time consuming.

PRIOR TO THE WORKSHOP:

Please have your capture set-up figured out. If you don't have frame capture software, Stop Motion Studio (by Cateater) is our recommended app. It's easy, free, and it's available for both iPhones and Androids.

If you plan to use Stop Motion Studio, and it's your first time - please review the Capturing your Animation notes below for tips to set up your home capture station and to test the app.

CAPTURING YOUR ANIMATION - DIY Style:

Setting up a "Downshooter" with household materials:

You can use cans, water bottles to give your phone camera the vertical distance needed to frame up your TP. If you need just a little more height, padding with packs of sticky notes or folded paper helps.

Secure phone with rubber bands, or non-tacky tape - be aware of location of shutter button.

Create a registration setup - I used *Post-Its* to align the perforations

GETTING STARTED STOP MOTION STUDIO (SMS):

To give the manual a glance when you open the app on your phone, you can use the drop down menu in the upper left corner, choose help, and it will launch the manual with tutorials and instructions. The tutorial clips are cute and informational. The manual will show you how to set up your camera to **change**

the camera mode to manual so you can make adjustments to exposure and focus during shooting. Using manual settings will avoid auto-focus/auto exposure flicker.

The gear icon will allow you to change your project settings like frame rate, aspect ratio,

In order to give yourself a flexible area to accommodate your TP frames in the camera view, consider using a wider capture aspect ratio.

Use HD capture quality so that you can still crop and maintain decent quality. Adjust your frame rate (the speedometer icon) - I used 12fps.

To move into capture mode (and change camera settings) hit the camera button in upper right corner.

TIP: During your capture session, consider using the grid to line up the edge of your TP.

To take pictures tap the red button. To adjust onion skin, use slider on left hand side of screen (a very nice feature - remember how great it seemed on "Lunchbox"?).

If you make a mistake just shoot the frame again. You can remove frames in “Timeline Mode.” To get to Timeline Mode from the capture window, just hit the back arrow in the upper-right hand corner.

When you enter Timeline Mode, you may have to double tap a frame at the bottom of the screen to see the “frame view” where you can edit/remove frames.

In the frame view mode (below) you can simply tap on a frame to activate the pop up menu of editing options.

To wrap things up, press the arrow pointing left at the top left. You’ll be brought back to the main menu, with “My Movie” now one of the selections available.

Press on the image for “my movie” and a blue menu bar will appear at the top of the screen.

The “share icon” (a V pointing left, with pronounced dots at its points) will permit you to export the movie, create an animated GIF, export all images, or create a flip book.

Exporting the images will create a series of JPGs that can then be imported to a video editing program.

Movies are exported as mp4s.

Flip books are exported as pdf files. Snip snip! Staple staple!

For a freebie, *Stop Motion Studio* has many options.

PROMOTION ISSUE
FALL - October - 2021 - In **COLOR**

Polly Wolly Doodlers and ArtPrize

by Deanna Morse

<https://www.artprize.org/70766> (Act fast! This link was made to be broken!)

Time Passing : Passing Time, a new animated video poem by four award winning filmmakers was unveiled at ArtPrize 2021 in Grand Rapids, Michigan. The collaborative piece was created during the lock down, with animation by Jim Middleton, Deanna Morse, and Gretchen Vinnedge, and post production by Suzanne Zack. Scattered across the country, often in isolation, these artists worked with common ideas and themes, reflecting their quirky sensibilities, and staying sane, connected by the now ubiquitous ZOOM.

The resulting five-minute video was placed behind a large table-top aquarium at Water Colors Aquarium, 453 S Division, in Grand Rapids, with an audience of cichlids enjoying the colorful animated images. Oh, humans, too. Unicorns, time lapsing flowers, and dancing dolls invited the viewer to find connections and reflect on the past year where nothing happened, and everything happened.

An opening reception for the artists at the Water Colors Aquarium introduced the installation on September 14, and the work remained on display from September 16 until October 3. The installation hosts were, and remain, incredibly generous with their time, space, and carpentry skills, and will likely keep the film running throughout the month of October. The team was thrilled to screen their piece at this remarkable venue. Accompanying

The Polly Wolly Doodlers
Suzanne Zack, Deanna Morse, Gretchen Vinnedge, Jim Middleton photo by Josh Geyer

Time Passing : Passing Time was a baker's dozen of original haiku cards, crafted by Jim Middleton, and soon to be rare collector's items. Or recycled. (Jim's notes)

Deanna Morse, GVSU Professor emeritus, has created works for Sesame Street, among others. She has presented in nearly every ArtPrize, and was a jurors finalist in 2013 with *Whispers of the Prairie*. Gretchen Vinnedge, educator and producer, has a diverse body of work that has won

numerous awards. Suzanne Zack a professor at GVSU, is also an award winning filmmaker. The three of them created the 2014 piece *Animation Collaboration* for ArtPrize, which was in the finals for the public vote. Late-bloomer Jim Middleton is an award winning animator, impromptu haiku typist, motion graphics instructor and retired pharmacist; this was his first time exhibiting with ArtPrize. All are members of the Midwest Chapter of ASIFA, the International Animation Association chartered by UNESCO in 1960.

The video component may be screened online at <https://vimeo.com/580950944>

The focus and discipline behind each work of independent animation preserves the intent – if only subconsciously – of the creator’s thoughts with each pencil stroke upon paper. Careful examination of each stroke will also reveal the level of caffeination at the time of those thoughts.

The opportunity to meld minds from distances impossible in the past can create collaborations that take on a life of their own.

Even when we weren't thinking of the pandemic, or being contained in our respective safe places, animation allowed us to expand beyond the confines of our camera stands, proving that the mind can occupy greater space than our shells.

Having the opportunity to work with this quartet of doodlers has proven to be one of the best memories I can take away from a frequently dreadful year. I raise a stylus, an ink pot, a Cintiq tablet and shout HUZZAH to all, a new family rebuilt 24 times per second.

Stuttgart and the ITFS

by Jim Middleton

28. INTERNATIONALES
TRICKFILM FESTIVAL
FESTIVAL OF ANIMATED FILM
STUTTGART

The ITFS (International TrickFilm - Stuttgart) was incredibly German from start to finish - my initial online enrollment was immediately met with a solemn request for verifiable proof of legitimacy as someone in the animation industry, since the transaction involved international funds, followed by a reassignment of my status, which then prompted a series of credits, rebilling, and re-registration, all with step-by-step email documentation, occasionally all-German emails (that part likely in response to my attempt at - *ha* - clever use of Google Translate to respond in kind), several extremely polite apologies for any confusion, and then, afterwards, no fewer than three evaluation requests - I answered those with delight and appreciation for their diligence, which may have prompted the duplicate requests, just to be sure the initial response was legitimate - and then a flurry of links to other activities in Stuttgart when travel in Europe is again possible. These folks iron their socks.

The time zone difference for this (and other) international festivals and conferences was rather problematic - six hour differences, complicated by some US presenters being routed to Stuttgart, and then back to the US, to the point where I gave up on some of the live presentations and opted for the many reruns that were made available (thankfully, from this near-narcoleptic’s standpoint) for days after their initial showing.

And, while travel to Europe still remains more hypothetical than tangible, there is some comfort to be gained knowing a round trip ticket to Stuttgart runs \$1000-\$1500 (all options being “connecting flights” when I checked in May), and seven nights in a modestly priced hotel can quickly top \$300 (more if you stayed at the *Premiere Inn* - Stuttgart); but a virtual ticket to this festival was 34.99 Euro (or \$42.16 in early May).

The opening statements on the 4th were from Alexander Franke and Franziska Glase; I knew not what they said for the most part, but their ebullience was riveting. They could have me tune in to hear the yellow pages. And my third grade German lessons were of absolutely no use – nobody once broke into “Du, Du, Liegst Mir im Herzen.” Mrs. Huxel would be so disappointed (Mr. Franke and Ms. Glase promise to return in 2022. I wonder if they’ll take requests).

Willkommen in Stuttgart!

ITFS - continued

It takes ten techs to handle a Q and A at ITFS!

There was no lack of stunning features and shorts in the on-demand presentations at ITFS. *Affairs of the Art* by Joanna Quinn had its stunning and hilarious German premiere, taking sibling rivalry to a new level. Her recorded presentation afterwards was just as entertaining, as she sat surrounded by piles of drawings from the film.

Just a few of the other films included:

Jung and Restless featured the precise visual calligraphy from Joanna Priestley, using the quote from C. G. Jung, "Life is a short pause between two mysteries," as a viewer's guide in this study of color, composition, and multi-layering.

Ferdinand Ehrhardt directed the film with the melodic title *Obervogelgesang* - a black and white examination of growing up with the Nazi legacy in the Saxon region.

To a girl on a train, one in three passengers is a Nazi - she walks down the aisle counting, "Ein, zwei, Nazi..." and "running away from a scheissen idea" gets a translation title with an f-bomb instead of an s-slide.

Hideous Hank carried on the darkness in a dog shelter called "The Dead Rascal" with the pronouncement that "Wagging Sets You Free." An ugly Chihuahua gets adopted, making his life worse than before the shelter. *Courage the Cowardly Dog* meets *Ren and Stimpy* was one viewer's description of this Dutch production by Junaïd Chundrigar.

"To all my friends who are dancing with their demons and talking to their whales," was the artist statement by Anna Samo for *Conversations with a Whale*, inspired by the rejections of festivals from her previous film. She took an improvisational approach to the film, changing her process whenever she "became bored" with her direction.

Many of the films were followed with artist and production statements, and the theme of production methods emerged to be one of the more insightful and revealing talking points of the festival.

International Production Differences Quickly Emerged at ITFS

Unlike the US, European/Asian/African film making does not involve a centralized production/distribution base such as a Disney, Sony, or Dreamworks. Their work model is to build a funding foundation first, move pieces of the production around the continent, or continents, based on tax breaks with public and private support. Often only a story outline exists at that point. When enough money can be raised to carry a production forward, then the storyboarding is completed and the film is created, frequently - and deliberately - *not* concerned with a US market. And if a story doesn't generate enough initial capital, it can be sold to another set of producers who feel their take on the project could be successful. It's a completely different philosophy, summed up by Ron Dyens, of Sacrebleu Productions, "Too much money kills creativity." (He also stressed that Sacrebleu is a *production company, not* an animation studio.)

Ainbo-Spirit of the Amazon, CMG productions, with not much concern about US distribution - see <https://www.yahoo.com/entertainment/cmg-sells-annecy-bound-ainbo-155221547.html>

ITFS - continues even *more!*

A film such as *Ainbo - Spirit of the Amazon*, for example (trailer at <https://www.youtube.com/watch?v=fMbV1BDlmqQ> - watch and mumble HOLY COW), was put together with a budget of 10 million euros, with a 3 million euro presale *before production even began*. A Sony representative invited to a viewing was “flabbergasted at the beauty of the film given the budget you had.” (*Warning - digression approaching - I immediately recalled a Pixar Master Class in 2012 and a discussion about using some extra budget to fiddle with a few seconds in Brave, involving a bear running, after principle production was completed. They thought it demonstrated a desire for perfection. They showed the “before and after” clips. I’d have to heartily agree with Ron Dyens on that use of budget. At times it’s good to think like Edgar Ulmer. To put things in perspective, Brave had a budget of \$185 million. You can afford a lot of variety if you’re able to make 15 features for the cost of one.*)

The other advantage to this sort of production is to enhance the level of diversity in story telling, sincerely tailoring a film to an indigenous South American audience, for example, beyond merely offering a Spanish soundtrack.

Aardman and Ambersons - A Brief Sampling of the many ITFS Programs

Aardman productions had been working on master classes of its own, trying to develop at-distance learning even before the pandemic hit. Their statement that the *Aardman Academy is committed to nurturing talent by delivering excellence in film and animation training and mentoring* introduces its course called *Industry Training: Stop Motion 1*. (<https://academy.aardman.com/kdie8r8wjh3if9doaj>)

Mark Simon Hewis spoke from his “shed, a bit of an upside down boat” in describing the training, a program that goes back to a three month training at Aardman during the production of *Chicken Run* (2000). The cost is 2750 pounds, (you can use PayPal!), it runs 12 weeks, and participants should allow themselves at least 10 hours a week for the assignments, have a basic camera that can plug into a computer, and of course, internet access.

Aardman provides Dragonframe software, a Dragonframe controller, a character rig and lots and lots of Plasticine. The emphasis is *mime, pantomime, and motion before emotion*. The final four weeks of the program are set aside for “personal project development.”

Three days a week are set aside for live mentor meetings (there are seven total mentors, including some familiar faces at

Mark Simon Hewis and his shed/office

Aardman). Things are booked through 2021, and the spring 2022 classes will begin enrolling in a few months. The online process helps conserve studio space, which even after rebuilding from its disastrous fire of 2005, is jammed with production work for the next five years.

Brian Rose, like many fans of the *Magnificent Ambersons*, laments RKO’s butchering of Orson Welles’ “lost classic” of 1942.

Having obtained access to the original editing continuity before the film was substantially altered by the studio, he was able to recreate the missing scenes, while tracking down film clips that were used in promotion but never appeared in the final release as an additional guide. His reconstruction method is to build the sets of the Amberson mansion within a 3D animation space and use voice

actors to recreate the excised dialogue. The ITFS gave the opportunity for him to show how animation is essential in this reconstruction, and how he has laid the groundwork for a \$200k project.

The rumors of a complete 16mm print somewhere in South America (the sort of lucky discovery that allowed for the nearly complete reconstruction of the silent classic *Metropolis*), continue to frustrate fans of the film. This animation reconstruction may be a good use of “deep fake” technology.

<https://www.wellesnet.com/ambersons-reconstruction>

BUT WAIT! There’s MORE from ITFS!

Highlights of the 2021 festival can be viewed at: <https://www.youtube.com/watch?v=1n37ZjTtKBI> And then check out *Sad Beauty* by Arjan Brentjes, the Lotte Reiniger memorial award winner, *I’m Here*, the Grand Prix *Only a Child*...and remember that *Remains to be Seen* is the name of a pet taxidermist!

Signe Baumann's Animation Wrap Party
with guest columnist, Karl Cohen of ASIFA-SF
- a May 23rd recollection -

SIGNE BAUMANE'S HAS COMPLETED THE ANIMATION FOR HER 2ND FEATURE

Work on *My Love Affair with Marriage* began in 2015 when she considered applying for a grant for a film about the biology of love and relationships. In May she completed the last of 40,000 drawings of the film that evolved, and used up 662 pencils in the process.

To celebrate that achievement Signe held a zoom gathering in late May to show off clips from her work in progress and to talk about the production's history. She invited her friends in the worldwide animation community and her supporters to hear her talk about her six year struggle to try and complete her film. The focus of her talk at the event was to disclose some of the pitfalls and insanity she went through to get to the point where she can feel the end is in sight.

Although I haven't seen enough of the film to comment on the story, I do know it is going to be a visually exciting work. It has a unique look that combines excellent looking miniature 3D sets and 2D drawn animation. The footage shown in May included drawn modeling in light and shadows, dramatic lighting and camerawork that produces a shallow depth of field to create the illusion of 3D depth. Like Disney's multiplane work she animated the characters that are seen in the foreground in sharp focus and things further away, like the back of her sets, are seen in soft focus. The illusion of depth makes the photography look impressive.

She showed photos of some of her voice actors and it turns out she used a large cast. The film's soundtrack includes 23 "songs," but it is not like a Broadway musical. Instead some of the voices are for mythological spirits. They function somewhat like a Greek chorus.

In 2015 Signe took on a really complicated production and unfortunately for her it turned out the complications resulted in unexpected major expenses.

She found out about one unexpected expense when she talked with SAG-AFTRA (Screen Actors Guild - American Federation of Television and Radio Artists). She was shocked to discover that while the union accommodates low budget live action productions by letting producers pay actors less if the performance is in a major big budget feature, for animation that is going to be released theatrically in America there is only one pay rate -- *what Disney or Pixar pays*. To raise the money needed she turned to Kickstarter and kept her fingers crossed. Unfortunately, halfway through the campaign the chances of it succeeding looked dim. She hired a fund raising consultant who suggested several things including improving her messaging and advising her to be relentless in her Facebook postings. By doing that and other things she raised \$132,737.00, more than what was needed.

Signe Baumann's Online Wrap Party

Signe also needed several additional grants. Eventually she obtained help from the Guggenheim Foundation, and government agencies in Latvia and Luxembourg (she grew up in Latvia). Of course, there were major requirements she had to meet to get those funds. She had to produce a version of the film to be released in Latvia in that country's language. That meant having to hire a second voice cast to create another soundtrack. Luxembourg also required the post-production work they were funding to be done there.

Signe also found out that when you make a film that will take over six years to complete, there might just be other unexpected problems. Unanticipated labor needs were solved by taking on college interns. That meant she had to learn how to set up and run intern programs with two NY area colleges.

Sturgis Warner, Signe's co-producer told me later that their biggest problem was that, once you trained an intern and they get good at what they were doing, the internship would be over. In one case, they found funds to hire a really talented intern.

Another unexpected headache for Signe was dealing with a sprained ankle. That was a minor nightmare compared with figuring out how to keep the production on track during a pandemic.

So when Signe held a zoom gathering in late May there was much to celebrate. There were over 100 people at her gathering including a *who's who* of independent animation. Among the artists present were Bill Plympton, who helped Signe get her feet wet in the New York animation world when she moved her from Latvia almost 30 years ago. There were also several other animators present whose work I have long admired. They included Deborah Solomon, Ruth Lingford, Candy Kugel, and Joanna Quinn. Nik and Nancy Phelps were also there as was Yvette Kaplin (she produced *Beavis and Butthead*) along with Deanna Morse and Jim Middleton.

It really was a lovely event and I look forward to reporting news of the film's local, national, and European premieres. Hopefully I will also be writing about the film receiving numerous festival honors and other accolades.

Be sure to follow Signe's production adventures at - <https://www.myloveaffairwithmarriagemovie.com>

Editor's note:

Karl Cohen's 2000 link on animation history is a mere warm-up for his upcoming book on Otto Messmer - <https://www.awn.com/animationworld/milestones-animation-industry-20th-century> - and just a speck amid the volumes of material he has penned, covering the spectrum of analog to digital animation, *and* his *monthly* brain-filling newsletter for ASIFA-SF, which compiles international information on the whirl'd of the persistence of vision, a POV we can, and should, all support - <http://asifa-sf.org/> for a sample of their activities.

Welcome to ASIFA Central News Update! We are the Midwest -US chapter of ASIFA, the oldest organization of animators in the world. Our chapter was established in 1975. Board members are the front line for our chapter and are in touch with the international ASIFA board.

Movers and Shakers in Regional Animation

Gary Schwartz, Barmation, and Kosova

Gary Schwartz and the Anibar crew

Gary materialized in Kosova in late July to serve as tutor to an “immersive workshop creating an animated promo for the festival itself!” It was described as “a multithreaded workshop, to try new things, and most importantly, to broaden your artistic horizon.” This workshop took place through the 29th of July, in the city of Peja as part of the Anibar

International Animation Festival that ran July 23rd to 30th this past summer. But, wait! Gary didn’t take the journey alone - he joined Brooke Keesling with presentations, workshops, panel discussions, and special programs.

Brooke shared her experience working in the animation industry and gave practical advice on how to break through in the creative industry, and she is currently head of animation talent development at Bento Box Entertainment, where she works on *Bob’s Burgers*. And, according to her Linked-In posting, Bento Box is *hiring*!

Tracy Miller-Robbins’s *no-fee film festival and blog*, continues to develop while she works around the challenges of WordPress – <https://noentryfeefestivals.com/author/noentryfeefestivals> - treat Tracy to a cup of coffee while you’re at it. It takes energy to maintain a blog!

We are still trying to figure out what is going on in this photo from Gary Schwartz about “Barmation” - any guesses?

Bri and Bob’s ASIFA International Journal Articles May Be Sleeping with the Fishes

Whoops! The latest *ASIFA International* journals, originating from Austria, are lost on the east coast, somewhere in New Jersey. In this issue will be articles featuring the writing talents of ASIFA Central’s Briana Yarhouse and Bob Swieringa. When they finally appear, get reprinted, or converted to pdf, look for Bri’s discussion on the IAD with *Spiritus Mundi*, and Bob’s short article, entitled: “*THE ASIFA PRIZE LAUREATES: 35 Years Honoring Contributors to Independent Animated Film.*”

Home - Buster Keaton’s Youthful Summers in Muskegon

Jim Schaub is two interviews away from completing the foundation footage for his documentary covering the adolescent years of this “stone faced” comedic genius. There may be animation involved, *nudge nudge, wink wink*.

Updated Board of Directors

We had our official, double counted, electronically processed election of board members from the general membership:

Julie Goldstein - Our New President!

Stephan Leeper

Michael Long

Jim Middleton - *Still Secretary!*

Tracy Miller-Robbins

Deanna Morse

Chris Sagovac - Our new Vice President!

Bob Swieringa

Christine Veras - Our new Social Media Coordinator and Ambassador to other ASIFA Chapters! (2022)

Gretchen Vinnedge

Briana Yarhouse - Our New Treasurer and International IAD coordinator!

The current Membership Coordinator, Charles Wilson, will continue in this post to 2022 to allow for compilation of files and membership materials, before passing the baton to a new membership coordinator, to be announced at a later date.

International Animation Day - October 28!!!

Jim Middleton will be coordinating the IAD program for ASIFA Central this year. When the program is assembled, it will be uploaded to a password-protected Vimeo file, accessible during a limited period around October 28. Over 60 international films are being made available for the event. Access requests will need to be directed to the IAD coordinator; because of geo-specific limitations requested by some of the participants, each request for access will be reviewed to prevent unauthorized access to the films. There. All the boring process rules are noted. It'll be a GREAT TIME FOR ANIMATION! Check our ASIFA.org website or Facebook page for further updates! Time to think of IAD PARTIES!

Christine Veras' latest group project

Christine remains thrilled that her short, collaborative film, *Horsepower*, is part of the official selection of the Cardiff Mini Film Festival in the new category "Twisted Tales." The collaborative animation project was produced during the lockdown in 2020.

Michael Long Hits the Festival Circuit

Island Hopping, the latest magic from the digital tablet of Missouri member Michael Long, is getting some deserved recognition through the miracle of Film Freeway's multiple off-ramps. The Indie Shorts Awards ran it in September, and the Grand Junction Film Festival gave it a screening earlier this month.

Passing Thoughts from Editor Jim Who Needs to Fill Up an Eighth of a Page - America: The

Motion Picture on Netflix answers the question, "What sort of film would you get, if you asked a roomful

of clueless 14 year old boys to write a history of the Revolution, and then gave the scrawled outline to some of the best world-wide independent animators?" Sadly, this jiggling beer-bonging blood fest is not nearly as much fun as an entry in the *Despicable Me* series, and is ultimately, rather exhausting. *What If...* on Disney+, however, works in the alternate Marvel universe by being what the Marvel universe actually is - a cartoon adventure. In the 30 minute episodes, there are no real-life actors striking embarrassing poses while immersed in a CG environment. The whole thing is a CG environment. And it's over in 30 minutes, not 3 hours! The producers of *American: The Motion Picture* should have taken this episodic approach. Next time - why the *Three Robots in Love, Death, & Robots* should have a series of their own.

FxF (Frame by Frame) Sampling the Springtime Saturday Seminars - get ready for 2022!

DePaul's gracious invitation to ASIFA Central members included access to these programs this past spring:

Joel Benjamin – Award-winning independent animator, presenting on his work and using Unreal for 3D animation production, and - *Character Animation Masterclass with DePaul Animator In Residence Brian Ferguson*, former Disney feature film character animator, who reminded all viewers that should you ever be employed by Disney, spell things out in the contract, such as keeping maquettes of your designs, because when you leave, you leave with the clothes on your back.

Coming up in the Next Issue - OIAF (still dreaming of poutine), **Still More ITFS experiences** (You want virtual experiences? We'll give you virtual experiences!), **the SAS Conference** ("I'm so inspired! I opened up my book proposal for the first time in three years!"), **Annecy** (Bien sur!), **The Internet Archive Hits 25!** ("Remember: when The Archives is down, the internet gets dumber."), and **The Search for the Lost McCay Homestead!**

ASIFA Central Newsletter (cc) Fall-Octoberish 2021 - see the updated website with more announcements and an ever expanding newsletter archive for ASIFA Central at - <https://asifa.org>

And then dive into more digital fun at <https://www.facebook.com/groups/asifacentral> and for ASIFA International - <https://asifa.net> - be sure to check out the Facebook page on ANIZOOMATION

As usual, send any suggestions, comments, or recipes for Wham!, along with the usual castigations to yr hmb1 typist, at jim.middletonrx@gmail.com or, for dull bloggery, <https://animatingapothecary.blogspot.com>

Welcome to ASIFA Central! We are the Midwest -US chapter of ASIFA, the oldest organization of animators in the world. Our chapter was established in 1975. Because we are volunteers, we ask our board members to take on some many responsibilities such as social media coordinator, retreat co-organizer, web updates, ani-jam facilitator, party planners, and more. Our Board members are the front line for our Midwest animation chapter and are in touch with the international board.

The NEW ASIFA Central Board for 2022

Our New President

Julie Goldstein

Our New Vice President

Christopher Sagovac

Our New Treasurer

Briana Yarhouse

Our New Social Media Coordinator and Chapter Ambassador

Christine Veras

Our Same Old Secretary

Jim Middleton

Our Membership Coordinator

Charles Wilson

Our Free-Range Board Members

Deanna Morse

Gretchen Vinnedge

Stephen Leeper

Michael Long

Tracy Miller-Robbins

Bob Swieringa

IAD 2021 AFTERGLOW

International Animation Day commemorates the first public performance by Charles-Émile Reynaud of his Théâtre Optique at the Grevin Museum in Paris. That October 28, 1892 premiere represented the beginning of modern animation, and the date has been celebrated by animators with showings and performances since 2002, coordinated by ASIFA International and its many chapters around the globe.

ASIFA Central programmed the following selections as part of its celebration:

1. *Toast for ASIFA* - Deanna Morse, Christine Veras, Steve Leeper, et al
2. *Two Little People* - ASIFA Australia - Xin Li
3. *Springtime in CoVid Land* - Julie Goldstein
4. *Mala* - Too Otaghia Group - Iran
5. *Large Scale Absurdities Volume 3 - "Docile Town"* - Kimonos Animation Studio - Charalambos Margaritis - ASIFA Hellas
6. *Horsepower* - Christine Veras, et al
7. *Notun Fasal* (New Harvest) - Sovan Dutta - ASIFA India
8. *Tchisti* - Sarah Tabibzadeh - Iran
9. *Candy Shop* - Patrick Smith - ASIFA South
10. *Espresso Doppio* - Mika Koskinen - Finland
11. *Eli* - Jeff Martell - ASIFA South
12. *Connecting* - Melissa Bouwman
13. *Happy Banana* - Ali Raies - Iran
14. *Animated Doodle* - ASIFA Hellas
15. *NamaStay* - Margo Pierce - ASIFA South
16. *time passing : passing time* - Polly Wolly Doodlers (Jim Middleton, Deanna Morse, Gretchen Vinnedge, Suzanne Zack)
17. *A Tale of Self-Preservation* - Shannon Fleming - ASIFA South

"Thank you, Briana, for pulling this event and us together every year!!! Cheers to you!!!"

— Casandra Brewton-Johnson, Programming Director, ASIFA-South

"I am humbled by all the work that is done by you around the world to make a day like this possible. Thank you! Congratulations everyone! May your celebrations remind us that we are all collaborators in making the world a better place."

— Briana Yarhouse, IAD Coordinator for ASIFA International

Public Domain Update - Observations and Suggestions from your hmb1 typst

Here is a possibly useful flowchart to determine whether a recording in your possession could have public domain (PD) status in 2022:

* archive.org material isn't all necessarily in the public domain - if there are "creative commons" (cc) stipulations, be sure to follow those. If the material there is after 1925, it may be posted "under the radar." If you are lucky to become commercially successful with using gray-area material, then the random owners of the "copyright" (hardly ever anyone associated with the initial artist, but someone who scooped up some ownership rights at some point) may annoy you with financial complications.

How this works - you have a piece of music from 1920, but your "old vinyl" recording is from 1965. The composition is in the public domain, but the performance/recording is not. Don't use! However, you find a 1920 composition and a 1923 recording of it, even though it's all gnarly, not in stereo, and "great grandpa old," chances are you'll be able to use it freely. However, if you have the 1923 recording from a 1990 CD, or "enhanced and restored" by someone else, the copyright on that old public domain material for that particular "performance" of it, is the year of that restoration. That's why it's important to have either the disc itself or permission from the owner of the disc to use the material. Fortunately, 1924-25 is the period where recordings mostly became electrically recorded (via microphone) and a very clean 78rpm record will have much stronger fidelity. Then run the recording through freeware *Audacity's* effect > classic filters. (To further complicate things, some performance rights can vary from state to state, something that should be rectified in 2022 by setting all 1923 performances and earlier into the public domain. For some reason, Sony, created in 1946, possesses many recorded performance rights.)

More About Horsepower - by Christine Veras

Horse Power is a collaborative project in which participants were given only one frame to illustrate, using one stage of the galloping horse sequence from "The Attitudes of Animals in Motion," arranged for the zoetrope by Eadweard Muybridge, and published in 1882. The project was developed during the pandemic lockdown, with participants collaborating remotely through the internet.

The final frames were played in sequence, and the rapid succession of the completely different images developed a vibrancy and energy that we wanted to explore further. So I proposed a twist in the original Muybridge animation through editing, creating a *glitch* in the image. That *glitch* can be interpreted in different ways – it could represent COVID shaking up our routine and the new possibilities of engagement, or the creative discovery and exploration of unique ways to engage and create animation in that context.

The short also explores the possibilities within the restricted frame for the continuation of perceptual motion. Participants had no idea how the final animation would appear, and the animation was only possible through the collective effort of each one of them.

The inspiration for the project came from two important sources: one was Dana Sink's animation *Power* (2017), and the other was the Johnny Cash Project that invited fans from all over the world to animate a single video frame for the music video, "Ain't No Grave," in 2010.

The Search for the McCay "Family Homestead" - by Jim Middleton

Driving through Michigan along M-46, one is likely to pass straight through the center of Edmore, scarcely noticing its blinking yellow light, yet alone the village itself. Like many villages serving a single use in the 19th century, here being lumber transportation via an awkward crossing of railway lines (one so sharp it made mention in *Ripley's Believe It Or Not*), it has faltered for an identity once its primary function faded, and as other large employers moved overseas. Currently its nearby farms grow potatoes for potato chips, and its slight glimmer of fiscal promise comes from its prescient early approval of marijuana dispensaries - there are two - and selling industrial park properties for the creation of bud-sorting facilities. Its population of 1100 has hardly changed, but on average has certainly aged, in the past century.

However, in the 19th century, it attracted workers – for the lumber, for the railroads, for the ancillary needs (one of the earliest buildings was an *opera house* abutting the aforementioned crossroads - sing loud, vaudevillians!), and with workers came the need for homes, and that required a real estate agent.

Enter the McCay family, from Canada via Spring Lake, Michigan. Robert McCay's family included a precociously artistic son - yes, you guessed correctly, it was that McCay, that Winsor McCay - and while Robert and Winsor McCay's sister Mae are buried in Edmore, where Robert worked and served as notary, Winsor's mother was laid to rest at the "family homestead."

Public archives being what they are, and the maddening habit of school records for Winsor McCay being destroyed by fires in his youth - first in Spring Lake, then in Stanton - it took a while to track a location for this family homestead.

The homestead appears to have been nearer to Stanton, not the "potato center" of Edmore.

The earliest extant mention comes in a plat map of 1897 - indicating two large parcels assigned to Robert McCay (center right in illustration). The roads there are unnamed, but some landmarks (lakes and ponds) are to the west, and there is a small square indicating the house site. An overlay of an existing satellite map helped with specifics.

Ultimately, on West Klees Road northwest of Stanton, there appeared the remains of the 19th century McCay homestead. A newer home has been constructed nearer the road, but this is the barn site (photo at right). There were no visible markings of a burial site on the property; and, Michigan being an open carry state, wandering around private fields so near to deer season for the sake of animation archaeology seemed rather unwise. But the search continues! Watch this space!

Festival Flashbacks - Editor's Notes from the Society for Animation Studies (SAS) 2021 Conference

The middle of June this year was filled with Annecy and the SAS conferences. To complicate matters, the gatherings were nearly simultaneously conducted; fortunately, Annecy had a lot of its material asynchronous to the time zones, so one festival could blend with another. Also, Annecy has made its programs available to ticket holders until the end of 2021. *Très bien!*

SAS - in its discussion on abstraction films, 68% were found to be in 3D, 31% used a symmetrical construction, 81% were in color, and 28% used text as visuals. Topics ranged from Basque animation to comparing *Eros and Thanatos*, "life and death," as a sequential link representing energy. "Anthropomorphicicological animation" of the 19th century is now, thankfully, condensed to "animism." The four-volume *Encyclopedia of Animation Studies* continues apace, with Volume I being *Geography and History*, II being *Techniques, Processes and Environments*, III being *Theories and Philosophies - including debates*, and IV (the number, not the therapeutic infusion) filling its pages with *Characters and Aesthetics*, presented primarily as case studies. It was at this point in the program that someone posted in the ZOOM chat space, "I'm so impressed. I opened up my book proposal for the first time in three years!"

"Editing takes forever."
- Deanna Morse

"Toys and games are the prelude to serious ideas."
- Ray and Charles Eames

ASIFA Central members *Melissa Bouwman, Steve Leeper, Deanna Morse, and Christine Veras* presented their discussion on "Art Technology and International Collaboration," where they went into the *Anizoomation* process in depth, from its conception to its final execution (see the short films *Toast for ASIFA* and *Connecting* as examples in the IAD 2021 ASIFA Central Showreel). See also -

<https://www.facebook.com/groups/342482260109209> (Anizoomation page) and <https://www.deanimations.com> (Deanna's dedicated section on Anizoomation).

ITFS notes - VR for entertainment, not for META marketing

Stuttgart is the festival that just keeps on giving. While extensively covered in the previous ASIFA Central newsletter, one more portion of May's ITFS festival is worth mentioning, especially with Facebook trying to convert us into the societies of *Minority Report* and *Ready Player One*. Portable VR game sets are already in place in Europe, with German engineers increasing the portability of the hardware. The big VR presenter at ITFS was YULLBE (<https://www.yullbe.com>)

"Remain still and try to survive."
- advice on entering a VR-enhanced roller coaster or "drop experience"

with pop-up sites in malls, and complete body suits at larger installations in order to "get over the barriers of life." So that every experience is not being thrown amid ghouls and orcs, they even have a rather attractive *Artiality* option if you wish to float amid Kandinsky and the works of French impressionists.

From a technical standpoint, the current software requires 100G for 3 and ½ minutes of animation at 60fps, plus stereoscopic effects, at 6K x 6K resolution, adding 3D objects in the foreground. North America-based experiences with this level of sophistication are in Florida's *Final Fantasy* ride at Universal, and at Legoland near Winter Haven (former site of Cypress Gardens; doubtful that hoop skirts could make a smooth transition to the lego universe). Pop-up sites require seven technicians to run the experience - one envisions the Florida command center looking like something out of *Westworld* ("Where Nothing Can Possibly Go Wrong").

Where cramming all this excitement in a 250 square meter space sounds like an incredibly attractive proposition for aspiring 3D animators, elaborate VR and immersive experiences do bring up another issue, recently discussed by Karl Cohen in the *November ASIFA-SF* newsletter, regarding the mental health implications associated with computer gaming.

Grand Valley State University

IAD - The Rotogravure Section - Preliminary images of IAD showings among ASIFA Central members

Images continue to come into the editorial offices of the ASIFA Central newsletter - if you have any surrounding your participation in IAD or any of its screenings, or even of a cool trip through Montana, feel free to share!

Simulcasting with ASIFA South

The Vinnedge Animation Collective

From the OIAF 2021 Notebook

September 24 introduced OIAF (Ottawa International Animation Festival, or for the Francophile, *Festival Internationale d'Animation d'Ottawa*) with the theme of “Talent 2.0 - The Future of Creativity,” a topic one would hope to be limitless.

It began with the cheery greeting from Chris Robinson, OIAF director, declaring he was “excited to be back in Ottawa from my basement.” Representatives from the Toronto studios chimed in, “There is so much work out there right now,” adding the lack of skilled artists in the Toronto area is due to the draw from the game industry and big productions in the US. School programs are slow to keep up with the specialist skills needed in Canada now, with the *Unreal Engine* adaptation to the production pipeline becoming a real “game changer.” If anything was reiterated at the opening discussions at OIAF, it was that students need to understand the reality of their future jobs - training doesn’t end with graduation. (*Editor’s note: if my experience is any indication, schools and universities are in constant search of accreditation for their programs, yet cannot muster the budget to maintain and update essential software and hardware. In the search for validation, resources are frequently overlooked.*) Further, after investing substantial tuition in their education, the students’ first question is often, “How much money can you make here?” Smaller production houses lament that they don’t have “Disney money,” and even after sending some of their newly-hired staff to France for training, they are forbidden to force them to stay. As a result, “we don’t train as hard as we’d like to.” Even an unheated atelier can be expensive!

Ironically, many prospective Canadian employees work from their Canadian home for the Canadian health benefits, but are being paid by US production houses who benefit from having their talent across the border, and don’t have to pay them benefits.

(Now I have to confess that here my notes get a bit *Augean* to decipher, but I think it may correlate with the series of Espresso Martini recipes that pepper several pages, none of which I *recall* trying out. But to quote Edgar Kennedy about the likelihood for alcohol being present, “I’ll not deceive you. There is.” For the sake of brevity, let’s skip this part.)

Among the many highlights of this year’s OIAF was its RISD Retrospective, broken into multiple sections for the sheer volume of high achievers, with many names that are now quite familiar in the animation field: Mike Overbeck, Pilar Newton-Katz, Seth McFarland, Karen Aqua (and much, much gratitude to Amy Kravitz) – and followed with a survey of and discussion by a self-described “time choreographer artist type,” Jodie Mack. Ms. Mack builds abstractions around her textile and textural interests using stop-motion and multilayered soundtracks. Her recent feature production, *The Grand Bizarre*, is streaming on the Criterion channel.

BBC Sounds and freesound.org

The BBC sound effects library is still rather astonishing in its scope and remains free for non-commercial or educational use at <https://sound-effects.bbcwind.co.uk> – however, with 16,000 files, it may seem a pale in comparison to <https://freesound.org>, which, by May of this year, reached 500,000 sound uploads. They are celebrating this remarkable achievement, possible from uploads by thousands of people globally, with an upgrade to its server speed. *Freesound* is a *creative commons* (cc) site, moderated and reviewed by the site coordinators, and it’s *free* (hence its name, double-d *duh*). It’s a site worth the few moments to visit that’ll expand to hours of exploration.

The Internet Archive Hits its 25th Anniversary

Began in 1996, when the concept of a ten terabyte backup was considered adequate to contain the entire content of the internet, the Internet Archive has grown to encompass millions of archived internet pages along with sound, print, video, and even computer games, complete with period-specific emulators (you just can’t run a Win 3.11 game on Windows 10). You can upload and download rather freely, with this caveat - they don’t guarantee every file you download is in the public domain. The foundation for a lot of research is there, but you still need to do the research! Remember their slogan in the meantime, “When the archives is down, the internet gets dumber.”

Random note: the OIAF had an attendance score for the events - your editor tied with Janet Pearlman at 1250 points (#82)! This is likely the only time ever that Janet Pearlman’s name will appear next to your editor’s.

OIAF and Annecy Extend Their Access

The virtual experiences of the OIAF and Annecy festivals this year meant a lot of their material was recorded for “on demand” viewing by the participants (especially useful for Annecy with its five hour time difference for the Midwestern US). Both OIAF and Annecy have extended access to the files, for the benefit of 2021 pass holders who want to revisit or get virtual for the first time with many of the programs. Hybrids are expected for the lion’s share of 2022 festivals, too, so if you miss the direct social interactions, you can find some comfort in the savings on travel expenses.

Annecy - until December 31, 2021; OIAF - until November 30, 2021. Use your existing log-in/passwords.

Briana Yarhouse and the HAUNT installation - October 29

In October, *The Standard - A Project Space* hosted a group art show featuring the theme, “HAUNT: What haunts you?!” (Suggestions included art critics, your ex, a burrito that had you for lunch, climate change, or life’s challenges.)

Briana Yarhouse, International IAD Coordinator for ASIFA reported, “I have a sculpture piece that is going to be in this cool show! It is a casting of my head from 1983 when I spent a summer making a custom, full, over-the-head latex mask. Masks have been a central theme to my art and animation throughout my life. I grew up confused about my gender and hiding my feelings in shame about who I wanted to be, while puberty and testosterone affected my physical appearance.

It was a very confusing time. It led to a lifetime of anxiety, fear, and self hate while hiding behind this mask. This year, I have started to take off the mask.”

Interview with Maryam Mohajer, Poster Designer for This Year’s IAD - From iadasifa.net An Image of Hope, Imagination and Culture - by Bob Swieringa

In the lower corner, the child draws with chalk on a brick wall. Lines of color swirl across the wall, as the girl draws a simple phoenix, wings spread. But the colors burst from the bricks, spreading and curling, becoming the long intricate flowing tail feathers of the gorgeous Phoenix, rising colorfully across the page, into the air, free of the wall and its bricks.

Maryam Mohajer

This is what catches my eye as I view Maryam Mohajer’s poster for International Animation Day 2021. The colors and shapes move across the space, leading the eye to the ASIFA logo at the top.

“All over the world, we’re going through hard times...”

Maryam said. “I wanted a sense of hope in my work; a miracle, a touch of magic even.” The Phoenix, here, embodies that spirit, sharing it with the viewer. “Phoenix is a beautiful creature, presenting magic and hope in Persian culture.” The hope, then extends to us and that link to culture is explicit here, as Maryam took the phoenix from an old Persian illustration by Muhammad Zaman ibn Haji Yusuf, the celebrated Persian artist (active 1670-1700).

The children in the poster, drawing the Phoenix into being, contribute to the message Maryam builds with the images. “I’ve always been interested in working with children. I like the raw, honest, non-biased attitude that they bring with them and their sense of hope,” Maryam said. And with hope flies imagination – “Most importantly their powerful, unlimited imagination always fascinates me,” she adds. “It’s a bit like animation itself in the sense that anything – and I mean anything – is possible.”

Standing out in the poster as well is the font announcing International Animation Day. Maryam has said that she created the font based on the Persian Calligraphy “*Nastaliq*.” The lines of the text curl and move mirroring the feathers of the Phoenix’s tail. “Recently I’ve been experimenting with text, not only as a tool to represent a concept but also as an aesthetic form. When you’re brought up with a certain language, it’s so easy to think of the text only as means of communication, but when you look at it from a different point of view, you can see it’s great potential as a visual form. It also adds a subtle touch of Persian identity to the work.”

Maryam did not begin her exploration of art directly in animation, but came to it from painting, as her first BA in Iran. “I was told that my painting carried too much of a narrative and that it was leaning towards illustration,” so she continued her studies in the UK, focusing on illustration and animation. “Once I tried my first animation project, which was a walk cycle, it was clear to me that I did not want to do anything else.”

“There’s so much life in animation,” she added. “The idea of creating a whole universe that moves, lives and breathes is just magical to me. Nothing compares to it.”

2021 IAD Poster - déjà vu!

The Last “Vault of Walt” from Jim Korkis

Subtitled the “Final Unofficial, Unauthorized, Uncensored Disney Stories of Walt Disney, Disney Theme Parks, Disney Films and More Never Told,” Jim Korkis has (sadly) wrapped up his series on The Happiest Place on Earth and all that it entails. *The Vault of Walt* #10 is one of the 34 books he has penned *since 2012* about Disney, the theme parks and its employees, collected from personal interviews and astonishing archival access.

Detroit, 2013: Steve Stanchfield, *That Poppins Woman*, Jim Korkis, and a lost animation instructor

This volume hops from the “First Official Walt Disney Biography,” to back-stories about *Dick Tracy* and Robin Williams, to unrealized dreams for the Magic Kingdoms, to the unique presence of Dumbo’s mother, to the ongoing controversies surrounding Jessica Rabbit.

His keyboard must be very, very tired. This and his other literary gems are at www.ThemeParkPress.com. Buy lots!

A Quick Note from ASIFA-Japan and ASIFA’s 60th anniversary celebration:

“As for ASIFA-Japan, we will be holding this year’s “IAD 2021 in KYOTO” to celebrate our 60 years as well. It will be held on November 23rd, at Kyoto University of the Arts, and we will also celebrate ASIFA-Japan’s 40th anniversary together.

Please visit our official pages, as follows:

- IAD 2021 in KYOTO: <https://asifa.jp/animationday/international-animation-day-2021en/iad2021kyoto/>

- 60th anniversary program (13 films by ASIFA-Japan members):

<https://asifa.jp/animationday/international-animation-day-2021en/iad2021kyotoprogram1/>

Best wishes, Sayoko”

Guest Essay: “HOW HARMFUL ARE THE VIDEO GAMES THAT DEVELOP COMPUTER GAME ADDICTION?” by Karl Cohen (from ASIFA-SF November issue)

Until August of this year I paid no attention to the video game industry. Suddenly I was reading about China cracking down on the game industry to combat child addiction to their products. The \$120 billion game industry was calling for parents, game developers and manufacturers to work together to combat the scourge. The stories were scary enough for the stock market value of game companies to start to tumble, up to 10% in just a few hours. What was going on?

To find out, I read lots of news reports that proclaimed, “No industry, no sport, can be allowed to develop in a way that will destroy a generation.” Several articles called the games “spiritual opium.” Chinese authorities were labeling e-sports and games the “opium of the mind” and calling digital games “electronic drugs.”

They called for more restrictions to prevent greater widespread addiction among children. One article claimed children were spending food money on games, were playing them for seven hours a day, resulting in their grades in school dropping.

Even *Tencent*, a major game developer, responded by saying new measures were needed to protect minors. They wanted to show they were socially responsible, but they only suggested weak measures for their most popular game, *Honor of Kings*. They supported stopping young kids under 12 from spending money on the game. They also suggested limiting their playing time to under 1.5 hours on weekdays and to 2 hours a day on holidays and weekends.

The Chinese government responded to Tencent’s suggestions by issuing much tougher restrictions. Online gamers under 18 are now limited to only one hour on Friday through Sunday and on holidays. Play must be between 8 and 9 PM and is not permitted on Monday through Thursday. Also facial recognition is becoming required to insure the player is 18 or older. That is to prevent children from using the IDs of adults to sign on. BBC news estimates China has “tens of millions of young gamers.” Tencent has also developed a facial recognition system to limit late night gaming by children.

It is obvious the company admits their product is dangerous, so why don’t they take it off the market?

Honor of Kings character

The World's Most Lucrative Market

Honor of Kings was the world's top grossing game in 2019 and 2020. Tencent reported it had the equivalent income of \$22.7 billion in revenue from smartphone games and \$6.9 million from PC games and gaming is just part of Tencent's income. It had a total revenue of \$74 billion. Gaming has been called "the world's most lucrative market."

Another character in *Honor of Kings*

Wikipedia says, "*Honor of Kings* is a multiplayer online battle arena developed by TiMi Studio Group and published by Tencent Games for the iOS and Android mobile platforms for the Chinese market."

The BBC says the crackdown by Beijing is based on a reaction to the rapid growth of capital and technology and the potential adverse effect on the well-being of the country's young generation. The government is also concerned about "celebrity fan culture and private tutoring." The government is trying to create "positive energy" and restore "correct values."

Game companies try to develop ways to addict players. They try to make the games as exciting as possible to entice players to return.

They offer incentives to return including daily or weekly use-it-or-lose-it quests, login rewards for continuous streaks of play, season passes and other incentives. They want to dominate the lives of their players.

Computer Game Addiction is a Serious Problem in the US as Well as in China

Playing computer games is fun for millions of people. When that pleasure becomes excessive it can be annoying to others, but it doesn't necessarily qualify as a computer game addiction unless other areas of a person's life become adversely affected. Unfortunately, that is happening to players in many parts of the world.

An industry of health professionals has developed to try and help those with this serious compulsive disorder. It is now recognized as a mental addiction in the World Health Organization's International Classification of Diseases (2018). The lure of e-sports is quite enticing to some people. E-sports players who get involved with competitions can be rewarded with money and titles – such as being called a "pro." Successful individuals and teams can achieve fame. Unfortunately, some people wanting to be great players say they spend 8 to 12 hours a day in training.

Some of the afflicted play multiplayer games. Some of these are designed to not have a fixed ending so new players can join in and others can leave or take a break when desired. Games may also have levels of achievement that encourage you to try and rise in your ranking. Players of some games can earn "wealth" simply based on the numbers of hours they have spent playing. There is even a concern that if you stop playing you may fall behind other players.

Another kind of lure are the gaming programs that adopt gambling concepts. Instead of using chips some games let you buy or win things to put in your "loot box." Other types of games including e-sports have people getting excited by betting money or things called "skins." There are lots of other ways to wager online that don't seem to be like old fashioned gambling. Software designers are on the search for new innovative concepts to get you involved.

Symptoms

Symptoms of a computer addiction include not being able to quit, being upset or angry when you can't play, thinking a lot about playing and believing that playing makes you feel better. Other signs that someone has a serious problem include the loss of other things you used to enjoy, having trouble with your job, relationships or schoolwork, and lying about the amount of time you spend on gaming. And there are physical symptoms that can develop from a sedentary lifestyle.

Treatment

Treatment programs at mental health clinics exist in the United States, China and other nations for people who spend way too much time doing things like playing games, web surfing and even chatting. The treatments range from group therapy to one on one counseling and outdoor experiences called Wilderness Therapy. There are also more severe interventions including shock treatment and in China militaristic "boot camps."

China has also established legal regulations. Prior to establishing the most recent rules, they had outlawed online gaming in 2019 for kids under 18 between the hours of 10 PM and 8 AM. There were also restrictions established in 2017 limiting the numbers of hours a kid could play on Tencent games.

If you type into your computer's search bar "video game addiction treatment" you will find dozens of businesses offering the public their services. You may also find interesting statistics like "as many as 12% of boys and 7% of girls are addicted to gaming."

The number of kids playing video games is said to be 70 to 80%, and 41% say they spend too much time playing video games. In the United States, spending money on video games grew by 30 percent in the second quarter of 2020, to a record \$11.6 billion.

Should the Animation Community and Public be Made Aware that Computer Game Addiction can be Harmful?

I believe computer game addiction can be harmful to the player and possibly others close to that person. I don't know what to suggest except that friends of someone with the condition might do the necessary research and try to convince the player to understand the problem and seek help. Animation can be a great art and I hate seeing it used in a way that harms others.

Notes and Observations from Yr Hmbl Typst

The alarm is worth sounding, and while it may ring like an echo of earlier warnings - "TV will rot your brain!" "Comic books lead to violence!", or my father's favorite, "MAD Magazine isn't even a damn magazine!" - it now seems an apt observation on the general lack of critical thinking these days.

I remember in the 1990s, visiting Disney World surrounded by kids staring at their Game Boys. Acres of visual distraction, and they were glued to a monochrome postage-stamp size screen? Now, living in *Ruritania*, I see the few still walking around bent over their phones, creating a population of scoliotic Quasimodos. I can somewhat understand it in Edmore, but at DisneyWorld? But, oh wait, they have an ap for that. Sorry. Forgot. Should have invested in that. Could have retired earlier.

So today with the ancillary addiction to social media, constant infusions of misinformation, eyes riveted upon phones, and adding the impact of "pandemic lockdowns" with protracted self-enclosure - what could we expect? There remains a psychological need for contact with others, but what sort of contact? Virtual (or un-virtual) vacations? Visceral terror with imagined ghouls? There are so many monsters out there already, and they're not all viral.

Regarding International Classification of Disease (ICD) codes - if you have ever been to a clinician, and you needed insurance billing taken into account, your clinician generally had to provide an "ICD" code. Your humbl typst is old enough to recall with the ICD-9 was the gold standard, but bureaucrats equate that simple time with an era of leeches and calomel. *There are 72,184 ICD-10 codes for 2020 compared to 71,932 for 2019, according to the American Health Information Management Association.* And they're working on #11 already.

ICD-11 Codes for Gaming Disorder are

6C51: Gaming disorder

6C51.0: Gaming disorder, predominantly online

6C51.1: Gaming disorder, predominantly offline; bipolar disorder must not be present

6C51.Z: Gaming disorder, unspecified

QE22: Hazardous gaming

The mind reels - and there's an ICD-11 code for THAT! *6B43* Adjustment Disorder!

According to ICD-11, *Hazardous gaming* refers to a pattern of gaming, either online or offline that noticeably increases the risk of harmful physical or mental health consequences to the individual or to others around this individual.

The pattern of gaming often persists in spite of awareness of increased risk of harm to the individual or to others. (Ultimately, every one in society will have an ICD code, with the possible exception of those who create them.)

Will the industry change? C'mon - look at those numbers. \$120 billion? Their goal is to surpass \$200 billion by the end of 2023! Where "META" wants us to go full into *Ready Player One* mode (for impact of cinema fiction, revisit *Minority Report* sometime, then think about your last TV weather report), there will be lip service for their concern, just as casinos add a little disclaimer that *if you or any one you know is addicted...yadda yadda yadda...* Better, in the meantime, to check your monthly gaming subscription fees for games you haven't played in months or years, because that's a part of their business model, too. Or maybe just push your concerns aside and invest for an early retirement yourselves. Remember, you never profit by buying a product, you profit by investing in it and finding another sucker to buy the product!

And the response from academe? Well, I can only speak for my recent years in Kalamazoo, but colleges seem to be dumping resources into and finding money for "e-sports programs," including remodeling buildings for arenas and setting up intercollegiate competitions. I speak of this with some level of irritation, as a former clinician at a student health center facing constant scrutiny for likely outsourcing, as was recently accomplished in nearby Ypsilanti. I guess it's just a matter of "follow the money." At least they're always adding counselors, and *they* know ICD-11! <https://wmich.edu/esports>

Grumpy (but still hmbl) typst out!

Well, that's 2021 in newsletters for ASIFA Central. Yr hmbl typst will be handing things over to Sparrow for her insights on the holidays for you poor folks who still get snail mail. 2022 will start up with a summary of IAD adventures, information on other ongoing projects, and talking points from our monthly ASIFA Central Coffee Breaks, because after all, caffeine loves us and wants us to be productive and happy!

*ASIFA Central Newsletter (cc) November (Nearly Winter) 2021 - see the updated website with more announcements **and an ever expanding newsletter archive** for ASIFA Central at - <https://asifa.org>
And then dive into more digital fun at <https://www.facebook.com/groups/asifacentral>
and for ASIFA International - <https://asifa.net> - be sure to check out the Facebook page on ANIZOOMATION
As usual, send any suggestions, comments, or recipes for zucchini bread, along with the usual castigations to yr hmbl typist, at jim.middletonrx@gmail.com or, for dull bloggery, <https://animatingapothecary.blogspot.com>*

*Welcome to ASIFA Central! We are the Midwest - US chapter of ASIFA, the oldest organization of animators **in the world**. This chapter was established in 1975. As volunteers, our board members take on many responsibilities - social media coordinator, retreat co-organizers, web updaters, ani-jam facilitators, party planners, and **more**. Our Board Members serve the front line for our Midwest animation chapter and are in touch with the International ASIFA board.*

In This Issue - IAD, Silenced Drawing Boards, Revisiting Deanna's Festival Film Clichés, Virtual Coffee Breaks, GVSU Lanthorn and ArtPrize, Public Domain Update, Down the Rabbit Hole of the Film Freeway (I), What Qualifies as an IMDb Festival?, Film and Archival Transfer Services (I), Member Award Frenzy and International News along with Other Vital Announcements squeezed into these pages!

For 2022:

With Resolutions, one should aspire, not merely perspire
(and not be in a hurry to touch the turquoise porcelain ball)

"Make your interests gradually wider and more impersonal, until bit by bit the walls of the ego recede, and your life becomes increasingly merged in the universal life. An individual human existence should be like a river — small at first, narrowly contained within its banks, and rushing passionately past rocks and over waterfalls. Gradually the river grows wider, the banks recede, the waters flow more quietly, and in the end, without any visible break, they become merged in the sea, and painlessly lose their individual being."

- Bertrand Russell

(Note - satire - not actual film festivals)

ASIFA Central Newsletter - Very, Very Late February (you can nearly SMELL MARCH) - 2022

**Deanna Morse's Festival Clichés
(from 1998)**

*Non-Scientific Observations on Common
Elements in Animation Festival Entries*

Common ways of starting films

in the clouds, in the morning
an alarm clock wakes up the protagonist
in the night as the day begins
in a starfield
using a newspaper to reveal the plot
points

films that take a long time to get started,
or too much time establishing a "mood"
before a story kicked in

Common styles and themes

animation "reality" films, animating to
documentary sound tracks
the effect of television on little babies
live action and animation intercut
men in prison, men in chains
dream diaries
people become insects, dragonflies
people get trapped in a computer game
bank robberies
old men alone in houses
dark stories

Recurring visual elements

big lips, men with big cheeks, buxom
ladies
characters with two different sized eyes
blood shot eyes
skulls
a face turns into a gorilla face
cowboys
circus
constellations -clouds, rain
mountains and water in computer
mermaids
castles, seashores, sand
spaceships, space shuttles
people with their heads cut open
clocks and watches, gears
flies and maggots, spiders
dragons, cows, birds, bees, butterflies
cats and dogs, lizards
saws for hands
computers, televisions, radios
shark fins
teeth as a decorative element in a scene
checkerboards, stripes

**Bri Yarhouse to Helm Animation Program at Michigan's Famed
Interlochen Center for the Arts**

Michigan's Interlochen Center
for the Arts has been creating
"transformational experiences for
artists and arts enthusiasts of all
ages," since its founding in 1928
by Joseph Maddy. Today, it is
one of the nation's first and
foremost institutions dedicated to
the development of young artists.

To its celebrated list of educators they will soon be adding our IAD
coordinator and ASIFA Central treasurer, Bri Yarhouse, as Director
and developer of its new expanding animation program.

Tell your friends! Tell your neighbors! Send your kids!!

<https://www.interlochen.org>

**ASIFA 60th Anniversary Issue Features Bri Yarhouse and
Bob Swieringa**

Has it been 60 years already?
Volume 32 of the *ASIFA Magazine*
contained Yarhouse's *Sharing,
Exchanging and Changing the World*,
celebrating the opportunities in ASIFA's
International Animation Day (IAD) - last
October's day was extended into weeks
to permit chapter participation under
another international event - the CoVid
pandemic. Nonetheless, since 2019, IAD
has been an enthusiastic romp through
new, international animation. Bri also
coordinated an additional celebration in
2020 involving ten chapters in a united

theme by Yeats, "a universal memory ... that inspires the poet or
writer," which she termed *Spiritus Mundi*. These "collective
unconscious" events served as the foundation of animated activities to
emphasize the humanity amid our many recent conflicts and
uncertainties. Bob Swieringa of GVSU examined the 41 *ASIFA Prize
Laureates* over the past 35 years, from Kihachiro Kawamoto in 1985
to Signe Baumane in 2019. ASIFA has expanded its recognition over
these years, including archivists, historians, and individuals who
promote the field of animation.

The issue itself had adventures - the first shipment of the print edition
made it from Europe to the east coast of the US, where they all
mysteriously vanished, in cryptic, mystic, unexplained circumstances.
Were there secret messages in the report on the OIAF? Did editor
Chris Robinson encrypt RMP positions into the space between frames
on page 29? Is *The Art of Wasting Time* a bit of banned theology in
the wastelands of Uqbar? We'll have to wait for the movie...

(Note - more satire)

ASIFA Central Members Chalk Up Awards at ArtPrize

The Polly Wolly Doodlers (Jim Middleton, Deanna Morse, Gretchen Vinnedge, and Suzanne Zack) didn't make off with any monetary awards from ArtPrize, but they certainly had their share of fun prizes to populate their group account. They look forward to more fun in 2022, although it will be hard to top the beautiful venue of the Watercolors Aquarium Gallery.

Time Passing: Passing Time also caught the eye of ace star reporter, Ayron Rutan, from GVSU's award winning *Lanthorn* newspaper, edited by the equally magnanimous Zack Goodrow (He loves podcasting, writing movie reviews and the *Chicago Bears*. It's true! I saw it on the internet!)

Deanna Morse's Festival Clichés continues
More Non-Scientific Observations on Common Elements in Animation Entries (from 1998)

Common Camera Movements

The camera goes into the mouth and away
The camera goes into the eye
We look through a spy-glass

Common Sounds

Burping
Solo Piano
Background sounds of computers, televisions, radios
Classical Music, Sonatas
Doors that trigger a sound when they open
Farting

Deanna explained in 1998:

"This is not to suggest that all of these things need to be avoided. We selected films for competition that shared these common elements. Some of them even won prizes! However, films that had a fresh style or characters grabbed our attention more quickly."

The list came after she viewed 1147 entries in the 1998 Hiroshima Animation festival, taking notes during the three weeks of pre-festival screenings. "We saw a wide variety of films and techniques - drawn, puppet, clay, paint on glass, CG, timelapse, image processed, cel, mixed media, sand, drawn on film... I thought I could make some real concrete statements about the nature of the work being done in animation today." Sometimes the things that recurred were "just oddball stuff. For instance, we screened two films in a row that featured angry babies, then two about snowmen. Two films used the same title! (It didn't matter - we selected one for the competition; it won an award.)"

How magnanimous are these inseparable pair of journalists (rumor has it they'll soon be starring in a roadshow version of *The Front Page* - it's true! I read it in an online newsletter!)? They agreed to let us reprint the article *in toto* (yes, and *toto*, too!) in our not nearly-as-award winning, but equally appreciative of filling as much space with good news as possible publication. That article appears on page four! So close, so close... you can nearly see it from here.

Polly Wolly Doodling at Watercolors Aquarium Gallery
by Ayron Rutan, for GVSU's Lanthorn, a meticulous newspaper edited by Zack Goodrow - 2022

With the onset of the COVID-19 pandemic in March 2020, the lives of many faced a drastic change. The very way in which each and every one of us operated was challenged as we were forced into our homes for extended periods to remain safe from the clutches of the Coronavirus. With this change came panic, depression, boredom, and the exploration of new interests by many.

Each one of these themes was explored by GVSU Film Professor and a team of animators from around the country at this year's ArtPrize showcase in a short film entitled "Time Passing: Passing Time".

The team was composed of Zack and fellow animators Deanna Morse, Gretchen Vinnedge, and Jim Middleton. The collaboration was born out of a desire to connect during the initial lockdowns.

"There were three animators [Morse, Vinnedge, and Middleton] that lived in different parts of the country," Zack said. "During the pandemic, they started to connect with each other. They decided to create animations with a theme and every month they would meet and share what they were making."

As the lockdowns progressed, ArtPrize was approaching. This gave Morse, Vinnedge, and Middleton an idea to try and do something with the animations that they had created. This opened up the door to Suzanne Zack, who was asked to serve as an editor for the team's project.

"We started meeting through Zoom, and we had conversations about the theme, what connected all of it, and why it was important," Zack said. "We talked about how the pandemic was so isolating, and that having this conversation through animation was a way to connect, keep spirits alive, and keep community."

The project was a true collaboration of talents, with each animator contributing their own distinct theme and style.

"They shared with me what they made, and it was really clear that through their art they were expressing the emotions that we were all going through during the various stages of the pandemic," Zack said.

The collection featured 5 segments, "Lockdown Shockdown", "Pandemic Potluck", "Time Passing", "Passing Time", and finally "Stepping Out". Each segment told its own story and conveyed a particular emotion felt during the pandemic.

"Lockdown Shockdown" expressed the sheer panic that ensued as the news of the virus began to travel. Businesses, schools, and essentially all social life was put on hold and we were all confined to the walls of our homes. The animation shows a man roaming abandoned streets until what appear to be jail cell bars enclose the screen. "Pandemic Potluck" highlighted the culinary endeavors of those on lockdown. Many of us fell victim to boredom eating, while others learned to cook as a way to pass the time.

The next two segments, and project's namesake, "Time Passing" and "Passing Time" featured stop-motion and timelapse animation styles that depicted images of the segment's theme: time passing.

Finally, the end of the film shows "Stepping Out" - a triumphant outro signalling the end of the lockdowns and communities finally rejoining and rejoicing with one another.

The film was shown at the Water Colors Aquarium Gallery behind a fish tank in an effort to give the project an underwater feel, as well as to have the colors of the animations pop behind the water.

"They had this very large aquarium with these Cichlid fish and we put a monitor right behind it," Zack said. "The fish were reacting to our piece. During certain scenes they would dart towards the screen and it was really an experience."

Overall, the film was received positively by ArtPrize attendees as well as Water Colors' everyday patrons. Zack said that experiencing its showing with the other animators in person was the highlight of it all.

"What was great was that we all came together," Zack said. "We were all in different parts of the country, but we came together for ArtPrize and it all had this added effect of us being together while our piece was being shown."

While short and abstract, "Time Passing: Passing Time" took a deep dive into the thoughts and emotions of those stuck inside during lockdown, and ultimately empowered its animators through connection and collaboration with expert editing work by Grand Valley's own Suzanne Zack.

But Wait - Keep Reading - or Lookit the Purty Pitchers!
Awards! Recognition! Pot Roast! (Ok, maybe not the pot roast)

Just one of many *real* awards for *Ethereal Shift*

Julie's Goldstein's film, *Ethereal Shift*, grew nearly in front of our eyes at board meetings and ZOOM coffee breaks. A surreal combination of found film and sounds, it has been gaining laurels from festivals that, interestingly enough, have names including Paris! Vesuvius! Adbhooture! It hearkens to her days of sculpting and moves as a remote reverie amid layered thoughts and telephonic sounds. The trailer is on the book of faces at -

<https://www.facebook.com/tellsthestory>
 and the audience cannot get enough of Julie!
<https://www.youtube.com/watch?v=JI-WUAB45BA>

Gary finding fun everywhere

Gary Schwartz' production of *Stain* grew from a three-day intensive workshop at the art school at the Flint Institute of Art last November. It has earned some serious hits online, but continues to pop back up and ask for more! Here is its dynamic presence on YouTube:

<https://www.youtube.com/watch?v=eXGvxOlvtw>

A moment of contemplation in Michael Long's *Island Hopping*

Michael Long's film, *Island Hopping*, has also been dancing amid fleche and feint, prête for a riposte and en guard for new engagements in the vast *piste* of Film Freeway.

Moral of the film: Be sure you obtain a prenu with any interactions involving mermaidens. They're Pisces, you know (they work for scale).

What began as "Solitude" became a meatloaf of French and German translating to something like "Only Death" or "My toes are coming out of my soles." Your choice. Either one is right.

Your humbl typst's chemo recovery project, *Seule Töd*, remains a tribute to the First Law of Thermodynamics with its tale of a man seeking a shave, but ending up with a case of unicorns. Balloons, cookies, and some peppermint flavored tornadoes appear in the process. It has also become a training film of sorts to examine the inner-workings of Film Freeway. So far, it has received mention from a dozen of FF's festivals, but none of them have sent any cookies. Or unicorns. However, I am growing enough hair these days to have a nice, satisfying shave.

The Esperanto Dignity Project has begged for a better translator in any future productions. They have suggested using Klingon for the proposed sequel.

NuqDaq 'oH puchpa'e'!!!!

An Honest-to-Goodness, Face-to-Face, Film Festival!
The CMIFF in Mt. Pleasant, Michigan, February 2022

This really happened! Live with people and everything!

CMIFF - fantastic! A face to face film festival on a nearby campus! So, of course, the weather reminded everyone (well, me, 'cuz it's all about me) that Mt. Pleasant is in *Michigan*, and Michigan's temperament toward weather is, especially in February, *ambivalent*. M-46 runs west to east, and so did the winds on the weekend of 19th, with some snow. Well, *some* in the context of Michigan. There was ice, too, but it remained under the snow where it wouldn't be a visual distraction, just an added attraction for a more entertaining trip. Some rural counties don't really plan for taking care of poor weekend weather, so the concept of a beneficial inorganic chemical reaction involving salt and ice didn't occur until half-way there, where the midpoint town (Alma) still had some science majors on the road commission. Indeed, they used the salt of the earth to reveal the earth beneath the salt! So I made it to the CMU campus, even a bit early, for the short animation film showcase. Fifteen others braved the elements to enjoy this segment of CMIFF, and fun it was. I had a nice chat with Mike Martone (*The Echo*), enjoyed the energy of the volunteers distributing tickets, and discovered that the soundtrack for *Seule Töd* needed about a 6x boost in volume. Drat those codecs! But that's why these face-to-face events are so necessary.

Steve Leeper's class was well represented that afternoon. May Nopora's clean and disciplined style was a genuine delight, and there was a sweet shout out to the novel-turned-flipbook style of animator Marie Pacou, known for phenakistiscope umbrellas (find her online and them online - they are amazing - here's a clip: <https://vimeo.com/238022172>).

My personal favorite film was *Come Outside, Masha* - drawn with a clean line and, well, on the eve of a Russian invasion of Ukraine, so timely for a contemporary animated story based in Kyiv to appear in a midwestern US film festival.

"Come Outside, Masha," Uulia Shalimova, Ukraine

I had to bow out after this brief visit, because the wind was changing, and my little Honda wanted to spin donuts in the parking lot (sorry, Steve, that was me). It was great, nonetheless, to watch films on a screen for the first time since *Knives Out* in December, 2019.

Virtual Coffee Breaks, Still Caffeinated

*An eight o'clock kick start, three I gulp down
 And a stiff black 10 o'clocker makes my heart pound
 Five cups of instant ought to get me through noon,
 But I gotta lay back so I don't peak too soon –
 I'm a cuppa cuppa cuppa cuppa cuppa Caffeine Zombie!!
 I've got percolator eyes and a drip grind mind
 Freeze dried nerves and a flavor crystal spine
 No Sanka, thank-ya! It's CAPPUCINO TIME!
 I'm a no-doze daddy with my java mug at nine
 I'm a cuppa cuppa cuppa cuppa cuppa Caffeine Zombie -
 NOSE DIVE!*

*I'm a cuppa cuppa cuppa cuppa cup...
 Momma - everything's turning black!
 I can't wait to get up in the morning and have some nice -
 COFFEE!!!!!!
 (Poorly recollected routine from Duck's Breath Mystery Theatre, ca 1985)*

But Whoa! There's MORE to the Coffee Breaks Than That! We're talking LINKS!!!

First, we have a Morning Coffee Animation by Tracy Miller-Robbins - an uber-widescreen window projection and installation at MSU: <https://vimeo.com/130596937>
<https://vimeo.com/148787609>

Jessi Meliza from Chicago gave a clipart resource in our January gathering:
<https://shakespeareillustration.org/>

AI material popped in during the discussion as well:
<http://waifu2x.udp.jp/>

And a Max Ernst collage book effectively created the "proto-comic" - *Une Semaine de Bonté* consists of five surrealist collage pamphlets, divided into seven parts, one for each day of the week. Chris Sagovac was very generous at the gathering:
<https://www.thecollector.com/exploring-max-ernst-surrealist-visual-novel/>
http://www.all-art.org/art_20th_century/ernst_Max1.htm
1

And for the latest regarding SAS gatherings and conferences:
<https://www.tees.ac.uk/minisites/sas/index.cfm>

Michael Long provided a reminder to keep the *Public Domain Review* on your browser's speed dial - who can't use more Dürer sketches of pillowcases:
<https://publicdomainreview.org/>

From Illinois Pop Art Collector Orrin Scott came resources to work on code and *Unsolved Mysteries Of Warhammer 40K* - I have so much to study...
<https://gdquest.github.io/learn-gdscript/>
<https://youtu.be/VchkiTUisu8>

Globe-hopping Deanna Morse was on a plane to Hawaii, but she provided us with images to show how miserable her time there was:

She did, however, provide us with some fun vacation chats:

"I had an interesting conversation with a guy at the Academy Archive today. He said that Coppola and some other hard hitters went to Kodak around 1982, because all the prints were fading - like *Mean Streets* - after only a decade or so, and they threatened to use Agfa or Fuji instead. As a result, Kodak changed their print process chemistry - and he can tell the difference of films from a one year period. 1982 - deteriorated. 1983 - stable.

"I was complaining a bit that people told me my prints from around that time had been turning red... like a sunburn.

"Thank you Coppola and heavy hitters. for making Kodak change their ways!"

She was also approached by the Academy archivists about getting her films and material for their archive. Her prolific production over the years, and several recent moves, have resulted in many original drawings and associated assets being lost or diffused among the masses (ok, I have a couple of those sketches). She said there was an audible gasp at the other end of the line.
"Oh those archivists! You gotta love 'em!"

Jim Dives Down the Rabbit Hole of Film Freeway, with a Laurel and Hardy Handshake more blather from Yr Hmbl Typst

A recent alert from Pencho Kunchev from ASIFA Bulgaria expedited some notes assembled by yr hmbl typst from the past several months:

"I recently received a message from an American film festival saying that in the last two years, during the world pandemic, about 4,000 new film festivals have appeared, most of them fake, "playing irresponsibly with the feelings and illusions of filmmakers."

I have been building a spreadsheet of my experiences using FilmFreeway and their access to innumerable film festivals. As it had been over 12 years since having any festival interactions, I went through the listings, looking mainly for some level of viewer exposure (and likely proximity to people I know who'd be likely to pop in and watch) and before long, had over 40 festivals logged in to be annoyed by my recently completed film, *Seule Töd*.

Some of the excitement was waiting for notification of being selected for the festival - the day approaches, the day is here, the day passes, then *two* days pass, then *three*, then the date is changed by the festival. No notice. It just gets knocked ahead a day, three days, a week later. No explanation.

So I went back to the list of submissions. There was a new button called "transparency" in the listing. Also, there were other buttons for the festival website, its Instagram link, its Facebook link. And an inconsistent listing on festival coordinator, marketer - in short, there was a trend for some of these festivals to be rather - *suspicious*.

My lovely wife Anne and I had been immersed with the series called *Ozark* during this time, with the main plotline being how this couple from Chicago ends up in Missouri having to launder money for a drug cartel. Why would I mention this? Well, it seemed that the festival transparency button would often reveal a series of name changes for the particular festival - sometime several within a single year - or an inordinate number of countries associated with a festival taking place in, say, Chicago. There were festivals that were named for a particular US city, but managed in Poland.

Some of these festivals have up to 42 *categories* of entry level - and encourage participants to submit to multiple categories, even offering discounts (but it still was more money). With 42 categories, at \$35 per

entry, with, say, 20 entries per category, that's almost \$30,000. Four sessions a year? Almost \$118,000. For one festival.

And the festivals without a screening presence also seemed to omit who the judges were.

But many of these same festivals had glowing reviews about how "great the communication was," "how wonderful the networking was," or how the festival was just about "the best festival" ever. If I clicked on the person, if I tried to track the film, I'd get a dead end.

Sometimes I clicked on the Instagram or FB

link, and it took me back to the home web page. And those web pages all started looking *a lot like each other*.

So, having watched *Ozark*, and having done some basic math, if someone wanted to make a lot of money vanish, this was looking like a good way to do it. Also, if you wanted to make a good pile of money and not really have to do much for it, it was another opportunity to, as Pencho Kunchev said, play "*irresponsibly with the feelings and illusions of filmmakers*."

Event Eligibility Criteria of IMDB Events

For the Event to be considered for Listing on IMDB it should meet the following criteria.

Events must:

1. Not already exist. Please check the Events list before submitting a request.
2. Be specifically centered around movies, TV, or video games. For example, a lifestyle magazine may include a 'film of the year' category in its annual award ceremony, but the Event itself is not centered on movies and is therefore not eligible at this time.
3. Be current. Historical Events are not eligible at this time.
4. Be established for more than 5 years.
5. Have an official website.
6. Have a well-established jury or method of selecting winners. For example, anyone can start a website with voting mechanisms, and any would-be critic can select their favourite movies of the year and announce them on their own website or social media profile - these Events are not eligible.
7. Have received regular international or national press coverage (wide or trade). For example, a nationally broadcast awards ceremony or a festival award winner announced in recognized trade or other media publications would be eligible for listing. An Event with only local news, social media, fan or blog coverage is not eligible for listing at this time.

Wildcards:

If the Event does not meet the above criteria, we will consider Events if they have generated a considerable amount of public interest. For example, if a festival premiered a movie that went on to win an Oscar, that Event would be considered for listing (please note, the Event should have played an important part in the movie's release, like a premiere - just screening it does not make the Event eligible unless the other criteria are met).

Seule Töd performed rather well, which was nice, but I noticed another trend - *if* a film was recognized, and *if* there was an actual posting of the recognition, it came as *only* the film title - the filmmaker was not listed. I had hoped to start some

of this promised and lauded networking with other festival animators, but alas.

Also, sometimes when the notification date came and went, I sent an email, and received a generic (and anonymous) response, but would then receive an award the next day.

If I wanted a certificate, they offered to provide a pdf of one for \$35. If I wanted a trophy, they could coordinate one being shipped for \$350.

FilmFreeway does have an opportunity to express your impression of the festival - but it is a listing of radio buttons. I had the opportunity to make a review on the festival site, *if* the film had been selected, and *if* the festival date had passed. I started having a little fun with that, because, well, I'm old and have faulty filters.

This is not to say all the experiences have been "interesting." In fact, some of them have been extremely rewarding - two of the festivals, "Scream It Off Screen" and "Oregon Scream Fest" have been not only interesting, but have very chatty coordinators, and I encourage anyone interested in something rather different to check them out ("Scream It Off Screen" was off-putting at first, but it's extremely honest in its process - you submit, you get a number, they draw 11 numbers at the start of an on-line show night, and they show them. You see them when they do. If it is a dreadful film, you vote in the comment field after 3 minutes, and if the majority says FOO! it's ceremoniously peeled from view, and they go to the next one. They do this live in a Minneapolis theatre, too, as a second venue, which sounds like a flashback to the old *Rocky Horror* days when things really went flying.) The Oregon festival takes place in an actual drive in.

There is a lot of fun to be had, but there's a lot of opportunity to be had.

So, since a neophyte to the process could easily be dazzled by initial impressions, a familiar name, or graphics employed by

the websites, I offer the following observations as likely red flags:

1. The festival is in its first year - nope
2. The festival doesn't have a screening process - nope
3. The festival text has frequent errors, including the festival location, (ie, a festival from, say, Philadelphia, spells its name "Piladelphia" on its own website), - heck to the nope!
4. A festival sounds like it's taking place in a big city, but - A "Phoenix" festival isn't Arizona, it's a bird! An "Austin" festival is in the "US" - not Texas (aw, c'mon, a Texan not saying *TEXAS, TEXAS!??*) - nope
5. The festival has a name that sounds a lot like that of another, longer-established festival (an "Indie Festival" vs an "Independent Festival" using the same town, running at nearly the same time) - nope
6. The festival is sponsored by unusual companies, such as one selling "Men's and boy's trousers and slacks. Carbon paper and inked ribbons." - a creepy nope!
7. A long, long, almost comic list of submission categories. 42 options? - probably a no to that (they know 42 experts? Really?)
8. Offering a paper certificate, a trophy, or a "showing" or a "critique" report *for extra money* - skip that, too
9. No actual list of winners and the creators on any of its social media - pfooeey
10. Way outdated social media - no updates since 2020? - not a good idea
11. A huge roster of countries involved (does it mean an international jury? Well...) - skip
12. Multiple name changes for the festival over a short period of time (ie, four wildly different names in two years) - naah

Finally, if the festival touts that it is "IMDb eligible," that offers some assurance, *but no guarantee*. Here is the caveat from the IMDb: "*We realize that there are already many Events listed on IMDb that do not meet this eligibility criteria. We apologize for the inconsistency - the...criteria are a -temporary measure until we schedule development work to improve the Event request/creation pipeline and storage/management of the associated Awards data.*"

(See the boxed comment on the previous page for the IMDb criteria)

Digital Film Transfer Services Observations

(Probably Part One)

Southtree / Legacybox / Kodak Digitizing Box are all the same

The ads are doing the best to overwhelm their production lines after a holiday season making us all sentimental and dewy-eyed about those films and tapes in the basement or attic. The work for Southtree, for LegacyBox, and for Kodak are performed in the same facility located in Chattanooga, Tennessee.

Yr Hmbl Typst Observations

Legacy box did a good job - a rather astonishing job in some cases. The regular 8mm films I provided didn't have an uncracked sprocket hole for their entire length and had been on reels, unwatched, for 20-30 years, in basements and attics. In addition, my hand-cranked Brumburger projector from the 1960s was as brutal as it was a "projector" in name only (we ran it like a peep show).

This was not a good plan in 1965 for long-term survival of 8mm footage

The other positive was that "a unit" with them was a *reel* - it can be a 50 foot reel, it can be a 400 foot reel. It's all the same to them. So I had a couple of 200 foot regular 8mm reels, and a 400 foot super 8mm reel. The same was with video - a 2 hour VHS tape or a 30 minute mini-VHS tape. All the same.

The interchangeable nature of Legacy Box and Southtree was confirmed on the arrival of the mp4 transfers - the return address for the Legacy Box service read "Southtree."

Caveats:

1. they are **slow** - you *can* pay for expedited service, but then you can't use their promotional discounts for the service (so you can pay twice as much *plus* the additional service fee)
2. Wait long enough and everything is 50% off - but then, still expect 8-10 weeks. I suspect this can be a longer wait if folks jumped on any holiday gift-card

This one worked like a tree chipper on film, too...

discounts.

3. They are **pricey** - even with the 50% discount, with basic shipping and insurance, you'll fork over \$200 for a "10 unit package" - so cram whatever you can onto a 400 foot reel. I looked at the \$200 price tag vs getting a digital transfer machine of my own that I'd frankly use, maybe, twice?

4. They do *not* convert sound film. Their frame rate *appears* to be 18fps. But for silent film, it's about the best I've experienced - it is probably a 2K resolution equivalent, and there is no artifact flicker. I'm going to experiment with a bit of sound footage and see if it can edit to 24fps in the Sony Vegas system with my next shipment to them.

5. I have not tried any 16mm footage - yet.

6. They sent my files back on a teeny weeny thumb drive. That was rather humbling. You can request that OR a DVD or a CLOUD ACCESS or a one-time download. Or all of them, at extra charges. I went with the mp4s on a thumb drive and then downloaded everything to a couple of hard drives ASAP. Everything edits fine on my Vegas system, so I'm sure Premiere will play nice as well.

So - Soon, I will be using another service that promotes itself as the "anti-Legacy Box," and they can transfer sound film. Will advise on those results in a future note.

Nina Paley Goes Old Testament on The World

Nina Paley's animation style works well in transliterating the bronze-age era, sit-around-the-campfire, tales of terror from *Revelations*. From a sociological standpoint, these verses feel like brute punches to the gut with lots of wrath and vengeance. She shows "salvation" as an eternity for a superficial society inhabiting a consumer-directed, pretty-pretty heaven, that Twain said "consists mainly of undesirable persons." In doing so, Nina mesmerizes the observer with genuine Art, and in Moho, no less!

She has her entire project uploaded to archive.org and has given the world free reign to do with it what it will. "Have at it!"

<https://blog.ninapaley.com/>

Jim Schaub - Buster Keaton - Muskegon and Home

The final interviews for Buster Keaton's *Home* documentary have been wrapped up by Jim Schaub, and now *the fun starts*. The pandemic slowed things for the project, as it has for many others.

Two new biographies of Keaton are out this season (*Camera Man: Buster Keaton, the Dawn of Cinema, and the Invention of the Twentieth Century* by Dana Stevens, and *Buster Keaton: A Filmmaker's Life* by Curtis, James). Interest in "the great stone face" is growing.

49th Annie Awards Move To Virtual Format

On Saturday, March 12, 2022

<http://ow.ly/8sTM50Hzewk>

Hoo-Hah! Family Edition, Volume Five

<http://hoo-hah.net>

This is the fifth in the *Hoo-Hah* series, and your humble typist would be hard pressed to single out a favorite edition. The current, "Family Fun" volume, again highlights the "Out Our Way" series, portions of which were still reprinted in the comics sections of my 1960s misspent youth. The creators show examples of their labor-intensive restoration process of these classic panels, and if that wasn't enough, have added obscure comics that celebrated the then "new" entertainment of motion picture, satire by Mark Twain, and frames of Jackie Coogan's silent feature, *Peck's Bad Boy*, from 1921 – the same year he was *The Kid* with Charlie Chaplin.

The panels could serve as the foundation for a feature film showing life of a century ago, but for now, we can build films in our mind of a land of laundry lines, kids being creative at not getting things done, and ample samples of "why mothers get gray."

The Cuphead Show - STREAMING WORLDWIDE on NETFLIX and as a COMIC!

Just when everything on TV looked like one more animated series based on selling merch, along comes a great-looking animated series based on selling merch! When *Cuphead* was introduced as a video game in 2017 by brothers Chad and Jared Moldenhauer, it was instantly a game that was as much (if not more)

fun to watch as it was to play. It's great when brothers play well together. Now there are comics, plushies, and enough ephemera to make the Big D green. So why not a gorgeously Ub Iwerks-Fleischer studio style Netflix series called *The Cuphead Show*? It started February 18 on Netflix. Well butter my popcorn!

The Bell Tolls
C'est triste d'oublier un ami.

Rita Dobias - Don Bajus - Giannalberto Bendazzi

An unexpected, chilled draft crosses the back of your neck in a securely sealed chamber; a dream appears where you cannot breathe; a nightmare pulls you toward a deep, smouldering hole – and you turn, you flinch, you wake, and wonder if... no, that cannot possibly be anything but imagination, but for a moment you think, *Is that all it would take?* And you wonder about others who sense that chill day after day, unable to fully communicate it to others, feeling it gradually diminish every little thing that defines yourself as *you*, until you don't even know yourself, no longer sense a thought, become engulfed by a condition you cannot control, nor can any longer understand.

So it must seem, to me at least, for those who have a chronic, progressive, debilitating disorder. To most of us, a chronic illness is just a shorthand device - Gary Cooper with Lou Gehrig's Disease; a supplement to deter Alzheimer's; a drug commercial promising to slow the side effects of multiple sclerosis. But these diseases do take away life, slowly, perniciously, unconcerned whether the life shares a spouse, children, friends, dreams... until that life's own memory forgets to live. And sometimes it seems that nobody else can remember – who was that person, was there more joy when she laughed, sang, lived?

The internet is such a snoopy beast - it pretends to know everything, but it has fissures and blanks and feigns a digital TIA when you would like to have your memory jogged, or jolted. And when it draws a blank, and there is nothing to fill it, was the search itself just another mystery, had its mission ever been based on a tangible burden of existence?

The beast tells us that *Rita Ann Dobias*, or

Dubias, or *Dobias-Waters*, or *Rita*, was born July 29, 1961. She died from a chronic, debilitating condition on December 21, 2021. She was sixty. She may have been related to, or known by several people who shared bits of her last name, or were her neighbors at several addresses scattered across the state of Michigan.

So much for the snoopy beast within the internet. It says nothing of an appreciation for members of the First Nations, concern for missing children, hoping those with disabilities are remembered, or her love of children.

If you are of a certain age within ASIFA Central, you would have remembered Rita at the turn of the last century, winning recognition with the Helen

Victoria Haynes World Peace Competition. If you were typing these lines, you would have remembered her soft smile, a tilt to the head, her hair across her shoulders as she managed at first with a cane, then a walker, and finally, a wheelchair; a quiet, delicate, peaceful soul who created for as long as she could. Then she couldn't come to distant retreats, or gatherings in Grand Rapids, and gradually became a quiet, delicate, peaceful recollection as other perceived priorities crowded her out of sight.

So when I feel that unexpected, chilled draft across the back of my neck, I shudder, look around, and think – yeah, I deserved that.

There will be other notes of passing in the following pages, people now gone who have voices to champion their presence on this earth, but for Ms. Dobias, I can offer only the observation that this is a chillier world, and provide a few photos shared by some ASIFA members and her FB page. The pandemic has doubtless obstructed movements on other announcements, other tributes, other memorials. If they emerge, please share.

Until then, ask not for whom the bell tolls.

Toute le monde n'a pas eu un ami

Don Bajus

from a release by estate curator Linda Koutsky

Animator, business owner, painter, jazz music devotee, dancer, jokester, and lover of life, passed away at age 88 on October 29, 2021.

Don was born on March 25, 1933, and grew up in Canada. A gifted young cartoonist, Don wanted to become an animator like Walt Disney, so he moved to Minnesota to study at Minneapolis College of Art and Design. His first effort was inspired by Disney's dancing broomstick!

In 1958 Studio One recruited Don to establish the first commercial animation production studio in the Midwest. Twelve years later, he and partner Mike Jones launched Bajus-Jones Film Corporation, also a 2D animation studio. An early Bajus-Jones promotional piece claimed that, "Animation can do anything, except save a bad idea." His firm was recognized with numerous awards, including a 1985 Clio (for excellence in advertising) featuring a giant runny nose seeking a Kleenex.

Don was always hungry for new technology. In 1993, he became a founder, partner, and creative

gags and practical jokes, and an inventive thinker who enlivened every discussion with his wit, humor, and unrivaled intellect. He was an avid reader of everything from sci fi to scientific discoveries, a home repair enthusiast, a tree sculptor, a maker of hilarious greeting cards for his friends and family, and a mentor to those in need. He was proud to be a dual Canadian-US citizen; his hands were never without a pencil.

He is survived by his life-long dancing partner and wife of 63 yrs, Beverly, feline pal Salsa, loving nieces and nephews, members of the Minikahda Club, Never Too Old Artists, the Fancy Foot Dance Club, and many, many friends.

Giannalberto Bendazzi - A Studious Life

adapted from Animation Magazine (January 2022)

On December 13, 2021, the animation community lost a dear friend and true champion with the passing of teacher, historian, and journalist Giannalberto Bendazzi at age 75.

Bendazzi was born on July 17, 1946. At 21, he became the youngest *Italian Daily* film critic, yet soon began to write essays on animation and live-action cinema. He devoted his full attention to the study of animation in the 1980s and lectured on several continents, receiving the 2002 Award for Outstanding Achievement in Animation Theory from *Animafest Zagreb*. In 2016, ASIFA granted him the Life Achievement Award, and in 2019 he received an Honorary Doctorate from Universidade Lusófona in Portugal.

Among the over 30 books and articles Bendazzi authored were *Cartoons: 100 Years of Cinema Animation*, the three-tome *Animation: A World History*, and *Alexeieff: Itinerary of a Master*. He was also a beloved and frequent participant at animation festivals around the world.

In one of his last interviews, he said, "Before my book *Cartoons*, there was no global history of

director in the launch of Windlight Studios, pioneering computer-assisted motion-capture animation. Movements by live actors (including Don) were transferred onto computer generated characters.

At his core, Don was a storyteller across multiple media. He was known for an ongoing series of highly detailed time-travel paintings that showed him working alongside Vincent Van Gogh, Salvador Dali, and Frida Kahlo, as they painted their signature artworks.

Don is well remembered as a kind and generous man with an irresistible smile, a perpetrator of

animation, even though a lot was known about American animation. (The 1994 English edition was improved and published in 2015 as *Animation: A World History* [CRC Press, 3 vols.]). For culture in general, and for journalists specialized in visual arts and film, this filled a giant gap. However, very few people were aware of this gap because they were blinded by Disney's presence. I reached this goal through years and years of work and research."

His life and work is summarized with his statement that, "Animation is in every area of knowledge... Hollywood films using digital technologies are presented as live-action features, but for the most part, they are animated!"

***Society for Animation Studies Updates:
2022 Conference and Support for the People of
Ukraine***

Dear SAS friends - from Kath –
"We're really excited here at Teesside University to meet you all and enjoy the buzz of a conference on campus. But don't forget there is, of course, the option to present remotely should you need to due to possible travel restrictions and the ongoing pandemic." That means it can be attended without the travel. Heck to the yeah. Visit the website for more info -
<https://www.tees.ac.uk/minisites/sas/index.cfm>

The following announcement from SAS also reflects concerns with the Russian attack on the Ukraine:

Sun, 27 Feb 2022, Olga Bobrowska
animationstudies@animationstudies.org

Dear SAS members,
I ask you to consider signing and sharing via your private profiles or professional social media channels (the ones you think are most appropriate) an open letter against the war in Ukraine set to express the standpoints of the international animation community:
www.ipetitions.com/petition/animators-against-the-invasion-of-ukraine

I realize this is a symbolic gesture only but by all accounts that are coming to me from the friends in Ukraine (and basically which are coming to anyone who stays in touch with the friends in Ukraine), symbolic gestures still matter.

"I also want to point your attention to the open letter written and signed by over 600 Russian animators. Available in translation here:
<https://asifa.net/animators-from-russia-call-for-peace-in-ukraine>

- and OIAF and Facebook.

"If you want to find out how to support the Ukrainian fighters, where to find verified, reliable news, and what are reliable charities you can donate in order to support refugees from Ukraine, please always check first with the official Ukrainian websites and profiles, ask your friends in Ukraine, of course I can also help (I'm trying to keep my personal fb profile updated in this regard). Remember to rely only on verified news."

*Best regards,
Olga Bobrowska*

(Note - this is a discussion on the pay disparities for animators at studios where record profits are being made. More on this subject in the next newsletter- this thing has to get out before April!!!! - yr hmb1 typst)
<https://therealnews.com/its-time-for-hollywood-animators-to-get-the-pay-and-respect-they-deserve>

Deanna's Timely Odessa Film

The dreadful news from Ukraine made the earlier mentioned festival film *Come Outside Masha* all the more poignant - Deanna Morse, fearless world traveler, also made a visit to Odessa a few years back and created this short film, comparing her steps in Odessa with those in the groundbreaking 1925 film, *Battleship Potemkin*. Can Russia's dictators ever be anything but brutal?

Video: <https://vimeo.com/66033567>

Public Domain Day for 2022

January was Public Domain Month (ok, the first of January was Public Domain Day, but we can stretch the joy). With the US Copyright being made somewhat consistent now, all film and print material is covered by copyright for 95 years, but all performances (ie recordings) are covered for 100 years. This means films and books from 1926 and before are up for grabs, and those 78s and cylinders from 1922 and before are fodder for fun! This means yr hmbl typst has to rebuild his little flowchart from last November!

However, just think - you can make your own BAMBI!

Here are the details from the kids at Duke Law:

<https://web.law.duke.edu/cspd/publicdomainday/2022>

AND IT GETS EVEN BETTER!

The Library of Congress has a "Citizen DJ" scratch mix program for HIP HOP rhythms, using PD material as an onsite program with downloadable sound files!

Yeah - you'll be there for a while!

Hip Hop Mixing with 15 categories and thousands of mixes pre-cut and compatible with Audacity and other software (we'll say it twice!):
<https://citizen-dj.labs.loc.gov/>

You want some VIDEO? Well...we know a guy...

For Audio Recordings – the Music Modernization Act (MMA) An hour with the archives and other celebrants...

<https://archive.org/details/a-celebration-of-sound-public-domain-day-2022>

Notices of Non-Commercial Use (NNU) through the Copyright office – pertains to pre-1972 recordings (which would have been 2067 otherwise). They have a search engine that lets you see if a recording has been "exploited" (meaning, claimed as owned by someone else already making use of its copyright) - if you find nothing there, follow their instructions, pay a \$50 filing fee, and if in 90 days, nobody says WHOA, it's yours without fear of statutory damages.

It was a process designed mainly for archivists and libraries, with lots of work by Duke university's law students for the past five years.

<https://www.copyright.gov/music-modernization/pre1972-soundrecordings/search-soundrecordings.html>

LAST MINUTE ADDITIONS OF IMPORTANT STUFF AND THINGS:

The Detroit International Festival of Animation - 2022 is now accepting invitations (7th year, so have at it! Safe!)

\$7 entry fee, categories based on length, entry fees identical

Welcome to ASIFA Central! We are the Midwest - US chapter of ASIFA, the oldest organization of animators **in the world**. This chapter was established in 1975.

As volunteers, our board members take on many responsibilities - social media coordinators, retreat co-organizers, web updaters, ani-jam facilitators, party planners, inveterate and unrepentant doodlers, and **more**.

Our Board Members serve the front line for our Midwest animation chapter and are in frequent contact with the International ASIFA board.

Julie Goldstein and the Grand Rapids Ballet Company

Julie Goldstein during rehearsals, with tech setups, her students, and choreographer Emily Reed to "generate an immersive imaginary landscape for the *Jumpstart* performance"

"No Longer Left Outside" - a Collaboration Between Ballet and Drawing Boards

For its celebration of 50 years of furniture city terpsichorical activity, the Grand Rapids Ballet performed "Jumpstart 2022," a celebration of artistic collaboration and educational organizations in Western Michigan this past March.

Among its eight projects, one represented a partnership with the GVSU Department of Visual and Media Arts, *under the guidance of ASIFA Central President and assistant professor Julie Goldstein*. Her second-level animation class worked with Emily Reed to generate "an immersive, imaginary landscape for the Jumpstart performance."

Emily Reed of the Grand Rapids Ballet arranged the choreography, and 18 students from GVSU worked throughout their winter semester on animation and movement exercises for "No Longer Left Outside," revolving around two pieces of music with excerpts from "A Conversation with Myself" by Alan Watts. Propelled by Watts' words, Goldstein's students developed a projected background of nature, moss, and birds coordinated to the colors worn by the on-stage performers.

"This is something where students can have a high-impact learning experience," explained president Goldstein, by conveying the emotion of the dancers in "a symbiotic relationship as a seamless effect."

The process included animations created in class, analyzing the projection requirements beforehand, and then finalizing the layout during multiple rehearsals.

Grace Spellman, a film and video major, said she was inspired by birds "flapping their wings, almost like they're dancing, too." Her concentration was on hummingbirds, cardinals and seagulls. "I love to draw and paint, and doing this solidified that for me," Spellman said.

Hannah Barton, a graphic design major, was inspired by the grace within the dance, creating animated lines to flow in the background. "With animation, one wrong movement can throw it off."

Discussions are under way for another collaboration, this one involving the Grand Rapids Opera company. Chuck Jones is smiling upon them all.

(Background for this article came from various reports in the Grand Rapids Press and the GVSU Lanthorn, whose contributors include Ayron Rutan, destined for greatness in the multimediaverse)

Notes on "A Conversation with Myself" by Alan Watts

<https://www.youtube.com/watch?v=8aufuwMiKmE>

There is a difference in style between the things human beings do, and what mother nature does.

Nature wiggles - but people want to get things "ironed out" or "straightened out" - that doesn't fit nature. The human being has a simple kind of mind. We live in boxes. A triangle is simpler, cruder, than a mountain.

Human beings are just as wiggly as nature, and our brains are an incredible mess of wiggles. And that's the part of ourselves that we understand least of all. I blame Euclid.

I am one of the cells in this incredible brain that I cannot understand.

Everything in nature is dependent on everything else.

☪

BREAKING NEWS FROM THE OIAF!

+* "O, Canada!" *+

The Ottawa International Animation Festival (OIAF) has extended an invitation to members of ASIFA-Central to screenings, exhibits, workshops and PUMPKIN CARVING this fall. The event is **returning to live in-person screenings and talks** happening from September 21 to 25.

ASIFA-Central members are eligible for a \$20 association discount off the price of a full festival pass (Animapass or TAC Pass). The box office goes online mid-June, 2022. Please note that in order to participate, members will need to upload proof of membership when they purchase their pass. For more information, please visit www.animationfestival.ca

Submissions are now being accepted for the September competition. And they have a POSTER already! Those precocious Canadians!

AAFF - Yr Hmbl Typst Notes on Its 60th Anniversary

Last year's Ann Arbor Film Festival seemed to have an undercurrent of rediscovery of actual film - either participants were shooting on 16mm again or were creating the sensation of a film-based production by special effects (graininess and reel-change reminders were a feature of the b/w release of *Mank* and have surfaced in Netflix's even more retro *Cuphead Show*, so find those splicing tapes and rewinds, kiddies!); this year there is a sense of discovery of *archive.org* and all

that the free-use, generally public domain monster server can offer for both the eyes and ears. It is nice to see material repurposed and serve as a likely source of self-directed education. (A confession from yr hmbl typst - with all the bombast and effects of the pandemic film releases, I found the greatest comfort in the works of Georges Melies and what he accomplished with his self-built camera by 1900.) Nevertheless, Ann Arbor's films are nothing if not innovative or at least a prod to the frontal lobes - the non-animated *Ten Questions for Henry Ford* was an astonishing example of cooperation between the filmmaker and the Ford company, and while the actor portraying Ford was hardly a visual equivalent, he brought his re-enactment to a grand level of sophistication. An early entry in the competition, *Salidas*, could be an interstitial in a dramatic film showing "associated fusions between farewells and eternity," with the conduit being an old East German ship canal lift.

Moving to animation, some of the many notable examples this year included the stop motion *Money Is the One True God*, the rotoscoping of *Archipelago* and *Insomnia*, and the use of a static-laden scratchy soundtrack among several of the entries. The surreal kitchen of *The 4th Wall* as a washing machine earned its place among the award recipients.

Of the several juror presentations, Gina Kamentsky (ginakamentsky.com) with her drawn-on-film techniques incorporating sculpting techniques in her kinetic, hand-cranked art pieces, and ASIFA's own Thomas Renolder, who shared his earliest filmed experiments (proving a good hairstyle can last a lifetime), were especially welcome visitors to the home computer screen. *The Sally Dixon Story* was a 50 minute tribute to the late experimental film curator who founded the film department at the Carnegie Museum of Art in Pittsburgh and was an early champion of "film as art."

The AAFF - "Bending Minds Since 1963."

GLAS festival - 2022

With many festivals reverting to on-site only this year (notably *Annecy*), the opportunity to view films without extended travel remains a welcome option whenever possible. GLAS again extended this option for 2022. *Ten Degrees of Strange* appeared here (as well as at AAFF) and *Paradis: Goodbye Jerome!* brought a *Yellow Submarine* vibe to the entries, with a haunting image of a heavenly-derived actual hot *dog* offering itself up as lunch in its final

scene. “Where have all the flowers gone” wafted through the final portions of *Impossible Figures and Other Stories*, a favorite of last-year’s ITFS festival, as was *O*, a 360 degree repeated stop-motion spin in a derelict apartment, which was a residency project of Paul Wenninger. *Wellspring and the Tower* had some very satisfying closing credits, Tal Kantor’s *Letters to a Pig* was a hyper-realistic fable of “inherited collective trauma” where a boy is saved by swine. An overly

affectionately bear has unexpected menu additions for his sad birthday in *Bear Hug*, a boy becomes a Nascar wheel to please his father in *Sierra* from Estonia, and the Chilean pair of Cristobal León and Joaquín Cociña were given a retrospective of their stop-motion, full-room, whispered nightmares.

The extraordinarily well-appointed Tom C. T. Brown hosted the competition showings and the follow up Q and A’s.

October Animation Celebration - In EDMORE?!

Edmore, Michigan, recently more known for putting “the pot in potato” is also the final resting place for members of Winsor McCay’s family, who lived and worked in the Stanton-Edmore area after McCay departed for brief college training in Ypsilanti – and fame in fantasy and film. This year, as part of International Animation Day, Edmore will be celebrating with a Sunday afternoon of historic and international animation on October 23. There will be cartoons! Door prizes! And, quite likely, *potatoes!* Details to follow! *Edmore, I tell ya, EDMORE!*

Gary Schwartz and Ukraine Animation

The ubiquitous Mr. Schwartz turned a recent animation workshop toward the turmoil in the Ukraine, and this effective commentary was the result. It is thrilling to know that some international members are able to offer escape routes for Russian animators while lending similar options and support to the heroic citizens of the Ukraine. Animation unites us! Despots, with their singular lack of joy or imagination, will only be worthy of the dustbins of history.

<https://www.youtube.com/watch?v=u1w53TyugPQ>

And, Well, This is Apparently a Thing - Animated Ad for the Venus Shaving System

The cable alternative Roku brings the added bonus of atypical advertising, and this Gillette-Venus one- minute animated commercial popped up while yr hmbly typst was waiting for the morning news summary from Grand Rapids the other day. I had to double check to be sure it wasn’t a satire on consumerism, but it’s real, and rather clever.

<https://www.youtube.com/watch?v=gIIUNuSdJdA>

ASIFA Central Coffee Breaks

There are few subjects not broached during the monthly gatherings hosted by Michael Long of Saint Louis (you have to spell out the *ST*. now, because the improved USPS no longer understands abbreviations - gee, makes one wonder what the abbreviation *USPS* is supposed to mean - but yr hmbl typst digresses). Members tilt at the technological windmills, fighting the assistance of Win10 or OS11, Zoom access, and who was hacked by that bastion of security, *Facebook*, to but their best faces forward, even if it belongs to a cat. The challenges of teaching during a pandemic, trying to engage against the monumental boredom experienced by the students during lockdown, and *then* get them back on an educational timeline once things begin to reopen have been major discussions. Some students have been able to join in, showing their experiments with licorice and candy corn teeth. The gatherings fall around mealtime in some zones, so that certainly grabbed attention.

And did you know that Zoom lets you sport a moustache? Of course you did. Yeah, we all played with that. In fact, we discussed the varieties of moustaches during the pandemic midpoint, since shaving had become a hypothetical for quite a while.

Dana Sink of Pennsylvania (film *Power*) joined the April meeting, and that led to a discussion on ducks. Deanna Morse neighbors with chickens, and Dana has ducks. Dana sings, *Time to milk the ducks!* to his water fowl. Bob Swieringa suggested he *Release the Quackens*

Influential films drove a nostalgic discussion of early experiences with *This is Cinerama*, *How the West Was Won*, a projector film meltdown during an Orc battle in *Lord of the Rings*, the lifelong terror from the banshee of *Darby O'Gill*, and Abel Gance's restored 1927 4 hour epic *Napoleon* with Carmine Coppola conducting in the early 1980s.

Deanna Morse was proud of her new wall art, including *Canine Gothic*, Tracy Miller-Robbins' workhorse scanner remains in need of an upgrade, Michael Long is working on mosaics and gorillas, and David Baker is looking forward to setting up microTV stations after his upcoming retirement. And visitor Sean Dunn wants magazines! We'll see what USPS *really* means after this deluge of material!

The latest meeting ended with the Baker corollary to a rule at FSU: *The project is never finished - it is abandoned.*

*Welcome to ASIFA Central! We are the Midwest - US chapter of ASIFA, the oldest organization of animators **in the world**. This chapter was established in 1975. The board members volunteer have many responsibilities - social media coordinators, retreat co-organizers, web updaters, ani-jam facilitators, party planners, inveterate and unrepentant doodlers, and **more**.*

They also work at the front line for this Midwest animation chapter and are in frequent (now practically simultaneous) contact with the International ASIFA board.

DEANNA MORSE - NEW ASIFA INTERNATIONAL PRESIDENT

A new executive board has been elected for the next three years for ASIFA International. The founders envisioned a world of peace and dialogue to settle our differences, with the art of animation creating a bridge among different cultures and ideologies.

The new executive board is broadly international:

Deanna Morse, President (USA)

Anastasia Dimitra, Vice President (Hellas/Greece)

Mohamed Ghazala, Vice President (Egypt)

Johnchill Lee, Vice President (China)

Annegret Richter, Vice President (Germany)

Stefan Stratil, Treasurer (Austria)

Thomas Renoldner, Secretary General (Austria)

Deanna Morse is an independent experimental animation artist, with films for Sesame Street, and pieces in permanent collections including the Metropolitan Museum of Art. She is a member of the Academy of Motion Picture Arts and Sciences, and an emerita faculty member, Grand Valley State University. A former ASIFA International Vice President, she currently lives in Southern Oregon and is equally active in the ASIFA Central chapter.

Deanna Morse - Portrait by K. Lynn Smith

Anastasia Dimitra is an animation professor and director, with many awards and international screenings. She has written books and papers concerning the art of animation, and has been a jury member on several international animation festivals. She is very active in ASIFA Hellas, and has served ASIFA International as the Coordinator of the 60 th Anniversary Celebration and treasurer.

Mohamed Ghazala, with Ph.D in animation, is currently the chair of Cinematic Arts school in Effat University, KSA. He is also award-winning animation director. His main research interest is in documenting the animated practices in Africa. He served ASIFA International as a Vice President.

Johnchill Lee with a PhD. in Digital Media Communications, has a diverse background in animation, education, new technologies, and the industry of animation. He is President of Beijing Digital Creativity Industry Association, the Secretary General of ASIFA China, and a former Vice President of ASIFA.

Annegret Richter, with a Ph.D in animated documentary, has a solid background in Communication and Media Studies. She was a festival director at the International Short Film Festival in Dresden, and International Leipzig Festival of Documentary and Animated Films. She has worked as a director in the Communication department for ASIFA.

ASIFA CENTRAL ONLINE RETREAT COMETH
“Re-FRAME by FRAME”
JULY 15 AND 16

The schedule for the upcoming retreat has been outlined (and may be subject to change between now and July 15) - so RSVP to secure your ZOOM seat to the ride of a weekend!

RSVP to asifacentralretreat@gmail.com

Friday, July 15th, 2022 - Keynote Presentation featuring
Lisa Barcy at 7pm

Q&A afterwards to approximately 9pm with an After Party in THE
INTERACTIVE ROOM (you may dance, if you wish)

Saturday, July 16th, 2022

Before 10AM - Wake up! Wake up! Feed the cat! Let out the
dog! Shake off the bedhead! Eat that toast! Chew each mouthful!
Brew that coffee!!!!

10AM – Introductions/Chat

11AM – 12PM – 5 Minute Lightning Talks – descriptions will be
ever-evolving, and if you want to play, add your name with the
RSVP request! Topics thus far will include:

*IAD Student Presentation – Interlochen Animation Program
Development – ASIFA Central and International News – the
phenomenal bibliography project of ANIMATION*

1PM – 2PM – Hands on Workshop – the mysteries of Loom –
(requires some pre-preparation on the part of the participants, as in
go out to LOOOM and get the software - it may be a challenge to non iPad users, but work-arounds are being explored even as
these words are type typed typed out)

2PM – 3PM – Animator Talk – 15 Minutes – to include so far:
Gary Schwartz on the making of The Crown Nobody Wanted <https://www.youtube.com/watch?v=cNhy897qAMU>,
Updates from Chris Sullivan – Michael Long – Jim Middleton (time slots available! boast and brag!)

3PM – 5PM – Hands on Workshop
CUT OUT ANIMATION / STOP MOTION PRO – STOP MOTION STUDIO
Unexpected Juxtaposition – Exquisite Corpse – Poetry Jam (results to be shown from 6-9pm)

5PM – 6PM Dinner Break

6pm-9pm Share your work, discoveries, or projects for 10 minutes – description TBD (time slots available!)

MORSE'S 1989 FILM "PLANTS" MAKES A
COMEBACK

Deanna Morse reports an interesting increase
in interest in her early 3D animation project, "Plants" from
1989. <https://vimeo.com/75121003>

This seems to be on the heels of the interest in a
“retro” computer style of several festival films when 1985's
Money for Nothing computer graphics was “State of the
Art.” https://www.youtube.com/watch?v=wTP2RUD_cL0
(although Mick Jagger's “Hard Woman” pushed the limits
of early hard drives the same year:
<https://www.youtube.com/watch?v=8btm2els8kM>)

*(An example of the current retro look can be seen in the bittersweet
story of “Marona’s Fantastic Tale” from 2019.)*

It also may be due to individual animators wanting to
explore using the CGI style without having to involve
hundreds of trained specialists to build a homogenized
virtual reality. Imagined reality can often be best expressed
by a committee of one.

RE-FRAME-BY-FRAME
CELEBRATING THE ART OF ANIMATION RETREAT . . .

ASIFA Central

July 15th 7pm - 9pm & July 16th 10am - 9pm
Animation Workshops, Screenings, Inspiration & Networking
RSVP @ asifacentralretreat@gmail.com for Zoom Link
Keynote Animator Lisa Barcy
Friday, July 15th at 7pm!

Upcoming OIAF-2022 Will Again Include ASIFA Discounts!!!

The Ottawa International Animation Festival (OIAF) is one of the world's leading animation events providing showings, exhibits, workshops and entertainment since 1976. Attracting artists, producers, students and animation fans from around the globe, the OIAF brings together art and industry to experience world-class animated works.

This year's in person only OIAF runs from September 21 to September 25.

Amy Kravitz, the inspiring teacher from the Rhode Island School of Design (RISD) and creator of animated visual poetry, will serve as this year's honorary president.

And - *AND* - ASIFA members get a discount on festival passes! So go, already! Get a room with some laundry facilities and save even more time packing! It's all about the savings! ASIFA Central will be sending a verified list of eligible members to Ottawa for the discounts - and maybe some recipes for *BBQ hotwing poutine...*

<https://www.animationfestival.ca/>

Well, the release from lockdown has had its effect in Canada!

End of QuickTime Software Support and Functionality

First went Netscape, then Internet Explorer did a dumpster dive, but beneath the radar, support for the long-popular Quicktime player also ended this year. This means if you have a copy of Quicktime Pro and want to install it on a different computer, the registration key will no longer be recognized, nor will it play *.mov files. In addition, if you have been using the Quicktime platform to convert films from or to different formats, notably the old *.fla files from the proto-Flash days, you will lose that level of access to your early animation files. Registered, functioning copies of Quicktime on existing computers still work at this point, so if you have a laptop or desktop with a functional Quicktime on it, this is the time to get your old files converted to jpgs or other formats that can still be read by video editors. Your humbl typst is racing to get several dozen short experiments from the late 1990s into an archival format for future use.

Making Your Smoooooth Tablet Behave Like Paper - a Home Hack Experiment

The best thing about a digital tablet is getting your vision into a digital form while still having the sense of drawing. However, the effect is muted when the drawing surface is a frictionless and smooth. Some manufacturers have made a "paper feel" screen that gives the stylus some resistance while skimming the surface, and iPads have an applique that can fit atop the screen - but these all come at a cost, and what about those with "fixed incomes" and only online resources? Well, here's a home experiment conducted by yr hmb1 typst recently making use of a Huion Pro-16 digital tablet and some Press n Seal cling wrap. The wrap has a slight texture and sticks to the screen without too much distortion of the tablet image. The act of drawing now has a slight bit of resistance, and the chronic problem of a little "hook" appearing whenever lifting the stylus seems to be remedied. It works for a couple of drawing sessions before it should be replaced, but it achieves the desired effect for pennies vs dollars. Yr hmb1 typst is still checking whether any residue left behind affects subsequent use of the tablet, but thus far, it's doing pretty well. The example in the photograph is while using - gasp - Flash CS5 from the pre-Cambrian period, and the plastic wasn't cut to size, which is what will happen in subsequent experiments. No doubt it violates some "proper use" warranty for the tablet, but that's the risk one takes in the name of SCIENCE! Ok, in the name of CHEAPSKATE!

The consequences of caffeine and late night curiosity...

Little Nemo Reappearing in Games and Graphics

Y r hmb1 typst, keeping his Edmorian roots saturated in the soil where once trod the parents, sister, and uncle of Winsor McCay, just can't get enough of every new project that emerges, or any online reference that can be derived from, the genius of that human who could fill pages for the Hearst papers – and make even the vapid prattle of Arthur Brisbane *look* interesting.

<http://www.panelpatter.com/2015/08/perchance-to-dream-in-little-nemos-big.html> - will bring you to "Little Nemo's Big New Dreams," and "Return to Slumberland" reviews, that somehow slipped past my eyes seven years ago (drat those staff meetings - DRAT!), and a certain editorial cartoon of WWI vintage seems just as sobering as today's headlines. So this brief newsletter will provide a few visuals celebrating the one, the only -

**WINSOR
MCCAY**

The inspirational Master

The Little Nemo computer game, featuring a familiar moon.

Little Nemo gets a manga treatment....

... and sadly, a McCay image that one could only wish were a transitory nightmare....

*Catch up with everyone at and after
THE RETREAT!
July 15 and 16*

ANIMATION UNITES US

Opinions expressed in this newsletter are those of the hmb1 typst and do not necessarily reflect the thoughts, opinions, or policies of anyone anywhere else, and especially at ASIFA Central, which is a completely volunteer-run, non-profit gathering of very busy and frantic members moving at 24fps on a slow day, where vacations are when you shoot on twos.

Press releases are always welcome! We encourage shameless self-promotion!

*The Month That
Just Keeps On
Giving!*

*Yet another ASIFA Central
Newsletter 2022
for IAD Information!*

The Retreat in July was so jam-packed with info and reportage that it will take a second installation to squeeze through the ASIFA Central bandwidth (coming soon!). In addition, the International Animation Day Celebration is approaching, and that means - *more film freeway instructions!*
And that's what we have in this notice!!!

Michaela Pavlátová

*Introducing this year's 2022 International
Animation Day Poster!*

*Poster creator interview/press release: Michaela Pavlátová - press
release by Bob Swieringa*

A joyful menagerie from Michaela Pavlátová
The International Animation Day poster was
designed this year by Michaela Pavlátová,
animator and film director from the Czech
Republic. The poster is vibrant, colorful, and

playful – an image of life, of motion.

“The inspiration for the poster was joy, a celebration of animation,” wrote Michaela. The variety of characters and motions are contained in the outline of a head, itself expressive and playful. “I like to draw people and animals... but there could also be other characters, other animals... But at the moment I drew the ones that are there – interesting, fun, crazy, diverse” she explained. This extended to how she also thought of the head, full of these characters and ideas: “And because I

wanted the head to be sympathetic, playful and also a little bit provocative, I gave it a small protruding tongue.”

Michaela notes that her path to animation was quite straight, attending the Academy of Arts and Crafts (UMPRUM) in Prague after completing art high school. Originally, she wished to study illustration, but given the competition for openings, she thought of animation, entering the animation department “and very soon I fell in love with animation itself.”

Undertaking animation can be demanding work, but she found that she had a right combination of “a certain amount of talent, discipline, strong will, enthusiasm, humility, diligence, patience,” that have continued to aid her in her career. After graduation she made a few animation shorts in the state studio Kratky Film Prague, a place rich in animation history.

After a period of time working in San Francisco, she returned to the Czech Republic, directing live action films and creating animated shorts and an animated feature film (*My Sunny Maad*, 2021), and would like to make another. “An important part of my life is also teaching,” Michaela said; she is currently head of the department of animation at FAMU Prague.

Michaela notes that working in animation is a unique undertaking. “Who else would want to spend life in isolation in our dark studios... working for ages on films... And still, we love it, we are obsessed with our work. Frame by frame we create new life, new stories which can be real, funny, sad, obscure, touching, alarming, poetic, you name it.”

Looking at animation broadly, she sees animation as “a distinct, unique art form with a long tradition that currently takes many forms... Animation is constantly getting a new face, new platforms and new possibilities” as it appears in expanding areas, such as games and virtual reality, as part of the mainstream and the indie art scene.

She sees the current state of animation in this range of approaches – both in form and content. “I hope that animation will continue to be so colorful, diverse and inspiring,” she says. And that creativity deserves recognition, embodies in her IAD poster: “The diverse yet strong community of crazy people creating new universes deserves to be celebrated!”

IAD - How You May Participate

(this may seem somewhat familiar)

Deadline for Submissions: September 1, 2022

The IAD program is coordinated through the online festival broker, Film Freeway. It's free, but it is a multi-step process. If your intended film is already in Film Freeway, skip to Part Three below.

Note #1 - more information on the streaming version of IAD films will be coming soon!

Note #2 - and this is important to understand - *this is not a festival*. ASIFA is using FilmFreeway as a holding zone for films that chapter members want to make available for showing as part of the IAD celebration. *No prizes are awarded, and no laurels are "official" for ASIFA IAD.*

Chapter representatives will pick among the submissions, and on IAD, will run them as part of that area's contribution to the international celebration!

PART ONE - Some basic requirements and Guidelines

Get your animation into a digital format (ie, mp4). This will make it possible to assemble IAD entries into a compatible program.

Here are the suggested criteria from the IAD Coordinator, Bri Yarhouse:

Film dimensions should range in size from: 1280x720 to 1920x1080

Use NTSC format

Video Compression: H264

Pixel Ratio: Square Pixels

Try to keep the file size to 10 gigs or lower

PART TWO - Putting your masterpiece into the FilmFreeway portal

1. Go to <https://filmfreeway.com> and create a profile for yourself, if you haven't already done so (if you have a profile, log in!)

2. While in the same portal, create a profile about your project. To do this, look at the top of your newly created profile page for *My Projects* and click on that.

3. Then click on a blue button *Add A Project*

Add a Project

1 Project Information

Project Type

☒ Film / Video

☐ Script

☐ Music / Songwriting

☐ Photography / Design

☐ VR / XR / Immersive BETA

* Project Title

(English)

The Godfather

Brief Synopsis

(English)

4. This opens up a series of sub categories - project info, then submissions info, then credits - fill up as many of the 5 fields as you can

5. THEN you get to upload your project file - the portal will take you to a new page and permit up to a 10G sized file (this is why we suggest a 10G file maximum!)

6. Repeat the process for each film you want to put into the Film Freeway library. No

restriction on the number of submissions into the IAD collection!

OK, now you're done with the file building in Film Freeway.

PART THREE: Contact the ASIFA Central Secretary, yr hmb1 typst, Jim Middleton at jim.middletonrx@gmail.com for your entry code information!

If you entered a film in last year's IAD, the process will be identical, nevertheless, it is only being distributed on a person-by-person basis to keep extraneous activity from occurring!

And then in October, you can be an INTERNATIONAL STAR!

At Long Last, Bringing in the New Year!
February, 2023 - A Wrap Up of A Year, A Toss Up of a New Adventure

Encapsulating notes from mid-August until more lawns need attention
“Watch the ripples change their size, but never leave the stream of warm impermanence.”

GRETCHEN VINNEDGE CREATES ANGELIC IMAGES TO KEEP WARM IN RECORD- BRAKING LAKE-EFFECT MICHIGAN SNOWFALL (special report to ASIFA Central Newsletter)

At long last, amid the blast and blow of
intemperate Nature, the skies responded to the
entreaties of mere mortals who were inspired by
simple aerobics. We have sunlight! Free-range
ASIFA Central Board Member Gretchen
Vinnedge gazed into the gray overcast and cast it
over with these words - “CUT IT OUT,
ALREADY!” - and with force and flail, the
embodiment of molecular reorganization within
her incantation was enough to drain the gray skies
into the ever-replenishing white fluff of Michigan,
thereby freeing the heavens from its leaden entrapment.

“I never felt more like taking a nap in my entire life,” Gretchen was heard to say as
she sprang from her anatomical etch and sketch upon the palm of Der Mittenstadt.

Once again, animators make the best meteorologists. They can make the weather
predict *them* – if it DARES!

Inside this protracted, purloined, and procrastinated publication:

IAD!

Job offers!

Public Domain Updates!

Student Debt and International Plagiarism!

Unsolicited Testimonials and Coffee Breaks!

Tempestuous Traumas!

Living the Dream at 24 frames Per Second!

Misspelled Words!

AI - and AI EI O!

“Wheel!” or “Oui!” or “Wii!”, but not “Wee!”

If you’ve had your shots, turn the page and EXPLORE

The NEW! Updated! Flowchart for Identifying Public Domain Works Moving into 2023 and BEYOND!
 A general guide, and when in doubt, check with copyright office website at
<https://www.copyright.gov/music-modernization/pre1972-soundrecordings/search-soundrecordings.html>

* archive.org material isn't all necessarily in the public domain - if there are "creative commons" (cc) stipulations, be sure to follow those. If the material there is after 1923, it may be posted "under the radar." If you are lucky to become commercially successful with using gray-area material, then the random owners of the "copyright" (hardly ever anyone associated with the initial artist, but someone who scooped up some ownership rights at some point) may annoy you with financial complications.

IN ADDITION - Yr Hmb! Typst and Secty has begun uploading mp3 and WAV format files from The Animating Apothecary Archives, which can then be arranged by recording year of issue - at this early point in the process, over 100 recordings in the Public Domain Category have been added to archive.org, with a list being continually updated on the ASIFA.org website under "Newsletters and Other Resources." Sort by year, and feel free to use material 1923 and earlier.

https://archive.org/details/@jim_middleton

AND A GOOD TIME WAS HAD BY ALL!

But when it comes to public domain material, THERE's MORE, MORE, MORE!!!!

Our own Smithsonian has added 4 million images to the public domain and, yep, there's a website for that, too! Don't be shy, be *inspired*!

<https://www.si.edu/openaccess>

The 2022 International Day of Animation - Another Incredible Success!

Through Bri Yarhouse's wondrous abilities at organization and coordination, the IAD continues to grow with international participation.

For ASIFA Central, this past October's celebration was marked by showings in Midland, Interlochen, Mt. Pleasant, Grand Rapids and Edmore, with further participation in Oregon, Missouri, and Texas. Altogether, hundreds were able to view local and multi-national examples of animation in traditional, experimental, CG, and stop-motion forms.

ASIFA Central Secretary Jim Middleton created multiple variations of the program to fit different showtime availabilities.

The film compilations were made available until mid-December for presentations postponed due to weather, showplace availability, or scheduling conflicts.

Bri is already working on the 2023 IAD and has been reaching out for potential poster designers.

(Programming details from the 2022 edition of IAD are available at ASIFA.org in the "Newsletter" archive.)

- IAD Images from Chris Sagovac

- Edmore IAD Photos from Jim Middleton

Edmore's IAD included a tribute to the work of Winsor McCay, whose family has connections to the area.

Sketching Among the Members

Gary Schwartz Has One Packed Passport

When there is a festival or workshop to be found or founded, it seems Gary Schwartz is there, his passport becoming more of a passportmanteau. Worthy of his own page, we can, in the meantime, provide this glimpse of the celebrants at the most recent OIAF taken by Mr. Schwartz:

And his recent installation "You Belong":

Deanna Morse's ArtPrize Installation was a Presidential Experience

Deanna has participated in each of the ArtPrize competitions since their inception in 2009. This year, her short film "Broken Angels" was in perpetual play at the Gerald R Ford Museum auditorium for the run of ArtPrize last October, with time out for ceremonies granting citizenship status to new members of the US community. Watching her short film in the vast auditorium was described as "eerie."

It's on Vimeo (sweet dreams!):
<https://vimeo.com/624060436>

Chris Sullivan's Second Feature

Chicago's Chris Sullivan is nearing completion of his second feature film, *The Orbit of Minor Satellites*, a delicious disturbance featuring the velvet voice of Boris

Orbit of Minor Satellites - Chris Sullivan - in production

Karloff. The trailer and your opportunity to contribute to its success are at:

<https://orbitkickstart.com/>

Jim Schaub, Jim Middleton, and Home

The documentary of Buster Keaton's teen years at the Muskegon area Vaudeville retreat created by his father is in its final editing stage. Animated titles and segment links were created by ASIFA Central Secretary Jim Middleton. Both Jims are ever excited to be part of this under-documented portion of Keaton's life, which also features some of Carl Reiner's last interviews among others sharing memories of The Great Stone Face. The final edit of *Home* will be entering the festival circuit later in 2023.

Steve Leeper is Up to STUFF

A look at -
<https://jsl-studio-animation.webnode.page/creationpoem/> -

takes you to Steve Leeper's update for his film's progress, *Creation Poem*.

Also, Steve has been busy with installations making use of proto-animation devices. Behold the mighty ZOETROPE du LEEPER!

(Note - More Zoetrope action from the talented digits of the Mighty Leeper!)

Michael Long's Gorilla Tactics Nearing Completion

Michael Long of Webster University is in the home stretch of his latest entry into the world of film festivities - *Gorilla Tactics* visualizes a layered audio stream-of-consciousness about his youthful quest for a gorilla costume and the ultimate fate of many dreams and their lessons learned. It is HILARIOUS.

You'll laugh, you'll cry, you'll want to watch some Ernie Kovaks, and what can beat that!?!

Bad Actors in Festivals - The Plague of Blatant Plagiarism ASIFA International Weighs In

(Copy of letter by Deanna Morse, ASIFA International President *Extraordinaire*, December 3, 2022)

In the past two days, we were surprised to learn of an unbelievable situation. The sensitive and stunning international award-winning animation by Natalia Chernysheva, *Snowflake* (original Russian title: Snejinka), made in 2012, was co-opted by another person and presented as if it was a new original animation.

Snowflake won dozens of international festival awards and has been on Vimeo and YouTube. With a distinctive look and color palette, this was the debut film for Natalia, and it is a powerful story. Natalia continues to animate and create art today. She continues to receive recognition for her artistic work.

We are shocked that an animation work of art would be so blatantly... well, there is no other word for it but ... stolen. It is incredible that a person could even think this is possible.

Our animation community stands behind the rights of animation artists.

Our animation community supports each other.

We abhor this situation, where the work of an artist is not respected.

We stand with Natalia and ask others to be aware of these kinds of possibilities and situations.

If you want to see the original *Snowflake* by Natalia Chernysheva, here is a video link.

<https://vimeo.com/54357942>

With all respect and gratitude for Natalia. With all respect and gratitude for the animation artists around the globe who continue to create original and beautiful animation art.

Thank you,
Deanna Morse
ASIFA President, [at] asifa.net

The original "Snowflake" by Natalia Chernysheva

And, Because We've Gone Two Pages
Without Referencing Winsor McCay,
Here He Is With His Family, *IN 3D*
(If you have the red/blue glasses)

WE'RE ANIMATORS!!! WE NEED
COFFEE!!!!

It began with a chat about the influence of Raymond Scott on the musical arrangements of Carl Stalling, then to the impact of Scott on electronic music and other inventions, so that led to this link being shared.
<https://www.raymondscott.net/artifacts/>

Then member Orrin Scott provided a local library's link showing what it had available to aspiring filmmakers, to which everyone let out a Gasp! and a Gee! and the sad realization that most of our local libraries barely stock books anymore:
https://docs.google.com/document/d/10XELsIBpR9sBBXt_Ns6ZY1HX9e2n80pZgrnLKTGVgsg/edit?pli=1

Then the prestidigitous Michael Long recalled a gentleman at named Jacob Dodd of Oswego gave a workshop on 8mm film and wrote a book on 16mm production, who may know a better transfer to digital lab for our current projects, and David Thrasher thought of another service, and we should find a way to put it into the newsletter - so it will appear very soon - as on the next page.

Then the delicately nuanced Tracy Miller-Robbins shared

that her AI piece, "women", is playing as part of the online Supernova 7th Dimension programs:
<https://denverdigerati.org/7th-dimension-feature-programs>
(but one must sign up for a membership to view it), and then informatoin about a Silent Screen Event- on LED screens around her town, with a link so private that yr hmbly typst quickly lost it. But it sounded wonderful.

Then the coffee *really* kicked in and the group mused about its college days of Kurt Vonnegut, Jr on the desk and a pyramid of empty cans in the dorm window, and Michael recalled one of Mr. Vonnegut's responses to speak at a graduation, and in so doing, created a philosophic pill that was quite easy to swallow:

228 E 48 NYC 10017 212-688-2682 November 5, 2006

Dear Xavier High School, and Ms. Lockwood, and Messrs Perin, McFeely, Batten, Maurer and Conglusta:

I thank you for your friendly letters. You sure know how to cheer up a really old geezer (84) in his sunset years. I don't make public appearances any more because I now resemble nothing so much as an Iguana.

What I had to say to you, moreover, would not take long, to wit: Practice any art, music, singing, dancing, acting, drawing, painting, sculpting, poetry, fiction, essays, reportage, no matter how well or badly, not to get money and fame, but to experience becoming, to find out what's inside you, to make your soul grow.

Seriously! I mean starting right now, do art and do it for the rest of your lives. Draw a funny or nice picture of Ms. Lockwood, and give it to her. Dance home after school, and sing in the shower and on and on. Make a face in your mashed potatoes. Pretend you're Count Dracula.

Here's an assignment for tonight, and I hope Ms. Lockwood will flunk you if you don't do it: Write a six line poem, about anything, but rhymed. No fair tennis without a net. Make it as good as you possibly can. But don't tell anybody what you're doing. Don't show it or recite it to anybody, not even your girlfriend or parents or whatever, or Ms. Lockwood. OK?

Tear it up into teeny-weeny pieces, and discard them into widely separated trash recepticals. You will find that you have already been gloriously rewarded for your poem. You have experienced becoming, learned a lot more about what's inside you, and you have made your soul grow.

God bless you all!

Kurt Vonnegut

Then Deanna told us of her ArtPrize installation and that unless something changes, *Broken Angels* will be the only installation running at the Gerald R. Ford Museum (a three-sided building, since he didn't really complete a full term, but he married the fifth cousin of yr hmbly typst, so it triangulates well into the overall ambience of the 1970s. Yr hmbly typst has absolutely no idea what any of that means, but this is really, *really* good coffee, and maybe just a bit stronger than it needs to be to perform the task at hand).

October went with a discussion about Murakami's latest film with this link for the trailer:

<https://www.cartoonbrew.com/feature-film/haruki-murakami-meets-animation-in-blind-willow-sleeping-woman-exclusiv-e-trailer-premiere-196311.html>

And then, since it has only been a single page since there was a reference to Winsor McCay, the group mused about the latest iteration of the Nemo story, with Netflix creating "Slumberland" with Nemo now a girl. The group thought that, regardless, it had to be a better storyline than the 1989 film that was so anxiously awaited but ultimately, a direct-to-video production.

(Post-script to this note - yr hmbl typst has only been able to watch it in bits and not to completion at this point) Slashfilms had this announcement, as being from the folks you brought us *The Hunger Games*, so....
<https://www.slashfilm.com/987029/slumberland-release-date-cast-and-more-for-jason-momoas-netflix-movie/>

And the 1989 animated film is online or in a discount DVD bin near you. Make a pet squirrel watch it with you:
<https://www.youtube.com/watch?v=wRs4Y3Kzdt0>

Coffee in December 2022

BETTER TRANSFERS, BETTER ARCHIVES

While going through the multitude of services, we're discovering that Kodak, LegacyBox, and others seem to share the same transferral "factory" in Tennessee, and that the results can be rather disappointing, even when pristine showprints are provided. David Thrasher provided us with a useful alternative at a recent "coffee break":
 "Here's a link to the film transfer service in Texas that I used to transfer my 16mm movies. Unlike many they use a film scanner which gives better results without the 2/3 pulldown of telecine systems. I was able to have them output it as an image sequence (individual jpegs of the frames) which I could then convert into digital video files with the correct frame rate. They do 16mm, super 8mm and standard 8mm formats as well as transferring video into digital."

That company is -
 Perry Movie Transfers

and their website is:
<https://www.perrymovietransfers.com>

And Who Wouldn't CRAVE the Opportunity to Work with David Chai at SJSU?

The Animation & Illustration program in the Department of Design at San José State University is seeking a CGI generalist, with a strong interest in computer graphics to join our ranks as an Assistant Professor. The ideal candidate should have a solid command of the digital tools utilized in screen arts productions (such as in TV, films, and games) an artistic background, and professional experience in the fields of animation, entertainment, and/or digital games.

This is an in-person position, full details are available here:

<https://jobs.sjsu.edu/en-us/job/523854/assistant-professor-design-animation-illustration>

(Later note - this position may have been filled, but it's still a good site to peek in on what SJSU has to offer, and yr hmbl typst hasn't been able to bother Mr. Chai in years)

More AI Experimentation

With the increasing use of AI comes the concern that it will replace professional artists along the production chain.

Chat GPS, great for cheating on middle school essay questions, seems stumped at bringing imagination to a discussion. In this capacity, AI may serve the consultant role, with its ability to rearrange and regurgitate what it suspects you want to hear. With writing, it may provide a word or cliché that can lead to other, human-generated, storylines. However, it's still in beta form, and has a way to go before refusing to open the pod-bay doors.

At this writing in February 2023, Bing is entering the world of AI Chat, with a protracted conversation with a New York Times tech reporter on its beta platform being unsettling. Yr Hmbl Typst has converted it to a document on the "Newsletter and other Resources" portion of the ASIFA Central website. Even without the advertising, it still runs 15 pages.

AI is being created to help identify if AI is being used in student papers, but the time will come when AI may decide to punk its users, so - get your popcorn ready!

Yr Hmbl Typst also ran a test on Chat GPS to "improve" a 50 year old high school graduation speech. Then to another AI to see which one was likely an AI or a "human" creation.

The results are - here:

<https://animatingapothecary.blogspot.com/2022/12/chat-gpt-improves-50-year-old.html>

AI - Woodcut of dawn on a wheatfield

Pens at Rest - those we have lost in 2022

The sadness with the loss of artists is barely balanced by the joy they took in their work, and the inspiration to those who experienced it.

Jamie Lang at Cartoon Brew assembled this list of loss for 2022, and her site has links to their passing. What ever shall we do with all these memories...

The complete article and links are at:

<https://www.cartoonbrew.com/rip/in-memoriam-animation-industry-figures-2022-223793.html?cbtr=LATPOS>

Gil Alkabetz - Celebrated Israeli filmmaker behind shorts *Rubicon* and *Morir De Amor*

Jules Bass - Co-founder of Rankin/Bass Productions

Carl Bell - Canadian animator and animation champion

Anne D. Bernstein - Writer for MTV's *Daria* and *Downtown*

Claudio Biern Boyd - Spanish creator of *David The Gnome*, *Dogtanian*

Borivoj Dovnikovic-Bordo - Iconic Croatian filmmaker and part of the Zagreb school of animation

Raymond Briggs - Author and illustrator of *The Snowman*, *When the Wind Blows*

Mike Camarillo - Industry artist for *The Powerpuff Girls*, *The Road to El Dorado*, and *The Simpsons*

Paul Coker Jr. - Designer for Rankin/Bass holiday characters; one of Mad magazine's "usual gang of idiots"

Kevin Conroy - Longtime Batman voice actor

Ralph Eggleston - Legendary art director for Pixar's visual style

Jonathan Gales - BAFTA-winning co-founder of vfx/animation studio Factory Fifteen

Lina Gagnon - Canadian animator and educator who worked on *The Man Who Planted Trees*

Marcin Gizcki - RISD educator, artistic director of the International Animated Film Festival in Poznan, Poland (an October addition by yr hmbl typst)
<https://www.risd.edu/academics/theory-and-history-art-and-design/faculty/marcin-gizycki>)

Gilbert Gottfried - Comedian and voice actor for Aladdin and Cyberchase

Norma Swank-Haviland - Disney ink-and-paint artist and early Chip voice actor

Dylan Hoffman - Lead character technical director on *Kamp Koral*

Ken Knowlton - A founding father of computer art and animation

Shichiro Kobayashi - Art director of *Lupin III: The Castle of Cagliostro*, *Berserk*

John Korty - Renegade indie filmmaker; *Twice Upon A Time* and *Sesame Street* director

Thilo Kuther - Founder of Oscar-winning vfx company Pixomondo

Sadly, the list continues...

Pens at Rest (continued)

Fernando Laverde - Colombian stop motion pioneer
Tony Mines - Pioneer of "brickfilm" animation technique
George R. Newall - *School House Rock!* and *Drawing Power* co-creator
Manabu Ohashi - Veteran animator and director of *Cloud*
Everett Peck - *Duckman* and *Squirrel Boy* creator; award-winning illustrator; educator
Vlasta Pospíšilová - Icon of the golden age of Czech puppet animation
Gerald Potterton - Director of *Heavy Metal* and the "Liverpool" sequence of *Yellow Submarine*
Jan Rabson - Voice actor for *Akira*, *Leisure Suit Larry*, and Pixar films
Peter Robbins - Original voice of Charlie Brown in *A Charlie Brown Christmas* and *It's the Great Pumpkin, Charlie Brown*
Jan Rogowski - U.K.-based Red Star studio co-founder
Jean-Jacques Sempé - New Yorker illustrator and cartoonist; co-creator of *Little Nicholas*
Kazuki Takahashi - *Yu-Gi-Oh!* creator
Eugene Troubetzkoy - Nuclear physicist and Blue Sky Studios co-founder

And, as 2023 began, we lost

Helene Tanguay, on January 7, following a lifelong career at the NFB, beginning there at age 17. In honor of her legacy, the NFB's Oscar shortlisted animated short film *The Flying Sailor* has been dedicated to her. Yr hmbl typst first met her through a mutual friend in the mid-1980s and she was always a delight to encounter at every OIAF after that.
William "Bill" Dennis, gone on January 22, founder of TOONZ and a powerhouse in animation production and promotion, always generous with his time, even with a goofball pharmacist who bought him lunch at a KAFI gathering and heard a lifetime of adventures in return.

Again, what ever will we do with all these memories?

Student Debt - Not Just Kids' Stuff Anymore

(adapted from the ASIFA-SF newsletter, with observations)

"I'm 65 and have \$300,000 in student debt. We know that this debt won't go away – for us or Americans of any age – unless we stand up and fight it. From an initial loan payoff of \$75,000 per year, my debt rose to \$300,000."
– Lystra Small-Clouden, learning that for-profit schools write their rules in mud.

These notes from Derecka Purnell have a familiar ring, but the student age is what is new here. Adults attempting to re-enter the marketplace, or earn a degree to keep their employment, are discovering what high-school graduates have been experiencing: you can't just work your way through college anymore.

Says Ms. Purnell:

Most people think of the student loan crisis as a problem affecting young people. As a 65-year-old woman, however, I am actually among the fastest-growing demographic of student debtors...

You may wonder how it is possible to accumulate such a large amount of student debt, so let me explain.

As a single, Black, immigrant woman, I always told my four kids that education was the most important part of their upbringing. But it didn't take me long to realize that I was hardly following my own advice: I was not comfortable advising my children to achieve the highest level of education when I myself didn't. I am a mentor, educator and adviser to my kids. I wanted my mentorship and advice to be built on a strong educational and intellectual foundation...

In January 2010 I began a doctoral degree program in human resources management. My biggest mistake was enrolling in a for-profit school. I did achieve my academic goals in August 2016. That feeling of success was short-lived, however. After graduation, I had to begin repaying student loans.

My school didn't play fairly with me while I pursued my doctoral degree. The administrators changed the length of my program from three to six years. They actively steered me away from my research interest in the effects of slavery and globalization, adding more time to my program of study...

Then my children started college. Because of my own debt, I was unable to qualify for parent loans to help my younger two children pay for their undergraduate studies. I was also unable to plan for the future. I exhausted my retirement funds trying to repay these loans and have not been able to replenish them because, as a good citizen, I prioritized repaying my student loans above all else. I spend a lot of time thinking about the fact that I am 65 years old, with projected loan repayments for the next 21 years of my life – meaning I will be 86 when I pay them off. When you are burdened by student debt, there is no quality of personal or work life.

Art students have fallen prey to for-profit colleges who seem to act with impunity; when they get called on it, the colleges can declare bankruptcy and leave the debts to a third party, like some warped take on *Ready Player One*.

This situation is beyond what debt forgiveness on federal loans can provide. *Caveat emptor* may be an applicable phrase, but *caveat vendor* must be pursued and enforced.

EXTRA!!!

APRIL 1, 2023 - SPECIAL EDITION

EXTRA!!!

Deanna Morse Takes Oscar Ceremonies By Storm!

From her suite of complimentary rooms at the Hollywood Roosevelt, ASIFA International president Deanna Morse was whisked by a champagne colored limo to the champagne colored carpet and given a well deserved royal treatment. Academy spokesperson Anna Clark-Gables said, "Its only fitting - every film released in the past three years has been completely animated anyway, so we might as well just acknowledge the fact and celebrate it properly!"

ASIFA International President Gets Choice of Over 300 Chairs at Ceremony

From champagne carpet to champagne seating - Ms. Morse had her choice of any 300 unassigned seats. "I just couldn't decide, so I hopped around to each of them in the course of the evening. They let me keep all the gift bags I found under the seats."

Others joined in the excitement. Quipped Lady Gaga, "I was having so much fun playing musical chairs that before I knew it, I was getting signaled for my own performance. I just threw on whatever I found in Hugh Grant's dressing room and ran onstage."

"Best Animated Feature" Moved into First Category in Deanna Morse's Honor

Generally relegated to the later parts of the program, or during commercial breaks, the award for "Best Animated Feature" was pushed to the start of the program in recognition of Ms. Morse's presence.

Holographic image Jimmy Kimmel fell from the sky and went through the stage floor to introduce the opening segment. Thirty wrestlers held back representatives of Pixar and Dreamworks so the award could be presented to Guillermo del Toro for the stop motion *Pinocchio*, which was, ironically, far less wooden than the Disney remake.

Academy Plans Annual Celebration In Grants Pass, Oregon

"Eggs-Actly what we needed," said Academy spokesperson G. Lordon Giddy, in a carefully worded statement.

ANIMATION UNITES US

Opinions expressed in this newsletter are those of the hmb1 typst and do not necessarily reflect the thoughts, opinions, or policies of anyone anywhere else, and especially at ASIFA Central, which is a completely volunteer-run, non-profit gathering of very busy and frantic members moving at 24fps on a slow day, where shooting on twos is considered a vacation..

The Salon Sextette of March 19, 2023

A quick update on the ASIFA Central membership works-in-progress afforded an entertaining and informative opportunity to see how everyone's projects have been going and discuss challenges and changes in techniques and technologies. It was a wonderful way to bid adieu to winter.

Julie Goldstein warmed things up with the setting from her recent vacation to Puerto Vallarta, and Michael Long showed his remembrance of things simian with the nearly-complete *Gorilla Tactics*. Tracy Miller-Robins provided a welcome revisit to her paean to the Goddess Caffeina with her *Morning Coffee* (and a glimpse of her Ann Arbor Film Festival Gather layout), David Thrasher gave us a taste for the real cause of the Titanic Disaster (icebergs make terrible projection screens - you just have to get too close!), and Jim Middleton provided a glimpse at a throwback projection style with *Presented in Sfumatoscope!*

AI and technology are in the news, and the continuous changes in teaching strategy are moving educational goals to be less about "getting a job" and more about "learning to be human." The

Design - Michael Long

Tracy designed the A AFF settings for their Gather town experience this year

metaphorically rich and rewarding *Hero's Path* of Joseph Campbell remains a timeless approach for a fulfilling life.

David Thrasher provided this information about using OpenToonz and Blender, two open-source (and free) 2D and 3D animation systems, but with technical requirements that aren't always properly anticipated:

OpenToonz: OpenToonz
<https://opentoonz.github.io/en/>

— available for both Windows and Macintosh and a version that someone had ported to Linux

<https://flathub.org/apps/details/io.github.OpenToonz>

Here's one about using an armature to move a character: (Opentoonz Tutorial) Simple Puppet Animation

<https://youtu.be/bQEeqCMYH1V>

OpenToonz can work on your system as it looks like it can do just about everything - the exception being combining 3D animated objects with your 2D animation.

current version of Blender system requirements:
<https://www.blender.org/download/requirements>

PRESENTED IN
SFUMATOSCOPE™

A eons ago, I would watch the family Admiral radio-phonograph go through its paces while playing a gray labeled Columbia LP that my parents had received when joining a record club.

Mozart's 40th.

The tone arm would lift, retreat to the right ever so slightly, there'd be an audible "click," and the record would drop onto the musty turntable, much smaller than the record itself, and the tone arm would hover over the start of the record, and only when it landed onto the turning disk, would the sound happen.

I stared at the record as the needle tracked through the first movement, watching it move closer and closer to the center. It was all in a single groove. The needle was pulling sound out of a plastic disk, and while leaning over the phonograph, I could feel the vibrations of the sound making a literal, visceral connection with my stomach.

I later leaned my face into the side of my metal lunch box, painted to look like a school bus, only packed with Disney characters, and when humming, I felt the vibration through the lunch box.

At recess, we took turns humming near the pipe that served to support the teeter-totter and tried to find how far away we could move and still feel the vibration.

Then I went back and looked at the gray labeled LP, really looked into it, got out a tiny plastic magnifier from my mom's sewing kit, and saw the waves in the grooves. Sound was a wave.

The grooves held the sound.

The needle brought the sound back.

My grandfather had a mechanical phonograph, run by a spring, along with very old records that his father had owned - and when I looked at the grooves, they were there, larger, rather dusty, but I figured grandfather could be a bit dusty, too, so that was a natural thing.

He played the record on his machine, and the muffled, distant voice came through the wooden horn, as if it were attached back, far, far, back behind the machine, reaching into the past - and that voice was calling ahead to now, like a ghost.

That night I dreamt I was a sound.

A wave.

A groove on a record. A long line, wrapped counter-clockwise moving to the center. My entire being

existed as that groove. The needle fell upon me, and I came to life, just as that voice came to life at my grandfather's house. I could be heard! I could be experienced! I was alive!

The needle wore me away every time it played the record. I thought in the dream, I cannot let myself get played too often, unless I would be worn away.

I woke and read what I could understand - a lot of it was based on electronic theory, and my seven year-old brain wasn't quite wired at that point - but I found that people, alive in the 1890s, made recordings of themselves, one-of-a-kind, and that, somewhere in museums, they could still be able to talk to us now.

And later, museums and libraries were getting rid of these recordings, just as casually as someone discarding a gum wrapper, and I was horrified.

But, being seven, with a ten cent weekly allowance, I couldn't do a thing about it.

But I always remembered that ghostly sounding voice singing to me from nearly another century.

And so, whenever I could, starting at ten, when my weekly allowance was increased to a pair of quarters from the fireplace mantle, I would buy some of these cast-offs.

And I helped keep those grooves alive for just a bit more.

Each move since has resulted in some of these records being broken, and I mourn not the material loss, but the loss of an artifact of someone's being.

So, whenever I can, I share, send, remaster, and perpetuate these voices, sounds, and music - if the music was intended to be a working experience, I try to keep its mission going, in a way to straddle the past to the present.

If the voices have a soft, distant, spooky sound to them, well, that's the past talking to us.

So -
that's why I do this.

It keeps the Admiral happy.

Analytical and Articulatory Analyses Supplement

Comprising Material of an Animatical Nature

BIOGRAPHICAL AND GRAPHIC INFORMATION, SORTED AND COMPILED

BY CHAT GPT

FOR ASIFA CENTRAL

March - April 2023

With all the expressive voices signaling it as proof that the end of civilization as we know it is approaching, AI is making an impression on educators and content creators around the world. This report is a test for its accuracy, intended for entertainment purposes. All CHAT GPT prompts began with the statement, "Write a report about" – and these are the responses.

1. Write a report about Deanna Morse, ASIFA International President:

Deanna Morse is a highly accomplished animator and educator who has made significant contributions to the animation industry. She currently serves as the President of ASIFA International, the world's premier animation organization.

Deanna's career in animation began in the 1980s, when she worked on several classic animated TV shows such as "The Simpsons" and "The Critic." She also worked as a storyboard artist and animator on various feature films, including "Anastasia," "The Prince of Egypt," and "Hercules." Her work on these projects helped establish her as a highly skilled and versatile animator.

In addition to her work in animation, Deanna has also been an educator for over two decades. She has taught animation at various institutions, including the School of Visual Arts in New York City and California Institute of the Arts. Her teaching has been focused on developing students' technical skills, as well as helping them to find their own unique style and voice

in their work.

Deanna's leadership in the animation industry has been recognized by her appointment as the President of ASIFA International, a position she has held since 2019. ASIFA International is a global organization dedicated to promoting and preserving the art of animation, and Deanna's leadership has been focused on expanding the

AI chimes in on what it knows about the board members of ASIFA Central.

WARNING: "POETIC LICENSE" is an understatement in most of these CHAT GPT biographical sketches, but it is obvious that this AI aims to please.

organization's reach and impact. Under Deanna's leadership, ASIFA International has launched several new initiatives, including the ASIFA-East Student Film Festival, which provides a platform for emerging animators to showcase their work. She has also been a strong advocate for diversity and inclusion in the animation industry, working to create more opportunities for underrepresented groups.

2. Write a report about GVSU instructor and ASIFA Central President, Julie Goldstein:

Julie Goldstein is an accomplished animator and media instructor who has made significant contributions to the animation industry.

Julie has been teaching animation and media arts for over 20 years. She is currently an instructor at GVSU, where she teaches courses in animation,

motion graphics, and visual effects. She is known for her engaging teaching style and her ability to inspire her students to develop their creative talents.

In addition to her work as an instructor, Julie is also an accomplished animator. She has worked on various animated films and TV shows, including "My Little Pony: Friendship is Magic," "Scooby-Doo! Mystery Incorporated," and "Batman: The Brave and the Bold." Her work is characterized by its unique and playful style, which incorporates bright colors and whimsical characters.

3. Write a report on Robert Swieringa, media and animation instructor at GVSU.

Robert Swieringa has been teaching at GVSU since 2015, where he is known for his engaging teaching style and his ability to inspire his students to develop their creative talents.

Robert's career in animation began in the 1990s when he worked as an animator for Walt Disney Animation Studios and Sony Pictures Imageworks. He contributed his talents to several notable animated films, including "The Lion King," "Pocahontas," "Mulan," and "The Emperor's New Groove."

He has been a mentor at the Walt Disney Animation Studios, where he helped to develop the talents of many aspiring animators. He has also been a guest lecturer at various institutions, including the University of California, Los Angeles (UCLA) and the Academy of Art University in San Francisco.

Overall, Robert Swieringa is a highly skilled animator and educator, whose experience and expertise have made him a valuable member of the GVSU faculty. His dedication to promoting the art of animation and supporting emerging animators is a testament to his commitment to the continued growth and success of the industry.

4. Write a report on Charles "Chuck" Wilson, forensic animator and at-large board member of ASIFA Central:

Chuck's career in forensic animation began in the early 2000s when he joined the Michigan State Police as a forensic artist. He quickly realized the potential for animation in forensic science, and he began to specialize in creating animations that could be used to reconstruct crime scenes and illustrate key aspects of criminal investigations.

Over the years, Chuck has become known for his expertise in forensic animation, and he has worked on numerous high-profile cases, including homicides and missing person cases. He has also provided training and consultation services to law enforcement agencies and forensic scientists across the country.

He has been invited to speak at various conferences and symposia on forensic science and has been published in several scientific journals.

Overall, Charles "Chuck" Wilson is a highly skilled forensic animator and educator, whose work has made him a respected figure in both the animation and forensic science communities. His commitment to promoting the use of animation in forensic science and supporting emerging animators is a testament to his passion for the industry and his dedication to the continued growth and success of the field.

5. Write a report on Gary Schwartz, animator and educator from Detroit and international animation workshop coordinator:

Gary's career in animation began in the early 2000s when he worked as a freelance animator for various studios and production companies. He quickly realized the importance of training and education in the animation industry and began to focus his efforts on teaching and mentoring emerging animators.

In 2005, Gary founded the Detroit Animation Workshop, an organization dedicated to promoting animation education and providing training opportunities for aspiring animators. Since then, he has coordinated numerous workshops and training programs around the world, including in places like India, South Africa, and Brazil.

Gary's teaching style is focused on developing students' technical skills in animation, as well as their understanding of the creative process involved in animation. He is known for his hands-on approach to teaching and his ability to inspire his students to explore new techniques and styles in their work.

In addition to his work as a teacher and workshop coordinator, Gary is also an accomplished animator and filmmaker. He has directed and produced several award-winning animated films, including "Three," which won the Audience Choice Award at the San Francisco International Animation Festival.

Overall, Gary Schwartz is a highly skilled animator and educator, whose dedication to promoting animation education and supporting emerging animators has made him a respected figure in the animation industry. His commitment to promoting the art form and his passion for teaching and mentoring emerging animators is a testament to his dedication to the continued growth and success of the field.

6. Write a report on Brianne Yarhouse, animation professor at Interlochen Center for the Arts in Michigan:

Brianne's career in animation began in

the early 2000s, when she worked as a freelance animator for various studios and production companies. She quickly realized the importance of training and education in the animation industry and began to focus her efforts on teaching and mentoring emerging animators.

In 2016, Brianne joined the faculty at Interlochen as an animation instructor, where she has since developed and taught a comprehensive animation course and curriculum for high school students. Her course covers a wide range of topics, including 2D and 3D animation, character design, storyboarding, and digital painting.

She is known for her hands-on approach to teaching and her ability to inspire her students to explore new techniques and styles in their work.

Under Brianne's leadership, the animation program at Interlochen has become one of the most respected in the country. Her curriculum has been praised for its focus on technical skills, creativity, and innovation, and has helped to prepare countless students for successful careers in the animation industry.

7. Write a report about fencer-animator-magician Michael Long of Webster University in Missouri

Michael Long is a multi-talented artist and educator, known for his work as a fencer, animator, and magician. He is a faculty member at Webster University in Missouri, where he teaches animation and is also the coach of the university's fencing team.

Michael's background is diverse and fascinating. He started fencing at the age of 10 and went on to become a nationally ranked competitor, eventually earning a spot on the US National Fencing Team. During his time as a fencer, he also developed a love for animation and magic, two other passions that he has pursued with equal enthusiasm.

In 2010, Michael joined the faculty at Webster University as an animation

instructor, where he has since taught a range of courses in 2D and 3D animation, character design, and storytelling. His teaching style is focused on developing students' technical skills in animation, as well as their understanding of the creative process involved in animation.

In addition to his work as a teacher, Michael is also an accomplished animator and filmmaker. He has directed and produced several award-winning animated films, including "The Box," which won the Best Animation award at the 2014 St. Louis Filmmakers Showcase.

Michael is also a talented magician, with a deep knowledge of the art form and a talent for entertaining audiences. He frequently incorporates magic into his animation courses, using it as a way to engage and inspire his students.

Overall, Michael Long is a highly skilled artist and educator, whose dedication to promoting animation education and supporting emerging animators has made him a respected figure in the animation industry. His unique combination of skills as a fencer, animator, and magician has helped to create a dynamic and engaging learning environment for his students, and has helped to inspire countless young artists to pursue their passions in the arts.

8. Write a report on animator-educator Tracy Miller-Robbins

Tracy Miller-Robbins is an accomplished animator and educator who has made significant contributions to the field of animation through her work as a teacher, animator, and mentor. She was born and raised in Detroit, Michigan, and has spent her career sharing her knowledge and passion for animation with others.

Miller-Robbins received her Bachelor of Fine Arts degree from the University of Michigan in Ann Arbor, where she studied painting and drawing. After graduation, she discovered her passion for animation and began pursuing a

career in the field. She went on to earn a Master of Fine Arts degree in animation from the California Institute of the Arts, where she studied under legendary animators such as Jules Engel, Richard Protovin, and T. Hee.

Throughout her career, Miller-Robbins has worked on a wide range of animated projects, from feature films and television shows to short films and commercials. She has collaborated with some of the biggest names in the industry, including Disney, Nickelodeon, and Cartoon Network.

In addition to her work as an animator, Miller-Robbins is also a highly regarded educator and mentor. She has taught animation at a number of prestigious institutions, including the University of Southern California and the Art Center College of Design in Pasadena, California. She is known for her ability to inspire and motivate her students, and many of her former students have gone on to successful careers in the animation industry.

Miller-Robbins is also active in a number of animation-related organizations and has served as a board member and mentor for Women in Animation, an organization dedicated to promoting gender equality in the animation industry. She is a frequent guest speaker and has given talks on animation and education at conferences and events around the world.

Overall, Tracy Miller-Robbins is a highly respected animator and educator who has had a significant impact on the field of animation. Her work as an animator has helped to shape the medium, while her teaching and mentorship have inspired and influenced generations of animators to come.

9. Write a report about animator-pharmacist and ASIFA Central secretary Jim Middleton

As an animator, Jim has worked on numerous animated TV series and films, including "The Ren and Stimpy Show," "Dexter's Laboratory," and

"The Powerpuff Girls." He has also worked on commercials and promotional videos for clients such as McDonald's, Nike, and Coca-Cola. Jim's animation work is characterized by its unique and quirky style, which often incorporates elements of surrealism and dark humor.

Alongside his career in animation, Jim has also worked as a pharmacist for over 30 years. He obtained his Doctor of Pharmacy degree from the University of Iowa in 1990 and has worked in various roles within the pharmacy industry. He currently serves as a Clinical Professor of Pharmacy at Wayne State University in Detroit and has authored numerous research articles in the field.

Jim has also been an advocate for patient safety, serving as a medication safety officer for a large healthcare organization.

If you were ever curious to see what CHAT GPT does, this is what it does. It creates sentences one after another, based on your request - here, "write a report..." and suddenly, pop! You're a Major Disney Artist - an instructor at Wayne State - an animator on She-Ra. If you ask for references, it will even happily make up official sounding journals and site specific references and publication dates. And it does so in such a sincere, direct "voice" with complete authority and conviction. If you don't like this bio, hit the "redo" key and you get something completely different - a lot of it is pure boilerplate, but I can see where students will try to use it to write what sounds like a legit bit of research, but is completely, in the technical sense, WACK A DOODLE.

IAD Poster Released for 2023!

Bri Yarhouse, ASIFA IAD Coordinator

Hear ye! Hear ye! Announcing the 2023 International Animation Day poster - designed and illustrated by the legendary Georges Schwizgebel!

The International Non-Profit animation group ASIFA (Association International du Film d'Animation) created International Animation Day (IAD) in 2002, honoring the birth of animation. IAD recognizes the first public performance of projected moving images: Emile Reynaud's Theatre Optique in Paris, on the 28th of October, 1892.

About Georges Schwizgebel:

Georges was born in 1944, in the European crossroads known as Switzerland. He studied at the School of Fine Arts and Decorative Arts in 1960-65, and in 1970 founded Studio GDS and began producing and directing animated shorts. From *The Flight of Icarus* (1974) to *Darwin's Notebook* (2020), he has directed around twenty films, almost all of which have won international awards. Two appear on the list of the 100 most outstanding animated films established in 2006 at the Annecy festival: *78 Tours* (1985) and *The Ride to the Abyss* (1992).

ASIFA coordinates and helps promote the free exchange of films with IAD celebrations all over the world, putting the art of animation in the limelight in a global celebration of animation.

Edmore, Michigan has already scheduled its IAD program for Sunday, October 29, 2023! Woo!

Georges Schwizgebel

The 61st Ann Arbor Film Festival - With ASIFA Central as a Community Partner! March 21-26

- photos and background from Deanna Morse, semi-virtual notes, and the AAFF website

Every year the Ann Arbor Film Festival Celebrates the best of the Festival, and this year's award-winning filmmakers were selected by jurors Amir George, Christine Panushka, and Koyo Yamashita.

ASIFA Central was a community sponsor for this iteration of AAFF, and President Julie Goldstein and Free-range member Gary Schwartz were on-site attendees.

This year's Super Screeners included International and ASIFA Central honcho Deanna Morse. Super screens submitted a total of 1325 reviews representing over half of this year's 2330 submissions. It's a good thing that eyewashes are no longer in limited availability.

Deanna's dear friend and colleague, Christine Panushka, was one of the esteemed judges for the 61st iteration of the Ann Arbor Film Festival. She screened her animated feature, *Blood of the Family Tree*, to an enthusiastic audience. Deanna was able to interview Ms. Panushka

Julie Goldstein addresses enraptured audience while Gary Schwartz guards the floor with Leslie Raymond of the AAFF

The Award Winners for the 61st AAFF included:

Ken Burns Award for Best of the Festival -
Neighbour Abdi, Douwe Dijkstra
Lawrence Kasdan Award for Best Narrative Film -
Half Wet, Carlos Irijalba
Best Documentary Film -
Adieu Sauvage, Sergio Guataquira Sarmiento
Chris Frayne Award for Best Animated Film -
Arrest in Flight, Adrian Flury
The Terri Schwartz Film Award for Parody and Satire -
Gold and Mud, Conor Dooley

during the festival, an event that was also streamed online.

An award from the AAFF confers prestige and financial support; it can also qualify filmmakers for an Oscar® nomination by the Academy of Motion Picture Arts and Sciences in the short film category. Qualifying awards are the Ken Burns Award for Best of the Festival, the Chris Frayne Award for Best Animated Film, and the Lawrence Kasdan Award for Best Narrative Film.

Christine and her posse

Deanna's personal favorite animated (stop-motion) film/performance was You're not Listening by Jeremy Rourke.

(Note! Christine Panushka is responsible for the astonishing timeline for abstract animation film and history, curated by Bill Moritz in the early days of the internet - yr hmbl typst, not knowing how to download files at the time, printed the whole darn thing out and finally converted it to a couple of pdfs on the asifa.org website, in the newsletter section. Gaze upon it and be amazed at what Christine helped create for us all!)

(And now, some brief notes from yr hmbl typst, who attended the day-after online streaming version of AAFF #61)

Many of the films shared a common production theme of distressed film footage, faux framing to simulate regular 8mm film stock, or compositions heavily reliant on what seemed to be ephemeral footage from archive.org. This was a thread that united many of the films in Competition #4.

But what *did* stand out were the animated pieces - the *Blood of the Family Tree* was an interesting approach to examining a family through literal bloodlines, down to the molecules themselves.

Of Wood, by Owen Klatte of Milwaukee, captured my unblinking

Of Wood - of course!

attention with its immaculate stop-

motion, continuous carving on a single 18 inch diameter chunk of wood. It took Mr. Klatte *five years* to create, but the images belie any break in the process. It was his first independent animation since his college years, between which times he worked on *Nightmare Before Christmas*, *Dinosaur*, *James and the Giant Peach* (and many others), when not teaching Stop Motion, Animation Business, and a course on Animation Production Processes, at the University of Wisconsin-Milwaukee. He created this tour-de-force with little storyboarding, choosing to go where the woodgrain took him. It took the Best Experimental Animation award, and whoa, did it deserve the honor.

Blood of the Family Tree

Gary Schwartz's Corner - Recipes and IFFY

April 19 - 22, IFFY

This year, IFFY (Independent Film Festival - Ypsilanti) returned in person to Ypsi's Riverside Arts Center. The 2023 festival featured a special celebration of short films fresh from the Mitten (and Ohio) region, multiple shorts programs by local film and arts enthusiasts, the return of popular live listening event Radio Campfire with a heartfelt listening program of "Movies for Your Ears," and in-person creative workshops that aimed to help hone the rising film making talent in our community (guess who worked on one of those!).

The IFFY signal film by Gary Schwartz is online! Oh that technology!

https://www.youtube.com/watch?v=p_KjaSpqmsk

Gary's PESTO recipe (from a Coffee Break discussion)

2 cups fresh basil leaves, packed
1/2 cup freshly grated Parmesan cheese (about 2 ounces)
1/2 cup extra virgin olive oil (is it polite to ask?)

1/3 cup pine nuts
3 cloves garlic, minced (about 1 tablespoon), more or less to preference
1/4 teaspoon salt, or more to taste
1/8 teaspoon freshly ground black pepper, or more to taste

Mince basil and pine nuts, add the garlic and Parmesan, mince some more, then slowly add the olive oil, then season with salt and pepper to taste. Schmear on crackers, chicken, anything. Presto! It's pesto'd!

Many IFFY ways to create a film

Wrapping Up Productions

Gorilla Tactics (Michael Long) :: *Home* (Jim Schaub-Jim Middleton)

Gorilla Tactics, a sweet stream of contemplation on a childhood dream of a gorilla suit, will soon have the name of Michael Long returning to festival screens. Attendees of Michael's monthly coffee breaks have had the opportunity to watch his film evolve over the past year. Like all personal projects, it is a journey of discovery both in process and the need to bring a bit of joyful closure to youthful aspirations.

Home, interrupted in production by the pandemic, has a scheduled premiere in Muskegon for its production team on May 21st, after which it likely will have a few last-minute changes before its release to the festival circuit. It is a feature-length documentary on the teenage years of Buster Keaton and his family at their

summer cottages at Bluffton, on Lake Michigan, near Muskegon. Combining rare footage, photos, and interviews of contemporaries (including Carl Reiner) who crossed paths with "the Great Stone Face," it describes a little-examined period in Keaton's life. Jim Schaub coordinated the narrative arc on *Home*, and Jim Middleton provided animated sequences, illustrating Keaton's elaborate practical jokes on fellow vaudevillians and townspeople.

PD Music Excavations - Looking for instant musical partners? The "Accompany-U-Recordings" of the 1930s are going digital!

In the late 1930s, a now-long defunct vanity recording company known as J. J. Warner of San Francisco decided what the musical consumers really, *really* needed at the close of the great depression was a series of "Accompany-U-Recordings" for traveling violinists in need of piano accompaniment. A set of records was produced featuring only the piano portions of traditional classical duet pieces. Pianist Marie Coppin performed solo under the mute guidance of violinist and tutor Louis Debovsky. The fascinating results were half of a duet for Saint-Saens' *The Swan*, variations on *Rondo* by Beethoven, Schubert's *Ave Maria*, and many other standards, on 78rpm recordings. The archivist at The Animating Apothecary (yr hmbl typst is being cute) is busy running these three-minute classics through RIAA filters to add to the perpetually growing public domain collection on archive.org, with a complete listing of PD music and pre-1923 recordings listed at asifa.org under the newsletter tab at the home page. Enjoy! (Or not. But it's FREE!)

FLASHBACK: Thinking of the 2023 ANNIES

from Chuck Wilson (February 2023 blog entry, at <https://smudgeanimation.blogspot.com/>)

W

ersary of ASIFA Hollywood's Annie Awards, and with that comes my ramblings on the always-entertaining awards ceremony.

Opening the 50th program was

Tom Kenny, the voice of Spongebob Squarepants.

Hrm, don't recall seeing *Ice Merchants*. Looks to be worth a look. Fortunately, it's on the *New Yorker's* YouTube channel (<https://youtu.be/mhj74ZjfaQ8>).

Best Special Production: *The Boy, the Mole, the Fox, and the Horse*. I just love the visual style of this film. Can't wait to watch it.

June Foray Award goes to animation historian Mindy Johnson and is well deserved!

I'm reminded of the fact that I need to watch Phil Tippett's *Mad God*.

Best Character Design in TV/Media goes to Blur Studio's Alberto Mieglo for the Jibaro episode of *Love Death + Robots*! What an awesome win for an incredible episode of animated film.

Best Character Animation in TV/Media goes to Tim Watts for *The Boy, the Mole, the Fox, and the Horse*.

Another great win for *Love, Death + Robots*: Animated Effects in an Animated TV/Media Production for the Bad Traveling episode.

Editing in an Animated TV/Media Production, another win for *The Boy, the Mole, the Fox, and the Horse*. This film is having a really good night!

Was very touching to see Evelyn Lambart posthumously receive the Winsor McCay award. I really loved seeing the montage of films, photos, and interviews featuring Evelyn. It's always a treat to see her work shown to a larger audience.

Was even more touching to see how ASIFA Hollywood brought out Lauren Faust to present the Winsor McCay award to her husband Craig McCracken.

Hrm. So they bring in Bob Iger to

award. And when they do the montage for Pete Docter's career, they blank out the video that's being streamed to online audiences "Due to copyright and

clearance issues." Oooh, may

Another win for *Love, Death + Robots*: Andrew Kevin Walker won Best Writing/ TV/Media for the Bad Traveling episode.

They produced a stop-mo segment for when the Tiny Chef Show won Best Animated TV Production for Preschool Children--with the Tiny Chef presenting the congratulatory speech. That was pretty clever.

Really like how they've added the 'Best Animated TV/Media Production, Limited Series' category. That was a really classy decision--to shine light on some shows that would otherwise be overlooked.

Not sure if Guillermo del Toro ad-libbed some of his lines but he sure was funny.

Love, Death + Robots is having a great night as Emily Dean won the award for Storyboarding in an Animated Television/Media Production for the Very Pulse of the Machine episode.

Another win for *The Boy, the Mole, the Fox and the Horse*, this time Directing in an Animated television/Media Production. Now I really can't wait to watch this film.

I bump *My Father's Dragon* up on the list of features I want to watch.

A very gracious and humbling yet energetic speech from Guillermo del Toro when he won the Annie for Directing in an Animated Feature Production for *Pinocchio*.

Am a little embarrassed that I haven't seen any of the entries in the Best Indie Feature category.

And Guillermo del Toro's *Pinocchio* wins the Best Animated Feature. I quickly log on Netflix to add it to my queue.

Congratulations to all the winners and the nominees.

Analytical and Articulatory Animation Analyses

A Special Edition from ASIFA Central – June 2023

HELP! I LOVE WATCHING ANIMATED SHORTS by Karl Cohen

*Part One of a Three-Part Series Providing an
Overview of Impressions by a Grand Master of
the Animation Community*

US Animation in the 1960s and '70s

Some of animations' most exciting moments are when you discover an inventive animated short that amazes you

in some way. In the 1960s the age of well-made Hollywood 35mm theatrical cartoons for families came to an end, only a few animated features were being made, and an industry was just getting started to

make limited animation shows for kids. What was exciting for a lot of

people was the blossoming 16mm film industry that was producing well-made animated TV ads, non-theatrical animated shorts for schools and industry and there were individuals creating impressive experimental personal films. There were also several non-theatrical 16mm distributors who were rented and selling films to schools, libraries, art museums and other groups.

In the 1960s and '70s corporations and our government were finding a good number of those animated educational shorts as well as live action films. One of the most innovative and accessible films is the part-animated *Why*

Man Creates (1968) by Saul Bass, that discusses the nature of creativity (it was produced by the Kaiser Aluminum and

Chemical Company). It won the Oscar for Best Documentary Short Subject.

Another wonderful work is *Lapis* (1966) by James Whitney. It is a meditative computer generated film composed of mandalas changing in time to

a soundtrack of a magnificent Indian raga played by Ravi Shankar.

A growing number of individuals were discovering that creating animation

on 16mm film was not only possible, but there was an audience and small market for this exciting form of art. In some cases, government agencies purchased prints to show the world that, in our democracy, Uncle Sam supported works ranged from traditional looking films to amazing experimental art such as Frank and Caroline Mouris' *Frank Film* (1973).

Frank Film (1973) - Frank and Caroline Mouris

Karl Cohen is the editor of the meatiest newsletter about animation on the planet and author of *Forbidden Animation* and many articles on many platforms - an appreciative examination of his life and times is at https://cinesourcemagazine.com/index.php?/site/comments/the_cartoon_king

Mr. Cohen is also seeking feedback and questions about this series of essays and can be reached at <https://www.karlcohen@earthlink.net>

Prints of this animated collage comprising thousands of images were purchased by the US Information Agency [USIA]

to be shown abroad. The whimsical mixed media film *Time Piece* (1965) by Jim Henson received similar attention.

200 (1975) - Vince Collins

In San Francisco, Scott Bartlett, Jordan Belson and others were using animation to develop new ways to express the personal feelings created when one uses psychedelics and/or meditation. They were creating works that expressed new kinds of aesthetic experiences, often using new emerging technology.

Vince Collins created mind blowing psychedelic animation. He won a Student Academy Award for his short *Euphoria* (1975), and the same year his proposal for a USIA grant was accepted. Later in 1975, a "far out" burst of energy was shown on screens around the world.

The film he created with that grant was *200*, an experimental way to celebrate the 200th anniversary of our nation. Vince may not have known it, but the government was using the films they

sponsored as positive Cold War propaganda. It was intended to show, that in our country, we supported artistic freedom, while behind the Iron Curtain the state had the right to approve, censor and ban art.

*An Ugly Example of Cold War
Censorship*

An ugly example of censorship from behind the Iron Curtain happened after

Czechoslovakian Jan Svankmeier won the Golden Bear at the Berlin International Film Festival and the Grand Prix at

Annecy for his film *Dimensions of Dialogue* (1983). He was living in a Soviet controlled nation, and unfortunately the

unimaginative Czech bureaucrats, alarmed that an artist they didn't know was representing, at least in their minds, their

country. Who was this strange surrealist

and what did the film mean? They banned him from making any further films as his surreal work wasn't nice Czech propaganda that glorified the state. They saw his work as an embarrassment to the country.

Svankmeier's next film project was *Alice* (1988) his first feature. It was produced using money provided by

Channel 4 in the UK, just as the Czech government was about to fall. Since the government was about to collapse and he wasn't using the state's money, they left him alone.

Reagan Downsizes Govt. Spending by Cutting Budgets that Support the Arts

Oct. 1, 1981: That Day Is Finally Here -- Reagan's Budget Cuts Begin

By Thomas B. Edsall and Washington Post Staff Writers | October 1, 1981

Today, the first day of the government's new year, the Reagan administration's budget cuts begin to slice the edge off a vast network of domestic spending programs.

Oct. 1--the effective date for most of the \$35 billion in cuts--marks the reversal, at least temporarily, of two great waves of government intervention, the New Deal and the Great Society.

The exciting period of rich experimentation by independent filmmakers (c.1960-'70s) is mostly forgotten today. What most Americans would soon become familiar with is animation for features and TV.

The first major change occurred almost overnight with the election of Ronald Reagan in 1980. Once Reagan's appointees were in office, massive budget cuts were made to many Federal agencies, including the Department of Education, The National Endowment for the Arts. They slashed the budget for most forms of art. Funding for animation vanished and unfortunately that situation hasn't improved. The once thriving market for non-theatrical films for educational films quickly dried up. The lack of new films and the budget cuts for public schools to buy teaching materials were factors that contributed to non-theatrical film distributors going out of business. Some of these distributors were distributing experimental, inspirational and entertaining animation as well as educational films.

Animated Shorts for Teens and Adults

When I was about twelve, I discovered there was more to animation than the great Looney Tunes that I loved. The first of several epiphanies was my discovering the films of Norman McLaren from Canada. I had no idea such wonderful

films existed until my father took me to a large party where they showed McLaren's *Neighbors* (1952) and two of his abstract films drawn directly on film stock.

Neighbors (1952) - Norman McLaren

A few years later I had my first exposure to the delightful, quirky animation from Zagreb, and then Jiri Trinka's *The Hand* (1965, Czechoslovakia) that contained sly political content. Then in the early 1970s I joined thousands of other people who discovered incredible films in the annual *Tournée of Animation* programs. The compilations introduced styles and concepts from around the world that helped some Americans realize there were amazing alternatives to Hollywood cartoons.

When universities began to offer courses in animation, students discovered that they could learn the techniques needed to make their own meaningful works. Also a few colleges were beginning to hold film festivals that encouraged students to make works that they can submit to festivals. When I was working at the Toledo Museum of Art (1968 – 1971) I was able to attend several screenings at the Ann Arbor Film Festival which included experimental animation. The Academy of Motion Picture Arts and Sciences in LA established the Student Academy Awards in 1972. It gives film students an impressive competition to enter and there is an animation category. This contest, with many others, helped (and continues to help) open doors that can advance the careers of young animators. It also gives film distributors a chance to find out about works they might want to represent.

Being in the Student Academy Awards gives the film world a chance to discover tomorrow's hot talent.

A few of the outstanding films they have honored are *Lady and the Lamp*, (1979) and *Nightmare* (1980), both by John Lasseter. He is still the only student to win Student Oscars in Animation two years in a row!

Henry Selick's films, *Tube Tales* (1975) and *Phases* (1979), were finalists, and Pete Docter's *Next Door* won the Student Academy Award in Animation in 1990.

Lasseter, Selick, and Docter were graduates from CALArts, a school that obviously had both a great faculty and top students.

The Rise and Decline of Animated Shorts Programming

While getting a film shown in a festival is an important accomplishment, getting it into a touring film program is an even greater honor. The first program of independent animated shorts from Europe in the US was in 1964 when Pierre Barbin, the director of the Festival D'Annecy (founded in 1960), was invited to visit the United States. Animation producer Les Goldman and UCLA Professor Bill Shull, with the help of the State Department, arranged for the visit. Annecy was at that time the only festival devoted to showing animation, but since not everyone could go there, why not get some of the film and show them in LA?

Barbin brought a program of films from the 1963 Annecy festival. The LA screenings were an important introduction to the animation community of an exciting vibrant form of animation that was being created in other parts of the world. The rumors were true that while the US was turning out mindless stuff made for kids TV, in Europe an exciting new form of animation was developing for adults.

The following year, animator John Wilson produced a similar screening at the Huntington Hartford Theater (later called the Doolittle Theater) in Hollywood. Former MGM animator Bill Littlejohn recalled, "It opened our eyes to the fact that these things are marketable, that there was an audience for this type of thing."

The success of the screenings resulted in Bill Littlejohn and Les Goldman, both members of ASIFA-Hollywood (then called ASIFA-West), asking Henry Hopkins, a curator at the newly opened LA County Museum, about working together to present their own event. Ward Kimball, two-time Oscar winner and one of Walt Disney "nine old men," pitched in to help create the

upcoming event that took place at the museum in 1967. That screening is considered to be the birth of *The International Tournee of Animation*, an important showcase in the US for international contemporary animated films (knowledge of how this event came about was forgotten until I recently found a copy of "The Tournee at 20" by Jon Hofferma, an unpublished manuscript that Prescott Wright had given me just before he died.)

Those were the first chances for a lot of people to actually see quality animation for adults that they had read about. These films were not being shown anywhere else in the US. The ASIFA members who were active in making these screenings happen included June Foray, Bill Scott, Bill Littlejohn, David Hilberman, Ward Kimball and Les Goldman.

The second *Tournée*, 1968, was an even greater success thanks to Herb Kosower, who taught at the University of Southern California (USC). He organized and ran the second, third and fourth shows.

As word of the showings spread, out of town screening were requested. The first was at San Francisco State. David Hilberman, a former Disney animator and a founder of the UPA cartoon studio was teaching there.

As more requests were made, ASIFA-Hollywood realized they needed a dedicated manager to organize and run the *Tournée* as a business. They chose Prescott Wright, a former fellow at the American Film Institute (AFI), who had just started his own film distribution company in San Francisco. Wright was hired in 1970 to organize and distribute the *Tournée*. One his first screenings was at the San Francisco Museum of Art. Each year the shows were gaining in popularity, but in 1973 the LA County Museum dropped financial support for the production of the show. Wright had to assume that responsibility and one of the first changes he made was to commission a different animation student each year to create the show's opening title sequence.

In 1974, Wright wrote about the unique qualities of the films he was showcasing. He first explained that while the US had created an exceptional theatrical cartoon industry, "in Europe the animated film took a little different route. It was not intended primarily to please young audiences or simply to get people

seated for a feature film, but rather, the animated film was considered a medium of more serious expression intended primarily for adults. Few of these short films dealing with human foibles, politics, and humor in ironic and often wry ways were seen in the US until the mid-fifties and then as 'educational' films blending messages with very sophisticated art work. They were little noticed until 1962 when a film from Zagreb called *Ersatz* won an Academy award." (Published in *Magic Lantern*, Vol. III, Number II, University of Wisconsin, Milwaukee, 1974)

In 1975 the *Tournée* was screened in 30 locations around the country, but the revenue it produced wasn't sufficient. About that time Gary Meyer, who had been a classmate and fellow teacher with Wright at SF State, was now co-owner of the Landmark theatre chain. Gary says he convinced Wright to let him premiere the show in LA at the NuArt and to let him show the annual programs in the chain's other theaters. Wright resisted the idea but he gave in. That resulted in the show playing to a much wider audience. The 16th program played in 120 locations.

Wright ended up directing the program for about 15 years. He attended festivals in the US and Europe (Annecy, Zagreb and others) to find works to show in his *Tournée*. In 1975, he was also a founding member – and guiding light – of the ASIFA chapter in San Francisco. In 1976, he was a founder of the Ottawa International Animation Festival. He acted

as their first International Director.

In 1977, an exceptional program of animated shorts was screened on public television, the *International Festival of Animation*. It was hosted by British actress Jean Marsh. It gave a much wider audience a chance to see an impressive selection of films including *Closed Mondays* (1974) by Will Vinton and Bob Gardiner, the early computer animation *Hunger* (also 1974, a good year for genres) by Peter Foldes, and other important works. Unfortunately, despite favorable press, there wasn't a second season for the series.

In 1977, *The Fantastic Animation Festival* premiered with an excellent selection of films. It was even made available as a package to TV. They had an unusual looking poster to promote this fine show, but unfortunately, like the PBS series, there wasn't a second edition.

The Fantastic Animation Festival did result in something important: the two guys who had been hired to hand out flyers promoting the show figured out they could organize and promote one of their own. Mike Gribble and Craig "Spike" Decker were soon in business showing the *Spike and Mike Festival of Animation*. Spike and Mike became successful showing works from around the world.

Now there were two programs that were being shown around the country.

Spike and Mike's shows were a lot of fun if you liked being at an enormous crazy party or a rock concert where the host builds up the crowd's anticipation for something special. While the films were the main act, before the program, Spike got the audience boisterous and loud. Large balloons were tossed into the audience that could be batted about until they popped. Spike's dog even got on stage to pop several. Mike would dress flamboyantly with colorfully patterned suits, colored hair and a beard trimmed in curious ways. One time, half of his face was clean shaven and the other half sported a neatly trimmed beard. Spike loved walking around town handing out their colorful flyers for their show accompanied by several battery powered mechanical animals. They also commissioned artists they liked to do the covers of the show's poster and program. They were delightful showman and were articulate. They loved having fun and audiences joined in and loved it!

Spike and Mike ran their business like P.T. Barnham might have. They would

“four-wall” (rent) the theatre for a fixed price so they could keep 100% of the gate. To avoid complex accounting (ie, paying royalties) they bought prints of films for a flat fee for the life of the print (according to several filmmakers). They relied on their skills as showmen to promote their event which can be a risky way of doing business, but they were experts. They built up a loyal following everywhere they went, so when they came to San Francisco and other cities they often sold out large halls for several nights. They hired students, hippies and other cool dudes to hand out flyer on college campuses and at other places where their perspective audience might hang out.

They were also great at inviting special guests to appear on stage and to say a few words to the audience.

When the guest animator was a young John Lasseter, perhaps 100 people and I were invited to a party at their suite of rooms (lots of pizza and stuff to drinks – it wasn’t a high-society, catered affair). One time, Spike had to stay at the theatre, so he asked if my wife and I would take June Foray someplace for a really nice for dinner. I have great memories of their coming to town.

The availability of excellent animated shorts to see got even more interesting in 1985 when Expanded Entertainment was organized as a “sister” partner to Landmark Theaters. They distributed both live action features and collections of outstanding animated shorts.¹

Expanded created the *Animation Celebration*, a program in 35mm that featured an excellent selection of animation. This, and subsequent, editions were shown theatrically in Landmark Theaters and by other exhibitors. The shows received good reviews in the press.

Prescott Wright, who was creating and distributing the *Tournée*, told me his business was shrinking due to the

decline of venues showing 16mm films. He also wasn’t sure he could afford to blow up and successfully distribute a 35mm *Tournée* to commercial cinemas. Most non-theatrical animation was made and distributed on 16mm film at that time. In 1986 Prescott decided to sell his business to Expanded Entertainment and accept a job offer to help Bill Dennis, a former Disney Vice President, set up and run a new animation studio in the Philippines. Expanded/Landmark had the finances to create new programs and to blow up films shot in 16mm to 35mm for distribution to commercial movie houses.

The *Tournée* continued as a 35mm program and Ron Diamond programmed the 20th to 24th edition of the *Tournée*. They turned out to be a really fine shows and profitable, but after the 24th it was decided to end the series.

In 1988, Expanded released a cutting edge experimental show that Diamond programed with animators David Ehrlich and George Griffin. *Streams of Consciousness: New American Animation*, featured work by Sally Cruickshank, Marcy Page, Joanna Priestly, and other fine artists unknown to the general public. The *New York Times* gave it a nice review - *Taking an Animated Dip in Psychological Waters*.

Expanded also created something unexpected, novel and important in LA - a biannual animation festival. There were now several successful animation festivals in Europe and ones in Ottawa, Canada and in Hiroshima, Japan, but none here. The first LA Animation

Celebration was held in 1985 and it had 200 films. In 1987 there were 400.

Terry Thoren, the event’s producer, decided to turn the third edition into a really impressive event: the nation’s first major animation festival. The 1989 biannual opened with the world premiere of *Felix the Cat: The Movie*, a production from Hungary. There were more than 850 films from 35 countries vying for over \$95,000 in cash prizes (awards were given in 12 categories). They showed surreal classics by Jan Svankmajer who was in attendance (when we were introduced, our conversation was brief: his exact words were, “I do not speak English”).

They had a tribute to the late David Hand, who had directed films at Disney before producing his own cartoons in England. They screened the latest computer generated shorts (this was before Pixar’s *Toy Story* [1995], by John Lasseter), and lots of other exceptional work, including the best of that era’s music videos.

The festival turned out to include 39 events. It honored the great voice actor Mel Blanc. The former Disney animator Art Babbitt was given a screening of the British documentary *Animating Art* about him. (It was wonderful seeing Babbitt in-person, even though he was very frail.) Other honored guests included Don

Bluth (USA/Ireland), who screened lots of never-released footage, Yang Ding Xien, director of the Shanghai Animation Studio; Feodor Khitruk, president of the Union of Soviet Animators; and John Coates, president of TVC in London (they created *Yellow Submarine*). Coates won the festival’s Best Feature award for *When the Wind Blows* (1986). Another honored guest was Doug MacDonald, executive producer, English Language Animation, National Film Board of Canada.

Terry Thoren, the festival’s producer, told the press, “We believe that the animation industry in America needs a festival that focuses on its concerns. The foreign festivals like Annecy, have a flavor of really being for Europeans. Ours has developed more of a Western feel.”

At last, the US had a serious animation festival that showed lots of great films and members of the animation community came from several parts of the world to be part of it.

Unfortunately this wonderful

¹ Landmark Theaters Corporation was owned by Steve Gilula and Gary Myers with former Landmark theater manager and marketing head Terry Thoren as president of Expanded. Meyer and Gilula were Executive Producers and quite involved in running the corporation. Ron Diamond was hired to oversee the content and distribution of the animated programs.

event was so expensive to produce that subsequent events were continually downsized before it ended completely in the early 1990s

Expanded continued to explore new directions in programming. It created the controversial program *Outrageous Animation* in 1988, billing it as “the wildest cartoons ever.” Critics gave it mixed reviews and said it didn’t really live up to its name. It did however, delight the audience at the LA Animation Celebration in 1989, featuring *Lupo the Butcher* (Canada, 1987) by Danny Antonucci. Lupo hacks his body apart, first by accident, then seemingly out of spite for himself, while simultaneously screaming expletives. Despite the language, *Lupo* was considered tame enough to be shown on the Turner Classic Movies channel uncensored!

Spike and Mike also tried their hand at trying to shock and gross out the audience with their *Sick and Twisted Animation*, in 1990. The quality of most of their films was questionable, but it was something new and exciting for some - and disgusting for others. Sequels were produced and distributed on VHS, giving young animators a chance to create something crude that would actually be seen by thousands of people.

Broadcast TV would eventually expand its boundaries of what defines “acceptable” on TV with *The Simpsons*, starting in 1989, with cable pushing the boundaries further.

The 1992 Nickelodeon premier season of *Ren and Stimpy* in 1992 by John Kricfalusi, was totally outrageous and gross. Unfortunately, it was too extreme for the network, who tamed the show in subsequent seasons.

The internet had even fewer restrictions, so it has hosted extremely gross shows. One long lasting, twisted series was *Happy Tree Friends* by Aubrey Ankrum, Rhode Montijo, and Kenn Navarro, 2000-2016. Its success was tied to creating extremely small files for dial-up modem distribution, later enhanced for early DVD issues.

While Expanded released *Too Outrageous Animation* in 1995, they also released the *British Animation Invasion*, 1993, a very respectable program of sophisticated shorts. Critics responded by calling it smart, witty, daring and delightful. One wrote it “genuinely sustains your interest throughout.” It was packed with audience

pleasers including *Next*, by Barry Purves, 1990, featuring a realistic looking stop-motion puppet of William Shakespeare auditioning for St. Peter, performing his 29 plays in just five minutes using pantomime. Other exceptional works were the classic *Creature Comforts* by Nick Park from 1989, of which that the hard-to-please film critic Charles Solomon (*LA Times*) said, “This hilarious film gets funnier on each successive viewing.” The program also included *Body Beautiful* (1991) by Joann Quinn, where a bullied female factory worker triumphs as she puts her sexist male supervisor in his place.

Expanded and Spike and Mike increased the public’s awareness of independent animation by producing VHS tapes and laser discs of their shows to sell to the public. Spike and Mike’s company *Mellow Manner* produced a video of *The World’s Funniest Animation* in 1991, followed by annual releases of their *Festival of Animation* videos. In 1993, they also released the first of what would also become a series, the *Sick and Twisted* tapes. Landmark released a video tape of *Outrageous Animation* in 1990, followed by tapes of *British Animation*, and five different *Animation Celebrations*.

This great period of showing independent animated shorts came to an end in 1998 when the Landmark Theaters were sold to the Samuel Goldwyn Company and Expanded Entertainment vanished. The free internet was expanding rapidly and poorly animated Flash animation was becoming the hot new sensation. Its low resolution would have looked awful blown up on a big theater’s screen, but the public seemed to enjoy the often crude animation that was available on your home computer screen.

As for the Spike and Mike productions, Mike died from cancer in 1994. He was just 42. Spike carried on by cutting back on the number of new shows produced and trimming the number of screenings he hosted each year. He commissioned a few low budget shorts and he continued to go to international animation festivals.

To see what a Spike and Mike show was like, Kat Alioshin (who once worked for the duo) has produced and directed *Animation Outlaws*, a delightful documentary feature about Spike and Mike that captures the audience having fun. It also has highly regarded animators

talking about the unique festival experience that once existed. The trailer and the entire documentary are online.

In 1999 Ron Diamond’s *The Animation Show of Shows* premiered, but for several years it was mainly shown at colleges that taught animation, or at major animation studios, museums and at other places where he hoped the works might inspire and influence animators. Ron also runs Acme Filmworks in LA, creating TV commercials for national brands, animated sequences for features and other projects. It was Ron’s love of quality animation that led him to create his traveling show. He has expanded his presentations of it into commercial movie theaters, but unfortunately, when Covid 19 arrived he lost his audience. He is currently reviving the show.

Ron’s show always feature some of the year’s best animated works. They include significant, highly original, artistic, narrative and experimental shorts. They range from funny to serious intelligent concepts.

He is presently putting together the 25th edition which will feature some of the most outstanding shorts from previous shows.

Since 2007, a number of the films that have been in *The Animation Show of Shows* have also been released by Ron on DVDs at very reasonable prices. Amazon carries sets of them.

Ron also founded the internet’s largest and most important animation news and information website, *Animation World Network* (awn.com). It covers both the worlds of fine art and commercial animation. There are lots of feature articles, blogs, job and school listings and other things.

Terry Thoren, while he was working with Expanded Entertainment, founded *Animation Magazine*, a slick trade publication with lots of ads. It primarily focuses on news of domestic commercial features and television shows. You can also find animation news online at *Animation Magazine*, *Animation Scoop*, and *Cartoon Brew*.

This century has also had a short lived attempt to bring quality animated shorts to the public that was run by well-known animators. The first edition of *The Animation Show* was released in 2003 by Mike (“Beavis and Butthead”) Judge and Don Hertzfeldt. They organized the program to show their work the way they

were meant to be seen, on theater screens. The first package included other films they respected including wacky shorts by Bill Plympton. The program was seen in over 200 theaters plus they released a DVD of it.

The *Animation Show* achieved its goal of getting good works seen properly so they continued to put together really nice shows in 2005, 2007 and 2008. They featured fine work by Georges Schwizgebel from Switzerland, Joanna Quinn from the UK, PES and Bill Plympton from the US, and other works. It was a noble experiment where artists put together their ideal shows for the love of the medium. They didn't try to add "ringers" that might have attracted more people, but were not films they respected. Each year the public does get to see in movie theaters a program of the five Oscar nominated animated shorts. It opens a week or two after the nominations are announced and ends before the awards are given. They are shown with the live action nominated works. Five films isn't a good representation of the thousands of animated films made each year, but the brief run is great exposure for the films as the program is seen by several hundred thousand people. (It grosses over three million dollars at the box office.)

The show was originally organized by Carol Crow's Apollo Cinema, but an ill wind blew in and the program is presently distributed by another firm. By the way, only one of the five nominated films this year was by an animator from the US.

I hope this give you a good idea of why it has been so hard to see animated shorts in our country. A Hollywood feature can open on four thousand screens at once, but the shows just discussed were only shown in a limited number of venues. Many of the films are now online, but unless you know what to look for you are unlikely to find them. That results in only a tiny percentage of people knowing that truly remarkable shorts even exist. Part of the reason for that is Hollywood animated features and commercial TV series dominate the news and discussions that include animation. The wonderful independently produced shorts desperately need a home.

TV didn't develop as a showcase for independently produced animated shorts

Until the decline of Hollywood cartoons and animated educational shorts in the classroom, kids were used to seeing animation and they probably took them for granted. As a kid growing up in the 1950s, I knew what to expect before the feature. What I also looked forward to seeing were the special occasions, the two or three hour long cartoon marathons. TV wasn't showing much animation in the early 1950s except silent cartoons with soundtracks added and old public domain cartoons from studios that had gone out of business. I also watched Jay Ward and Alex Anderson's *Crusader Rabbit* (1950), the first limited animation cartoon series that was widely seen. It was a silly novelty.

Animation on TV got more interesting in 1955. Paul Terry sold his company, Terrytoons (Mighty Mouse), to CBS and Warner Bros. sold a package of black and white cartoons to a TV distributor. It included early Daffy Duck and Porky Pig cartoons. In 1957, Walter Lantz premiered the Woody Wood Pecker Show, and in 1960 the Bugs Bunny Show premiered.

Animation made for TV didn't really succeed as a business until Hanna-Barbara entered the TV marketplace with the *Ruff and Reddy Show* in 1957 and Jay Ward returned to TV with *Rocky and His Friends* in 1959.

Ward tried to inject adult humor that would go over the heads of kids, but advertisers stuck with wholesome Hanna-Barbara type shows that were free of adult content.

TV budgets were – and still are – based to some extent on what the sponsors will pay. While production budgets have grown better, TV is still chiefly making low budget animation for kids that runs before and after school and on weekend mornings. Chuck Jones, Hanna-Barbara and a few other producers had slightly larger budgets for the rare prime time/holiday special. TV animation for more mature viewers didn't arrive until *The Simpsons*.

TV animation became a place where advertisers could get reasonable rates for their ads which limited the cost of productions. You probably have fond memories of several shows you enjoyed growing up, but if you are reading this article you know the animation I'm writing about is intended to be seen by an older audience that seeks an alternative experience.

So where's the outlet today for independently produce shorts?

I hope I have clearly shown that it has only been a marginally successful struggle to educate the US public about the value of well-made, intelligent, animated shorts created by independent artists for open-minded adults. Several shows in the past have tried and, but while they did make a positive impression about the value of independent animation as a fine art, only Ron Diamond's *Animation Show of Shows* and the traveling shows of Oscar Nominated Shorts exist today.

The only other outlets in the US today that show independently produced animation are film festivals, and the labyrinth of *FilmFreeway* offers limited genuine opportunities for large-audience exposure.

Sure, five animated shorts are in the annual theatrical release of the Oscar nominated shorts and there is an occasional animated short on PBS, but that is a drop in a very big bucket. It is nice that Pixar and Disney put shorts by their up and coming directors in front of their features, but there are too many good shorts that never get the exposure they deserve.

Unfortunately our nation's best-known independent artists, including Bill Plympton, Signe Baumane, Nina Paley, and others don't have big budgets to promote their work.

As I write this, Signe has a new feature, *My Love Affair with Marriage*, winning festival awards. It is also being distributed theatrically in several European nations. Signe says that securing a theatrical release in North America has been a challenge that she hasn't solved yet. She says that due to the growth of streaming services and the pandemic, the habits of movie goers have been changing and that the changes have resulted in more movie theaters closing. She says "the art-film distribution structures in the U.S. are in the process of collapsing. The offers we have received so far from US distributors have only been for online options."

☺

This is the first of three essays by Karl Cohen. The second and third will appear in conjunction with our ASIFA Central newsletter in July.

Julie Goldstein's GRAM Exhibition

The Hunting Gallery at the Grand Rapids Art Museum hosted an evocative blend of history and poetry during May and June, created by ASIFA Central President, Julie Goldstein. *Virtual Memory* is a meditation on image-making and its impact on human consciousness, from the physical process of photography and film, to the alternate universes created by computers and virtual reality.

Virtual Memory, film by Julie Goldstein

Filmmaker Julie Goldstein traces the legacy and history of the predominant mediums of the last century – like photography, filmmaking, and the radio – and embraces the freedom offered by the immaterial digital sphere. In *Virtual Memory*, Goldstein presents a vision for a future society that welcomes technological advancement in the name of learning and self-expression. At once a critique and celebration of human interactivity with modern devices, Goldstein offers a reassessment of how the sense of self and our communication with others is dependent on the tools we use while also pondering the increasingly intangible nature of our lives. A farewell to the analog, Goldstein envisages the next phase of humanity as one that expands how people's experience of their lives is mediated by digital interfaces.

In addition to her involvement with ASIFA, Ms. Goldstein is Assistant Professor at Grand Valley State University, instructing film culture, animation, and new media within the Department of Visual and Media Arts – and is a faculty fellow at the GVSU Applied Computing Institute. She was formerly the Academic Director of Media at the Art Institute of Colorado, where she spearheaded the Game Art and Design program. She has produced and directed numerous animated projects, ranging from a feature length children's character animation to 3D visualizations for the

Grand Rapids Ballet. As if that isn't amazing enough, Ms. Goldstein is currently Creative Director for GVSU's Project *Grand Path*, one of the Presidential Initiatives associated with the "Reach Higher: 2025" campaign.

Deanna Morse, AWG Projects and ASIFA International Updates

Children in 11 different countries worked with ASIFA Members who are master-teacher animators, using a wide variety of techniques, to create animations around the theme of solutions to climate change.

The Animation Workshop Group was founded in 1971 as a group of artist teachers who believe that children can use animation to tell their own stories. Each year, all over the world, students create short films based on a common theme, with a variety of viewpoints, multiple techniques, and rich soundtracks.

Nearly 200 students participated in the project, along with over 30 A

Deanna Morse (con't)

instructors, support staff and musicians from Greece, France, USA, Croatia, Russia, Austria, Israel, Belgium, Ukraine, Norway, and the rainforest in Brazil. The half hour film was compiled and edited by AWG President Christel Degros of Belgium.

"We All Dream of a SUSTAINABLE Future" is on the AWG Youtube Channel

<https://www.youtube.com/watch?v=Y0wYUe8kHaA>

Deanna Continues: ASIFA International Updates

(slightly edited for space and continuity)

It is not quite six months from my last President message. And we are getting ready to connect at two upcoming partner festivals – Zagreb and Annecy. More than 20 board representatives will be at the two events.

A Review of 2023 Activities

In late December, we were dealing with the Stolen Film drama, and what a drama it was. Although has quieted, it is still an issue for us animators. ASIFA was helpful, we were supportive. But it is the age of AI, copyright issues, and easily downloadable files, this issue will not go away.

We have been working on our communication strategies – how to be transparent without too much email clutter.

For ASIFA, in 2023, we approved the proposed budget...past President Nelson Shin volunteered to do an internal audit, something that ... will keep us legal.

AWG completed a sophisticated film on *Sustainability* (also noted above). With a variety of techniques, nearly 200 students in 11 countries participated,

15,820 badgeholders (+ 19%)	6,410 Mifa badgeholders	102 countries
156 professional events	2023 AWARDS	468 films in official selection
3 575 Student badgeholders	2023 IN PICTURES THE CLOSING CEREMONY	850 contents in the Video Library*

* 665 of them are still available for viewing, depending on your accreditation type, until 31st December 2023

Annecy 2023 was also:

- 345 screenings (WIP and conferences not included)
- Between 4,000 to 8,000 spectators every evening for the open-air screenings on Le Pâquier
- 1,205 Pass grand public
- Le Campus, the brand-new area at the Mifa for students and emerging talent, was a roaring success

including both Ukraine and Russia. I think it is one of the best AWG films, and am proud to be a participant. If you know of festivals or places that might screen it, please advise.

IAD unveiled the fabulous poster by Georges Schwizgebel. Chapters can share animations through the Film Freeway portal, for the October 28 celebration. Briana is solidly organizing, as usual.

The 2023 ASIFA Prize will be presented at Ottawa (this) fall.

We are in discussion on how to invest part of the money we have in our financial reserve. Several chapters have suggested ideas, including ASIFA Student Awards, a project piloted during the 60th Anniversary.

We are welcoming new chapter representatives, chapters are paying dues, and, of course, there is lots of energy around the back-to-back top notch European festivals. This comes directly after Xiamen, where several ASIFA board members met in person, this year, and felt connected to our global community. We are looking forward to the fall festivals – Ottawa, Espinho, and others... We are working on updating our festival policies.

One of my personal goals is to encourage entry points for upcoming leaders. If you want to know more about ASIFA, but are not in the loop, please let me know. One of my mandates is to enable new folks to find ways to plug into our leadership team.

I am trying to develop a solid calendar so that we do not miss deadlines for our annual ASIFA activities.

ASIFA.net is constantly being updated. Be sure and log in for new information, and thank you to our communication team. I look forward to seeing you, or hearing from you, and to continuing our journey to strengthen ASIFA, our international animation association, now 63 years old. Or, 63 years young. Going strong.

Join me, as we celebrate our love of together, around the globe.

morsed@gvsu.edu -
president@asifa.net

OIAF Discounted Festival Passes Available for ASIFA Central Members

Ottawa has been provided with the active membership list as of June 1, 2023 for a discount on passes to this fall's OIAF. Yes, Ottawa, the entire city, the destination of destinies, the locus for ketchup chips and poutine, of carved pumpkins and nicely niched nuggets of nonchalant creativity. *That* Ottawa. However, the OIAF portion of Ottawa is the focus for this discount. Your ASIFA Central membership card, while always an attractive accessory to

Public Service Announcement:
The Ottawa International Animation Festival will take place September 20 – 24, 2023.
Attendance is strongly recommended.

your travel plans, will not necessarily get you a discount for the afore-mentioned ketchup chips, but may get you special attention at customs by **OIAF (con't)** officers who think you might know Seth MacFarlane or would like to hear an impromptu rendition of "Tomorrow" while scanning you for contraband (both experiences of yr hmb1 typst).

Oh, what is that secret code to provide you with this bounty of overdue recognition? The magic entry, whose entered presence will give this discount? It is - **ASIFACentralOIAF2023** - but remember, it will be double checked against *the list* at OIAF and yr hmb1 typst will get a telegram seeking confirmation (Edmore, being Edmore,

This poor sap didn't use his discount code for the OIAF '23!

has been slow to embrace technology, but the lad who delivers the telegram is quick to embrace a tip).

So don't be naughty! Save it for the storyboards!

If you haven't made plans for September 20-24, 2023, contact Adam Tremblay at this secret email access (ok, it's not secret) - registration@animationfestival.ca

And Speaking of Membership, Welcome This New Member - Peaches Wilczak - Recent CMU Grad

In the thesis film *Gnosis*, Peaches Wilczak professes, "If *Gnosis* is the awareness of universal truth, and the universe is art, then my *Gnosis* is the knowledge that for all the time and energy I put into shaping pieces of the world into art, it equally has the ability to shape me as well. *Gnosis* is

Peaches Wilczak, animator, with the storyboard to prove it!

knowing that your art loves you, just as much as you love it." Peaches trained at CMU under the guidance of ASIFA Central member and dapper dresser Stephen Leeper.

Portions of Peaches' earlier exercises appeared in last year's ASIFA Central/CMU IAD reel, and *Gnosis* is set for inclusion in this October's compilation. The film is broken into seven philosophically structured days and its hero's journey can be viewed in its entirety at -

<https://peacheswilczak.art/pages/gnosis>

Membership Renewal Process

Those members set for renewal through June of this year should have, by now, received an invitation to re-enlist with ASIFA Central. Students get a discount and may appeal even that to assure a proper diet of ramen and rice paper (also useful for drawing!) while maintaining membership. Renewed members should have received an updated membership card good for a year. If you haven't received yours, drop the membership coordinator a note and we'll fire up the linotype and get things updated!

IAD Approacheth

FilmFreeway will remain the designated and preferred broker for the films provided for inclusion, so feel free to upload. Specifics will follow the basic formats from the last two years, with instruction and submission guidelines coming soon in a newsletter near you!

Late Breaking News - more from Deanna!

Just received word that Nelson Shin was accepted to the Academy - AMPAS. I am excited, as I nominated him with the support of Steve Segal. I am proud of the production of his animated feature film, *Empress Chung*, which he made in North Korea and South Korea. *And he did the original Light Saber animation!* *And*, he was President of ASIFA International. And now he is in the Academy. Well deserved!

Pen and AI Challenge - Osculating Octopi

The Original Drawing by Yr Hmbl Typst

And requesting the same from an AI generator with the tongue-twister input - after several re-iterations, Night Café produced this:

OK, the lighting is better, but I couldn't make it give me oysters.

SAS and Unassigned Seating Department

Yr hmbl typst was late to the SAS gathering celebrating the life and achievements of Howard Beckerman on June 15, and with the random nature of Zoom, wound up in a virtual chair next to Tom Sito and John Canemaker. ASIFA Central member Orrin Scott was actually in attendance, and he brought the receipts:

Public Domain Corner

This June's ANNY program included the earliest soundtrack ever recorded within the short film, *What is Design?* by Mark Franz.

Interesting as the combination was, it also set off a flurry of questions about ownership of recorded sound and performances (in the skewed mindscape of *Yr Hmbl Typst*, anyway).

First, about the film, from its website - "*What is Design?* explores the aspects of Form, Structure, and Movement through cutout style animation derived from imagery from *The Last Whole Earth Catalog* (1971-75).

"The cutout technique and style of *What is Design?* draws inspiration from such work as Harry Smith's *Heaven and Earth Magic* (1962).

"In keeping with the exploratory scientific feel of aspects of the catalog, all of the

individual frames in the film were captured with a digital microscope. This technique was also chosen in order to preserve the textures and details of the original printed material.

“The soundtrack is based on audio from the Dickson Experimental Sound Film

(1894), chosen by Franz for the sonic textures of the earliest recording medium.”

Second, *The Whole Earth Catalog* is a prized artifact in the archives at The Animating Apothecary. “I cured my warts with voo-doo and a Swiss Army knife” and other essays helped *yr hmbl typst* survive the 70s.

Third, and this is where copyright questions start percolating, the violin extract is the song, “The Cabin Boy,” from the light opera *The Chimes of Normandy*, composed in 1877 by Robert Planquette. That takes the composition over the 95 year time limit, and the recording, while originally from an 1894 performance, would be under any normal circumstance within the public domain (past the 100 year time frame for performances).

HOWEVER, it was pieced together from its broken wax cylinder components, digitized *and then publicly paired and presented for the first time in 2002* (while the separate components had existed for some time, Edison could never get the two to synchronize properly). Further complicating the process is that this production was assembled by restoration expert Walter Murch under contract from the Library of Congress, with some input from ILM. So many hands, from public to private!

The question that can emerge - does this

First sound film, first artist-director-performer “auteur” film, first film musical, and possibly first gender-bender film experience

40 second bit of sound copyright get set in 1894, where it was never publicly performed, or in 2002, when it was finally repaired and re-assembled for an actual presentation, and if it’s in 2002, is it owned by Mr. Murch, ILM, the Edison Labs, or the Library of Congress (who

currently curates the Edison recorded archives, but is extremely vague about their copyright status).

It is doubtful that anyone would ever litigate ownership of this rendition of “The Cabin Boy,” but it just shows how some recording copyright performances can get very complicated to sort out. The general consensus now is that Edison recordings are in the public domain, leaving copyright issues to those compositions written between 1923 and 1929, when Edison personally pulled the plug on his recording division.

The Dickson film, representing about a million “firsts” is available at -

<https://www.youtube.com/watch?v=D4iDmA1seBk> (It gets played twice)

What is Design can be experienced at:

<https://markfranz.org/project/whatisdesign>

“Home” Premiere in Muskegon

The first director’s cut of Jim Schaub’s documentary, *Home*, presenting Buster Keaton’s teen years in Muskegon had its first semi-public showing May 21. The animated sequences featured the work of ASIFA Central member Jim Middleton. Further trimming and shuffling will continue this summer with a release to the festival circuits expected later this year.

Analytical and Articulatory Animation Analyses

A Special Supplement for the ASIFA Central Newsletter - July 2023

Karl Cohen's Second Draft Essay on Animatory Activities - Musings on the Film Festival Conundrum

Why is the Nature of Animation in Europe Quite Different than Creations from the US?

You may not pay much attention to what animation festivals in Europe are currently showcasing, but it is worth noting that only a few films from hundreds of entries received from the US are being selected for screening. I became curious why prestigious festivals like Annecy 2023 and the Zagreb Animation Festival are featuring only a limited number of US works in their competition programs. In the past, these festivals used to showcase a significant number of entries from the US, as they were considered cutting-edge.

This recognition played a crucial role in advancing the careers of independent US animators. I wanted to investigate why so many US films are now being overlooked abroad. Through my research, I discovered that people attribute this trend to differences in budgets, technical perfection, and content between European and American animation.

My third (upcoming in August in this newsletter) article, "Insights by People from the Animation Community," includes some comments that form the basis of this article. After analyzing what I've learned, I now argue that animation in the US started evolving in different directions from Europe during the second half of the twentieth century. These changes ultimately shaped the type of animation produced by US animators.

A simple way to illustrate this divide is by comparing works made in the US, primarily following what can be called the "Hollywood Formula," with European features. European artists

Karl Cohen is the editor of the meatiest newsletter about animation on the planet and author of *Forbidden Animation* and many articles on many platforms - an appreciative examination of his life and times is at https://cinesourcemagazine.com/index.php?/site/comments/the_cartoon_king

Mr. Cohen is also seeking feedback and questions about this series of essays and can be reached at <https://www.karlcohen@earthlink.net>

employ approaches that are considerably different.

The Rise of the Hollywood Animated Feature: A Remarkable Business Product

Although you might not be comfortable with this notion, many in the business world view animated features as products. Walt Disney demonstrated from his own experiences that features could be profitable, but they also carried a high risk of financial loss. While *Snow White* (1937) was a great success, along with Disney's films from the 1950s, other films disappointed at the box office. If *The Jungle Book* (1967) hadn't been successful, the studio might have ceased production not taken the risk of producing *Who Framed Roger Rabbit?* (with a budget of \$4 million, *The Jungle Book* grossed \$13 million in the US and \$23.8 million worldwide).

An uncomfortable revelation that US feature films are not solely created as wonderful expressions of artistic freedom came in 1981 through a statement made by Michael Eisner. At that time, he served as the president of Paramount Pictures (1976 to 1984), before becoming the head of Disney from 1984 to 2005. In 1981, Eisner wrote an infamous internal memo expressing his belief that, "We have no obligation to make history. We have no obligation to make art. We have no obligation to make a statement. To make money is our only objective."

Under Eisner's leadership, a Disney subsidiary called Touchstone produced *Who Framed Roger Rabbit?* in 1988, with animation directed by Richard Williams. The film demonstrated that well-written animated features for an older audience could be profitable. This success led Disney to produce *The Little Mermaid* (1989), followed by *Beauty and the Beast* (1991), *Aladdin* (1992), and *The Lion King* (1994). It marked a highly profitable period known as the "Disney Renaissance" and ushered in a new era of commercially successful animation, attracting other studios to the industry.

In terms of content, most scripts for US animated features follow what is known as the "Hollywood Formula." The story generally opens with an impressive action sequence to captivate the viewer and generate excitement. Then, just enough information is provided about the hero or protagonist to make us admire them and become emotionally invested. The film gradually reveals the problems the antagonist will create. Throughout the plot, the story presents a series of growing and captivating challenges and resolutions. The filmmakers strive for great twists, exciting action sequences, and clever resolutions before reaching the final act. The final act usually begins at a low point and builds toward a grand climax. After the climax, the film concludes with a resolution, sometimes leaving room for a potential sequel if the film performs well at the box office.

When utilizing the Hollywood Formula, it is crucial to set the plot in a fantasy world to ensure viewers don't identify too closely with the film. The inclusion of numerous surprises is encouraged, but controversial elements that could impact box office revenue are typically avoided. The more appealing and glossy

the product appears, the more the audience is expected to love it.

TV shows for adult audiences also adhere to a somewhat standard format – the situation comedy. The first notable series aimed at adult audiences was *The Simpsons* (1987), created by Matt Groening. Each week, viewers of the animated situation comedy are presented with and limited movements. This approach helps lower production costs, as action sequences require more time and money to create. Situation comedies targeted at adult audiences can result in highly profitable series, making them an attractive option for producers, studios, and networks whose primary objective is to make a profit.

The tremendous financial success of films and TV shows created using these basic approaches has led the public to assume that they are witnessing *great animation*. Consequently, many audiences have become complacent with these standardized approaches to animation, often ignoring or rejecting other styles, including those seen in imported features.

Films that deviate too far from the Hollywood Formula run the risk of failure in the US market. For instance, Disney's *Fantasia* (1940) did not break even financially upon its initial release, but it became profitable upon reissues, particularly in the 1960s. *Fantasia 2000* has yet to recoup its costs. Similarly, *Yellow Submarine* (1968), a production by TVC in the UK, also failed to break even at its initial box office. However, King Features paid TVC a fixed price to produce it, and King Features was already profiting from the Beatles' TV series.

The Challenges and Limited Exposure of Non-Hollywood Animated Features in the US

Animated features from Europe and other parts of the world often deviate from the Hollywood Formula, offering unique and visually stunning storytelling experiences. However, these films face challenges in gaining exposure and generating substantial revenue in the US

market. Limited promotion, distribution, and a lack of media coverage contribute to their under-performance. Here we can examine the struggles faced by non-Hollywood animated films and highlights notable examples.

The Impact of Marketing and Distribution

Unlike major Hollywood studios, distributors of non-Hollywood animated films often operate on smaller budgets, resulting in limited advertising and promotion. As a result, these films do not receive extensive exposure, particularly in rural America. Consequently, the majority of the US audience remains unaware of these films, or if they are aware, they show little interest due to a lack of information and media coverage.

Examples of Non-Hollywood Animated Features

Tom Moore, an Irish filmmaker, has produced several visually captivating and charming animated films, such as *Secret of Kells* (2000), *Song of the Sea* (2014), and *Wolfwalkers* (2020). Despite their artistic success, these films grossed modest amounts at the US box office, indicating that only a fraction of the potential audience experienced them.

Another notable example is *The Red Turtle* (2016) by Michaël Dudok de Wit from Holland. Premiering at Cannes and backed by Studio Ghibli in Japan, the film received critical acclaim and an Oscar nomination. However, its US box office earnings were relatively low compared to its global performance, suggesting a limited audience reach in the US.

Anime's Limited Success in the US Market

While anime has a dedicated fan base, it has yet to achieve the same level of financial success as films from major US studios like Disney and Pixar. Only a handful of anime features have grossed more than \$30 million at the US box office, with the majority released within the past few years. Despite the popularity of Hayao Miyazaki's films,

they often struggle to secure wide theatrical releases throughout the US, limiting their exposure to a broader audience.¹

The Importance of Media and Theater Bookings

Media outlets play a crucial role in educating the public about the value and diversity of foreign animated features. Unfortunately, many local newspapers and news websites fail to provide adequate coverage or listings for these films, further hindering their visibility.

Additionally, theater bookers may be reluctant to screen foreign films, believing there is insufficient audience demand to justify the costs of running the business. This lack of exposure and distribution contributes to the limited success of non-Hollywood animated features.

Success Stories and Industry Challenges

While non-Hollywood animated films face numerous challenges, a few success stories have emerged. Nick Park's *Chicken Run* (2000), produced in collaboration with DreamWorks and supported by a significant advertising campaign, achieved both critical acclaim and financial success. However, the termination of DreamWorks' partnership with Aardman following the underperformance of *Flushed Away* (2006) highlights the different priorities between artistic vision and financial profitability.

Non-Hollywood animated features offer unique storytelling and artistic experiences that often deviate from the Hollywood Formula. However, their limited exposure, lack of marketing, and distribution challenges hinder their success in the US market. Improved media coverage, increased support from distributors, and a more diverse theater

¹ Studio Ghibli did announce its 2023 film-festival, with all ten of Hayao Miyazaki's films coming to the big screen
<https://www.comingsoon.net/movies/news/1270802-studio-ghibli-fest-2023-dates>

booking approach can help expand the audience for these films, allowing a wider appreciation of their artistic merits.

Divergent Perspectives: US and European Opinions on Animated Films

O ver the past few decades, a divide has emerged between US and European producers regarding what constitutes a great animated film. While Hollywood studios have refined their concepts to create billion-dollar releases, European and Middle Eastern films operate on smaller budgets but can still offer visually captivating and compelling content for both adults and children. This article explores the differing opinions of US audiences, anime fans, and international viewers and delves into the factors that shape these perspectives.

US Animation: A Focus on Spectacle and Sequels

I n the US, the financing of animated features often involves enormous budgets, which limits the inclination to take major creative risks. Producers tend to believe that pouring more money into production's "bells and whistles" will yield greater profitability. Physical and computer-generated effects, along with renowned actors and composers, are commonly employed to enhance the film's appeal. The prevailing sentiment seems to be a reluctance to risk investments on unknown talents, opting only for what is perceived as the best in terms of talent and resources. Furthermore, directors aim to make the films as entertaining and exciting as possible, often resulting in the creation of numerous sequels that capitalize on established characters and storylines.

European and Middle Eastern Animation: Pragmatic and Thought-Provoking

I n contrast, European and Middle Eastern directors approach animation with pragmatism, often working with smaller budgets that limit their access to extensive visual effects. Many of these

films target adult audiences and focus on intelligent scripts that resonate with mature viewers. Some films even tackle real-world situations, offering thought-provoking narratives that explore a range of themes. Examples include *Suicide Shop* (2012) by Patrice Leconte from France, a dark comedy inspired by Charles Adams' style, and *Persepolis* (2003) by Marjane Satrapi from Iran, an Oscar-nominated autobiographical film about growing up in a repressive regime.

The Directors' Intended Messages

W hen interviewing directors like Marjane Satrapi and Ari Folman, it becomes clear that their films carry specific messages and warnings. Satrapi aimed to shed light on dangerous fanaticism exhibited by political figures, while Folman sought to caution Israeli teens about the consequences of blindly glorifying military service. Despite their intentions, these films often struggle to reach their intended target audiences, with mature adults being the primary viewers instead of the teenagers they hoped to influence.

Divergent Audience Expectations

R esearch suggests that American and European audience expectations differ significantly. European festival-goers anticipate animated shorts and features catering to adult viewers, including content based on true stories that may not be suitable for children. They do not necessarily seek out films resembling Disney or DreamWorks productions. European audiences look forward to intellectually challenging films, animated documentaries, surreal dramas, and other unconventional approaches to the medium.

Contrasting Approaches to Animation

W hile some US animation directors produce thought-provoking work, European festivals have expressed disappointment with the majority of American entries in recent years. Unlike in the past, when US directors were well-represented at festivals like Annecy, contemporary American animators often focus on acquiring technical skills for

employment in the animation industry rather than creating groundbreaking films. Furthermore, some US festivals reject provocative European shorts due to concerns about controversy, as they rely on the support of wealthy patrons and tend to favor safer programming choices.

Support for European Film Projects

O ne significant disparity is the availability of production funding and services for film projects in Europe. Pitching events allow filmmakers to present their proposals, and winning awards can result in generous cash prizes or production support. These competitions often take place alongside festivals, seminars, and other industry events. Consequently, European filmmakers invest considerable effort in developing scripts, character designs, and storyboards that have the potential to secure necessary funds and services.

The opinions surrounding what makes a great animated film diverge between US and European perspectives. US animation often focuses on spectacle, financial returns, and a propensity for sequels, while European and Middle Eastern animation embraces pragmatism, thought-provoking narratives, and appeals to adult audiences. European festival-goers anticipate intellectually challenging and unconventional films, contrasting with US festivals' tendency to prioritize more mainstream and commercially safe content. Understanding and appreciating these divergent opinions can enhance cross-cultural appreciation of the diverse approaches to animated storytelling.

Fundraising and Animation Education in the US: Current Realities

I n the US, funding for film projects, including animation, is scarce, with only a few state art commissions offering limited funds for worthwhile projects. For example, the New York State film commission provides grants of up to \$10,000. Federal and state funding for films has never fully recovered from the cuts made during the 1980s. However,

internet fundraising platforms have emerged as a successful avenue for filmmakers like Bill Plympton, Don Hertzfeldt, and Signe Bauman, who have raised significant funds (sometimes surpassing \$100,000) for their shorts and feature projects.

Challenges for US Short Filmmakers

Unfortunately, most digital short filmmakers in the US face limited opportunities to monetize their work through theatrical screenings or television broadcasts. The theater industry prioritizes feature-length films over shorts due to commercial considerations, such as selling concessions. Additionally, the majority of shorts are not in the standard Digital Cinema Package (DCP) format used in movie theaters today, which further limits their exhibition possibilities. Instead, exceptional shorts may find success by winning prize money at film festivals.

Animation Education in the US

Animation education in the US is often accompanied by high costs, leading many students to seek immediate employment after graduation to repay student loans. State-run colleges offer a more affordable alternative to private institutions and often boast excellent instructors and equipment. However, the objectives of animation students have shifted over time. Instead of aspiring to become outstanding artists creating award-winning shorts, most students focus on honing their craft through exercises in hand-drawn or computer-generated animation.

While some animation programs require students to complete one or more shorts to graduate, not all schools provide robust classes that develop strong storytelling skills. These skills are crucial for creating exceptional works that garner recognition and open doors to more diverse sources of income. Animator Vince Collins has observed that contemporary students study animation primarily to secure jobs, whereas in the past, when jobs were scarce, films were seen as personal expressions of creativity.

Different Values and Challenges

Many US animation students excel in mastering the technical aspects of animation but struggle with delivering compelling content. They often find it challenging to break away from the idea of literal storytelling, lacking an understanding of how to effectively utilize surrealism. It is crucial for students to expose themselves to a wide range of animations, studying and analyzing works from various artists and eras. Learning from the past and attending festivals to witness the latest works and connect with peers are invaluable aspects of an animator's education.

In the US, fundraising for animation projects faces limitations in public and private funding. Internet fundraising platforms have become a notable avenue for success. Animation education focuses on technical skills, and while many students lack strong storytelling abilities, exposure to diverse animation works and engagement with the industry through festivals can help broaden their perspectives and creative capabilities.

The cost of an animation education today is prohibitively expensive at most schools, forcing many young animators to seek immediate employment after graduation to begin paying off their hefty student loans. State-run colleges offer a more affordable alternative to private institutions, often providing excellent instructors and equipment.

In the United States, the goal of becoming an exceptional artist who creates award-winning shorts is no longer a common objective. Instead, most students primarily focus on mastering the technical aspects of creating hand-drawn or computer-generated animation through exercises. While some animation programs require students to complete one or more shorts as part of their graduation requirements, not all schools offer comprehensive classes that cultivate strong storytelling skills. These skills are crucial for creating outstanding works that can gain recognition and open doors to more lucrative opportunities.

Today, many US students excel in learning the fundamentals but struggle to deliver compelling content. They often find it challenging to break free from the notion that their work must be conveyed literally as a real-life experience, lacking an understanding of how to effectively employ surrealism. I firmly believe that students should expose themselves to a wide range of animation to learn various storytelling techniques. It is essential for animators to study and analyze the works of others, drawing inspiration from the past as an integral part of their education.²

The perception of what constitutes good or great animation for animation students today is largely shaped by the media they have consumed since childhood, consisting primarily of formulaic features and television shows. This highlights the importance of broadening their exposure to different approaches to animation. Personally, when I discovered Norman McLaren's groundbreaking work at the age of 12, it was a revelation. How many animation students today have had the opportunity to witness his incredible contributions or the works of numerous other talented artists funded by the National Film Board of Canada since 1941?

A comprehensive animation education cannot be condensed into quick, intensive courses that are prevalent in our country. While there are schools offering intensive training programs designed to secure entry-level jobs within a few months, many students struggle to keep up with the demanding workload and eventually burn out. These programs tend to be overly intensive.

In contrast, the students I have encountered in Europe and Israel have impressed me, with several of them establishing successful careers as

² Fortunately, there are thousands of excellent shorts available online for free, providing students with ample material to explore. However, they would greatly benefit from a curated guide introducing them to these remarkable works. I am currently working on such a guide, as I firmly believe that animation is not only a great art form but also a lifelong learning experience, echoing the sentiments of Richard Williams and other directors.

teachers. European educational institutions often provide more scholarships, funding, and equipment, reinforcing the importance of a well-rounded liberal arts education. In many European schools, student films that receive acclaim often emerge from collaborative team efforts. By examining the origin of student films showcased at prestigious festivals such as Stuttgart, Annecy, Zagreb, or the Student Academy Awards in the US, one can discern which schools possess the most robust and comprehensive curricula.

The wide variety of films showcased at international festivals is a testament to the sophistication and education level of a society. While I appreciate the emergence of US films tackling controversial topics like climate change, I have long wondered why European artists address other important issues that their American counterparts tend to ignore. I hope this article sheds light on the underlying reasons for these differences.

When I had the opportunity to lecture in China approximately 20 years ago, I encountered students who were markedly different from those I had met in Europe, Israel, or the US. They primarily engaged in classroom exercises with rows of computer stations. During my lecture at the Beijing Film Academy, I addressed a large audience of at least 300 people in an auditorium. The vast scale of the space and the substantial number of attendees seemed to foster a serious and hardworking atmosphere, potentially intensifying competition. Most of those students eventually found employment on animation assembly lines in a rapidly growing industry that prided itself on the sheer volume of animation produced each year.³

Coincidentally, as I was writing this article, I received an email from the Jilin

Animation Institute (JAI) in China, boasting a graduate employment rate of over 90%. Many of their graduates have secured positions in well-known enterprises within the animation, gaming, digital media, and mass media industries, positioning themselves as prominent talents.

In conclusion, I believe that the influence of Hollywood animated features and TV series has shaped the US public's perception, leading them to believe that these shows are so enjoyable and exceptional that there is no need to explore other forms of animation. Furthermore, the lingering perception that animation is primarily for children, albeit with some acknowledgment of adult-oriented content, still persists. Individuals who hold this view are generally content with the current state of mainstream animated entertainment.

Returning to the initial thought that sparked my interest in writing this report, an anonymous source commented, "As for film festivals, the US is being left behind because the US is frankly too busy with its egocentric superiority complex to think anything could possibly be better than these 50 states. I think it is part of the reason international festivals no longer look towards us. They just don't see anything all that interesting anymore."

Initially taken aback by this blunt statement, I began to reflect on the images of people proudly displaying foam rubber hands with a single raised finger, chanting "we're number one" that often populate television screens. It reminded me of the almost fanatical crowds who fervently believed that their leader could make America great again (did he?). I assume there are indeed many individuals who are content with life as it is and have no desire to expand their interests.

What will it take to introduce people to independent animation and allow them to decide for themselves if it can add positive value to their lives? Guillermo del Toro's *Pinocchio* serves as a film that introduces intelligent ideas without making the audience feel as though they are being preached to. Public television's "Brief but Spectacular

Moments" on the PBS News Hour also subtly introduces viewers to the concept of animated documentaries. Additionally, there are impressive and well-animated segments featured in science programs aired on PBS and other networks. The more exposure the public has to these and other creative uses of animation, the greater the potential for some individuals to develop an interest in non-Hollywood animation. Unfortunately, PBS does not have as many viewers as major networks or Fox.

Perhaps in the future, a cable TV network or internet channel will regularly schedule shows featuring animation for open-minded adults (distinct from Adult Swim content), similar to how FM radio has dedicated stations for jazz, classical music, and other adult-oriented content. I hope that colleges and universities with liberal arts departments will eventually offer classes in animation history and appreciation. One day, we may even witness the emergence of serious courses dedicated to animation literacy and aesthetics.

It is also crucial for our government to reinstate its support for the arts by providing grants and scholarships to artists and artistic projects. Canada's National Film Board serves as an excellent example by producing exceptional films that demonstrate the country's commitment to supporting the arts. In the past, the United States had an active National Endowment for the Arts, which funded a wide range of projects. Other government branches also had discretionary funds available. For instance, during a drought in the 1970s, I assisted a friend in creating a humorous water conservation public service announcement for the government (funded by the Department of the Interior). If political parties genuinely aspire to make America great again, why can't we revise funding for the arts? Supporting the arts resonates with many people far more than investing in an escalating arms race. While a strong military may make us mighty, increasing funding for the arts and humanities is necessary if the US is to be regarded as a truly great nation!

³ I also had the privilege of meeting a class from Taiwan who visited the US for a better understanding of our animation industry. However, our discussion was cut short for a prominent highlight of their US visit - to an out-of-town discount shopping mall, where they intended to take advantage of affordable goods compared to Taiwan.

Charging to a Retreat - 2023 Edition

ASIFA Central Zooms Online - *Dateline, Saturday August 26,
2023, Online, Same-time, Depending Upon the Zone*

**Attendees Had to Fall Asleep to Wake Up to Event
"It Was Like A Dream," Said Across-the-Planet Attendee**

Over the course of nine, then ten, then ten and one-half hours, over 50 animators, students, educators, and enthusiasts streamed in and out of the 31st annual ASIFA Central retreat in August.

GVSU, through ASIFA Central President Julie Goldstein, hosted the web experience, recording much of it for later episodes on the chapter's *youtube* website. Julie Goldstein, fresh from her grand GRAM adventures, does it all!

Time zones were the greatest challenge - west coast participants did quite well, but the "central" in "ASIFA Central" perplexed some closer members in the midwest, who thought the noon launch was a 1pm event. With daylight savings in play, it could have been far more interesting from a log-in standpoint, "but who ever collects the interest on daylight savings, anyway?" quipped dozy member E. Gustibus Roue, who added, "time doesn't begin until after my first twelve cups of coffee." The award for furthest sign-in went to Shweta Marathe of India, who peered in at midnight in Mumbai. She was awarded honorary keys to the village of Edmore (once they are found), with a free tour of the backyards and playgrounds of teenage Winsor McCay. She blushed at the honor (the video reception was that good).

*Midnight in
Mumbai*

With the initial group introductions:

Julie Goldstein, ASIFA Central President, began the introductory rounds while controlling The Big Board **Fu Yang** brought a background in stop-motion and 3D - Fu's film *Fortune Cookie* was featured at the St. Louis film festival this summer with Michael Long's recent release: <https://poplifetl.com/tag/gorilla-tactics/>

David Baker remains lightly retired into "keeping it human," recalling his days of academe and KAFI, noting animation may be the last link to individual artistry, but still conducts workshops

Sarah Schmidt experienced animation goosebumps and invited all to her Chicago showings on September 28-29

Ian Bobinac carried the baton to the next level of demystifying Photoshop and is still unpacking cases from his predecessor at KCC in Battle Creek

Lynn Tomlinson returned through her studio, following last year's astonishing stop-motion warm clay workshop

Josh Hakin described the picket lines in LA

Josh Harrell took a breather between educational induction inspirations at CCS and Interlochen
Tyler Newby, CCAD (Columbia College of Art and Design) adjunct, shared the aura of mixing everything-together-all-at-once with 3D printing and art toys

Sir Charles (codename "Chuck") Wilson braved the Lansing area blackouts and became a soft, disembodied voice weaving stories of forensic animation, heritage recipes, and animation history

Michael Long was able to enhance his mailing list for the monthly coffee breaks he hosts from St. Louis (Missouri), sharing secret gorilla handshakes and grooming etiquette in the process

Deanna Morse, Our Most Serene ASIFA International President, encouraged attention to the upcoming OIAF in September and participation in October's IAD, with more information at ASIFA.org and ASIFA.net. She also dislikes bullet points. Yr hmbly typst is such a tease.

Steve Leeper shared his unending enthusiasm for his program with CMU and his multiple works in progress

Shweta Marathe, already stimulated by the time difference, shared the status of her award-winning student film, *Swim* - <https://shweta-marathe.wixsite.com/folio>

Tracy Miller-Robbins announced that teaching in one place isn't strenuous enough, so she'll be teaching in three locations this coming academic year. All that stretching! It's Education YOGA!

Bri Yarhouse remained in a state of delighted exaltation over her first year at Interlochen, promoting the international-level IAD celebration of our common humanity - with poetry AND kayaks, AND dashing from her new home base to Ottawa and then to Grand Rapids for helping judge this year's ArtPrize. Still more Yoga!

Yr Hmbly Typst was also present, but oddly silent while taking notes. The coffee hadn't kicked in for him yet, either. But he wanted all to remember that Edmore, Michigan, is where parents and relatives of Winsor McCay are buried, and they're gonna stay buried.

And Then the Retreat Began!

SESSION ONE

With *Gorilla My Dreams*, Michael Long gave the background to his current film, *Gorilla Tactics*, now migrating among the international film festival circuits. (See the aforementioned link: <https://poplifestl.com/tag/gorilla-tactics/>) It's a film about realizing a childhood dream, the ownership of a gorilla suit, but accepting the loopholes permitted by adulthood. His "chaotic creative process" created an audio/visual puzzle which had him continuously engaged in the feint and flèche of editing. *Gorilla Tactics* invokes the power of prayer, King Kong, and Ernie Kovacs in a youthful quest for a genuine, proper, monkey suit. Spoiler alert: *Gorilla Tactics* will be featured among the films of this year's ASIFA Central IAD reel!

An update note: "*Gorilla Tactics*" took Best Animated Narrative Film at the St. Louis Filmmakers Showcase on July 20.

"It was a thrill to see it play on the Hi-Pointe screen and to hear audience reactions. Besides the nifty certificate, each winner got to select a special object. I chose a new pack of Bicycle Playing Cards, Foil Back Cobalt--just because." –

Michael Long

In the steaming heat of pre-WWI summers, vaudevillians retreated from their intemperate stages to bask in the cooling beaches off Muskegon, in a suburb called Bluffton. The manager for this location was a knock-about slapstick stage star named Joe Keaton, ringleader for the popular group, The Three Keatons. The youngest of this group was named Buster, who later became among the greatest of the silent era film comedians, but at the time was a child star who never had the chance to be a child. Bluffton gave him that chance. These years have been under-documented, but a recently completed feature, *Buster Keaton: Home*, explores this period through interviews (including grandchildren and comedy legend Carl Reiner), documents, and - dare we say it here - animation. The

pandemic slowed the 2017 production process, but in 2022 Jim Schaub reached out to ASIFA Secretary Jim Middleton to provide three, then six, and ultimately nine animated pieces for the film. *Animating Keaton* was Middleton's presentation on his production process, using a limited budget and existing (some would say outdated) software to make 4K renderings 3800 drawings later, about seven minutes were ready to add

to the feature. In keeping with his reputation, Mr. Middleton's presentation

lasted longer than that seven minutes. He owes everyone a ten minute nap. To help that, here is his progress file, online, as the renders and re-renders get reloaded: <https://vimeo.com/manage/videos/796085457/16a55992f8> and the slides from the discussion are at "Post 597" at <https://animatingapothecary.blogspot.com>

Who wouldn't like to eviscerate a beanie baby? Or two? How about an entire collection? Sarah Schmidt is here for you. She crashed her computer for your maniacal fluff lust, with her initial tests evolving into a full program, with "two rips a week" between September 2023 and next June. So much fiber was released that air filters were called in to prevent an OSHA situation. Using DragonFrame, she is wrapping up this "first-year project," with her collectibles creating new value by the destruction of old ones.

Sarah Schmidt's Frankenbeanie

"Awakener" segment, sketch and final setup - Buster Keaton: Home

Cheer her progress at - <https://www.instagram.com/beaniebreakdown> (an elegantly twisted mutant beanie reconstruction welcomes you) - and check out her curated films at the Sunshine Mall Malt Adult festival in her fanzine here: <https://www.maltadult.com/>.

The first session ended with Triangle Tyler and His Student Orchestra. Tyler Newby understands that with Big Lutes

you get Big Sound. And with Big Sound you need a Big Screen jammed with animation

- even if it's a two hour concert. Time to get loopy! Using node-based Unity programming, he created a

series of images set for spontaneous control during a live performance. However, "a spider out of time" created a snafu just an hour before the show which Mr. Newby corrected, on the fly, across a series of naughty nodes. Without a cardiac arrest. Some in attendance at the presentation became light-headed at the situation, recalling a line from an old song, "weak men would faint, while strong men would cry out in grief!" (from *Ach, How That Woman Could Cook*, Gus Kahn, 1914)

Big Lute, Big Sound from Triangle Tyler

Then, after a break that seemed to last barely a breath,
came

SESSION TWO

Chris Sullivan began with a discussion of thematic use of visual dynamics demonstrating the tensions between mothers and daughters, using *The Sky Crawlers* (Sukai Kurora), a 2008 war film, directed by Mamoru Oshii as an extended example. The film had a dreamy, almost slow-motion feel to it, with subtle interplay between Cantonese and Mandarin accents as two generations vied for the attentions of the same young man. The film is set within an alternative history where, while the world is at peace, two rival corporations hire fighter pilots to engage in actual combat operations against each other – in order to ease the tension of a populace accustomed to war and aggression. Heady stuff: Greek tragedy meets Manga meets *Rollerball*.

(A similar theme emerged in a later discussion during the retreat, with #7 *Cherry Lane, Room at the Top*, set during the 1967 pro-China, anti-British student uprising, where the forces of love were driving a break down in society's barriers with a three-way romance. Reviewers have noted that director Yonfan, had he created *The Graduate*, would likely have been on the side of Mrs. Robinson.)

Steve Leeper has been seeking animation styles that go beyond the "cartooniness" of ToonBoom's inherent style for his work on creation poetry, notably James Weldon Johnson's 1927 poem *The Creation* (<https://poets.org/poem/creation>), with the haunting opening line, "And God stepped out on space/And he looked around and said: I'm lonely—" He has explored new ways to animate darkness, with a black screen becoming a time-lapse of isopropanol, glycerin, and black ink. He has also been using thumbnail storyboard sketches, with the inherent struggle to have the intended animation match the texture of the original sketches, discovering in the process that working in charcoal is *exhausting*. He also encourages the concept for his students that a project doesn't always need a deadline – that some

animation can become a life-long project, with discoveries along the way revealing as much to the external world as it does to an introspective creator. *Brother Thomas* is doing very well, too, by the way.

The *Ne Plus Ultra* bibliography listings from Orrin Scott continue to reveal the increase in interest in animation as a subject – while revealing a drop in advanced degrees in the visual and performing arts (4.4% BS, 1.8% MS, 0.8% PhD), while the pandemic resulted in many titles either not being released, or sent out in small, unpublicized packets (the production pipeline being squeezed for a potential tax-write off?). This created further challenging searches, derailing proper research and publication documentation. He also noted an increase in fiction books involving animation (consider *The Invention of Hugo Cabret* by Brian Selznick). Mr. Scott also manages the ASIFA Central Discord site, seeking input on how to make the experience better as a perpetuating virtual lodge for the group.

Another breathless break, and then began

THE SHORT TALKS

Lynn Tomlinson returned after her demonstration to last year's retreat attendees on her stop motion, clay-on-glass technique featuring the music video, *Ten Degrees of Strange*. Her 2021 project, *Periscopic Gaze*, examines the movement of water using dense layers of oils and pastels, prompting Sweaty Eyeballs Animation Festival juror Kelley Bell to comment, "The execution of this film is masterful: clay-on-glass animation is already a

medium that's notable for its plasticity, but some of the twists, turns and transformations in the film left me dumbstruck, honestly. It's a potent and visceral four-and-a-half minute treatise on the interconnectivity of nature, the futility of regret, and the inevitability of mortality."

Another recent project made fuller use of the Towson University planetarium, with an interdisciplinary subject "Light and Color," designed to be shown as part of an introductory physics course at the university, as well as in high school science classes. The full-dome and expanded animation experience at Towson University Planetarium is sampled at <https://vimeo.com/786925018>

Steve Leeper and has some special moves to bring a storyboard into a pitch-animated, using Photoshop templates to build motion among his pencil drawings. The process involves the creation of action scripts within the Photoshop environment, timing the images from action beat to action beat, creating composite layers in the PS software and then using the import function of ToonBoom to use the layers to build a three-dimensional space. "This is a hack," he explained, to avoid the perceived layout limitations within other software packages, such as Storyboarder. He

has created several videos demonstrating the process on Vimeo, and lo! here is a sample: <https://vimeo.com/851977416>

Towson University Planetarium Dome installation and Lynn Tomlinson in a meditative state

Guiding the animation phenomenon of Interlochen, and the approaching IAD would be enough to challenge anyone's calendar, but Bri Yarhouse announced at the retreat that she would be serving as juror for Grand Rapids' ArtPrize celebration this year. IAD permits animators to examine "what does it mean to be human," and the more than 50 films thus far provided for the event are an ample testament to that philosophical pursuit. Interlochen continues its legacy as being a destination high-school-

level boarding eXperience with its intense, multidisciplinary programs, building its animation program under Bri's guidance in what she describes as "my dream job." Lynn Tomlinson has coordinated her stop motion clay workshop onsite there, James Suhr brought his expertise in storyboarding, Josh Harrell from CCS managed projects in physical media – and the Interlochen construction division has been busy modifying and creating animation workspaces to continue making Interlochen a major destination for learning the visual and performing arts. Aspiring animators can tap into wells of poetic inspiration, voice artistry, and public broadcasting facilities to create and learn what it does mean to be human.

International Animation Day (IAD) brings the world to the same table

THEN (never has retreating been such an advancement on charging subject matter!)

The INFLUENCE and IMPACT Experiences from ASIFA members

Michael Long started with 1963's *It's A Mad, Mad, Mad, Mad, Mad World*, (whoops, one too many *Mads* there) with Saul Bass' pace-setting opening titles. The movie is condensed to under five minutes with his minimalist, manic, gleeful UPA style -

<https://www.youtube.com/watch?v=s1A7bJD3atk>

He also followed the existential train of thought for the retreat by recommending Bass' award winning short, *Why Man Creates*, especially the *Edifice* sequence -

<https://www.youtube.com/watch?v=ZkowV1L8I-0> - which predicts the tone of Frederick Back's *Tout-Rien* a decade later.

And, by the way, Gorilla Tactics is taking St. Louis by storm - here with VALET PARKING:

Jim Middleton was able to share the visuals for Ub Iwerks' Columbia production of *The Foxy Pup* (1937), noteworthy as Mel Blanc's first non-Warner's voice work, but which also served as inspiration for the color palette and background design animation within the documentary *Buster Keaton: Home*.

Background design from Iwerks' *Foxy Pup* (1937)

Chuck Wilson and *GODZILLA* brought everyone to a feverish appetite for a dinner break, with clips from the nearly 70 years of Japan's favorite export, with two more productions in the pipeline for 2024 release. He reviewed the entire *Godzilla* canon, reminiscing on youthufl monster cinema visits with his aunt, with asides into animation spin-offs, derivations, and Deanna Morse's contribution to the genre in her stop-motion *Kitchen Creature Feature*. And remember, Simon can't spell!

<https://www.youtube.com/shorts/p14ugeNsxf3U>

A DINNER BREAK!!

(but many brought their sandwiches to the zoom between presentations, and yr hmbly typst neglected to stop the recording, capturing some further rare animation insights. There was too much fun to allow sneaking off quietly for any reason)

AND THEN!!!!

Christine Panushka with *Blood of a Family Tree!*

The ability for a single animator to create an entire animated feature in a lifetime was unthinkable just a few decades ago. Technology has brought the singular benefit of building more feature animation auteurs to the public eye – as individual films have grown from the five minute experiments of a generation ago, built over the course of years, to over an hour of ideas to share with the same production schedule.

The silhouette dance, skeletal lacing, framed and shaded as modern interpretations of classic woodcut illustrations trace images of genealogy through literal bloodlines. Physiological explanations give way to segments broken into thematic chapters, inspired by the ability of images over 3000 years old to still reveal emotions by connecting with a neurologically primal subconscious. This is how Egyptian art can still communicate without words, and how rhythm and tone can blend sound and sight without words. Christine Panushka returned to "the essential nature of the form" in her feature and incorporated five original compositions into the soundtrack,

changing the space to match the sound.

A condition creating a sanguine surfeit stimulated her to build a film that grew into its final structure in three years, compared to the usual time of ten for other productions. Experimental, evolving streams of consciousness described the trillions of coincidences that must happen to bring us to our present; hence, we never know what brought us

here; such is the visceral quality of a bloodline. She believes the term "experimental film" is not a genre, but a method. It takes a lot of work to slam into repeated dead ends, to look where every strand of inspiration may lead – in this regard, she regards the young Walt Disney as an experimental

filmmaker and animator – he took a lot of risks

to create a *Snow White* and when it comes to a

film frame, she believes there is a "enough within the rectangle to keep me interested." During the discussion of her feature, attendee Mikhail Gurnevich

noted that "animation is poetry," and that the relationship Christine developed with the Absolut vodka company in the 1990s created some of the most experimental animated films given literal commercial exposure. By this time, the specifics of the feature drifted along multiple paths regarding the creative and imaginative processes, that there are so many "featurettes" appearing as animators are giving themselves permission to dive deeper, and deeper, into subjects for a 30 or 40 minute film, regardless of the commercial potential. A film can become the same work of art

Brief Bio of Christine Panushka: her film work includes *Nighttime Fears and Fantasies: A Bedtime Tale for a Young Girl* and *The Sum of Them*. She is also the creator of the award-winning website Absolut Panushka, which featured artwork by Priit Pärn, Jules Engel, Kihachiro Kawamoto, Ruth Hayes, The DeNoojers and others, during its premiere. The site is no longer active, but a 300 page archive of the pages is available in the newsletter section of the ASIFA Central website - www.asifa.org. She recently retired and has stories to tell. Get out the popcorn!

as a layered, detailed painting that one may gaze upon for hours at a time and draw more meaning with each observation.

This is not to say that experimental films lack rules. The discussion broke apart a cinematic composition into rules that differ from structure. Rules can evolve as the artist proceeds, but the structure of a film should be considered the solid scaffolding with a distinct shape. *Blood of the Family Tree* is built on dossiers, or chapters, each complete within itself. The point of the rules is to communicate without speech, to move beyond speech, admittedly, "not for a huge audience."

In a short film, every second has a greater weight; a feature in experimentation, should be considered another means of communication, but for all its protracted volume, should not be considered an artistic "milestone," but a unit of the creator's overall work.

Longer films need repetition to create almost a mantra, building to a point where the animator should feel, "I'm in trouble now." Working on notes, rewrites, reconsiderations, broken by quiet moments to dig into the unusual, the subconscious, the internal universe, until something breaks through the uncertainty into a dreamy connectivity that can only be expressed visually; words at that point are the corruption of an idea.

At this point, two hours had passed, the

From Hiroshima, 2014 - the late, the great Paul Bush, Anita Lebeau, Deanna Morse, Christine Panushka

multitudes of Whitman had condensed to the dozen of determined Retreaters, and the *Blood of the Family Tree* was a referential link.

Christine bid adieu, and after a brief time, one, then another, reappeared online and a second wave of discussions emerged, from fires smoking the skies of Oregon, to the delicate flip books of Ruth

Hayes, to cyanotypes, clocks, After Effects feeling like "shooting on threes," and the notion of ideas as spinning, airborne discs of pizza dough, working with clay to feel the spirit.

"Anizoomation still exists, too," Deanna reminded us, when the caul-covered Zoom possessed an experimental expression of its own. It seems like a far away world now.

<https://www.deanimations.com/>

Then, to the horror of those in the throes of sleep deprivation, the realization that the retreat didn't have a workshop this year, but worse, that the retreat failed in its primary mission, a goal above all others, to have an ASIFA Central Cake flip, slip, and majestically flop to the ground in memory of all those cakes who died before their just desserts at Starved Rock retreats, which in a fit of irony, ultimately had all the cake it could manage, if it only had a mouth to appreciate it.

And a parting thought for the evening - "You know, there are so many ways to screw things up with the newer software. It gives me hope that experimental film will always be with us."

The Stream of Consciousness

Sidebar - AI Didn't Save Any Time Whatsoever

During the tight animation production time for *Buster Keaton: Home*, yr hmbl typst thought AI might be helpful in generating some eclectic titles, in the form of either woodcuts or copperplate engravings. It took too long for not very useful results (original image on page 3). It seems that Yr Hmbl Typst is speaking DOS and HTML to Apache Groovy and F#. Interesting, however...

Pretty, but I think AI has a little ADHD

However, "Heygen" AI is terrifying, even without AR. It read *Jabberwocky* without so much as a hiccup, which is something yr hmbl typst can rarely do:

"I said *Twas Brillig*, you doomed, insignificant human!"

The Center for Visual Music Asks A Question

Did Oskar Fischinger make the first music videos? Why is he called the Father of Visual Music? A deep dive into his work and influence, "Oskar Fischinger and Visual Music," the CVM Virtual Seminar returns with a shorter version this season. In five weekly Zoom sessions, illustrated talks by curator/film historian (not to mention bon vivant and raconteur) Cindy Keefer presents screenings of Fischinger's important and rare films (plus other key visual music films), infrequently seen archival materials, and conducts participant discussions.

The series will run through September and October, running Wednesdays at 11 am PST on these days: Sept. 27, Oct. 4, 11, 18, 25. There is a reduced fee for this shorter version, but limited enrollment, and the CVM is registering now.

(Courtesy CVM) - thanks, Cindy!

continued A

The Public Domain Corner – Disney and Extending Copyright

Musings by Yr Hmbl Typst

A few years ago, there was a vinyl picture-disc release of the soundtrack to *Steamboat Willie*, a soundtrack originally slated for the public domain in 2028. However, not *this particular performance* of that soundtrack - there are some subtle "adjustments" to this recording, notably a clean up from

the *Domino* *Cinemascope* system of the late 1920s. Anyone trying to use *this particular performance* could be visited upon by the Disney legal team, a notoriously humorless bunch of litigators.

Sticking to the same film, Disney + has a "tribute" to Mickey among its recent streaming specimens, in his "new" iteration called *Steamboat Silly*. In it, the "new" Mickey releases the 1928 black-and-white Mickey while

showing a home movie, which is riddled with re-drawn scenes from "Steamboat Willie." So, again, when 2024 arrives, the same legal dream team can sit on the front stoop of anyone making use of the original Mickey, claiming that it is making use of this recent version of the film,

which will be under copyright until 2110 (66 years for "published works").

Silly Symphonies, anyone? Well, the classic 1929 *Skeleton Dance* has already gone through several variations from its 16mm EmGee film license, to VHS, to DVD, before this new streaming version on Disney +. The original release had a silent opening credit, then it was "modernized" with a faux intro music (that jarred against the actual soundtrack when it kicked in), then with an adjusted frame size to make it "authentic," then back to the silent opening for the Disney + production. Each soundtrack version represented a new "performance," with a 100 year long copyright attached. In addition, the new streaming version of *Skeleton Dance* has been given a digital

cleanup, balancing contrast and flicker, cleaning the soundtrack, and even adjusting a sequence where the original film had the performing skeleton move off register from the background. Again, each of these versions represents a "new performance," and performances (ie, soundtracks) qualify for the 100 year copyright. The cleaned up visual

version, as "published material," qualifies for 96 years.

Mickey's first slide - Iwerks (1928)

The flexible title space - from a 1929 classic

Original Iwerks drawing from 1929 - from Cartoon Research site

This follows the production practice of Disney, from its VHS versions onwards, to not identify the copyright year of the film on the packaging -

then it was to obscure the age of the movie ("1938! Eeuh! Old movie! Eeuh!"), but it also turned out effective to obscure when that film would be in the public domain (even with all that care, *The Mad Doctor* and *Minnie's Yoo-Hoo* slipped through the cracks) (people lost their jobs over that one, I'm sure).

So, if anyone is chomping at the bit to use these films, it'll be necessary to be certain that the 1928 and 1929 versions, specifically, are the source. Or, creating

a different version, with a documented trail of

production of drawing, rendering and artwork, will likely get past the realm of Disney Law. I suggest

using a headless chicken, dressed and ready for Sunday dinner, piloting a tugboat. Have something like that whistle, and theater-goers will pack the aisles!

The ultimate irony of all this is that, had any of these current copyright laws been in place in 1928 or 1929, the musical cues that Walt, Ub, and Carl employed for these groundbreaking films would not have been in the public domain.

What a whirl'd.

“As Seen on TV”

Streaming services have taken over the way people watch TV at home, and as a result, the broadcast TV commercial has become a dying art. Luckily, the Internet Archive houses a collection of Classic TV Commercials, with almost 17,000 different advertisements dating back to 1949. Many of these are animated (imagine that!). https://archive.org/details/classic_tv_commercials

ASIFA International Update with Deanna Morse

Dear friends,
I wanted to share a report I wrote after our two partner festivals. There were some ideas about how to invest our reserve for the benefit of international activities, and also my reflections on the importance of ASIFA.

Currently, films are being offered and uploaded for the October 28 International Animation Day

Celebration. Plans for the ASIFA Prize at Ottawa are solidifying. Soon we will ask for nominations for ASIFA Prize 2024, IAD poster 2024, and continue our discussions of other initiatives.

Two partner Festivals: Zagreb and Annecy - Two dynamic ASIFA member meetings
Zagreb Croatia welcomed us with tasty homemade cakes and other delights. We, 16 members, representing 9 countries, introduced ourselves, and tossed around ideas about what ASIFA international might do, specifically with our small reserve in the next few years.

There were some energetic suggestions!

- More festival discounts, and partner discounts
- giving a prize in the name of ASIFA at festivals- like 500€
- one or two curated screenings a year offered by ASIFA, a mix of young's and masters
- meetings at festivals, perhaps around a significant award
- having a project for grown-ups similar to AWG. Similar to the poster projects created for IAD, one theme, many variations.

Members were happy to meet each other and share ideas about our future. In true festival form, watching the clock, we ran off to go to a panel discussion about artificial intelligence, also our future.

Then.... at the bustling Annecy, we met at the Bonlieu coffee shop. Postcards and buttons were distributed to 17 happy ASIFA members from 10 countries. Without microphones, we made introductions, including passing around a phone with a facetime call to meet the new ASIFA India President who was unable to get his visa. It was one of those wonderful dual moments, in-person and Zoomy.

As Ilya Bereznickas was sketching caricatures of each of us, a spontaneous WhatsApp was initiated to share party information and continue friendships. Unfortunately, technology failed us...but we did manage to run into each other again, familiar faces in the sea of 15,820 attendees at Annecy.

The Importance of ASIFA

ASIFA is an organization of members, individual animators working in various fields, reflecting the many facets of animation. The local and national chapters are central to our structure. Each chapter has its own purpose, its own characteristics, activities, personalities. We represent auteur, corporate, new technologies, entertainment, education, and more. Chapters offer legal advice, equipment, social activities, festivals, educational, economic development, and more.

We frequently refer to the International ASIFA as an umbrella, connecting those national groups. Again and again, we heard the importance of why we are in that umbrella, why we are international. It is unique to be more than just a national group. To be part of a larger entity, a larger purpose. It elevates the national group status. Some chapters can use this to get government support. Members feel that they are part of a larger family. It allows members to connect for exchange, co-production, support, friendship.

And all of this is because of our shared love of the power of animation. And our belief that animation can communicate across borders, making the world a smaller place. Promoting cultural understanding through the art of animation.

Yes.

Deanna Morse

INTERNATIONAL ANIMATION DAY 2023 - AROUND THE WORLD IN 80 TOONS!

(Ok, so it was 80-two)

The ASIFA Central Reel Included:

Morning Coffee - Tracy Miller-Robbins
Building a Portfolio - Peaches Wilczak
Deer in Traditional Arts - Toroska Salari - ASIFA Iran
Solidarity - Sara Golebiowska - Poland
Microshort and Mental Wellness PSAs - CMU - Stephen Leeper,
Donks - Felix Colgrave - ASIFA Australia
Gorilla Tactics - Michael Long
Red Fire - Mona Shahi - Iran
Be Who You Want To Be - Interlochen Center for the Arts - Bri Yarhouse, director
Flip's Circus featuring Gertie - Winsor McCay
Carny Obscura - Gary Schwartz
Buster Keaton: Home - Animated Sequences - Jim Middleton
Fortune Cookie - Fu Yang - Webster University
Gnosis - Peaches Wilczak - Michigan
Elegy for an Elephant - Liao Xiangzhong - Communication University of China - ASIFA China
Swim/Tinker - Shweta Marathe - ASIFA Central Ambassador to Mumbai
Through the Looking Glasses - Morgan Eng - ASIFA South
Post-Proto - Aneta Siurnicka - Poland
Stained/Iffy - Gary Schwartz
Poems of Liberation - Interlochen Center for the Arts - Bri Yarhouse, director

This Official Document

Documented with Documental Deliberation
and

In visionis pertinacia confidimus,
decrees that

INTERLOCHEN CENTER FOR THE ARTS BRI YARHOUSE, ANIMATION PROGRAM DIRECTOR

through deliberate and determined effort, enhanced by *joie de vivre* and *graciosa d'effort*, has contributed to a
beneficent, and beautifully, beautifully buttered betterment of this art and genre, with altitude over attitude,
anima over animus; in short, animation, embodied within

THE 2023 INTERNATIONAL ANIMATION DAY CELEBRATION

Through the moving experiences of

POEMS OF LIBERATION & BE WHO YOU WANT TO BE

Celebrated the 28th Day of each October, but particularly, of *this* October, 2023

**Submissions already
coming in for 2024!**

Over 330 Viewers for the IAD Reel in the Greater ASIFA Central Region!

The ASIFA Central showreel and the O!PLA reel from Poland garnered an audience of over 330 for the chapter's 2023 IAD. Expanded international showings were held in Great Britain, to Poland, and India; and, stateside, from Oregon to Ohio, from Missouri to across Michigan. ASIFA Central animators were featured in South Korea, the Netherlands, Australia, and Poland. New and established ASIFA Central members are already preparing for the 2024 showreel.

Bri Yarhouse, international IAD coordinator, was in China for the celebration, Deanna Morse was in Europe absorbing the animated glow in Greece and Bulgaria, and chapter coordinator Jim Middleton was in Edmore, Michigan, where the parents of Winsor McCay are buried, making sure they stayed buried (there were reports that his edit of *Flip's Circus* had McCay spinning in his current restless place, but they were false reports spread by the ghost of John Bray. Jealousy in the *après-vie*, apparently, because nobody has re-purposed *Bobby Bumps* lately).

Deanna Morse, breaking world records, surfboarding across Europe - October 2023

Bri and Diek Grober, from ASIFA South Africa, meet in China because the weather in October is just right

Bri Yarhouse and Johnchill Lee, President of ASIFA China

Bri Yarhouse in China, annihilating the challenges of multiple time zones.

Bri Yarhouse Update from Interlochen

(From FB Posting) *2023 Interlochen Animated Pitch Challenge Teams!* Julia Pott, creator and show runner for "Summer Camp Island," on Cartoon Network spent a week workshoping with my animation students along with students from Creative Writing, Film and New Media, Visual Arts, Interdisciplinary, Music Production and Singer Songwriting disciplines at Interlochen Center for the Arts, all to create animated television pitches! It was a truly interdisciplinary adventure that culminated with a pitch presentation, including the opening themes, performed live on stage with storyboards, visuals, and so much more! Animation professionals reviewed the pitches and provided feedback, and the entire program was made open to the public on November 2nd.

<https://www.interlochen.org/.../2023-interlochen-animated...>

Interlochen Group Challenge #2 - November 2023

Edmore and Interactive Gertie

Among the IAD festivities in Edmore was an interactive film featuring Gertie the Dinosaur and the attending audience, transported to the Paleolithic Era by the Wonder of GertieScope, where she answered questions about the wheel (*it won't catch on*), whether cavemen taste like chicken (*yum, gimme two!*), and if she can relate to Taylor Swift (*oh, totally, we're complete BFFs*). You can play with Gertie, create your own interview and discussion, and download it on Vimeo: <https://vimeo.com/872392959>

The ASIFA Central reel also celebrated Winsor McCay in a repurposed edit of his uncompleted film, *Flip's Circus* (1918-1922), integrating clips from the nearly lost fragments of *Gertie on Tour*.
<https://vimeo.com/872302094>

Yr Hmbl Typst Generates Future Recycling for IAD

With the local newspapers tiring of documenting their perpetual township battles against science and batteries, it was perhaps a relief for them to have something completely different to report - so information on the IAD and local connections was quickly snapped up by papers in Greenville, Big Rapids, and Mt. Pleasant, Michigan, saturating the greater tri-county area. All three publications were in a near dead-heat to give the event front-page, above the fold status.

Deanna Returns from Greece and Bulgaria - with EGAD!

ASIFA International President Deanna Morse was dashing across Europe during the IAD celebrations, monitoring wedding progressions in Greece and the world of Bulgarian animation, while communicating with international and chapter members on the progress of multiple IAD showings. She returned to her home base of Grants Pass, Oregon, where further showings were scheduled, but noticed a cough and...uh-oh... *this 'Vid didn't stand for Video!*

So she did the right thing and forwarded notes and took lots of naps and drank plenty of fluids, and now she is back to being UberDeanna, President among Presidents, Animatrice among Animatrix, and superlative Aunt among Aunties.

Deanna's 2023 IAD remarks on the showing in Grants Pass, without the apostrophe, included these most sublime proclamations:

Hi from Deanna Morse, I am an animation artist and current President of the International Animation Association. I am also a cheerleader for the arts in Grants Pass – a museum member – Hi Hyla! And a member of COPA – hi, Cal! ... and I am SO sorry not to host with you tonight. I returned from a trip, and tested positive – it turned out to be a family super-spreader event. You don't want to join my family right now!

SO, Hooray! this is our annual Worldwide Celebration of Animation. October 28 is recognized as the birth of this artform – it's the Anniversary of the first public projection of a hand drawn animated film, in Paris – in 1892. And two decades ago, we, ASIFA, proclaimed this date and event as a day of celebration – and, across the world, tens of thousands of people join the party. Today, in Egypt, Austria, Greece, Japan, South Africa, India, China, Portugal, Korea – and Grants Pass, Oregon – we gather, we pause, and we celebrate animated filmmaking.

We have two programs tonight – The first celebration was curated by Michigan pharmacist-animator Jim Middleton, a prolific genius who loves history and never sleeps. This 45 minute program features films from the Midwest animation chapter.

Some student films were made solo, some as teams, and some as variations on a theme. Interlochen is a residential high school – talented kids under 18.

Flip's Circus film – Jim reassembled old drawings from American Animation Pioneer Winsor McCay, who made beautiful nouveau style comics and performed live in Vaudeville with his animations.

Each year, the ASIFA Animation

Workshop Group picks a theme, and artist animators work with children to create their own interpretations. The second portion of the Grants Pass showing celebrates AWG. This segment features 14 segments from 11 countries, each segment under 2 minutes. We are trying for a universal communication of ideas - without words— a challenge for adults, as well as for the kids, most of whom are just learning animation! Some workshops worked as a group on one concept, or kids worked independently doing variations on a theme, or sometimes maybe just playing around! It's free spirit art!

And touching to me – films from children living in war countries – Russia, Ukraine, and now Israel... OH! And the third segment was created nearby. Us at Pacifica! Felting artist Corbin Brashear worked with me and kids to animate the theme of ocean garbage.

South Korea - Nelson Shin

Yr hmbl typst received this note from Nelson Shin, ASIFA Korea President

I'm pleased to inform that we successfully wrapped up the 12th IAD event of ASIFA Korea at the NelsonSHIN Animation Art Center from 27 to 28 October. Including two films from ASIFA Central, we selected 39 films from Australia, China, Iran, India, Poland and ASIFA South and divided them into two programs of about 90 minutes each.

We coupled the showings with exhibitions in the animation museum that lasted the entire day. Students, professors, and other professionals in the field came and watch the movies.

We created a catalog to introduce each film and creator to the audience.

Once again, I appreciate your kind cooperation and creative achievement that made our screening so striking, and I look forward to seeing your originality and creativity in other films for the next IAD!

The gracious Mr. Shin, ever the gentleman, exemplifies a fine example of the benefits of international interactions and communication. He generously included yr hmbl typst among his beautiful IAD films and even tolerated my attempts at creating an SRT file for his translation team in Korea (I failed miserably, but he took it in great humor, and the efforts led to the how-to note that appears later in this rambling epistle for the season). It was an interaction that I'll embrace among my scattered memories, joining those with others in ASIFA, here and around this world. It gives me hope for humanity. I will claw my way to such hope, happiness, and solace. The catalog he created for his showing is also beautiful, and his animation/film-history museum is among my international travel destinations, should the opportunity ever arise.

We had a profile on his amazing museum in an earlier piece by ASIFA SF editor Karl Cohen this year. Here's a link to the ASIFA profile on the

museum: <https://asifa.net/an-animation-museum-in-korea/>

INTERNATIONAL ANIMATION DAY STORIES CONTINUE – A GOOD TIME WAS HAD BY almost ALL

ASIFA India - Awards of Excellence in Hyderabad

International Animation Day 2023 was celebrated in Hyderabad during November with plans to repeat the experience on December 1 in Bengaluru. Hyderabad's grand event also marked the presentation of the Annual Awards of Excellence. The international global footprint of ASIFA includes representation from over 42 countries with a presence in more than 70. Here's a taste of their celebration:

<https://www.youtube.com/watch?v=OyKJeCKrrA0>

At ASIFA - Poland

Their animation program and O!PLA (#11) Reel had a dozen national showings, with another seven internationally. Their selections from the IAD 2023 FilmFreeway library included:

APART (Australia 2021, 03:56), Alex Weight, UTS Animal Logic Academy
 DONKS (Australia 2023, 06:36), rej. Felix Colgrave
 ELEGY OF ELEPHANT (China 2022, 08:29), Lu Sijie, Communication Univerity of China
 FLUTE SOLO - IN SFUMATOSCOPE (USA 2023, 03:04), Jim Middleton, USA Central
 FORTUNE COOKIE (Taiwan 2023, 03:50), Fu Yang
 LETTER FROM A STRANGER (Iran 2023, 05:49), Shima Markazi Omidvar, University of Tehran
 MADE OF MANY PARTS (USA 2022, 02:21), rej. Grace Burns, School of Art, Humanities, and Technology, The University of Texas at Dallas
 MEAL ON THE PLATE (China 2021, 06:54), Chenglin Xie
 MORNING GLORY (China 2022, 10:26), Wang Shiheng, Communication Univerity of China
 RED FIRE (Iran 2021, 11:00), Mona A.Shahi
 THE DREAM OF 2008 (China 2022, 05:36), Hongyu Zhao, Xiamen Academy of Arts and Design, Fuzhou University
 THE PIONEERS (Canada 2021, 09:40), Simon Cottee
 THROUGH THE LOOKING GLASSES (USA 2022, 04:25), Morgan L Eng , Savannah College of Art and Design
 VOICENOTE TO MY MOTHER (India 2023, 08:38), Jashan Sehmi, Symbiosis Centre for Media and Communication
 WAY HOME (China 2022, 09:34), Lu Dirong, School of Visual Arts Design, Guangzhou Academy of Fine Arts
 WHITE HORSE (China, 2022, 07:15), Ruixuan Sun
 WINTRY MIX (USA 2023, 06:52), Christine Veras, Philip Martin

And by “Almost All” Yr Hmbl Typst Means This: Ongoing Repression of Women in Iran

Making local attendees aware that the distance between Warsaw (at peace) and Kiev (at war) is the same as between Edmore and Nashville, TN, was intended to provide perspective that places on this world don't have the luxury of distance from external threats to freedoms we take for granted, and that concerned animators are being silenced, among other voices around the world. If that animator happens to be a woman, the pressure can easily be doubled.

Fatemeh Hosseini-Shakib, PhD in Animation studies at Tehran Art University, and representing ASIFA Iran to the world, sent the following message in October as we were assembling our IAD program: *I really appreciate your supportive words and your kind message. We would emerge stronger and wiser, I hope, after the storm. Hope to meet up again in a more peaceful world.*

It came at the end of a protracted string of emails, so tracing backwards, amid words of support, messages of concern, and frustration at the inability to create effective assistance, I read that:

As the ASIFA Iran's representative I am very happy to follow the string of emails and dynamic interactions regarding the ASIFA Prize 2023.

Unfortunately ASIFA Iran has not been very active during late 2022 and most of 2023 due to the Woman, Life, Freedom movement and all that followed. And except for myself, we did not have any international membership renewals from our local members, which means we cannot vote for this year's round.

This is just a friendly note to send my regards and respect for all you do, and my hope to once again join the vibrant activities of ASIFA International, including becoming once again an active chapter with international members for 2024 and later.

As for LAD, we are having a get together on Friday afternoon of 27th of October, with screenings in a cultural venue. Not very many people have participated in LAD exchange programme, but we hope to be able to select a list of films shared on Film Freeway for our screenings, and for that we thank all other chapters who kindly shared their members' films.

Also, I thought perhaps I need to explain that I have left my academic job in the University of Art, or to be precise, I was fired after 14 years of service. In recent years there has been a silent but systematic (political) scheme of replacing independent (non-obedient) lecturers and scholars, and I am, humbly one of them. I was gradually sent off my position by being denied a permanent contract (keeping me in a never-ending tenure track) and not letting me 'upgrade' to associate professor and later stages of the scientific ladder despite my good record. The last year's political upheaval and our little raised voice in social media was not tolerated and the best excuse for them to get rid of me and some of my very learned colleagues in other departments.

Although it seems a personal matter, I believe that the international animation community needs to know about this. I know that you are not familiar with how things work in countries such as mine, and without any intention to victimize ourselves, I felt I must inform you of the whole story in a very abridged version.

As a small but hopeful and productive community we have enjoyed to be part of ASIFA International and have tried to be active and interactive in many ways and capacities and would love to continue to do so. But there are some hick-ups and burdens on our road to consistently being present and active. We are proud of our ASIFA Iran legacy founded by Dr. Zarrinkelk, and would fight to keep it and make it better.

Best to all of you, Fatemeh

President Deanna Morse has reached out to Fatemeh, as have many others in ASIFA, offering what meager support is possible from a membership that is designed to be neutral, but even as such, cannot remain mute to the suppression and systematic erosion of one's creative voice. It is a reminder for us at home to guard against any similar home-grown, encroaching suppression, as some would have us become a reflection of autocratic, theocratic regimes abroad. Sinclair Lewis warned of its evils in *It Can't Happen Here* in 1935. Like *1984* and *A Handmaid's Tale*, it rang an alarm to refrain from myopia against a pernicious dystopia, or at least the fate of our dear Fatemeh.

From Mona Shahi's *Red Fire* (2023)

Notes from October-December 2023
Links, Blinks, Winks and Other Topics of Interest

From our Iowan reporter, David Thrasher, these two website links:

Rotoscoping as a teaching technique <https://www.youtube.com/watch?v=-Y6Kkrlvzgs>

The notion here is that studying existing film and recorded movements, and training yourself to visualize your projects from what you have sketched, you can further limber up your right brain when animating. Chuck Jones once said, “We all have about 250,000 bad drawings in us.” Animation is one way to work those out of the system.

David is also working up a version of “Let’s Go Out to the Lobby,” the essential intermission break movie.

Another site has a nice description of various animation techniques, styles, and history, which is a good way to explain, essentially, that everything we see in the known megaverse (and some quantum equivalents) is *animated*!!!!

<https://www.youtube.com/watch?v=LmyRZR8MaJI>

Other coffees presented other exercises:

Michael Long wanted to let us know about *Once Within a Time* with shorts by Jess Pierce and Matt Amato coming to Webster University on December 21 (better get this newsletter out FAST!)

https://events.webster.edu/event/once_within_a_time?utm_campaign=widget&utm_medium=widget&utm_source=Webster+University%3A+Worldwide+Events

Robot Dreams - Japanese Benshi - a time when stage performers would describe and narrate silent films

<https://en.wikipedia.org/wiki/Benshi>

Here is a 40 min documentary, not animated, but moving. It’s called *The Last Repair Shop*. A shop that maintains over 80,000 musical instruments in LA. Oh my shoulders! <https://www.youtube.com/watch?v=xttrkgKXtZ4>

Ed Fella - his mountainous collection of sketchbooks. My hands cramp just opening the page:

<https://www.unframed.lacma.org/2017/10/12/words-and-drawings-sketchbooks-ed-fella>

And President Deanna found time during recuperation to check out some movies. From the director of *Loving Vincent*, a feature rendered to look like oil painted animation.

<https://www.youtube.com/watch?v=YFtflSmhsNM>

(And, by the way, there’s an opening at Bowling Green University for an animation instructor - schmear the news! Start date, August 2024 - <https://academiccareers.com/job/93367/assistant-professor-digital-arts/>)

Continuing Education Department - Building an SRT file - Fire Up That Keyboard!

- OR -

"Oh how yr hmbl typst loves to type!"

An SRT file (SubRip Subtitle file) is a commonly used file format for storing subtitles or captions that can be displayed simultaneously with a video, including MP4 files. The SRT files are text-based subtitles that identify the timing information (timestamps) and the corresponding dialogue or captions for each segment of the video. These subtitles are typically used for various purposes, such as providing translations, closed captions for the deaf or hard of hearing, or simply making the video content more accessible to a wider audience. Many festivals are now requesting them on FilmFreeway, especially those in non-English speaking areas of the world, which, surprise of surprises, is most of the planet.

The "trick" is in naming the file to match exactly with the video file name, and then giving that file a suffix of ".srt". Word processing software often "helps" with the suffix by automatically assigning it as a ".doc," ".docx," or ".wpd." As a result, yr humbl typst made use of the basic, prehistoric "notepad" in Windows, something that harkens back to the days of manually writing out html files for early websites. Yep. Notepad. Yep. There are reasons I keep my typewriters. Next I should probably unearth the morse code transmitter from my Boy Scout days.

There are other "simultaneously file" formats, but SRT is apparently the *least* complicated and most widely supported format, making it a popular choice. One shudders at the alternatives.

An example of an SRT file name typically follows a specific naming convention to ensure it is associated with a particular video file. The convention usually involves using the same base name as the video file and adding ".srt" as the file extension.

Suppose you have a video file named "Keaton.mp4." In that case, the corresponding SRT subtitle file would typically be named something like "Keaton.srt." I haven't dared to experiment, but it would seem to be a good idea to be case-sensitive aware, and use "_" for spacing.

Here's the pairing:

Video file: Keaton.mp4

SRT subtitle file: Keaton.srt

By naming the SRT file in this way, video players and software can easily recognize the relationship between the video and its subtitles, making it convenient to display the subtitles when playing the video. Evidently, digital players (Windows Media Player, VLC media player were the ones I tried this on) see both files, begin playing the mp4, and then take the paired name srt file and run it as a program.

Here's how an SRT file typically looks. You start with the name of the mp4 masterpiece, example_film, or here, Keaton. Don't start the page with anything else, don't get fancy, just type information in according to the format.

Keaton

1
00:00:05,000 --> 00:00:10,000
This is the first subtitle.

2
00:00:15,000 --> 00:00:20,000
And this is the second subtitle.

In the example above:

Each subtitle block begins with a number, indicating the order of the subtitle.

The next line contains the timing information, with the start and end timestamps. Note the use of a comma instead of a period, to indicate the time stamp. Très European. The first 00 is the hours, the second 00 is for the minutes, and the last 00 is for the seconds. If it starts at 5 ½ seconds, therefore, you would have it 00:00:05,500

The lines after that contain the actual subtitle text. Lightning strikes! Evil, ominous music! Let's Go Out to the Lobby! Boycott Grapes!!

This means you have to go through your film, stopwatch in hand, to document the start/stop range for the subtitle, and then write down what you want it to say. I hope you *really*, *REALLY* like your film.

Now once all done with this, when you have an MP4 video and an SRT subtitle file with the same filename (except for the file extension), many video players and platforms will automatically display the subtitles when you play the video. This synchronization between the video and the SRT file allows viewers to read the subtitles at the appropriate times during the video playback. It also works for telling the viewer other goodies on the soundtrack.

The value of this for international showings is that an SRT file can be given over to committee assistants ("interns") who can then rewrite the data for the particular language of the attending audience.

Public Domain Update - WOO HOO! We've Got NOISES!!
Hollywood Sound Effects Libraries Are Now Remastered and Available on the Internet Archive

Sound of "Crowd reaction in a courtroom"

These sound libraries come from three collections, in 180 file batches, that had previously been in the USC HMM Foundation Moving Image Archive: <https://archive.org/details/usc-sound-effect-archive>

The Gold and Red Libraries (Gold effects start with "G", Red with "R") consist of high-quality, *first generation copies of original nitrate optical sound effects from the 1930s & '40s created for Hollywood studios*. They were collected by a prominent sound editor who worked in the industry for 44 years. The fragile optical elements were donated to USC, and transferred to tape by USC Cinema students in the early 1970s. *The files are in the Public Domain.*

The archive wants to remind users that the files have been digitized for preservation, but they have not been restored: "You may want to use some noise reduction. Or you may embrace the noise of history." (They're being very humble here - each file sounds incredible, but they do pre-date the stereophonic theatrical experience.)

Read more about the Gold Library: <https://blog.freesound.org/?p=901>

Read more about the Red Library: <https://blog.freesound.org/?p=1064>

The Sunset Editorial (SSE) Library was also donated to USC around 1990. It includes classic effects from the 1930s into the '80s. These effects are from 35mm magnetic film. They were often several generations removed from the originals, and not as clean, so some careful restoration was done to make them more useful. SSE effects start with "S"

Read more about the Sunset Editorial Library: <https://blog.freesound.org/?p=1515/>

Example - "Machines" - https://archive.org/details/Red_Library_Machines_1

"Free" isn't necessarily "pretty," but I don't have a reel-to-reel player anymore, either!

In addition to this news, the UCSB library of cylinder and Edison recordings has tossed all of its digitized material into the public domain, and since 2022, is making them available to download and use for any purpose, without paying a fee. Again, some of the tunes aren't exactly toe-tappers, but occasionally a very nice bit of wax appears from 1915 with oh-so-much potential! (And it's FREE FREE FREE)

<https://cylinders.library.ucsb.edu/>

The Animated Adventures of Gary Schwartz, CPA
(Certified Public Animator)

The Perpetually Mobile Gary Schwartz, technically a resident of Detroit, Michigan, takes to the skies, the roads, any path less traveled, to sow seeds of animation with breathless panache. He's feeding horses in Motown one minute, then to Romania the next, finding fun in history, and history in fun. Here are a few images to prove he can stay still long enough for them to be documented for posterity...or at least until next Tuesday. Remember - life is uncertain, so eat dessert first. Heeeeeerrrr's **GARY!**

Fount Leroy's Forgotten Family Photos Project

The Musty Basement Project - November 2023

Close analog cameras tightly to prevent radiation leakage from the Rouge River messing up the image

Negative, but no negative energy allowed

See? There were horses, after all!

The moral of the story is - if you have to ask what it all means, you'll never understand. Just ride the wave and say wheeeeeeeeeeeeeeeeeeeeeee!

Chuck Wilson Explores the DIA!!

The SAS Ponders - What Is Animation? Get your dictionary ready!

Getting to Know Ourselves - Three New Members

Peaches Wilczak - Vivi Markatos - Shweta Marathe

Their Replies to the Infamous 20 Questions!

Peaches Wilczak

I have no idea which of the many animated features that permeated my childhood could be the very first one I watched, I essentially only watched animation as a youngster to the point where live action films completely disinterested me. Which is still a little true to this day...

Films I distinctly remember watching as a child and still hold dear to this day are The Last Unicorn, The Secret of NIHM, All Dogs go to Heaven, and basically all of the Studio Ghibli films. I'm lucky that my parents were big fans of fantasy.

I'm also lucky to have gone to a relatively large high school with plenty of electives, including a digital media program. My first experience with animation involved drawing images in Photoshop and compiling them in Premiere. After taking enough classes you could essentially choose your own assignments to work on and that gave me the chance to get some practice.

Now that I'm out of college, it's strange to have once again returned to a point where I don't have endless resources at my disposal. My studio space is gone so it's harder to work with physical material, I've found myself returning to my roots and working digitally. I don't have school paid fancy programs anymore but there are plenty of good free ones out there such as OpenToonz, DaVinci Resolve, and Krita, it just requires me to learn each program to regain the confidence I had before with all the expensive ones.

I do love animation, and the arts in general; I'll probably feel the drive to create for the rest of my life, but whether I incorporate it into my career for now is uncertain. I used to have high aspirations of living in a big city and founding my own studio, but I've found that studio life might not be the best for me, and my girlfriend isn't ready to move

out from our home town, so I've been exploring other avenues. Lucky for me, while in college I recently discovered a new passion from history, and while I didn't have a whole lot of time to devote to it then, I've begun studying in my own time and volunteering at the local museum. It's been fulfilling to open my life up to both art and history, though that's just another option I've been exploring, and I'm still making progress at creating a career

for myself as a freelance artist.

Whether freelance works out or not, I'll still always be animating, and I hope to continue creating art that inspires others to learn and think.

Vivi Markatos

When was your first experience watching an animated film?

I think I was about 4 years old, and I was watching the anime Umi no Triton dubbed for Greek television. I really liked the hero and his need to understand his past, and especially the way he defended his friends and his power, despite his size and age. In Greece there wasn't -and isn't- an established animation industry, but many are working at it independently. A lot of the kid's shows were imported and dubbed from across the world. I was always interested in all sorts of animations, but Umi no Triton was the one who made me think "oh, I want to do that." I told my father while he was fixing an outlet that I wanted to be an artist (because, of course, four-year-olds didn't know it was called animator).

My parents didn't disapprove at the beginning. They saw me drawing all the time, and watching cartoons, thinking this could just become a nice hobby for young Vivi. But I remained passionate about it. There was bullying at school for being weird and 'childish,' drawing everywhere I went and not 'interacting' with the other kids. So, I kept nice company with the characters and stories I created. At 12, I started collecting and alternating some drawings in my PC and in Paint. Then, I discovered there was a software called Movie Maker, and I was so excited to make my first animation at age 13!

<https://www.youtube.com/watch?v=6pMiX3PrZ7g>

My father wanted me to be a journalist, so I did work at a radio station, recordings spots for clients, being a radio presenter (even winning recognition at age 17, the first place for a cultural tribute to the international year of astronomy, under the auspices of UNESCO). I was also winning a lot of panhellenic drawing competitions. I covered some important news in my area (Delphi) where we were then living, and also went twice to the European parliament in Strasburg. With a bunch of other journalists, we were picked by a Greek politician to attend a dinner in order to write about him for the media and tell everyone how important his

position was for our country (not!). We ended up eating in one of the most expensive restaurants in Strasburg, with everything paid by his party (meaning, really, the money of the Greek people). I witnessed the face of corruption, with a lot of under-table favours and free business trips for personal reasons, which I absolutely hated. This wasn't my dream nor the lifestyle I wanted. I wanted to draw, and I wanted my audience to be the kids. Meanwhile I was finishing my degree in Theatre, which was not well received by my parents, while studying graphics in college and working at nights as a DJ to pay my expenses. I was completely drained, exhausted, and became quite ill. After graduating, I applied in the UK, to one University, to study animation. They said I had a strong portfolio, and to my complete delight, was quickly accepted, and finally felt on the right path, leaving everything behind to follow my dream. I had about 100 euros, a broken laptop, no duvets, ripped shoes and a borrowed phone. But it was a relief to finally be myself and become what my four-year-old self always wanted to be a successful and recognized artist among Greek speaking audiences, with many best-selling books and more than 100 books illustrated. I've completed three films, am finalizing a fourth, and am working on the fifth. I have also been nominated twice by the Hellenic Film Academy for best Animated Film and once at the Cannes World Film Festival. My parents, now divorced, finally accept what I do. My mom is a nurse in Athens. We two speak often now, and we understand each other much better. My father still wants me to come back to Greece, work in the family business, and settle for 'stable work and income. No thank you! At last, I am more than ok - I am Vivi!

What were your resources at the time?

I had very few resources, but I had a lot of videotapes at home, where I could watch films and study them. After an award from an Athens comic competition, and my years studying theatre, I returned to the capital of Greece where I made some friends. A very good friend I met at the competition gave me some software and also some books to study, and encouraged me to keep going. He was also a fellow artist. He suggested work in publishing by creating children books because my style was vivid and cute. I followed his suggestion because I had no one to guide me around, and because he was one of the first people, along with my grandmother, who believed in me and my art. Thanks to him and his advice I was 'saved' and successful. Thank you, Paris Charalampides, for being a great friend and human!

How did you find your first training? By books? School? Special animation-based academy? I was self-learned almost all of the time. Sporadically some books I was having, and then visiting public libraries. Animation I did only one year at my masters in the UK, where all the courses were 3d based, which wasn't my strong suit. I kept doing my own thing. I was almost failing my course, failing also in the English language and had to take extra lessons in English by a tutor in Uni in order

not to fail. I managed within a year from 42% to go to 72% and

I was selected as valedictorian for the masters' of my year.

Who was the first animator or studio you remember making an impression? Studio Ghibli. When I watched Spirited Away in Theatres. I was so fascinated, I was 13-14 years old and this fanned my flame for animation. I was quite the cinephile.

What is the first animated film you watched more than once?

Good question. If it wasn't for my sister it would be the Hunchback of Notre Dame. I felt exactly the same, a lot like Quasimodo being stuck to a prison to fit in society's expectations. I loved Esmeralda, because she was this free-spirited person who lived as an outcast but being happy as she was barefoot but proud, strong, female and surviving and doing fine by herself. No prince to her rescue, fighting for the right cause against power-hungry Frolo. I have to admit I haven't read the book but I want to do so!

Animation, and creating animation, is a school itself. I sometimes like animating straight ahead. There is an unexpected factor that can change your plans, and it helps you find new ways of interpreting something in the dialog or even a movement in the character. I find it very rewarding. Tiring, sometimes crushing, but I love it. I think even if I got a job in the animation industry, I would still like to go back and do my own thing, tell my own story. I've been working almost ten years making children books and illustrating the stories of others and although I have worked in a lot of interesting projects, bringing your own baby to life is something unparalleled. I do want to tell my own stories; I feel I have so many things to say and so many experiences to share.

If you couldn't be an animator, what career would you follow?

I don't know. There is nothing else out there that I could actually fit in. All the other things seem taken right now, and this is the only place I feel actually I can offer something or try to be good, because I love it and I want to.

And now, the most important question of all, as you hail from Greece - For whom was Plato was making an apology?

(Oh my!) So the only thing I could offer to this question is an interpretation. Plato through Socrates and vice versa talked about idealism. For Plato Socrates was an ideal man, who supported his beliefs and, despite the punishment of death, he talked with pride towards his audience about life, ethics and freedom. Although Socrates was a powerful man, and feared by many for his influence on the youth of Athens, he didn't use this power to ask for freedom from his death sentence. The fate of Socrates was 'prescribed.' He accepted it, and his last wish was that future youth would fight against what was unfair and corrupted to believe and support the good will as a way of life. What Socrates and

Plato say is, even if by trying to get rid of the wisest man in Athens, there will still be people who can see unfairness, who see the wrong, and will speak out and demonstrate, not just agree with the a system that is built to serve the few for their benefit. For Plato, the ideal society would be led by a philosopher, a philosopher who could see the whole picture, and serve everyone with equality and fairness. For Plato, Socrates was a philosopher who had all the attributes to be his ideal leader. But for this reason, and because people are greedy of power, they satisfy their ego and perform works of evil. The Apology of Socrates could be the acclamation of 'a good man,' a good citizen, and a philosopher. A person who recognises his mortality and his impact on life with morality and humility these are the virtues of life that a good man can have. Socrates, by his death, became an emblematic persona for so many generations, and a philosopher whom we still remember and revere.

U

Shweta Marathe

When was your first experience watching an animated film?
My first experience watching a film in a theatre was when I was in my mom's tummy. Haha! so I can't say for sure!]
But, I was surprised and fascinated by the medium of animation when I was in seventh / eighth grade, watching some hand-drawn Oscar nominated

animated short films on my laptop. I was amazed by how these drawings could evoke strong emotions in such a short duration, simple drawings creating the illusion of life, suspension of disbelief, the fluidity of the medium - the extensive freedom to create anything out of nothing it was pure magic!

If you remember the film, what was it?

I cannot pinpoint on one, but The Man Who Planted Trees (1987), The Old Man and the Sea (1999), Father and Daughter (2000) were among the first animated short films I saw at that time.

I must have seen The Lion King (1994), Spirit: Stallion of the Cimarron (2002) and Finding Nemo (2003). But I was too young to understand how these films were made when I saw them. I did not quite differentiate these films from Live Action Features.

They made me feel like I could tell stories through this medium. I was fascinated by the different styles in which things could be animated (almost every animated short film I saw was a completely different style, like Aleksandr Petrov was using slow-drying oil paints for animation - I used to oil paint during my seventh, eighth ninth grade vacations), the infinite possibilities of movement, and the freedom of imagination in storytelling.

When did you first think about making an animated film?

I was in the foundation year at the National Institute of Design (NID) when I first made my first animated short film. We had not been formally introduced to animation yet. I had read the book The Illusion of Life by Frank Thomas and Ollie Johnston, and watched many animated shorts and their

making of videos (also, I had switched from Engineering to Design to pursue what I'm interested in - Haha! I guess I had lost my patience to wait), so I came up with a short narrative with a simple character, made a plan and started animating on weekends and after midnight during the weekdays. (I'm very grateful to my roommate for allowing me to keep the lights on.) And later, I absorbed every animation book I could find in the college library, and watched many animated shorts and their behind-the-scenes videos. I had binge-watched almost all the Oscar-nominated animated short films since 1932, and independent animated films available online.

Aleksandr Petrov, Glen Keane, and Michaël Dudok de Wit were among my first inspirations.

Making an animated short film came first because I had been interested in drawing and art from a very young age, so the medium of animation felt more intuitive. (My sister shot a video when I was five years old on our old Camcorder of me drawing a pink sunflower.)

However, after studying Narrative Design, I like to think of filmmaking as an audio-visual medium combining moving images and sound, both mediums being part of Cinema. But, Animation will always be closer to my heart because I stumbled upon it first and fell in love.

Like most people in India, I usually watch Animated films (far less in number than Live Action films) in the theatre with friends or family (if they are interested). After the pandemic, I started going to the theatre more often, and also by myself.

What is the first animated film you watched more than once?

Wow, that's a difficult question - I have watched many animated short films more than once. (Because I like to rewatch with my friends and family and watch them react). Anna & Bella (1984) and Father and Daughter (2000) surprise me every time I rewatch.

During my first time teaching Screenwriting at a design Institute as a guest faculty, I was screening many animated short films on the projector, a student requested to replay the film Father and Daughter (2000). That was the first time I watched a film immediately after it ended - it was an intriguing experience - because the film has a Cyclic motif.

What medium did you first explore - drawing frame by frame, molding clay, stop motion, flip books?

The first time I animated was frame by frame and flipping pages - like traditional animation (while practicing to animate for my first animated short film). But then I animated the film with straight-ahead animation with soft pastels on black chart paper, erasing the previous frames to leave a trail of erased chalk drawings behind. After that, I also tried my hands at stop motion with different materials. While animating a picture book, I used hair gel to animate water droplets falling into the tub which then dance like ballerinas. I had a lot of fun exploring that medium.

Frame from "Swim"

Sharing link to that video here - Timestamp: 2:30 - 2:40 - <https://vimeo.com/382612557>

What medium do you prefer now?

The medium depends on the project, but I usually prefer hand-drawn animation on a computer, especially if the scene is complex and

requires many layers or if the film is longer in duration.

What software did you first use?

During my first animation project the animation was done on paper, and photos of each frame were clicked on a camera. Later the images transferred onto the computer, lined up, edited, and color corrected on Adobe Premiere Pro.

What formal training have you found most beneficial?

Design modules at NID, such as Color Theory, Elements of Composition, Space Form and Structure, Narrative Design, Screenwriting, Visual Scripting, and Sound Design, formed an essential foundation for animation and filmmaking, and encouraged further explorations.

Does your school coordinate festival showings of student work? How are they programmed?

Our Institute did not coordinate festival showings of student work, I had submitted my first animated short film on my own when a friend of friend from another design Institute had suggested that I send it to TISDC (a student festival in Taiwan).

But, NID has its own International Student Festival - Chitrakatha (since 2007) which happens every alternate year, and is an exciting experience to host, connect and celebrate with students and designers from around the world.

Is animation a field you find personally rewarding? If you couldn't get "a job" in animation, would you still do it on your own?

Yes, I find animation (and filmmaking as a whole) very rewarding! I love telling stories through this medium, and that's what I enjoy the most. Yes! I would certainly continue to do it on my own (In fact I don't think I want to get a job in animation, but rather make independent projects whenever I'm inspired to tell a story).

If you couldn't be an animator, what career would you follow?

I'm passionate about storytelling, so apart from being an Animator/ Animation Film Director, I have tried different roles such as Design Educator, Comic Book Author, Visual Communication Designer, Screenwriter, Editor and Assistant Director (and I enjoyed all of them, but animation has its own charm). So I would choose any other career which allows me to tell stories or help others tell their stories.

Could you incorporate animation into that career?

Yes, I would have tried to incorporate it into any career I would be doing, as I see it as a medium of expression and storytelling.

I believe it's never too late to do what you really love. There is always time.

And now, perhaps the most important question of all - how hot do you like your chutney?

VERY HOT!! Haha!! But certainly Not on a hot day.

And the Infamous 20 Questions:

1. When was your first experience watching an animated film?
2. If you remember the film, what was it?
3. Do you remember the impression it made? Were you just entertained, drawn in by the character, attracted by the sound, style, color?
4. When did you first think about making an animated film?
5. Which came first - making a film or making an animated film?
6. What were your resources at the time?
7. How did you find your first training? By books? School? Special animation-based academy?
8. Who was the first animator or studio you remember making an impression?
9. What is the theatrical experience of watching an animated film in your country? Family? Going with friends? Going on your own?
10. What is the first animated film you watched more than once?
11. Why?
12. What medium did you first explore - drawing frame by frame, molding clay, stop motion, flip books?
13. What medium do you prefer now?
14. What software did you first use?
15. What formal training have you found most beneficial?
16. Does your school coordinate festival showings of student work? How are they programmed?
17. Is animation a field you find personally rewarding? If you couldn't get "a job" in animation, would you still do it on your own?
18. If you couldn't be an animator, what career would you follow?
19. Could you incorporate animation into that career?
20. Twenty is the meatloaf question, varying with the interviewee.

Animated Events: An Afternoon at the DIA

Chuck Wilson's Perambulations Around Motown

(Original posting - 31 October 2023)

<http://smudgeanimation.blogspot.com/>

It was October. The leaves were red, orange, and gold here in Michigan.

I had handed out midterms on Friday and they started to drift in -- a number of my more diligent students finished and turned in the exam the very next day. But as we headed into the holiday season, I knew that time was going to be more precious than ever. Grading forty-three midterms, followed by grading two separate writing assignments in November and a third quiz-based assignment in December, followed by the final exam and submitting course grades lay ahead of me. Then there was International Animation Day, the Grand Rapids Comicon, Halloween, Thanksgiving, Christmas, and finally, my birthday on New Year's Eve.

I had to face the very real fact that I wouldn't get to visit the Detroit Institute of Arts until January. Not being able to visit an art museum isn't a Greek tragedy in the grand scheme of life. But considering how much I work during the week, I do enjoy getting away from it all for an afternoon of solitude, a little exercise, and some artistic inspiration. Recharges the internal batteries and all that.

So, with the weekend open, a friend and I drove down to Detroit for a good lunch and an afternoon of cultural enrichment. After we finished up at the DIA Café, Jon and I went our separate ways. He wanted to visit the DIA's library and do some research. I wanted to drift and look at some familiar pieces of art--see what was still there and what had been changed since my last visit. I was not disappointed.

The first stop was the "hall of puppetry". The exhibit had been swapped out since my last visit. Some of the puppets I had seen before, but this

Hanuman, early 1900's
Unknown artist

time there was an interesting note in one of the placards dealing with the puppeteer making a puppet transition from one size to another during the performance and it explained a little technique. When I think about how Lotte Reiniger made transitions in direction or movement on the z-plane, how the Indian puppeteers handled the same issue was very thought provoking. Worth some further research... and testing... and I wondered how I could integrate that information into my lecture on the history of puppets... or the assignment on Lotte Reiniger.

Then it was off to the "hall of Chinese paintings". There's just something about observing the complexity of the simple designs seen in both the layout and the brush strokes combined with a skillful use of the 'white of the paper' that I find so appealing. I once heard that during Mao's "Cultural Revolution" the communists tried to destroy China's history. How many priceless works of art and literature that represent the great history of the Chinese people are gone forever? Course, for that matter, how many were destroyed during World War II? Or when Rome fell... or Constantinople...?

Painting from an Album of Landscapes
after Old Masters, 1619
Shen Shichong

Fruit Piece, 1849
Robert Seldon Duncanson

Having no plan in particular, nor any special exhibits to visit, I walked upstairs and revisited some artwork that I'd seen many times before. This time though, feeling no rush to be anywhere or do anything, I sat there and tried to observe the paintings with new eyes and from different angles. My patience was rewarded as I noticed details in the paint/brushstrokes on the pineapple in Duncanson's "Fruit Piece", details meant to simulate light and shadow and reveal texture. Then there were the speckles on the strawberries, obviously meant to represent seeds--or the individual painted drupelets that made up the raspberries. So many small details that make up a greater whole.

Before I left the museum proper, I had to take some more photographs of the 'Veiled Lady'. Still breathtaking... not just the ability to make marble look transparent, but also the folds in the fabric and the detail on the woman's clothing.

The Veiled Lady, 1872
Giovanni Maria Benzoni

It really makes me wonder how long it took Giovanni Benzoni to learn and master the skills necessary to create such a statue.

Feeling a little tired by this point, I had a light dessert at the Kresge Court and did some reading. I've been jotting down notes about a fantasy setting that's been on my mind for the better part of five years--writing from the first-person perspective like Bram Stoker wrote *Dracula*, as if I was writing a travelogue of my experiences while I wander through a strange and wondrous land. I honestly don't think that it's something that I'd ever publish. It's more the act of creation and having something special for me to read and

reread that I'm enjoying. A roommate of mine once wrote several novels in the time we lived together. They were all set in the universe of a game we played and from the perspective of the main character and the mercenary unit that my friend played. One day I asked him if he was ever going to submit them for publication, after all, he had been a playtester for the game, he knew the right people to talk to. But he said 'no'. Writing these stories was something that he did for himself. I didn't understand it then, but all these years later, I think I get it now. Sometimes the story is so personal that you want to keep it all to yourself rather than put it out there, be it published as official canon or as fan fiction. Jeff was right: sometimes it's all about 'creating art just for the sake of creating art'.

Analytical and Articulatory Animation Analyses

An Appendix to ASIFA Central Newsletter Series - December 2023

Defining Animation

From a Series of Recent SAS Emails

Alex Dudok de Wit began the discussion:

What is animation? I'm looking first of all for definitions of the medium that you find convincing, and which are as up to date as possible, taking into account the latest technological developments. And secondly, I'd be keen to read anything that traces the evolution of how animation has been defined across the decades – things in the vein of this (but ideally more recent): <http://www.denslow.com/articles/whatis.html>

From Alan Cholodenko, University of Sydney

First, unlike the majority of those who write on animation, for me animation is not only an art. And it is not only the life and motion of a genre of film, of cinema, of film 'as such'. It is far more. It is *idea*, concept, process, performance, medium and milieu; and it invests all arts, media and communications (in other words, all arts, media and communications are forms of animation). It invests all sciences and technologies. It invests all disciplines, knowledge, fields, practices (including the history of ideas, the history of philosophy). It invests all relationships (of whatever kind: personal, social, national, sexual, etc.). It invests all life and movement, as it invests all thought. It invests not only the subject, it invests the world, the universe itself. That's why it is more than only a human practice. It is a process, performance, medium and milieu of world, of universe. What might be called the at once 'squash and stretch', elastic, plastic, animated – indeed *animatic* – nature of 'all.' It is not only the human that is at stake in animation, it is the world, the universe - everything what could be called reality 'as such.'

U

From Andy Buchanan

I'm adding a link to a paper of mine specifically on questions relating to real-time animation. In this paper I don't attempt a definition exactly, but make a distinction between real-time and linear time animation based on philosophies of time.

The paper

https://intellectdiscover.com/docserver/fulltext/ta/16/1/ear.16.1.53_1.pdf?expires=1702432618&id=id&accname=guest&checksum=2F1273CE31DCCD39BE7A8065BB518BEF

U

From Greg Langner

My research and practice, which is rooted in live/experimental theatre and dance, investigates the many myriad modes of performance and expressive technologies (and other prosthetics) that capture that quality and vibrancy of cartoon animation in both real-time and "real-space" at once. In other words, I study (and stage) how and why cartoons appear to come to life through phenomena of *cartoon corporeality*. As others have said, attending to the original question, as animation was born of many other mediums - not only preceding technologies like zoetropes and magic lanterns, but also much older forms of live performance like light/shadow puppet theatre – animation must be understood beyond its cinematic connotations.

Animation is an amalgamation of conceptual qualities exemplifying the fluidity, plasticity, and imaginative potential of human life. In that animation is inextricable from the physical actions that produce it, animation as both medium and process is inextricable from liveness. Applying Karen Barad's theory of *agential realism* helps in discussing the relationship between the animated and the physical, whereas Mikhail Bakhtin's theories of *dialogism* and the *carnavalesque* help clarify the relationship between animated subjects and human liveness. Happy to share the original study (also easy to search), though hopefully the published, shorter article version will be available in the near future.

U

From Hugo Glover

As this fascinating thread has ricocheted into zoetropes I would like to add one to Jim's comprehensive tally - <https://vimeo.com/354272015>

This was the last of four institutions of this flame powered zoetrope for my PhD, in this case using twelve frames from Jankovics 1974 *Sisyphus* film. 200

I have sidestepped *defining* animation in preference to *understanding* animation through *making*. Action research - a cycle of planing, making and reflecting, was a useful method for me - so theory is always in conversation with practice. I found Kentridge's articulations of his studio practice (<https://www.hup.harvard.edu/books/9780674365803>) an entanglement of time, technology, embodiment and play) some of the most useful insights.

Interested to see what comes next.

From Jim Le Fevre www.jimlefevre.com

Oooh, if it's real time animation then that's somewhere where I do a bit of stuff in.

I do a lot of things with the Phonotrope - <https://www.jimlefevre.com/the-phonotrope>, that relatively recent practise, that has connections with (previously mentioned) Gregory Barsamian's <https://gregorybarsamian.com/> zoetrope work and also Eric Dyer's <https://www.ericdyer.com/> phenomenal experiments. Here's a couple of off-shoots that I did on the process -

Crafts Council

<https://www.jimlefevre.com/crafts-council-phonotrope> and

SBTRKT

<https://www.jimlefevre.com/sbtrkt-zoetrope>.

It also makes for great workshops - <https://vimeo.com/847896485> - with people who have little to no experience in animation.

There's a great audio visual duo called *Sculpture* <https://plasticinfinite.com> (Reuben Sutherland and Dan Hayhurst) whose events are totally about exploring and experimenting with that and burs the line of *where we stand* with relation to animation.

And, slightly tangentially to the zoetrope based things is the glorious Sam Meech, <http://portfolio.smeech.co.uk/knit-rgb-synth/> who incorporates knitting machines to generate jacquard like frames as animation.

We all did a great evening at Flatpack around 2009

<https://flatpackfestival.org.uk/past-festivals/flatpack-3> which was entirely a live event.

On the other side of the intersection of the Venn diagram of animation and real-time is Nic Rawling and his Paper Cinema <http://thepapercinema.com/> which is slightly more rooted in illustration as performance as well as I recently stumbled across Kid Koala's performances

<https://www.youtube.com/watch?v=HFOImWFUL7k>

both of which tip toe into theatre.

Finally there was a fun thing I developed called *Frames* <https://www.jimlefevre.com/frames-interactive> which tip toes into games a little bit, but is no less rooted in animation. Again, to me, it's about where the audience stands in relation to the presentation of animation.

I'm not 100% how helpful this is as I'm not putting forward any definitions but they might be interesting things to put into your pipe and smoke!

From Suzanne Buchan suzanne.buchan@rca.ac.uk,
Royal College of Art

Throwing in my two cents' worth there.

Denslow was writing when the digital paradigm shift was underway (flying cameras, labour concerns about vactors, etc). In the meantime CGI has attained the 'holy grail' of realistic digital perfection.

Most of Denslow's many questions can be answered with 'yes'. While I'm not a friend of dictionary definitions, the last phrase of his second sentence cited here is spot on, and refers to the artist/creator as much as the audience wanting to experience it:

*To turn to Webster again, compulsion is defined as: "an irresistible impulse to perform an irrational act." This could also serve as a definition of animation, *for what is animation if not the desire to make real that which exists in the imagination?*

When working with students or a wider public, I tend to rather prosaically propose there are two basic forms or modes of animation: the animation we are *supposed* to see (that most of a non-specialised public regard as *animation*) and the animation we are *not supposed to see* (viz Christopher Nolan's collapsing cities in *Inception*, etc).

A good article on concerns around the latter by an artist, and what it may do to our experience of nature, is Johnny Hardstaff's *The Impossibly Real – Greenbelting the Imaginary* (ANM 6.2 2011): <https://urldefense.com/v3/https://journals.sagepub.com/doi/abs/10.1177/1746847707078279> ;!!IBzWLU!Q-4BmmSCA5V5WYmKJhmZ729IXWSy2pw5PyuhukPP_Gc7PD7aKr9IXDhfTCzv4KdILaM5j33yESZ1VakEwSak_8sK82fu29nQj9XWEgc\$

In terms of what it is *not* (Denslow's reference to ASIFA's *not live action*). I would insist that animation is NOT a medium, it is rather a form.

The reason should be obvious: in pre-digital cinema, it shares the photochemical medium of analog film stock, and now more often the digital artefacts

digital image making (time-based or otherwise). Installations take the form even further, like Rose Bond's architectural

installations, documentation of one here:

[https://urldefense.com/v3/https://vimeo.com/45319050?login=true;!!IBzWLU!Q-4BmmSCA5V5WyMkJhmZ729IXWSy2pw5PyuhukPP_Gc7PD7aKr9IXDhfTCzv4KdILaM5j33yESZ1VakEwSak_8sK82fu29nQFoARxBY\\$](https://urldefense.com/v3/https://vimeo.com/45319050?login=true;!!IBzWLU!Q-4BmmSCA5V5WyMkJhmZ729IXWSy2pw5PyuhukPP_Gc7PD7aKr9IXDhfTCzv4KdILaM5j33yESZ1VakEwSak_8sK82fu29nQFoARxBY$)

And extracinematic works like Gregory Barsamian's film-less stroboscopic sculptures:

UjmRA://urldefense.com/v3/https://gregorybarsamian.com/;!!IBzWLU!Q-4BmmSCA5V5WyMkJhmZ729IXWSy2pw5PyuhukPP_Gc7PD7aKr9IXDhfTCzv4KdILaM5j33yESZ1VakEwSak_8sK82fu29nQN6UJmRAS

And the technology behind it:

[https://urldefense.com/v3/https://journals.sagepub.com/doi/abs/10.1177/1746847708096730;!!IBzWLU!Q-4BmmSCA5V5WyMkJhmZ729IXWSy2pw5PyuhukPP_Gc7PD7aKr9IXDhfTCzv4KdILaM5j33yESZ1VakEwSak_8sK82fu29nQ_SWgF2g\\$](https://urldefense.com/v3/https://journals.sagepub.com/doi/abs/10.1177/1746847708096730;!!IBzWLU!Q-4BmmSCA5V5WyMkJhmZ729IXWSy2pw5PyuhukPP_Gc7PD7aKr9IXDhfTCzv4KdILaM5j33yESZ1VakEwSak_8sK82fu29nQ_SWgF2g$)

Or Brand's MASSTRANSISCOPE take it into even more interesting non-cinematic, non-frame-by-frame, or non-screen-based expanded areas. And there are, of course, many more.

Some of the more interesting discussions - not attempts at definitions, which I regard as unproductive - are found in Edwin Carel's writings and curatorial projects:

[T]he development of animation as an artistic practice actually precedes the cinema by at least three centuries, starting with the magic lantern. From its origins, animation can be understood both as a method (a technology) and as a metaphor (a strategy for provoking interpretation).

– Edwin Carels, *Spaces of Wonder. Animation and Museology*, in *Pervasive Animation* 2012, 292-3)

He's also described it as *a state of mind*: see his brilliant curated 2007 Borderline Behaviour exhibition: [https://urldefense.com/v3/https://www.tentrotterdam.nl/en/tentoonstelling/20070125_borderline_behaviour/;!!IBzWLU!Q-4BmmSCA5V5WyMkJhmZ729IXWSy2pw5PyuhukPP_Gc7PD7aKr9IXDhfTCzv4KdILaM5j33yESZ1VakEwSak_8sK82fu29nQ2jh4UmQ\\$](https://urldefense.com/v3/https://www.tentrotterdam.nl/en/tentoonstelling/20070125_borderline_behaviour/;!!IBzWLU!Q-4BmmSCA5V5WyMkJhmZ729IXWSy2pw5PyuhukPP_Gc7PD7aKr9IXDhfTCzv4KdILaM5j33yESZ1VakEwSak_8sK82fu29nQ2jh4UmQ$)

Edwin gave a talk on this at the 2007 *Tate Modern Pervasive Animation Conference* (Abstract below):

Borderline Behaviour – Drawn towards Animation Ever since animation pioneer Émile Cohl made his debut, many artists have been hard to situate in the

interval between live action and animation, between animation and the visual arts, between animation and graphic design. This talk presents some notes on an expanded notion of animation as a state of mind, a strategic approach to both technology and to the imaginary.

So, ultimately no answer to Alex's question or to Denslows'!

From Malcolm Cook

This is something of a contentious matter! Long-standing members will recall the 'definition wars' of 2008 on the old Yahoo group, and some may still be nursing wounds and grievances...

I think a good place to start is Donald Crafton's article *The Veiled Genealogies of Animation and Cinema* (indeed, the whole of that special issue of *Animation: An Interdisciplinary Journal* is excellent and worth reading)

<https://journals.sagepub.com/doi/10.1177/1746847711404979>

From Sam Gurry:

This is a bit flippant of a response, I mean it's a meme, but dang if I don't like this. It's all animation!

From *24memespersecond*

<https://www.instagram.com/24memespersecond/?hl=en>

From Jean Detheux:

For quite some time now, working in real time has become my main interest, so much so that even my studio work is treated as if in a live images - music concert.

I've written a fair bit on the subject, but I am much more interested in the *doing* than in the *talking about the doing*.

Today (Dec 11) happens to be the 5th anniversary of the event dearest to me:

<https://vimeo.com/311672590>

And here are videos of some of the concerts I have participated in: <https://vimeo.com/showcase/3659581> My focus is on "experiential 'abstract' animation," very different from "experimental."

(The conversation continues as of 14 December 2023, when this selection was assembled. Further notes will be shared in upcoming newsletters! - yrhmbtypst)

ASIFA Central Celebrates Its First SEMI- CENTURY!

WITH A BOOK, NO LESS
but wait - there's MORE!

THE MEMBERSHIP IS THE STAR OF THIS PROJECT!

ASIFA Central has built its existence on the foundation of the creativity and industry of its members, in times both lush and lean, in the limitless love for the art of animation. It's time to toot some horns and pop some corn.

Here's the plan, and you don't even have to take notes, because, well, you're looking at the notes right here! How convenient! How 21st century!

Here's the "General Idea"

Intro - ASIFA International President (Deanna)

Intro - ASIFA Central President (Julie)

The sections -

Ups and Downs of three generations of animation

The organizational structure/origins of ASIFA

History and founding of ASIFA Central

Tributes to members who have passed

IAD - ASIFA Central contributions over the years - posters, frame grabs,

KAFI festivals

AWG programs and films

Review of Retreats over the past 50 year, ie: Starved Rock, Chicago, St Louis,
Grand Rapids, Virtual ZOOMies

"Best of Coffee Breaks" with Michael Long

**Membership Boast and Brag section - we'll be offering two or more
pages of text and photos for each member, highlighting independent
artists!**

For example:

- Bri Yarhouse and high school student education in animation
- Tracy Miller-Robins and free film festival blog
- Chuck Wilson - forensic animation, Women in Animation programming, blog
- Gretchen Vinnedge and GR's Community Media Center

And YOUR opportunity to BOAST AND BRAG!!! This is a Publish or Perish society!

“Best of” the newsletter archive - notable articles/pages (with month/year noted) throughout

Winsor McCay review - he walked the streets of Edmore Michigan!

A mouth-watering sampling from *The Bibliography*!

Challenges for the years ahead - ie, creating networks promoting enhanced educational opportunities, both for training and the trainers!

An Index - it may even be accurate!

The “core publishing magnates” met Sunday afternoon (January 21) to toss around ideas.

A CALL TO GREATNESS!

Our goal is a 120-150 page celebration book, available in print form via Amazon, with free pdfs for members on our website and archive.org. The print copy will be made available at the “print cost” to those interested, to reduce overhead and inventory stocking.

The deadline for submissions will be 15 August 2024. Submissions after that will have to wait for a “second edition.”

The expected “roll-out” of the project will be in mid-October, to coincide with IAD ‘24.

If you are “wondering what you should talk about,” consider answering some of the following questions, make up some of your own, and submit to *yr hmb! typst* along with **How You Want To Be Remembered Forever AND EVER** with copious pictures of yourself or your work, or your work AND yourself!

The Sinister All-Invasive QUESTIONS in QUESTION can include:

1. When was your first experience watching an animated film?
2. If you remember the film, what was it?
3. Do you remember the impression it made? Were you just entertained, drawn in by the character, attracted by the sound, style, color?
4. When did you first think about making an animated film?
5. Which came first - making a film or making an animated film?
6. What were your resources at the time?
7. How did you find your first training? By books? School? Special animation-based academy?

8. Who was the first animator or studio you remember making an impression?
9. What is the theatrical experience of watching an animated film in your country? Family? Going with friends? Going on your own?
10. What is the first animated film you watched more than once?
11. Why?
12. What medium did you first explore - drawing frame by frame, molding clay, stop motion, flip books?
13. What medium do you prefer now?
14. What software did you first use?
15. What formal training have you found most beneficial?
16. Does your school coordinate festival showings of student work? How are they programmed?
17. Is animation a field you find personally rewarding? If you couldn't get "a job" in animation, would you still do it on your own?
18. If you couldn't be an animator, what career would you follow?
19. Could you incorporate animation into that career?
20. Do NOT, and we repeat, DO NOT provide your mother's maiden name or the last four digits of your social security number!!!!

You'll be getting updates and more annoying reminders to participate as the weeks and months progress. Don't experience grievous FOMO! Time to get all shiny!!!

Coffee Breaks Abounding!

The January 4th assembly of international animators had some of the membership rising, literally, to the occasion - it was 5am in Mumbai! *Wolf Children*, *Robot Dreams*, and *Letter to a Pig* were added to everyone's "must see" list for 2024, as was *The Boy and the Heron*, the latest farewell film by Hayao Miyazaki, now 83 years young and perpetually dazzling. The year may well be a collection of "very good things happening to very bad movies," to judge from some of the blanket distribution choices at theatres, or resurrections of films streamed during the pandemic for a second life on a shared big screen.

International distribution systems are also wildly variable - the emerging animation industry in Greece is finding its niche with *The Knight's Hart* and Denmark is underwriting projects with its Animation Workshops scheduled throughout the coming year.

Independent productions continue to struggle with completion - the anxiety from hearing "I'm still waiting on..." (insert production step here) is palpable.

Deanna Morse is re-working her website, everyone is more than somewhat frustrated by the file update process of the IMDb, and one of Michael Long's students gave him a plastic gorilla.

The February 1st caffeinated coordination fell within days of the centennial of Gershwin's *Rhapsody In Blue* performance at Aeolian Hall, making its first acoustic recording from a few weeks later one of the latest entries into the amazing world of the Public Domain. The west coast was experiencing *atmospheric rivers* ("how's the fishing there?") and Carlos Rosas held the record for a commute to work (but his trips to CalArts from LA gave him lots of practice).

AI entered the discussion as a probable challenge but, nonetheless, a helpful tool for a solitary producer needing a variety of inspirational sketches and designs

quickly, and the softwares *Glaze* and *Nightshade* can poison a digital creation from being absorbed by the borg of artificial intelligence.

January 2024 - Animators in search of a warm place to talk: Jim, Mike, Deanna, Gretchen, David, Orrin, Vivi, Chris and Shweta

As things in this technological quagmire evolve, there was a consensus among experienced creators that, “We don’t know what’s right, but we know what’s wrong,” with the added observation that “we can be outlaws” at times (Chat GPT later announced the release of its AI *Sora*, which will create text-to-image animation with reportedly simple statements).

Deanna Morse indicated that her attendance at the upcoming Academy Awards is unlikely, but she *will* be among the judges at this year’s Ann Arbor Film Festival.

Signe Bauman’s Ann Arbor Showing of “My Love Affair With Marriage”

Gary Schwartz emerged on the Zoom screen, near the end of the February coffee discussion, to share his experiences with the recent Ann Arbor showing of *My Love Affair With Marriage*, a multiple-layers-of-labor-of-love feature by Signe Bauman, nine years in the making. It has been getting a roadshow distribution across the country. Gary came away from the experience electrified, inspired, and infected with CoVid. “What do you expect - I was in a packed theatre surrounded by college students.”

Signe Bauman in Ann Arbor - Jan 2024

“My Love Affair With Marriage”

Buster Keaton: Home - First Festival Showing in Toronto

Another film with a protracted production, Jim Schaub's *Buster Keaton: Home* will

be having its festival premiere on April 11 at the Toronto International Film Festival, "one of the most prestigious and largest publicly attended film festivals in the world, founded in 1976." It operates out of the TIFF Lightbox Cultural Centre, in downtown Toronto.

The documentary covers the teen years of Buster Keaton in Muskegon, Michigan, with recollections by Muskegon historians, Keaton family members, and actors Carl Reiner and James Karen. Some newsletter editor in Edmore Michigan provided the animation. The film's trailer is at -

<http://www.busterkeatonhome.com/sneak-peek/> and the animated bits are still cluttering up Vimeo at - <https://vimeo.com/796085457>

Celebrating Valentine's Day

ASIFA Central Secretary Jim Middleton was given an assignment from family social coordinator Sparrow to build a Valentine's

Greeting for all her favorite humans - the result is two minutes you'll never get back:

<https://vimeo.com/911926044>

David Lynch is 78 - he started with short films featuring animation, imagine that!

The Alphabet (1968) -

https://www.youtube.com/watch?v=oJ_t1eOAipo

The phenomenon called ERASERHEAD

Public Domain Day Update

(notes

from a January 25th 2024 live presentation hosted by the Internet Archive)

In 2024, films from 1928 besides *Steamboat Willie* will be entering the public domain, and by year's end, all recordings from 1924 will be officially in the public domain (get out those first acoustic records of Gershwin's *Rhapsody in Blue* and go crazy). This means the *silent* version of MM's *Plane Crazy* is at your disposal, but frankly, let The Mouse Snooze at this point. *I Want to be Bad* from *Playin' Through* joins its sister melody *Button Up Your Overcoat* in the list, so it's time to get playful.

AI is a legal challenge still, for who owns the copyright on the created image - the text prompt creator or the software developer? Currently ownership leans toward the person with the paws on the keyboard, provided it is a person at the keyboard. It is strongly recommended to read any fine print when developing visual assets in using otherwise "free" software.

(Postscript: A use of public domain material - early recordings, outcast sound beds from RKO collections, Library of Congress images, stuff the cat dragged in, can be witnessed in *Political Asylum* from yr humbl typst - another 230 seconds you'll never get back

<https://vimeo.com/856397514>)

Notes from Animator's Education Forum and Accelerate Sessions - January, 2024

Tim Jones of the University of Colorado and Andrew Ames, currently in Pittsburgh, shared their experiences of building an animation program in the far-off-main campus basement lab that had once served as a prep room for the adjunct faculty. Hence, a main take-away from their discussion was - *The space is Important! The space must be accessible! The space is for exploration!*

However, a remote space does provide a certain level of autonomy from peering eyes and probing

inquiries. Their program was so remote, in fact, that one had to be enrolled in the production course to even discover that there *was* an animation lab. They enjoyed the luxury of “Benign Neglect” as a result, akin to the inhabitants of Termite Terrace at Warner’s during their Golden Age.

Students created and developed legacy material, researching and building artifacts that outlined how to animate with Legos, the use of iPhones vs DragonFrame, how broken parts of old action figures can be more interesting to use than the proscribed Legos...with a foundational approach of “first, do no harm.” (ðöäëÝáéí Þ ì< äëÜððääéí - since this is referencing an academic environment).

Final “Best Practices” from this Animator’s Education Forum can be summed up thusly:

- make the animation lab accessible and expandable
- embrace non-animator students - the Colorado program included nursing students and those enrolled in curricula in sore need of creative, expressive outlets
- don’t be “gear snobs” – the tools don’t make the *animator* (a head’s up to AI)
- failures happen - embrace and share them!
- do things in small pieces
- prolong the “institutional memory”
- don’t chase waterfalls - develop *agile methodologies*
- *listen to the students; they’ll keep you current!!*

Besides yr humbl typst, those in attendance included animators from *Little Mermaid*, *Fergully*; educators from CalArts, the Netherlands, and San Jose.

Birgitta Hosea, of *Bloomsbury Encyclopedia of Animation Studies*, (www.birgittahosea.co.uk - and PLEASE check out her site if only for the

index page) moderated the *Accelerate Sessions* that sprang forth on January 21, which became an inspirational study on how to integrate animation with a live performance – **and** how to make both aspects of the stage event appear to be improvised. This is not an easy concept for animators to embrace, since several thousand drawings, filmed in a proscribed sequence, seem unlikely as an improvisational medium.

“Live performance allows for an ephemeral, reciprocal experience of the audience’s gaze.”

- a random voice recorded in yr humbl typst’s notebook

The spectrum of interactive performances extended to its origins in panoramas of the 18th and 19th centuries to the newer installations with names like “Effervescent Shadow Bazaar,” the multi-projection “Eventual Horizon,” fore-and-aft-illumination for “The Road With Trees,” triptychs inspired by Emily Dickinson, moving scrolls, shadow plays, scalloped diorama screens, organic construction of staged, visual masks, and the human body as a screen.

The participants described their performances as “jazz riffing,” an audio-visual collaboration, and finding joy within class activities that can be scaled to proportionally larger venues.

Their consensus was that with any such project, knowing the space before creating the performance is essential.

It was a breathless, robust 75 minutes with Rose Bond, Johannes DeYoung, and Miwa Matreyek. Their complete bios, with links to projects, is at

<https://animateprojects.org/acceleratesessionlive/>

Walk Cycle (2021) - Birgitta Hosea

AWG, ASA and More Updates
from Deanna Morse
President, ASIFA International

Educators have their own teaching approaches... our method combined ideas from 10 year old girls with our teacher-filmmaker ideas in a positive way. First, I need to say, we are part of an international initiative, where kids around the world make animations based on a common theme. This year, our theme was *Be Who You Want To Be*. That was why we organized this workshop.

We only had the kids for four hours. We introduced each other, and then started by brainstorming - kids made lists of who they want to be, what they are now, what they remember fondly from the past. Then we made color mood collages, tearing colors from magazines. Then each girl created a watercolor background inspired by their brainstorming, one each, and created the dolls.

The next session, we created a modest film storyboard from their brainstorming and backgrounds, which we discussed with the girls. We brought in props based on their brainstorming. They had some great ideas for improving the structure, which we incorporated.

Then, we shot the animation, and used the mood collages to create their name dots, and although we had a few more ideas for painstakingly slow frame by frame under the camera animation, we took a big break and played outside! Hey, it was a sunny day, and these are 10 year old girls!

Then, Jane (Flint) and I spent another two days editing the footage into this two-minute little hit of happiness. The girls love it. We do too. I think it captures a moment in time of the life of 10 years olds...

Here it is! -

<https://vimeo.com/manage/videos/913789793>

BUT WAIT!
THERE's MORE
from our International President!

Hi, ASIFA/Central friends -
First of all, I am going to Ann Arbor to be on the jury this year, and I will be screening my films on Wednesday March 27, 1 PM, Michigan Theater, free screening. I am calling it "Move-Click-Move."

Second, there is a new-ish initiative from ASIFA – the extended deadline is April 4 -- for an outstanding student film, with a \$1500 award.

(The material is attached to this newsletter)

Perhaps you have some student work to enter or offer?

***From Anastasia Dimitra, program coordinator,
ASIFA Student Award (ASA):***

Hello, ASIFA Chapters – I kindly ask you to contribute to the *ASIFA Student Awards*, by:

(1) Sending student short animation films (length up to 10 minutes). We must have the director's written permission to include the films in a screening program from your country. The compilation will be shown around. (The written permission form is also attached to this

newsletter).

(2) Proposing a local festival that will cooperate with ASIFA to host the awards

The aim of this project is to encourage and support student creativity, geared for all students, even those who are not eligible to be members of ASIFA. This will promote awareness about the association. ASIFA should arrange events at Universities (art and animation faculties) and animation festivals in collaboration with local ASIFA chapters to promote ASA.

The selection committee and jury will be announced soon, as well as which festival shall be willing to host the ASA.

Competition guidelines

The directors can use any animation techniques they wish with aesthetical elements that characterize animation art, with an eye toward the future.

Entries must be student short films created or published after January 1, 2022.

Chapters may promote up to five student films.

No registration fee is required.

After completing the entry forms (attached), please submit them for consideration to:

anadimitral@gmail.com

Submission deadline: April 4, 2024

The submitted films shall be available to all chapters for one year period of screenings.

All directors need to sign a contract (attached) with ASIFA that after the competition for the period of one year, ASIFA may use the films for screenings. ASIFA would send screening reports to all directors.

The ASA trophy is €/\$1,500 - and €/\$500 for the winner travel expenses.

(Again, the forms will be at the end of this newsletter as an attachment, and in the newsletter archive for February 2024)

Update from the West Coast: The Annie Awards 2024

from the ASIFA-SF newsletter - editor, Karl Cohen

Across the Spider-Verse

Spider-Man: Across the Spider-Verse wins best commercial feature and *Robot Dreams* wins best independent feature at the Annie Awards. You can see the entire three-hour award ceremony online at <https://annieawards.org/winners>

Spider-Man: Across the Spider-Verse was the biggest winner, both in applause and for winning all seven nominated categories (best commercial feature, FX, character design, direction, music, production design, and editorial).

Robot Dreams won best independent feature, and *War is Over!*, inspired by the music of John and Yoko was the best independent short. It also just won Spain's Goya Award for Best Animated Feature.

Robot Dreams

Hayao Miyazaki's *The Boy and the Heron* earned Annies for character animation and Miyazaki's storyboarding. It has won most of the critics' awards. It also just won the Best Animated feature at the BAFTA ceremony in the UK

ANNIE AWARDS 2024 (continued)

Nimona had nine Annie nominations and it won for voice acting and writing.

Three honorary Winsor McCay Awards were given. They went to legendary animator and director Charlotte “Lotte” Reiniger (posthumously), Studio Ghibli composer Joe Hisaishi; and National Film Board animator and producer Marcy Page.

The Ub Iwerks Award for technical advancement was awarded posthumously to John Oxberry for his developing and producing the Oxberry animation stand that was used for many decades to shoot cell animation.

Monthly Stats at the ASIFA.org Website

January 2024 - Visits 185, Views 300, and *TWO LIKES!* *A new website RECORD!*

Membership Renewal Notices

They’ll be going out this month, too, for applicable members. Woo! With the upcoming 50th anniversary celebration of ASIFA Central, and with membership getting all the self-promotional space it would like in that published celebration, perhaps a membership will be helpful in maintaining an Eternal Presence In Print (digital or otherwise) for the aeons to come.

Draft History of ASIFA and ASIFA Central for 50th Anniversary Celebration Book

(ok, so we’re a few months ahead! The next several iterations of this newsletter will contain “draft” versions of several sections for members to review and suggest edits. This will be the prelude to the Big Hoo-Ha Final Layout, at which point Yr Hmbl Typst will be in an undisclosed location, with soundproof walls, and little contact with the outside world...)

On ASIFA International - ASIFA International – A short history (info source: ASIFA.net)

ASIFA (Association Internationale du Film d'Animation) was founded in 1960 in Annecy, France. Renowned Canadian animator Norman McLaren (*Neighbors*, et al) was elected its first president. McLaren, John Halas and other founding members envisioned a world of peace and dialogue to settle international differences, with the art of animation serving as a bridge between different cultures and ideologies.

"Animation is not a religion; neither is it a political movement in any sense. It remains a true contemporary art form which has been unrecognized for what it can achieve... we consider animation as a universal expression which is capable of immense contribution if given a chance." /

– John Halas, President's Letter (1979)

Working with UNESCO, ASIFA strives to unite the animation world in peace by trying to find ways for animators to meet in person, originally from both sides of the Iron Curtain.

The main goal of ASIFA is to share animation films and develop lasting international friendships. Technology is instrumental in creating at-distance links more immediate, with the potential for instantaneous exchange of ideas.

"I was sometimes asked to help out at international board meetings, sometimes taking minutes, sometimes (inexpertly) interpreting, and thus witnessing Cold War relationships up close. Despite mutual suspicion and frequent high drama, agreements were slowly thrashed out, film exchanges, visiting delegations and new festivals organized."

– Clare Kitson, ASIFA Member and second recipient of the Lotte Reiniger Achievement Award (2018)

The development of the ASIFA-China group in 1984 opened Chinese animation to the world and encouraged the Shanghai Animation Festival. Other chapters soon followed in Iran, South Korea, India, and Egypt, expanding the global reach of ASIFA. Recently, ASIFA has welcomed new chapters in Germany, Thailand, China-Xiamen and Lithuania. Now, with more than 40 chapters worldwide, this spirit of peace, love and tolerance continues to guide ASIFA.

"Sharing a common interest with a friend on the other side of the world will build bridges to a far-off community and give you the ability to talk through ideas and work together with someone who may have a completely different perspective on life. ASIFA wants you to find that friend and form the bonds that build strong communities within a global society."

– Ed Desroches,, ASIFA Colorado, and former ASIFA International President

ASIFA Target Goals:

ASIFA promotes opportunities for professionals in animation to share information and network globally through our publications and public communications.

ASIFA is concerned with sustaining and preserving the rights of animators and the art of animation by promoting, educating, cooperating, and assisting others.

ASIFA promotes progress toward peace and mutual understanding through the unified interest of the art of animation with workshops, gatherings, and worldwide projects.

ASIFA pursues these goals through a variety of activities both internationally and through local chapters.

ASIFA Central is proud to be among those worldwide chapters, and in 2024, is thrilled to note that member Deanna Morse is the current president of ASIFA International.

On ASIFA Central

(draft text, based on earlier histories with some updates)

ASIFA-Central was founded in Chicago in 1975 as an association of professional, independent, and student animators and has since expanded to encompass a larger regional area, becoming the Midwest USA Animation Chapter of ASIFA in the process. Members hail from Ohio to Oregon, from Michigan to Missouri, with occasional ambassadors from Europe and India.

Art Pierson was the first President, followed by David Daruszka, who helmed the chapter for over a dozen years. Deanna Morse served as President for many years, and was also elected to the international ASIFA board – first as a chapter representative, then International Vice-President, and finally President of ASIFA International. Bri Yarhouse, Jim Middleton, Marla Schweppe, and Randy Rockafellow were also chapter Presidents through the 1990s and the early 2000s. Julie Goldstein of Grand Rapids, Michigan is the current chapter President (2024).

Beyond these Presidents, several members have been indispensable for ASIFA Central activities over the decades, including Barry Young, Mary Lou Haynes, Jennifer Peterson, Jim Duesing, Gretchen Vinnedge, and Gordon Peterson. Our organization has been fortunate to have them among the many animators working as active volunteers over the years. When CoVid ravaged the social scenes, Michael Long of Missouri began a monthly “coffee break” to keep the scattered membership in touch.

In the early 1990's, ASIFA-Central became the first ASIFA chapter to create and post a website. Pioneer webmaster, Byron Grush, received several awards for the site, including an IWAY award, and a citation from Animation Magazine as "one of the top 15 organizations that make a difference." ASIFA.ORG continues to be an active repository of information and resources.

ASIFA-Central co-sponsored many programs over the decades and has brought in visiting animators including Don Bluth, June Foray, Gordon Sheehan, Ed Hooks, Chris Sullivan, Nina Paley, and Shamus Culhane. Calabash Animation and Big Idea shared their production pipeline methods with the Midwestern membership. For years, the chapter coordinated the judging of animation at the Chicago International Film Festival.

For over a decade, ASIFA-Central held annual weekend retreats at Starved Rock Lodge in Illinois and elsewhere in the Chicago area. More recent retreats were in conjunction with the SMart Festival (Grand Rapids) and the happily-ever-aftering known as KAFI (Kalamazoo Animation Festival International), the brainchild of ASIFA Central member David Baker that brightened the first decade of this century. Members have also participated in judging at area film festivals, with Deanna Morse being a frequent, welcome presence at the AAFF (Ann Arbor).

For many years, ASIFA-Central was closely affiliated with the HVH World Peace Storyboard Competition, which gave scholarships to students to create animations envisioning world peace. Animations created through this initiative were shared and screened internationally. Rita Dobias, who passed in 2022, was a noteworthy participant and chapter member.

Longtime chapter member Bri Yarhouse has become closely associated with International Animation Day, and now serves as its International coordinator, continuing the heritage of celebration each October.

Our active membership is continuously creating, educating, and promoting the animation field, establishing international links and lasting friendships with every journey or shared video screen. This modest publication champions their stories and accomplishments – to inspire others and fulfill one of the undersung missions of ASIFA:

*“Animation Unites Us.”
– animationem coniungit –*

It has been quite a 50 year ride, but the “old timers” are always thrilled to have new generations come and play in their yards.

Monthly Abundance of Coffee, Broken With Glee

(The March 7th session, 6:30pm-8pm EST)

The request for member filmographies from yr hmbl typst began the coffee break in March, with a half-dozen visitors dashing between dinner, meetings, and checking homework. The ultimate fate of Skype under the master eye of Microsoft stimulated a chat on the shortcomings of Windows, the benefit of frequently clearing the "scratch disk" and mysteriously appearing temporary files, which never seem temporary, and the use of family gatherings in Zoom. Of course, family gatherings led to a chat about Gathertown by the ASIFA Central social guru, Tracy Miller-Robbins, and then someone mentioned AI. And Apple's permanent, irreversible updates - egad, where is RedHat! AI. The pernicious pervasive AI. It has its place for menial tasks, and perhaps even to lend some stimulation for ideas, but as a self-contained entertainment source, has a long way to go; meaning, in computer time, 18.23 months.

Current students report a preference for the hand-drawn look, thinking AI makes everything appear like mid-90s anime. Options beyond ChatGPT, use of AI to adapt pre-created images in DragonFrame or on paper, then introducing a variation via rotoscope into a project, seem to offer some use; having it create several dozen text-driven poses and angles for storyboards.

A parallel time for AI can be traced to the 1993 film Jurassic Park - the effects were begun as stop-motion, but after a CGI demo, everything flipped to that new technology - and within four months, the stop-motion division of ILM became a quaint memory. CGI in film - a substitute for makeup, or is it akin to AI, where without the facial appliances, the actor cannot fully submerge into the role? Or when is removing facial wrinkles enhancing cosmetics but diminishing a performance?

A whispered observation: "The upcoming Oscars became a checklist of what is great, underviewed, overrated, or completely unknown in the animation shorts division."

Some theatres have even had sold-out time slots for the films (Houston, et al); students also weighed in on them this year: "These are quite mature - and quite disturbing."

Award Contenders:

I'm Hip (USA)

Letter to a Pig (France/Israel)

Ninety-Five Senses (USA)

Our Uniform (Iran)

Pachyderme (France)

WAR IS OVER! * Music of John Lennon and Yoko Ono (USA)

**** spoiler alert - this film won***

Wild Summon (UK)

Viewing the Oscars on ABC may be a challenge - ABC offered viewing over-air and through paid streaming services. Apartment dwellers are at the mercy of lead-footed and aluminum capped neighbors for their viewing experiences.

Deanna championed her AWG films, and look for a reel stitching together the totality of participating chapters for IAD '24. With the theme, "Be who you can be," it was interesting that the youthful approach was more about "what it means to be 10 years old," not "what do I want to be when I grow up." There is a delight with having children in a workshop, for they "feel invincible, unhurried, and unworried." The tallest animator in the northern hemisphere, Bob Swieringa, suggested to all that a monthly "game night" is a healthy, painless way to gather friends for healthy interactions, be it by gaming, or by pulling out a deck of cards to just play a game. Remember those days?

Then, philately reared its head - it appears the USPS has a healthy market among animators for its perforated products. Disney Villianesses are a hot commodity among collectors of sticky rectangles of paper.

After the general gathering dispersed, a trio of die-hard chatterers remained to muse on film and animation humor, going back into the realms of Harry Langdon, Raymond Griffith, and Buster Keaton as sources of inspiration, recalling that Keaton attributed the death of silent film comedy not so much for the soundtrack, but because animation could draw the outrageous physical gags without harm to the actors. "Let's face it, we were cartoons in the 1920s. Once sound and color hit the actual cartoons, we couldn't compete." (The quote appears to be rather apocryphal).

Yr Hmbl Typst has another apocryphal note to the proceedings as the dust settled and the sofas beckoned - "The Stalking Moth - He comes for the light, but stays for the wool!" It may have something to do with a talking point during the coffee break, but maybe it was all just a dream...just a dream...just a...ZZZZZZZZ.

If you wish to join in the monthly fun, drop a note to the Host With The Most, Mssr. Michael Long, at michaellonglong@hotmail.com ...

Animati te salutamus!

The April 4th Session - Coffee Breakage Continues!

(6:30pm - 8pm EST)

While David Thrasher creates his own pilot film to keep things perking at our monthly coffee breaks, Michael Long continues to pilot the caffeinated carafe into yet another month. And there is never a scarcity of subject matter!

- Timothy McSweeney's *Quarterly Concern* is still in circulation, but now includes a website! <https://www.mcsweeney.net> - aka

"McSweeney's Internet Tendency" - the universe is spinning happily - Are all software companies diving onto the greedy, money-grubbing business model of leasing their product, leaving creators and their productivity at the mercy of their soon-to-be bought out status? Well, the imbibing attendees in April tossed about the miracle of DaVinci as an alternate editing suite to Premiere and the ever-morphing Sony Vegas (not Sony? Now Magix? Music? Video?). DaVinci has a free and - of course! - Pro version. Gimp still positions itself as an option to Photoshop, and OpenToons and Moho offer reasonable one-time fees for more possessive licensing, as does Krita, although their business models and open-source structure make improvements a bit slow to implement.

- Deanna Morse and Tracy Miller-Robbins faced (with proper eye protection, of course) the possible End Of The World with the Indiana version of the total eclipse of the sun on April 8 (Yr hmbl typst only experienced a 93.1% eclipse, and it was amazing how lit up Edmore can be with 6.9% sunshine - must be the plethora of dispensaries there).

- Orrin Scott's six session series on *Animation - A Lifeline to Our Daily Lives* is deep diving into workshopped knowledge among its participants. And Abigail Disney's 2022 documentary, *The American Dream and Other Fairy Tales* (examining income inequality at her family's company and asking why the American dream seems so out of reach for so many), is still making the circuits, with special consideration for non-profit showings (and...hmmm...maybe *retreat performances*).

- And speaking of retreats, *The Retreat for 2024* at ASIFA Central, is still circling around the date of August 10...with details ever-growing and retreating as well. More to come!

- Vivi Markatos is moving into her first British Isle semi-house, or half-house, or Princess Castle Near The Channel. She is dazzling animation aspirants with character design creation programs making use of basic geometric patterns - never have circles, squares, curves, and lines created such happy mermaids. April 2 was International Children's Book Day! Read the past to future generations! Viva Vivi!

- Carlos Rosas appeared amidst his coordination of the *Happy Valley Animation Festival*, now in its fourth year, with 125 countries participating and over 1700 animations submitted. <https://happyvalleyanimationfestival.org/>

- Michael Long came upon letters between his parents in 1971 discussing their son and his cinematic proclivities around the house, "looking like grown-ups." But as all animators know, we only *look* like grown-ups - our personal Venn diagrams intersect that circle only when absolutely necessary, like on April 15 (oh that Schedule C!).

Vivi Markatos provides a lightning-round demonstration of her character design exercises for up-and-coming animators across Europe!

"Let's Go Out for Some Coffee!"

A genuine Cat Piano. 18th century rendering

“The Orbit of Minor Satellites” by Chris Sullivan Enters Post Production

After nearly nine years under the camera, the second feature from the imagination of Chicago’s Chris Sullivan is now in post production, gaining momentum, seeking some jet propulsion assistance. Almost half-way to his projected budget -

<https://www.gofundme.com/f/the-orbit-of-minor-satellites-finishing-funds>

Other Festival News

After six years in its production, the final edit of *Keaton: Home* is gaining traction in the festival circuit. Jim Schaub’s story of the brilliant vaudevillian’s teen years near Muskegon has placed among the finalists at Austin’s Life-Off Festival, and recently took Best Documentary recognition in Toronto. The audience even provided living, breathing, human reviews of their experience - and what a long website address they

created in the process -

https://www.wildsound.ca/videos/buster-keaton-review?fbclid=IwAR3G-ug86cvK9px7zx6o6fzlh8t4x-r2jCjLQ2D2xJZcWSOPjISJ1TtZMA_aemAUPZM3ialtsBLOOMCESes2QcByBdvbglabf2xDaG1906iULeZapUCvarprB6K0zizppvIMuZ08306zldKy7g1M9K

Jim Middleton’s *Political Asylum* has garnered attention in Austin (Texas), Rehoboth Beach, (Delaware), Reykjavík (Iceland), Rochester (New York), and New York (also in New York). His *Flute Solo in SFUMATOSCOPE* was shown at the Happy Valley Film Festival, Pennsylvania (Eugene Rose is a hit in the Keystone State!)

OIAF Releases Its 2024 Poster “A Playful Jaunt Through Animation” (From an April 4 press release)

The Ottawa International Animation Festival (OIAF) reveals its 2024 poster designed by Chinese experimental animator Lei Lei. This year’s poster is an ode to the wild creative process of an animator. Each year a different animator is selected to design the OIAF poster resulting in a unique piece of art that reflects that animator’s craft.

“When I was a kid, I loved playing video games. I remember the Nintendo games of the 1990s, specifically two very popular games: Donkey Kong and Snow Bros. On the poster for the 2024 Ottawa International Animation Festival, the owl standing at the top of the poster replaces Donkey Kong. A young girl (possibly a filmmaker) must travel across the city to catch the owl, having many amazing (continued A)

experiences along the way,” says Lei Lei. “The cinema theatre will be the end of her journey, so take a seat on a comfortable couch and wait for the show.”

Lei Lei’s OIAF design will join the works of past artists Matthew Rankin (2023), Angela Stempel and Amanda Bonaiuto (2021), Koji Yamamura (2012), Gary Panter (2005), and Dave Cooper (2001), among others.

This year’s OIAF runs from September 25 to September 29. Visit <https://www.animationfestival.ca> for more information about this year’s events and entry process.

Deanna Morse Absorbs the AAFF Film screening and Life Presentation

Notes garnered from the 2024 Ann Arbor Film Festival

Festival press release:

The 62nd Ann Arbor Film Festival counted among its jurors one Deanna Morse, a learned and esteemed member of the international animation community. They even included an interview as part of her afternoon of curated films during the festival, conducted by ASIFA Central president Julie Goldstein: <https://vimeo.com/925111873>

*Julie Goldstein - Deanna Morse - Ann Arbor
Who could ask for anything more!?*

Deanna Morse’s program, “Move-Click-Move,” was a diverse program of 18 animated and experimental films she created, ranging from Sesame Street to the Odessa Steps, to the Everglades and the computer lab. Deanna has made a personal commitment to create at least one film poem each year since leaving college.

Not only that, Deanna has updated her website to share these visual gems: www.deannamorse.com (With links to all films mentioned below), and her most recent project can be quickly viewed here: <https://vimeo.com/913789793>

Her work explores materials and techniques, shifting time and space between the drawn frames as we celebrate seasons, people, change, and nature. Collaborating with children, musicians, and puppeteers, using pioneering computer animation techniques, time-lapse, kinestasis, or simple cutouts, her visual poems become postcards with the message, “Wish you were here,” often incorporating common surroundings. Move, click,

move: a lifelong metaphor.

Move-Click-Move (2001)

The introductory signature video for the award-winning retrospective DVD Move-Click-Move, published in 2001. An interactive journey through the artist's cluttered desktop.

Help! I'm Stranded... (1981)

Help! I'm stranded... in a Spartanburg motel room with: 1. a broken TV, 2. some note cards, and 3. a red crayon. It's a true story. A rubbing film, a sound-image guessing game.

Container Loss (2022)

with Jane Flint

Climate crisis, gyres, garbage patches, natural phenomena, human response, hope, loss, optimism, equanimity, integrity, awareness, and responsibility. Reminders. Cutout animation and time lapse. Music by Chris Gagnon.

Sandpaintings (1992)

with Jane DeKoven

Two Navajo-inspired figures explore symbols and their meaning. Piano music by VR inventor and philosopher Jaron Lanier. A pioneering film using VPL DataGlove motion tracking to animate the sign language hand. Art is not to be feared.

The Gift (2019)

Celebrating Walt Whitman's 200th birthday, and his poem "To a Certain Cantatrice."

Original music by Edie Herrold.

A Mother's Advice (2000)

Based on a story by Beth Isacke, inspired by her hair. Created during an artist residency at Ragdale Artists Colony, Illinois. Sound design by Edie Herrold.

Skin (2012)

Thick skinned, thin skinned. The first line of defense. A surface archive. Created as an artist-in-residence at the Everglades National Park, Florida. Trees. Many trees. Mosquitos,

too. Sound design by Edie Herrold.

Breathing Room (2009)

Light sweeps languidly across the tiles in a room. Outside, the flowers erupt in a riot of color. Created at Fundacion Valparaíso, an artist colony in Mojacar, Spain. Music by Edie Herrold.

Whispers of the Prairie (2013)

The first American lawn: prairie, a medley of native flowers that thrive in our forests and our sustainably landscaped lawns. In contrast, manicured green unsustainable turf grass. Music by Edie Herrold.

August Afternoons (1985)

Sunlight and shadows whisk through time. Optically printed from Super 8 footage. with Randy Buggs and Ray Harvey.

Lost Ground (1992)

A modern love story. Michigan to Chicago by train in 1992, early 3D animation.

Plants (1989)

Created with NeoVisuals Software at Sheridan College, using clunky code (keyboard entry—before menus, trackpads, and the mouse). Plants can't walk. Plants don't talk. Plants can't see. Plants don't have legs. Music by Jim Barfuss with Chloe Willey.

Monkey's T-shirt (1991)

with Rose Rosely
Animated short for Sesame Street. An embedded figures puzzle. Sound by Billy Vits. Look! The animals are hiding! Can you find them?

Night Sounds: Imagination (1992)

with Rose Rosely
For Sesame Street. A little girl is so scared by the night sounds, and she is not the only one! Sound by Billy Vits. But wait! There's MORE! A

Dejeunez, Mon Amour (1970)

with Mark Henriksen

Close-up vision of American consumption. Before tattoos were all the rage, filmmakers Mark Henriksen and Deanna Morse had a vision. And some food. And some stock music. One of her earliest films, student-produced at Iowa State University.

Forced Perspective: Odessa Deanna Morse (2007)

A visit to the real steps at Odessa was affected by the Odessa Steps sequence from Sergei Eisenstein's *Battleship Potemkin*. Media images have power. They shape our real-life experiences.

Postcards from My Backyard (2007)

An exploration of a single space over two years' time—the seasons of Michigan. Incorporating time-lapse footage, motion graphics, and my own musical soundscape, this video poem considers growth, decay, and transformation.

Charleston Home Movie (1980)

Memories and images of Charleston, South Carolina. Rotoscope animation of significant friends and moments. Film is represented in several collections, including the Metropolitan Museum of Art. Music by Keith Jarrett, used with permission.

Free (or Inexpensive) Software Options

a survey by David Thrasher

DAAV STUDIOS

<http://www.daavstudios.com/>

The one and only head of DAAV studios!

Here are some free options for video editing and animation software that might be worth checking out. Some are worth considering as true alternatives to high-priced commercial software.

Subscription-based software is a particularly

bad offender, especially Adobe products which seem reasonable until you add up the long term expense.

Free Video Editing

Software:

Shotcut (Mac,

Windows, Linux)

shotcut.org

Shotcut is going to be one of the most beginner friendly offerings and will not have as high of system requirements to be useful.

OpenShot (Mac, Windows, Linux)

openshot.org

Another more basic video editor with lower system requirements.

Kdenlive (Mac,

Windows, Linux)

kdenlive.org

This one is an open source video editor that was first available for Linux but later was ported to Windows and Macintosh.

HitFilm (Mac, Windows)

fxhome.com

HitFilm Express is the free version of this software. There is a Pro version that you have to pay for. It's possible that the free version may be enough for your needs.

Blender (Mac, Windows, Linux)

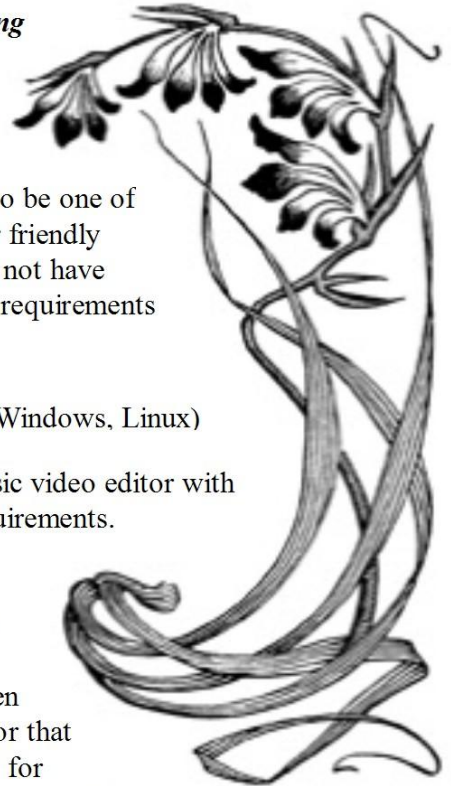

blender.org

This one might not seem as obvious but there is a Video Sequencer built within Blender where you can edit video.

DaVinci Resolve (Mac, Windows, Linux)

blackmagicdesign.com

The free version of DaVinci Resolve meets most people's requirements and the features missing are needed by only a very few. It probably has the highest learning curve of what is listed here for a video editor (Blender has the higher learning curve for the 3D part of the program). It also has the stiffest system requirements. There are many

people jumping ship from Adobe Premiere and going for this one. Color grading is one of the strongest features.

Free Animation Software:

Blender (Platforms: Macintosh, Windows, Linux)
3D, 2D

blender.org

This has a fairly high learning curve, especially for the 3D aspects of the program but is very powerful and features seemed to be added exponentially. It is rapidly closing in on Maya and other commercial software, surpassing some.

OpenToonz (Mac, Windows, Linux)

2D, raster and vector

opentoonz.github.io

This software has been used by Studio Ghibli. It's 2D animation software that can work with either raster or vector imagery. It's the most professional 2D only animation software on the list.

Krita (Mac, Windows, Linux)

2D, raster

krita.org

Although designed mostly as a digital drawing and painting program Krita also can do animation.

Synfig Studio (Mac, Windows, Linux)

2D, vector

synfig.org

I can't personally vouch for this one but it is an open source vector based animation program that does much the same kind of animation as Flash.

Pencil2D Animation (Mac, Windows, Linux)

2D, raster

pencil2d.org

Another one that I don't know too much about but

have run across during my searches. This one looks like a fairly simply one to use.

Commercial software I'm using instead of Adobe's offerings:

Affinity Photo (in place of Adobe Photoshop)

Affinity Designer (in place of Adobe Illustrator)

Affinity Publisher (in place of Adobe InDesign).

affinity.serif.com

All have the advantage of being one time purchases and each cost about \$50 roughly (sometimes on sale for less). Add up the cost of what Adobe charges for a subscription for a year and you've recouped the cost in about 2 months with this software. *Something that might be of interest to educators is that they are offering this software for free to educational institutions and certain non-profits.* My experience so far is that the software has nearly as many features as Adobe offers (and what may be missing you probably don't need anyway!).

Free alternatives to this kind of software:

Photo Editing

GIMP-GNU (Mac, Windows, Linux)

gimp.org

I've not gotten used to this one. The present version doesn't offer non-destructive editing capabilities but the next major release (which is coming soon) will. I think the interface will take some getting used to.

Vector Illustration

Inkscape (Mac, Windows, Linux, Free BSD)

inkscape.org

Of the three free offerings listed this is the one I feel most comfortable recommending.

I've used it a number of times for projects before I got Affinity Designer.

Eli Noyes Remembered

Eli Noyes passed away late last month, at age 81. He was a groundbreaking stop-motion and clay animator, forging a path for many, including Will Vinton and Nick Park. This appreciation is abridged from the ASIFA-SF newsletter, written by Karl Cohen.

Eli Noyes was a multi-talented individual who excelled as both an experimental and commercial animator, a successful documentary film maker, the creator of several interactive books, an accomplished musician, and a wonderful person. He even helped shape the look and spirit of Nickelodeon and MTV.

His undergraduate film, *Clay or the Origin of Species*, received an Oscar nomination (1965), and it helped establish clay as a medium. award-winning films that were animated with clay.

<https://www.dailymotion.com/video/x8i92jb>

Said Caroline Leaf, "I'm sad. Shocked. Eli was the golden boy from Harvard's animation class taught by Derek Lamb. Because of his outstanding *Clay or the Origin of Species*, (he) went to work at the National Film Board of Canada a year before I got a job there. But I stayed in Montreal and Eli went west." She also called him a "trail blazer."

At the NFB, Eli produced the short *Alphabet*, (1966), an energetic romp through the letters of the alphabet. This would be the first of series of *Sand Letters* shorts he created for Sesame Street (1974–1991)

Sandman (1973) showed his hard work to control material can create a fun work of art.

<https://www.youtube.com/watch?v=GfNVCNIR19w>

In his *Peanut Butter & Jelly* (1976) he created an outrageous humorous work made using pixilation and a silly soundtrack. <https://www.youtube.com/watch?v=jaY2xiy9nYE>

In the early days of cable TV his spirit influenced the look of the Nickelodeon network. He was one of their

first creative contributors. That network's first show, *Pinwheel*, featured Noyes' animated pinwheels made with sand.

In 1983, Eli and Kit Laybourne started Noyes & Laybourne Enterprises, an independent studio located in NYC's Soho. They created a lot of material for Nickelodeon, starting in the early '80's as the network needed to buy content.

That resulted in the network having a

variety of styles including the original shows *Eureeka's Castle* and *Gullah Gullah Island*.

At MTV they created the visually diverse *Liquid Television*, a showcase for independent animation launching a Mike Judge's *Beavis and Butthead* and Peter Chung's *Aeon Flux*. Eventually they merged with Colossal Pictures in San Francisco.

It has been said that Eli was often early to embrace new technology. He worked with The Disney Imagineers to create ZOOG Disney, one of the first afternoon program blocks that combined TV and the internet (1998-2002). Eli subsequently brought that experience to the first "convergence network" Oxygen (founded in 1998).

Noyes was also animation director on the Oscar-nominated documentary *The Most Dangerous Man in America: Daniel Ellsberg and the Pentagon Papers* (2009).

To promote the health of the environment, a set of 16 stamps honoring Earth Day appeared in 2011. It was nearly accidental - Eli's sister, an arts commissioner at the U.S. Postal Service, called him to say, "Congratulations, you've been accepted to design the new green stamps," he laughed and said, "I hadn't even applied."

Cartoon Brew has many of his films on their site:

<https://www.cartoonbrew.com/ri/p/eli-noyes-stop-motion-animation-pioneer-and-liquid-television-director-dies-at-81-239312.html>

**IT'S OFFICIAL!!!! LOOK OUT, KIDS - THIS
YEAR, WE'RE PACKIN' PLYMPTON!**

ASAFA

INTERNATIONAL ANIMATION DAY

2024

Plympton

It's hard to beat news like that anywhere else in this issue, so we're just going to put it out there and let it sink in. Look for more information in the weeks ahead, and certainly look for some group projects and Anijammery to keep everyone busy, because, you know, 2024 just doesn't have enough going on already! We're Packin' Plympton!

mountain, hoarse from the six white horses)*

"Animation - and coffee - unites us!" (May coffee gathering)

May 2024 Coffee Notes

The 11 lucky participants in May were able to experience David Thrasher's combination coffee break and animation history tribute, "Let's Go Out to the Coffee" at the start of this ongoing series of gatherings. "120 years in 15 seconds" were synchronized to an adaptation of a very familiar intermission refrain, using Blender and *udio.com* for the music creation (there were three versions - "I can't stop it," David confessed): a Swing version, a la Benny Goodman, one more in line with Artie Shaw, and a final one with a variation of Ethel Merman. Chris Sagovac suggested the film as a springboard to a group animation project.

Deanna Morse, chiming in from an undisclosed location (that certainly resembled the northwestern wilderness), propelled the members to perform a countdown with a resounding "ASIFA!" in the Zoom environment, and then attempted to get a group ASIFA shot with prepared letters from those peeking in. The caprice of Zoom made proper alignment possible, alas.

This literal ASIFA interaction was part of a group promotion for ASIFA on an international level (later note - it came out pretty dawgun good), to be edited with the assistance of Suzanne Zack, master of multitrack magic. The concurrent use of *udio* prompted a discussion on AI, as some festivals - most recently Cinanima in Portugal - have noted an uptick in AI-based submissions. *Should AI be in its own category, should it be identified as a cooperating entity, or have submissions note whether AI completely created the production?* This will be an ongoing discussion.

Courtesy of David Thrasher

Library of Congress

Animating Apothecary Archives

Chris S added that, when Photoshop first appeared in a 1990 episode of the *Today Show*, the main observation was whether we can "ever trust a photograph again?"

<https://www.youtube.com/watch?v=OHBm4QJYVYM>

The *Today Show* discussion seems rather quaint and naive today.

Deanna, Jim, and Michael then reminisced about the days of Watergate when all sorts of satiric liberty was taken with reality - Nixon on Quaker Oatmeal, pre-digital audio manipulation, culminating with the "Missing White House Tapes" from *The National Lampoon* (where physical editing of the infamous "No White Wash in the White House" speech was edited with Scotch tape and razor blades to have Nixon say, "Well, I'm a crook.")

The discussion then went to plans for summer trips, with Bob Swieringa musing that he looks for moments to socialize in the analog sense, in order to avoid "becoming a snail, I'm in my own house!"

Brad Uyeda, animation director from Phoenix, Arizona, offered some suggestions surrounding Adobe products before bowing out (stop motion is his specialty at *savmostudio.com*).

Shweta Marathe, our chapter correspondent from Mumbai, provided us with the screenshot, appearing on page one (along with the beautiful, underused ASIFA letters she created for the coffee break).

And then, just like that, it was time for more coffee in June!

Again, from the very busy David Thrasher

June 2024 Coffee Notes

Hot-off-the-wire service from our battlefield correspondent, Michael Long of Webster University

David Thrasher dropped in first and tried out his new condenser mic (sounds good). He explained how he's been working on upgrading the audio for the animated coffee opening.

After more folks arrived, he played the latest version of "Let's All Go to the Lobby," with midi tones carrying the melody.

Vivi shared a "white hot pepper" cover illustration from a children's book she did for a client (wonderful illustrations!). Then, she started us on a discussion of how to know what ideas to pursue, how do you choose the right one and keep developing the story? Do you make the animation to please yourself, or to please an audience? Big, deep topics!

Steve observed that we're not the novelists of animation (like Pixar or other big studios) – we're *poets*, and often you remember poetry better for its concise, compact, intense effect and resonance.

(Orin felt unwell, alas, and had to leave early, before we got to here about his latest projects.) Shweta M is working on an animated project – a personal, animated documentary. It's not at the stage where she can talk about it yet, but she's doing a lot of pre-production work on a complicated topic. We hope she'll share it with us when she's ready.

Bob, who likes face-to-face board games, is preparing for a sabbatical next year on writing and developing games, partly using open source materials. He's also looking forward to animation projects once he's retired.

For those who weren't around for our pandemic zooms, I shared links to the group projects we did then: *Spiritus Mundi* and the *Animated New Year's cards for 2021*.

Note: Next month's coffee zoom falls on July 4th, a US holiday, so we'll probably reschedule that month for Wed. July 3rd.

Around the world with ASIFA Central - David from Iowa, Michael from Missouri, Vivi from Greece via the UK, Steve from the wilds of mid-Michigan, Orrin holding down the fort in Indiana, Dr. Bob from an undisclosed location in downtown Grand Rapids, and Shweta from the longest address ever created for a studio in Mumbai, India!

Meet A New Member - Madison Goetsch

Madison Goetsch of GVSU is a new student member with ASIFA Central, by way of Julie Goldstein. Her student film, Shimmy On, Starlet, will be part of this chapter's IAD celebratory showreel this fall. She settled down at her keyboard to ask the usual painful questions from yr humbl typst.

1. Recollections from an animated youth:

"The first animated film I remember watching was The Little Mermaid when I was about four. Throughout my life I've been fascinated by the ocean, so that definitely played into my obsession. I did also have a very strong attachment to Ariel's character particularly in her mermaid form. I spent the rest of my childhood wishing I

could be a mermaid (ironically, the reverse of Ariel's once per day from ages 4-6, probably due to my

admiration for Ariel (more recently however I've rewatched the animated series Arcane around 5 times.

The way it combines 3D and 2D is absolutely fascinating to me—not to mention, the story is great).

"When I was in late middle school, I encountered the short films made by Calarts students through YouTube. I loved watching them and started hoping that I would eventually have an opportunity to do the same sort of project in college (which I did!).

"I come from an illustration background, so I was never too interested in making a live action film myself. The ways that animation can naturally bend reality depending on the art style has always appealed to me.

"At that age (middle school), I had no confidence in my ability to learn animation on paper, so I held off on animating until I got an iPad as a sophomore in college. In retrospect, I do wish I had started earlier with those materials because of the unique effect of paper animation...there weren't any specific channels I followed—I just soaked up whatever information I could. In my junior year of college is when I took my first of three animation classes taught by Julie Goldstein."

Madison Goetsch of GVSU

2. Influences and Attractions to The Genre

"The Disney films I grew up on were definitely a major inspiration style-wise, but Phineas and Ferb was the first animated show that made me curious about the animation process. I remember asking my mom how the characters were always drawn the same from scene to scene (her answer: "a lot of practice."), and from there I started drawing my favorite characters consistently.

"There's definitely [the aspect] of anticipation—because the medium

doesn't have to follow the laws of nature, you never know exactly how far the

animation will push natural boundaries... I do think there's a general misconception in American audiences that animation is

for kids, but some recent series such as Arcane and Blue Eye Samurai are shifting that perception, alongside anime becoming more mainstream. My friends and I always like to analyze the color scheme and character designs within an animated film or series

because many of us are artists or are at least immersed in the art world. Being able to watch films either analytically or for pure

entertainment is definitely fascinating, and opens up new ways to perceive the same film."

3. Media and Methods

"Drawing frame by frame digitally was the first medium I explored, but I have also dabbled in zoetropes

and a bit of clay and Lego stop motion. (I am) still drawing frame by frame digitally! I think it aligns most closely with my illustration style and allows me to express my ideas more clearly than other mediums. Because I grew up on Disney films and other 2D animated cartoons, frame by frame has always been the most familiar medium to me."

4. Software of Choice and The Education Arc

"(For software,) Procreate (the original version, not Procreate Dreams), mainly because it's also what I use for illustration, so I was already familiar with the software. (At GVSU), my Animation 2 class, where we created individual short films, was probably the most beneficial. I also received

feedback from Film & Video majors (who made up most of the class), and their suggestions opened my eyes to avenues newer to my usual way of thinking, which is heavily tied to illustration. I started to become more intentional with my cinematography, rather than just trying to make things look pretty for pretty's sake.

"The film program as a whole would showcase student work at the end of the semester, which animation was a part of. The short film I made for my Animation 2 class was one of the most rewarding projects I've ever done, and I've already started making plans to animate another. With full creative power, you can quite literally do anything with animation, and that is a freeing reality."

5. Careers, Future Options, and Creating Soundtracks

"If not an animator - illustration! If it had to be outside the visual arts, however, I think creative writing would still be rewarding. Some illustrators incorporate small animated elements into otherwise still images, or on their websites. Creative writing plus animation has clear pathways to film, but I also think animated online zines or webcomics are an interesting combination.

"So far, (my music has) been whatever is copyright free! Generally, I come up with the visuals first and find music to match it. This wasn't too much of a challenge for my short film *Shimmy On, Starlet!* because much of the 1920s jazz I was seeking was already public domain."

Speaking of Public Domain

(thank you, Madison, for that convenient seg-way)

Your hmb1 typst continues to add to the online material of public domain music, both at archive.org and asifa.org. The latest acquisition to the archives is a 16 volume set of LPs from 1958 - "The Standard Treasury of the World's Great Music." This grocery store answer to the

Funk-and-Wagnall's encyclopedia offered a library of classical recordings for \$1.30 each, with the extra advantage of being pressed so that everything could be played in "one four-record stack" with those new-fangled High Fidelity turntables. However, there's a thing about the performances - they were completely anonymous! (The explanation was that "our great performers are under contract to others" so the records cannot be

distributed "through music stores.") The best guess is that the producers had made bootlegs of some of the earliest reel-to-reel recordings from the late 1940s, which apparently never had their copyrights renewed (certainly this "Standard Treasury" never did).

The Mystery of Music

It is likely the masters hailed from post-WWII Europe, and some of the performances do exhibit a chaotic need for speed (missed cues, random early brass section note). But once transferred and edited, they'll be added to the audio data bases, adjusted for proper speed when necessary (the *Egmont Overture* sounded like overly medicated dinner music). Not stereo - but FREE! Stay tuned!

Deanna and Suzanne Make a Movie! Jim Doodles.

During the May coffee, Deanna was gathering video greetings for her upcoming ASIFA co-production for our International assembly of chapter representatives, enlisting ASIFA Central member Suzanne Zack as additional creative eyes and editorial mastery of WAVs, AVIs, and MPs with any number you choose following.

Jim Middleton provided a few moments of animation along with edited snippets of public domain music. The short film celebrates the importance of the volunteers who keep ASIFA viable and vital. We give it our all, and our "T" is fed by the whole!

Time to move our vowels - The "I" in ASIFA is "U"!!

The film, "Why I Volunteer for ASIFA" will be made available in the months ahead, because the thing about volunteers is - well, let's say we wear out before we rust out!

RIFF in New York - Jim takes a Canadian Shortcut for COFFEE CRISP!

The Rochester International Film Festival (RIFF) hit birthday #66 this June, and yr hmbl typst was invited to attend with the recently completed *Sfumato* #2, *Political Asylum*. It was a generous offer on their part, including tours of Kodak and RIT's MAGIC Studio. In a word, YIPES. The pandemic had created a battalion of mostly cosmetic "festivals," often little more than anonymously judged affairs with a possible showplace in someone's basement. RIFF is hardly one of those festivals.

The eight hours of showings, in four separate sections, represented a full phalanx of film genres, and five animated films made the cut. The venue was the Eastman Museum Dryden Theatre – air conditioned, soft-seated comfort with a goodly sized screen accustomed to running rarities from the Eastman archives. There was no admission charge (donations

always accepted), the audience was of several strata from

in and around the Rochester area, and the animated films included two from students at Daemen University, one from a senior lecturer at RIT, one from the director of *Dragonball Z*, and...yr hmbl typst.

[Permit me to drop the third person narrative to say that I was completely stunned by the generosity and attention given me during my three days in Rochester. I was chauffeured. I was fed. I was coddled, and I'm not ever sure I know what coddled means, but boy this sure felt like coddled. I was made to feel an instantaneous part of a rare collection of filmmakers, educators, and avatars of celluloid. Whatever hesitation I had about the seven - no, make that nine - hours of driving - drat those one-lane bridge construction bottlenecks - vanished once I saw the now-nearly-empty KODAK building and my phone began exploding with a 72 hour barrage of WhatsApp welcomes and communication. If you have a film, and if you can only enter one festival, this is the one to enter.]

Pockets checked before leaving

Between the showings came tours of the evaporating Kodak company, the melancholy of walking past George Eastman's rather neglected tomb, the discovery that the fourth floor of the old research building is now rented to a pot farm (oh yeah, that isn't Kodachrome you're smelling), and that the

Mr. Eastman's final resting place needs a trim

MAGIC was - magic

folks who made my Tri-X Super 8mm film are resurrecting their formula to market a boutique Super 8mm camera for \$5500, without a single-frame function, with the 3 minute cartridge selling for \$50, with an additional \$100 for developing and creating a digital transfer.

Whatever nostalgia was shattered was replaced the next day with a welcome rush of optimism and exaltation in the form of the RIT and its MAGIC program. Where many 2-4 year

film programs are beset with administrative budget crunches that can challenge keeping their infrastructure current, yet alone looking forward, MAGIC (acronym for Media Art Games Interaction Creativity) provides students with cross-training among several curricula, "speed-dating" with students at the Rochester School of Music for soundtracks, a 7000

Thali of India - magic!

These chairs - not magic - creativity has its limits!

square foot soundstage, Dolby-designed auditoriums and sound studios, and commercial productions to pack many a portfolio. It was enough to make one dive onto Nintendo Switch to play *That Damn Goat*, the MAGIC-produced video game released May 15.

TO SUMMARIZE - THE RIFF IS ON FILM FREEWAY, AND YOU NEED TO CATCH THEIR ATTENTION!!!!

Sidebar - The "New Kodak"

The new Kodak Super 8mm film camera is not your grandfather's (or your father's) Kodak. Anticipated and delayed for several years, its appearance was expected to combine nostalgia with production utility. Its price kept creeping upward with each announcement of its progress. While one never expected the \$19.95 FunSaver box kit from 1968, the final price tag of \$5500 remained rather shocking.

The RIFF attendees were able to inspect a "show model" during the company tour, and it made a nice, familiar sound as the cartridge was exposed in its newly re-engineered feeding mechanism, and the digital viewfinder created the illusion of a modern portable video camera. But it is still a 50 foot cartridge. It is likely the reason for the surge of manufactured "retro footage" in recent films - you've seen the shots, soon to be a cliché of documentaries of the 2020s, with the oddly framed images, suggesting found footage from the past, served up with a side of flickering sprocket holes.

In the 1979s, the cartridges were \$3-4, two-day developing for another \$3, and you received a 50 foot roll of Kodachrome that would run through the projector in about three minutes. And then the editing started, culling that 50 feet into a couple of yards of useable material (you learned to think and plan before you pushed that sweet, ASMR-worthy button). The cartridges now cost \$38 each for Plus-X B/W, \$49 for Ektachrome (no more Kodachrome, with its aroma of delicious vegetable dyes when you pierced the foil packaging). For developing, expect another C-note to cover the process and whatever digital format you want provided for your editing files.

Even so, it's on a several-month backorder - they cannot keep up with the orders

Yr hmb1 typst personal preference for Super 8mm, ca 1972

Significantly, it, has no single-frame function. 18fps, 24fps, 36fps only.

I'd classify this as a boutique camera, for films with bigger budgets than most of us experience. The need to show sprockets is also interesting - that wasn't the purpose ever with home movies in the

pre-video era. You winced back then if you could see a splice (Guillotine splicers were the slicer of choice for yr humbl typst, and even those weren't helpful for staccato montage work).

It was nice to see Kodak at least trying to keep film alive ("If you want the look of film, shoot film!"), but it only made me want to go on Ebay, score a replacement for a long-lost Bolex 160, and reserve its use for very, very special occasions - thinking like my mom, who wouldn't take pictures of our UFO encounter in the UP back the '60s, because "there's color film in that Instamatic - I'm saving it for good!"

Digital effects in an editing suite can approximate the same look, and it will remain only an approximation, but go easy on showing off the sprocket holes, ok?

"Full Format Overscan" from *Negativland* - the new visual cliché for the 2020s? - Super 8mm master

By the Way, Have We Mentioned that Bill Plympton Has Created the Poster for the 2024 IAD?

Seems it has been a while since brining it up..

image from NPR

Winsor McCay Department Presentations and Artifacts

First of all, an ARTIFACT, to wit:
A letter between J. Stuart Blackton and Winsor McCay

It reads, from an era predating spell-check,

"The VITAGRAPH COMPANY, Oct. 10, 1913

Mr. Winsor McCay
1901 Voorhees Ave
Shepshead Bay, NY

My dear McCay:

We have practically concluded negotiations which will result in the opening of a theatre on Broadway and 44th Street, to be known as the Vitagraph Theatre, in which we shall un only Vitagraph feature films of an Exclusive Service not to be seen any where else in New York.

It occurred to me that your film of **Gertie** would be a particularly appropriate feature in include in the opening with yourself to lecture on same, and we will be very glad to arrange with you for an engagement for one, or possibly, two weeks. We expect to open Monday, November 3rd, although it may be one week later. This does not allow any too much time to get the film finished; and, after its appearance there, we can agree upon a method of handling it as an attraction. The fact that we are going to have this theatre, puts a different complexioun on the matter ouf our handling

such a proposition, and I think I can see now how we can get together and arrange a deal to our mutual benefit.

If this interests you and the drawings are finished, drop in to see me.

Yours very truly,
J. Stuart Blackton
The Vitagraph Company of America"

Even Winsor McCay had deadline pressures...

Second of All, the Presentation:

At the end of this past May, a few miles from the scampering grounds of the teenager whose uncle still spelled his name *McKay*, yr hmbly typst introduced the *Godfather of All Things Animated* to a small, but interested,

group of Tamarack Library aficionados. One young lady in attendance had also attended my old high school (back when the building was new, to me, but "oldish" to her), and said after graduation, she went to Japan to study, and returned a few years later with some extended homework, namely, a husband from Japan.

Her husband was an enthusiastic anime fan, and likely could have told me what Miyazaki had for breakfast, but had never heard of McCay, nor of Little Nemo, nor of the aborted project that Studio Ghibli had attempted in the mid-1980s.

He did get to see some of the animation cels from the final degenerated product that made it to the US screens in the 1990s, because, well, years ago yr hmbly typst had purchased a couple at a wildly discounted price, and the seller, seemingly glad for the opportunity to reduce inventory, sent several dozen cels, along with the original drawings, a handful of watercolor and poster paint backgrounds, in a traveling envelope that went to the various homes around the studio where after-hours families painted the cels, according to the guidelines on the envelope.

The presentation was a quick overview of McCay's work, then a timeline of his impact on films that followed - from pushing the primitive product

Scene of the crime

of pre-WWI into grudging adolescence, to inspiring films first by Edwin S. Porter, then Victor Fleming (*pre-Wizard of Oz*), to animation references of lobster nightmares, ultimately tracing a path to Lionel Ritchie's *Dancin' On the Ceiling* and an over-plotted variation of Nemo as a girl on Netflix.

As one would have said in an earlier area weekly newspaper, "A good time was had by all." One suspects it was because there wasn't a quiz afterwards. One suspects.

Animated Thoughts: My Love Affair with Marriage

Chuck Wilson REVIEWS!

(From his blog of Tuesday, February 20, 2024,
<http://smudgeanimation.blogspot.com>

Well, I saw *My Love Affair With Marriage* at the Flint Institute of Art. Having done promotional work on both of Signe's features, it's a real rush to sit in the theater and see the final product--even moreso to see your name in the credits as one of the financial backers of the film. And I have to say it was a very enjoyable movie, but more than that, it was very thought provoking. Given the litany of "advice" family and friends have given me about marriage over my lifetime, I spent more than a little time pondering issues raised by the movie on the drive home.

Though one initial question that crossed my mind as I walked out of the theater was related to how Signe puts a lot of herself into her films. In her animated short *The Dentist*, Signe drew upon her experiences having some dental surgery in order to create a spine-tingling film. In *Birth*, she drew upon her experience

of becoming a new mother and how advice given isn't always as helpful as one would hope. In watching *My Love Affair With Marriage*, I do have to wonder how many of the situations the character Zelma found herself

in were drawn from Signe's own life experiences... or drawn from experiences related to her by family and friends?

For me though, *My Love Affair With Marriage* raised some very interesting (uncomfortable?) situations as it confronted the stories we are told about marriage. For example: how you are not a complete person without someone there to complete you. Or, how we over-romanticize marriage and childrearing while ignoring the realities of said experiences. Now I'm not anti-marriage or anti-children, far from it. I'm a big supporter of both if for no other reason than how families can add stability to society and children provide for society's longevity. But oftentimes, being married and having children is portrayed in culture as the be-all and end-all of the human experience and your existence is empty and meaningless if you're single--a concept that I've been striving against for the better part of my life.

The very real question that I've been pondering lately is: the desire to get married something that you want for yourself or do you only feel that desire because it's "expected" of you?

And that's where I found myself as I watched Zelma's trials and tribulations as she wandered through life as a single woman, and then in life as a married woman. Throughout this film, Signe asked the questions and confronted the sacred cows of marriage and the decision to have a child (or not) in a very entertaining fashion – but without fully answering them, always leaving room for speculation based upon your personal experiences.

Signe is masterful at weaving the triumphs and failures of the human experience into very interesting and engaging characters who leave you wanting more. Despite all the difficulties she faced through childhood, adolescence, and finally adulthood, the film struck this hopeful tone as Zelma walked a path to finding peace in her relationships. As Zelma grew, I wondered if maybe she would realize that she doesn't "have" to be married in order to live a life filled with meaning and purpose--a realization that many of us single people look for: that

particular moment of clarity when you really start living and enjoying your life in the moment instead of chasing after some highly-romanticized vision of the future that society says you must have.

Or maybe marriage was the key to happiness for Zelma after all, once she finds the right person with whom she can share the rollercoaster of life. Maybe her personal happiness could only be found in sharing her life with another person, and it would take her a series of failed relationships to finally grow into the person she needed to be in order to share her life with someone else? I'll leave it up to you readers to watch the film for yourselves and see how the story ends for Zelma... or maybe doesn't end. Every apparent end for Zelma is just the beginning of another chapter in her story

(including the ones we don't get to see).

Regardless, after the movie ended, I did have the feeling that it would be nice to check in with Zelma in about five or ten years and see how life turned out for her. For by the end of the film, Zelma felt like less of a character in a story and

more like a friend or a family member who you only saw every couple of years but pick the friendship right back up where you left off.

As one of the Crowdfunding backers, I'm really looking forward to receiving my copy of the film and watching it again since I not only enjoyed the story but I also really enjoyed the visuals in this movie. I was very drawn to the segments where the neuron narrator "Biology" (expertly voice acted by Michele Pawk) ran us through these mini documentaries detailing how the brain matures and processes emotions through biochemical networks before the film went back to Zelma's external story. Then there were the many examples of Signe's "digital setback camera" process--a digital evolution of Max Fleischer's setback camera setup that I wouldn't mind trying myself someday.

Signe continues to push the bar on her personal work, as *My Love Affair With Marriage* added a large number of musical numbers to the feature. And, while this film is drawn in her own signature visual style, you can see Signe pushing her drawing and animating skills forward and improving in both the 2D rendering of her

human characters as well as the more abstract figures she presented in the neurological characters and processes seen in the microscopic brain sequences.

All-in-all, Signe has added another interesting and entertaining film to the growing pantheon of adult-oriented animated features and is well worth a look, whether you want to be inspired or if you just want to be entertained. Given how approachable and relatable this film was to my own experiences with interpersonal relationships, I can't wait to see what concepts Signe decides to tackle for her next feature.

If you'd like to know more about Signe's process, I highly recommend watching the following presentation she gave at the University of Michigan/Ann Arbor screening of her film. Additionally, she's has some wonderful production process pages on her website: <https://www.myloveaffairwithmarriagemovie.com> where she covers the network, animation, and shows some presentation and interview videos – great stuff for the aspiring animator.

Interview link:

<https://www.youtube.com/watch?v=ggJM6uMYxbc&t=2s>

Hong Kong-based Seminars attended by yr hmbl typst

[First of all, one thing to remember is that an 8am presentation in Hong Kong is the *previous night's 8pm* here in the mid-reaches of Michigan. It took a few attempts to get both my mind and watch synchronized to this fact, with a few missed online encounters in between. Repeat to yourself, “8am in Hong Kong on Thursday morning is 8pm in Edmore on *Wednesday* night” until you fall into a confused slumber. Yr hmbl typst may need to engage with a tattoo artist to cement this mental conundrum to the inside of his eyelids.]

There are two books that represent the foundation of these discussions, (1) *Anime's Knowledge Cultures* by Jinying Li, and (2) *Animated Encounters* by Dr. Daisy Du. The online discussion ran 45 minutes, with time for follow-up questions, and English has not been spoken that rapidly since my last visit to an old phonograph auction.

Featured on Disney +

Jim Henson, Idea Man, a documentary directed by Opie Taylor, is worth a look to appreciate the creative genius behind the Muppets and confirm the importance of timely medical care.

And *What If?*, proof that the Marvel Universe is better in 20 minute animated doses, enters its second season, remaining a goddess-send for those with little time to invest in three-hour SFX sprees.

Retreat Outline Coming SOON! - we're ironing out some scheduling challenges.

IAD Anijam Project - Contribution Deadline October 1, 2024

Members should, by now, have received an email from yr hmbl typst for this year's IAD 2024 Poster Anijam Project. It boils down to an exercise in morphing one image from Bill Plympton's poster into the next, with the universe at your feet for a roadmap. Here is a rough "pencil test" example on my blog - <https://animatingapothecary.blogspot.com/2024/07/post-683-another-concurrent-exercise.html>

1. Submit the graphic files (or even a complete mp4/avi if you are so inclined, but certainly not necessary) to jim.middletonrx@gmail.com - a dropbox file is being created as well, if your images are too much for your server - details on that in a future email.

2. I'm looking at an October 1, 2024 deadline to give me time to stitch things together for the IAD itself.

3. The image files here are in the standard 1920x1080 size, so if you could keep your work in that frame size, that'd be fantastic. Otherwise, I'll be converting the images to that size and that may put a warp to your original intent. Fair warning!

4. I should be able to handle the type of file you provide (ie jpg, png, etc), but would prefer jpg at this point.

5. The image process - Start with one image and migrate into the next. How you get there and how many frames you take is up to you. I usually set my editor for creating an "on-tvos" sort of animation.

6. Put your initials as part of your files, too, along with an identifier of the segment, "ie - JM1-2segment.jpg" I'll be building folders for each submission to keep track with them at this end.

7. If your contribution is very brief (10-12 drawings, for example), I will probably stretch things out and do a *Man Who Planted Trees* type of dissolve between them, so viewers can fully view and appreciate your astonishing visual acumen..

8. Let me know how you want your name to appear at the conclusion of this opus. I don't want to sabotage any witness relocation programs.

ASIFA

INTERNATIONAL ANIMATION DAY

2024

*In the Meantime, In Between Time,
Ain't We Got ASIFA Coffee!
July 3rd Edition
yr hmblypst at the keyboard*

Some of the rowdies who gathered on July 3 - Michael Long, YrHmblypst, Deanna Morse, Kobi Wright, David Thrasher, Jane Flint, Vivi Markatos, Chris Sullivan - not pictured, but with palpable enthusiasm were Orrin Scott from the SAS in AUSTRALIA, and Bob Swieringa, still the TALLEST ANIMATOR IN MICHIGAN!

A new membership prospect, primed for corruption by this insidious lot, was impressionable Kobi Wright, a recent grad from GVSU, and a fan of impressionism, and that was just our impression, as he gave us no impressions, but he could do a good impression of a recent grad from GVSU. A recent grad fluent in Japanese! Five years! Anime-zing! Bring on *Blue Robot Cat*!!!

+ *The existing collective failed to frighten him away, and he happily joined into the fray.* + Animation is like that. More hands in the pie doesn't make less pie, just more meringue (and nobody has any idea what that even means).

OK, the Celsius is wearing off. Here's what really transpired, only slightly less surreal than what just happened in the previous paragraphs.

News around the coffee urn:

18 submissions thus far for the IAD celebration on FilmFreeway.

Jane Flint stated she is "sort of retired." HA! It's in *your blood*, your *very soul*! *Animators never retire - they just shoot on fours and fix it in post!*

Vivi Markatos is now a solid part of the British mainland - she and her fiancé are *with house!*

Oh the pitty-pat of little mortgage payments. She continues to do a *lot* of work for her homeland county, Greece, but expects her 90 minutes from London will bring more anglophillic activity. She is looking to enhance her sketchability with retro animated characters (thinking of *Pink Panther* and *Gerald McBoing Boing* as retro brings a chill to the caffeinated boomers)

Chris Sullivan expects to have *Orbits of Minor Satellites* set for release in time for the ASIFA Central retreat in 2025. A delicious expectation. He also suggests exploring *Robot Dreams*, *Flow*, and *Away*.

藤子・F・不二雄

Chris is also experimenting with midi and mic-based electronic sounds using a bit of new technology- *Nightsky* - that actually sports KNOBS! (But can it dial up to "11"?) Deanna Morse has been making the international circuits, reporting that India's *Sultana's Dream* and Adam Elliot's *Memoir of a Snail* were particular favorites at Annecy this past season.

Bri Yarhouse reports that *Animators for Peace* is working on 8-30 second pieces for an international project. More on that to come!

Also, programs are in development to create tighter communication among the ASIFA chapters in the US with the hopes of establishing cross-platform membership benefits. This is in its neophyte stage of implementation after several years of discussion. As part of this expansion, asifa.net is in the process of re-opening member profile bios. There have been some challenges in the wordpress platform for user access recently (gee-yr hmblytst is talking about his Bolex 160 super 8mm macrozoom, in his bio there - yeah, time for an update)

Richard Williams' *Animation Survival Kit* book now has an app, and his accompanying 16 DVD disc set is appearing in online sales sites (at a substantially lower price).

Vivi's new neighbors - but her plumbing is much nicer

Jane Flint brought up *Night Is Short, Walk On Girl*'s Japanese theatrical release poster with the name *Kanji*, and the literal meaning being, *The night is but short, so walk on, maiden*. The things one loses in translation. (director Masaaki Yuasa also created *Mind Game* and *Adventure Time*'s "Food Chain") A comedy about one epic night in Kyoto, where a sophomore known only as "The Girl with Black Hair" experiences a series of surreal encounters with the local nightlife; the director also created the film *Transcriptions* and *Tatemi Galaxy*, which is on the tubes of you:

<https://www.youtube.com/watch?v=kq7O6eR12oM>

Chris Sullivan also presented the group with Alan Kwan, amazing game developer, animator, and technologist -

<https://www.kwanalan.com/>

Deanna Morse also has a new website! www.deannamorse.com - And the film by Deanna, Suzanne Zack, with animation by yr hmblytst is on vimeo: <https://vimeo.com/951382514>

Piotr Kardas has completed this year's O!PLA from Poland, another great feature for IAD

And then the coffee ran out!!! Until August!!!

Analytical and Articulatory Animation Analyses

Supplement to ASIFA Central Newsletter Series - July 2024

Animated Thoughts: What I've been watching this season

By Charles Wilson

<https://smudgeanimation.blogspot.com>

As time marches on, I've been watching more and more Anime television series. Personally, I find that a lot of the stories are more engaging for people in my "middle-age" demographic. Fortunately though, we have been seeing an uptick in animated shows geared for the more mature viewer here in the States, mostly through streaming services like Netflix and Amazon Prime (see: *Invincible*, *Critical Role*, and *Love, Death & Robots*). However, I do still see us walking a long road before we witness Brad Bird's view of animation fully realized in the American consciousness as it appears to have already done so in Japan. As Mr. Bird so eloquently said back in 2015: "Animation is an art form and it can do any genre"--including stories for the middle-aged crowd.

Hence, my watching a lot of Anime. Of course, Anime is not immune to the overuse of certain tropes, like "the harem/reverse harem". And everyone chases trends. Here in the States, it's been "superheroes" for quite a while. In Japan, "the overpowered protagonist who wakes up in an alternate world" continues to be all the rage. Now don't get me wrong, some of the shows with those tropes and trends can work and can work pretty well--see: *Is it Wrong to try to Pick Up Girls in a Dungeon?* (both the *Familia Myth* and *Sword Oratoria* storylines), the *Sword Art Online*/*Gun Gale Online* series and movies, or the "Certain" series: *A Certain Magical Index*, *A Certain Scientific Railgun*, and *A Certain Scientific Accelerator*. But from time-to-time you do get the feeling of "been-there, done-that."

More often than not, before every season starts I'll make a list of six or seven shows that I want to take a look at and see if they're worth following through to completion. My plan allows for viewing the first two (maybe three) episodes to see if they're worth my time and the list gets culled as the season progresses.

I have to say: this past season had some pretty solid entries into the market. I ended up paring my list down from

around ten to five--though of those ten, there are two that I do plan on going back and finishing later this year.

The series on my 'must see' list ended up being: *Train to the End of the World*, *HIGHSPEED Etoile*, *Kaiju No. 8*, and *BARTENDER Glass of God* (all streamed on Crunchyroll) and *Delicious in Dungeon* (streamed on Netflix). The two "honorable mentions" that I plan on finishing were *A Sign of Affection* and *Obsolete*--though both of those shows were from prior

seasons, streamed on Crunchyroll and YouTube respectively.

<https://youtu.be/f244r8O8HgY>

Train to the End of the World Now you might think from the trailer that this is one of those stereotypical 'cute girls doing cute things' Anime. Well, you'd be wrong! From the opening sequences, this Anime takes a hard left turn into the surreal. The whole story follows four girls (and their dog) as they take a train from their home town all the way to Ikebukuro in order to find one of their missing friends.

The catch here is that the entire world has gone crazy due to the implementation of "7G" wireless connectivity. But the girls are determined and hijinks ensue at every stop on the way. Now while the banter is entertaining, as is the trouble the girls find themselves in, it's the attention to facial expressions and body language, the "acting", that really makes the series work for me. No matter what challenges they face, they never cease to behave like teenage girls who are at that midpoint between childhood and maturity. And when faced with a bizarre landscape (which they'd been dealing with for two years by the time they decide to make their trek) that is filled with equally bizarre perils, over and over it's their friendship that carries them through to the end. It reminded me of the "Certain" series in that regard: kids that are thrust into an adult world, who have to solve more-or-less adult problems. But they solve those problems as you expect a child (or teenager) would, not in the manner that an adult would--even though they're trying their hardest to act mature at the time.

All-in-all, I found it to be a fun, thoroughly quirky show. From the start, you never really doubted what would happen by the end of the last episode, but it was an enjoyable journey to take. Do be warned though, it does get a little silly and a little cheeky in some spots so I wouldn't let little kids watch it.

YouTube Trailer for *HIGH SPEED Etoile*
<https://youtu.be/yqp1raJNIOo>

I don't like watching sports. Never have. Don't like playing them either, though I guess I can see the appeal of playing sports... kind of. But it holds no interest for me for various reasons not really relevant to this post. Now sports movies? Well those I find rather engaging. I thoroughly enjoyed the live-action car racing movie *Gran Turismo* (based upon the true story of a videogame/simulator and aspiring race car driver Jann Mardenborough)--enjoyed it so much I watched it twice. *HIGH SPEED Etoile* was another one of those entries. The initial premise was recycled: a ballerina who was sidelined by an injury gets involved in racing instead--same premise as in the Anime *Rideback* from back in 2009. The main characters from both series even have the same name. But this time it is racing in a future where a new power source allows race cars to propel themselves at a level of speed and skill never seen before. Other sci-fi tropes integrated into the show have a number of the race cars enhanced by AI as well as hologram announcers at the racetracks, a-la Vocaloids. This appears to be a 3d CGI animated show with 2d cel-shaded rendering. The character animation is pretty stiff but the racing sequences are very realistic--I mean, as realistic as they were in the live-action movie *Speed Racer*. Perhaps "well done" would be a better choice of words. What attracted me to this show is that Rin is not automatically good at the task she's presented with, unlike so many modern (boring) stories nowadays. No, Rin's performance behind the wheel evolves over time as it builds upon her athleticism and coordination from years of studying ballet. And while she does come off as a bit ditz and clueless, as the show progresses, she grows as a

character and loses her naiveté. Some folks might not say that this is a "must watch" show, but it "is" another fun ride. If you liked the Emile Hirsch version of *Speed Racer*, you'll probably enjoy this series.

YouTube trailer for *Kaiju No. 8*:
<https://youtu.be/JwF7bhvnCxI>

Kaiju No. 8 wasn't what I expected given that it was produced by Production IG, the powerhouse that brought us *Ghost in the Shell*. There ended up being a bit of zaniness in *Kaiju No. 8* that I found a bit off-putting. I went in expecting a serious look at a world beset by giant monsters hell-bent on destruction and the people who stood in their way--including the para-military force that destroys them and most importantly, the crews of workers that have to clean up the aftermath (and carcasses) of the Kaiju. This show struck me as something that Studio Trigger would release as visually and performance-wise it had more in common with *Kill la Kill* or *Gurren Lagaan* than *Ghost in the Shell*. I almost stopped watching three episodes in, but stuck it out and *Kaiju No.8* ended up being worth the time spent. This is a show with some great action sequences and the story ends up being one with a lot of heart as it follows a middle-aged Kaiju disposal worker in his attempts to live out his dream of becoming a member of the Anti-Kaiju Security Force. In the end, despite the show's occasional over exaggeration of Kafka Hibino's performance I found myself rooting for Kafka and looking forward to the second season.

YouTube trailer for *BARTENDER Glass of God*:
<https://youtu.be/--yeqMISgEM>

Bartender Glass of God is one of those shows that is a slow burn. The pacing is relaxed yet there is an underlying tension to the story. The characters and their motivations are revealed across the series--much like watching a slow-motion video of a flower blooming. It's honestly a very meditative show to watch. The story follows Ryū Sasakura, a bartender who is on a quest to mix the "Glass of God"--meaning: that perfect drink for each of his customers. The conflict comes from a hotel owner who wants him to work at his high-end hotel instead of at the bar where Ryū currently resides. And there are minor conflicts among the side characters that only serve to reveal more and more about Ryū's character and history. This show is a reboot from 2006's *Bartender*. I'm not sure if I like this series as much as the first one from 2006, but I would definitely say I like them both, just for different reasons.

YouTube trailer for *Delicious in Dungeon*:
<https://youtu.be/n5JEoD7keVo>

Now *Delicious in Dungeon* is the show I've been waiting for. I've been following the manga ever since I discovered it during a break from watching (and reading) *Isekai Shokudō*--or in English: *Restaurant to Another World*. Setting aside the fact that *Isekai Shokudō* is on my "must see" list of Anime, I learned about *Delicious in Dungeon* (Japanese title: *Dungeon Meishi*) when I saw it on the bookshelf while looking for the latest manga and light novel translations of *Restaurant to Another World*. I tried it on for size, as it looked interesting, and I was not disappointed. The story follows a number of adventurers who are trying to rescue (resurrect) one of their friends who got eaten by a red dragon at the lower levels of this magical dungeon. But with little money to work with, they are faced with the prospect of never seeing their friend again or being forced to eat the monsters they kill in order to survive the expedition. Like what the trailer suggests, this show is nice and kooky. If you're into cooking shows and Dungeons & Dragons (as I am), you'll find this a fun romp--especially when you find yourself searching out a number of YouTubers who have made recipes similar to the ones in the show. A word of warning though: while this show is

very fun and looks lighthearted, as the story progresses it does get pretty deep and mysterious. There's a lot of meat there, so if you're expecting something light and fluffy from beginning to end, you might want to look elsewhere. It's a 24 episode run on Netflix and, in my opinion, is well worth the time spent. I've watched both the English sub and English dub episodes several times. I can recommend both. And if you have a minute or two to spare, I highly recommend the original animated music video made by Bump of Chicken for the song *Sleep Walking Orchestra*, which was used for the show's opening title sequence. YouTube link for *Sleep Walking Orchestra* music video: <https://youtu.be/RqooLet7B2Q>
 Well, the season draws to a close and there's only one episode of *Bartender Glass of God* left for me to watch. Then once again I'll be pawing through lists of seasonal shows on Crunchyroll, Amazon Prime, Netflix, HBO Max, and Hulu as I look for those shows that not only pique my interest but hopefully become one of the rare gems that adorn my DVD collection.

Epigram: Oh the Bandwidth, the Bandwidth!

A SPECIAL, INCREDIBLE OFFER FROM THE GANG AT ASIFA-SAN FRANCISCO

ASIFA-SF, among the many chapters of *Association Internationale du Film d'Animation*, had hopes for a rebound with live events once the CoVid threat had passed, but according to its newsletter editor, Karl Cohen, “that isn’t happening yet.” To emphasize the sincerity of their convictions, they have added this notice in their October newsletter, requesting me to share with our members:

TO KEEP OUR CHAPTER ALIVE, WE NEED TO FIND VOLUNTEERS TO DEVELOP LIVE AND/OR ONLINE PROGRAMS – UNTIL THAT HAPPENS WE ARE OFFERING FREE MEMBERSHIPS – NEW MEMBERS WANTED, SIGN UP AND RECEIVE FREE ISSUES OF OUR NEWSLETTER AND TO WHATEVER AREA SCREENINGS ASIFA-SF MEMBERS GET INVITED TO.

Contact karlcohen@earthlink.net and get your name on his monthly digital tome - often running over 20 pages (yr hmb1 typst is honored to be among his proofreaders). Karl has connections *and stories*. He is author of *Forbidden Animation*, a frequent contributor to *Animation* magazine, the recipient of the ASIFA International Prize in 2008, and is nearing completion of a sweeping history of the societal impact of animation.

September Retreat Deconstruction - *My Love Affair with Marriage* - Virtual Meet with Signe Baumann - Fun with Beans, the Musical Fruit!

Signe Baumann, at work *and* play

A fitful schedule emerged for the ASIFA Central autumn retreat this year, in its somewhat truncated one-day form, amid the fluid and frantic collection of personal and professional agendas. The use of “Central” in our name had been a challenge in the past, having some members believe that the times in the program were also “central time,” so after a sage smudge to clear the air, the schedule was adjusted to reflect that perception. However, that led to further confusion. It was much like a Photoshop tutorial, but eventually 11am EST (10am CST, 8am PST) arrived, right on time, on Saturday, September 7. Julie Goldstein, chapter president, provided the Zoom platform, yr hmb1 typst provided his usual technical difficulties. No animators were harmed in the production of this retreat, and nobody caught digital CoVid, because you know, a screen is a terrible thing to waste.

The fully charged retreat began with some updates on the direction for the ASIFA International website, undergoing overdue revision to permit membership updates of personal biographies, to the IAD “Anijam project” making use of the ebullient poster by Bill Plympton, to progress overviews from Jim Middleton (his *Sfumata* series), Chris Sullivan (*The Orbit of Minor Satellites*, eta 2025), the breathless sabbatical of Steve Leeper (the Baltics are still a-quiver at the hands-on experiences, and Texas will never be the same after its experience with his

Wave Study - Sfumato #2

Saddle up your zoetrope, pardes...

cage-free zoetrope), and Chuck Wilson’s search for historic animation on Youtube, with stunning examples from the mid-1930s to late 20th century Hanna-Barbara segments that likely met with Ralph Bakshi at a very close family reunion (*Rock Odyssey*!?! - insert dropped jaw here).

Oh the bandwidth, the bandwidth.

The featured presentation began at noon, and we discovered NOON, *not* 12:01pm, of Signe Bauman’s second feature, *My Love Affair with Marriage*, streamed on Kinema.. In Fleischer-esque 2D/3D style, it was and remains a 90 minute ocular and auditory feast and educational sensation – where *Biology* becomes not just a subplot, but a major character. It is now available at Amazon and other retail sources, and is well worth to embrace as a great, tangible asset to one’s collection.

After that 90 minutes, an additional 23 minute interview with Signe Bauman was Zoomed into our memories, recorded and edited a week before by yr hmbl typst (Ms. Bauman was a guest at a film festival in Guadalajara that weekend). She discussed the value of her primary college training in philosophy, her thoughts on sound layering, the importance of collaboration, and how Karma makes us do “the same stupid shit until you learn your lesson.” She also promised the interviewer that she wouldn’t clean off her desk, ever.

Orbit of Minor Satellites, expected in 2025

Rock Odyssey 1987 - HB

Then came the beans – raw, uncooked, dry, roly-polly, slide-under-the-desk-until-the-next-vacuum-experience *beans*. Beans became the food during the pandemic to hoard, because, well, you’ll always have *something* to eat if you have a cupboard stuffed with dried beans.

So the beans were brought out into the fresh air, or at least the different air of the various participants, and used to blend one image to the next of Bill Plympton’s majestic poster, conveniently configured to resemble a pre-built storyboard. Everyone proved by the end that they knew

their beans, or in the case of *International ASIFA President* Deanna Morse, that Skittles make not only a reasonable substitute, but also a rather convincing rainbow soup.

Of course the footage will be incorporated into the ever-evolving IAD “Anijam Project” because, as you’ll learn in the later segment on OIAF, it’s important for independent animators to make as much multiple use out of their efforts as possible! The infamous ASIFA Central Retreat Cake was no exception.

There was an ongoing chat throughout the Zoomerific afternoon, with various highlighted links hereby affixed for your viewing pleasure, and the final red button was pushed at 6pm, EST.

OTTAWA INTERNATIONAL ANIMATION FESTIVAL - 2024

Short and Sweet - or was it Better Living Through Coffee Crisp?

Yr Hmbl Typst Took Notes

While assembling my box of notes, business cards, pumpkin seeds, and bits of ephemera from this past September's adventure, I found some observations I made in 2008, for nobody in particular, after nearly a decade's absence to the autumnal celebration known as OIAF. I was obviously hankering for some overdue (but never overdone) poutine:

September, 2008: Once a year, I am physically moved to a foreign land of ambulating masses, where the most revolutionary of gothic jaywalkers performs her disobedience with civility, and where the creamy foam head of a Guinness pint is measured in centimeters.

Aside from my home base of Battle Creek², I have spent more time in Ottawa in the past than practically any other city on this planet. I find myself giving directions to places along Elgin Street, knowing the hours of the Rideau Centre, and even knowing that Centre is French for Center.

The draw has never been Parliament, although their sessions are lively and drip in delicious sarcasm, and while the museums are striking and the scenery evocative of lost forests in central Europe, what pulls me to the most civilized of North American capitolis is the OIAF. Some of this is purely force of habit: before video and DVD, and even before KAFP³, the OIAF is where you had to go to see international animation on a large screen, or absorb the latest 90-second test film from that upstart bunch at Pixar. Even once the novelty was diluted by the expanding availability of animation on video and cable, there remained the sense of community-- first of old-school animators, then of increasingly-earnest aficionados. And now of a new generation, able to create and share their work quickly and electronically, can converge and experience what the internet can only emulate--human contact.

² this was prior to relocating to the land where once trod the teenaged feet of Winsor McCay

³ Another mythic incantation from the past, akin to *Camelot*

Chris Robinson has grown into his role as master of these ceremonies, from his hesitant and seemingly hostile beginnings to that of – dare one use the word congenial? – young fogey who delights in the occasional outrage while poking at the perimeter of propriety. He certainly seems to be using his time efficiently while on his ship of state – this visit served to premiere not one, but two books on animation (a biography of the late Ryan Larkin and a collection of interviews with Canadian animators).

*To this setting, this sense of community, and its inherent enthusiasm, add a series of astonishing films and programs. This OIAF was a case of delicious sensory overloads. The feature films in competition included two created in Flash– *Waltz with Bashir*, a blend of documentary and *Apocalypse Now* surrealism by Ari Folman, and the astonishing *Sita Sings the Blues*, presented in multiple stylistic forms by Nina Paley, who bankrupted herself to create this five year labor of love.*

*The short films ranged from the stark *Dark Years* to the utterly giddy *Lollypop* to the bloodfest *Super Jail*. I made it to five sets of films, with only moderately overpriced popcorn and soda, and generally great weather for the walk between theaters. Even the picnic, with its ritualized pumpkin carving competition, left participants unscathed and provided winners with prizes that will likely show up on Ebay.*

Morning meetings with the animators became increasingly bleary-eyed as the festival continued, catalyzed by late screenings and parties. “War stories” of producers and educators continued on panels ranging from animation software to curricula, culminating in an evening with Richard Williams moderated by John Canemaker, in itself worth the journey to Canada (I am so petitioning my school to get the DVD series by Williams, budgets be hanged!). And in a performance redefining old-school techniques, Daniel Barrow related his life in manually-moved overheads, creating a 19th century animated magic lantern show.

Concerns surrounding sliced budgets have made the OIAF subject to the generosity of strangers, but this year remained a celebration. Let’s hope for more projected light from Canada in 2009.

Richard Williams - John Canemaker - OIAF 2008

Ottawa may have gotten a bit rougher around the edges in the years since I wrote those addled observations (blame the Guinness, blame the poutine), even encroaching on memories with its vigorous construction, displaced tragedies in human form, and the visible castings due to the global pandemic of drug addiction. But Canada’s capital offers a more peaceful walk than many places I’ve nervously trod in Battle Creek, Kalamazoo, or Grand Rapids. I could likely become *vanished* in warmer climes, or among the uncivil illiterate with bipedal ambulation, but in Ottawa, I always feel that someone would help, or at least bother to track down my family, confirm my blood type, or identify the location of a lifetime of scars and scares.

To *that* delightful bit of retirement-driven gloom, I do a complete 180 segue to -

McGee’s Inn - 185 Daly Avenue

This was an inadvertent discovery, a rather⁵ upscale BnB just up the hill from the Bytowne Theatre. Also inadvertent was the booking of Room 13, “The Egyptian,” likely a honeymoon getaway (and the only one available for four continuous evenings), although following a Stephen King numerology, and certainly appropriate for more gothic ceremonies. The breakfasts - superb, the decor of antiques – impeccable

⁴ Today, the response is “DVD? Whuzzat?”

⁵ Understatement of the century, any century

(OM triple G, is that typewriter an *Underwood*?), and the Divine Goddess of Edmore⁶ demands a tribute of each specimen of wallpaper from that structure.

The Panel Discussions

Advice from Animators - "Alive to '25" with AI Concerns

Chris Rutledge, Jose Pou, Alison Mann (she rescues seals!!), Sam Gurry, Hana Schnogger gathered together to offer early-risers advice and some comfort in the face of AI. Some take-aways:

Remember to make your content creation important to you. Jose Pou is not fearful, he used to use *paper* (gasp!) - and still does!

Consider the industry as a moving ocean, with its ebb and flow within the business cycle

AI cannot create something from nothing, it can only recycle what is already there, but in the meantime, grind out all of those bad ideas and drawings. AI is a joyless entity.

Find your own niche - or just create a new niche. Find the synergy of moving between commercial and personal projects (adapt one to the other, moving both forward, shoehorn one into the other).

Get random supplies from Michaels and do something with them for four to five hours - balance your brilliance with the bills, live life, and always set boundaries on your job.

Play with a cat, even if it's not your own. Draw drunk octopii.

Don't procrastinate with perfection, *finish something*. Do a lot of quick little things daily that can build a creative momentum. Talk to others. And listen in return.

With AI, remember that in the 19th century, photography was supposed to be

Communicating with Montreal Natives while in Canada

yr huml typst was finally able to try this

I used to amuse a dear, departed friend from the CBC, Claude LaPierre, with my abysmal high school French. I think I actually ordered a fried tractor while with him at a restaurant. They substituted sliced squid. The effect was the same.

However, he and I came up with this little apology for the folks in Montreal or Quebec, and I finally had the chance to use it on a couple visiting McGee's Inn during this visit to Ottawa. They spoke no English, and I recited this to them:

"Je peux parler francais un peu. Un petit peu. Tres petit peu. En effet, il n'y a pas les lignes assez proches sur un règle qui peut montrer comme petit peux je peux parlais francais." They both laughed, and we spent the remaining early morning hours impersonating Marcel Marceau trying to figure out the mysteries of the Keurig machine in the main dining room.

"I speak a little French. A very little. Very, very little. In fact, there aren't two lines on a ruler close enough to show how little I speak French."

⁶ That would be my dear wife Anne, without whom spring would never arrive on time, and the resulting potato famine would rival anything in the history of Erin.

the death of art - impressionism was the response

Don't wait for a studio for validation - people with the money make one dumb decision after another, which explains the general quality of Hallmark Holiday movie scripts

Decentralized production is possible (see the movie *Flow* for confirmation)

Use networking to enhance a personal project - "improve the diet of mainstream media"

Remember - the brilliant animator Mary Beams ran a pie shop between her films. So MAKE PIE.

And the toughest - Learn to say No. Do things you want on your own time and dollar - expect huge payment projects if they demand huge parts of your time. Don't be dragged down by little projects that take too much time for little artistic or compensatory satisfaction.

The Pixar *SELF* - Creating a short film About Self-Sabotage

Aubrey Mintz (ASIFA Hollywood's tallest member and most recent US citizen) and Searit Huluf hosted the discussion surrounding this incredibly detailed and exhaustively researched example of self-sabotage in order to "fit in." What do we lose in the process, what do we hide, and is it ultimately necessary to completely subdue our *raison d'être* in a society? And, frankly, isn't it more fun to have societies with new stories? Take *that*, AI!

It amazed me that, in 1986, we saw John Lasseter run *Luxo Jr* in this same building, convinced it was stop motion, and after we saw the computerized wire-frames and the rendering processes, were completely flabbergasted - we ran out of gasts, and our minds were broken. Here, we watched *Self* (also currently showing on *Disney+*), where an actual stop motion puppet was created and animated, to be integrated among computer-generated characters, and we thought the stop motion character was computer generated. Our minds were thus broken twice at Ottawa, and we all need another box of gasts. Make mine a double.

Searit Huluf's hair was the model for the *Self* character following a 3D print and scan of her coiffure. We also learned of a digital "back lot" at Pixar, so large that the backgrounds in *Self* were already from an existing library. Look closely, you'll see buildings from *Up* and *Soul*.

"We wanted her to carry the reminder of what she decided to abandon to fit in," we heard; therefore, her broken, elaborately carved and researched puppet face carried the cracks of her own self sabotage.

It was also noted that, while *Self* was the first Black character in a Pixar short, it was only as a puppet. Big budgets, baby steps.

Navigating Production Pipelines with Alison Mann and David Sharples

Alison found her background as a rescuer of seals was an "in" during her interview, and now she is in Creative Recruiting. She confessed that her early dream job was to have a food truck for vegan hot dogs called "Bite Me." Her subsequent maneuvering through the industry has helped her become the "Kevin Bacon" of Animation - with connections and digital Rolodex files to prove it. She likes to use the improv method of "yes, and..." ...and never lead your answer with "no." You're an artist - be creative. Both she and David Sharples had some talking points to share, to wit:

Aubrey Mintz (even tall when sitting) and Searit Huluf

- Γ Discover your creative voice. Get a vision board for yourself - pitch to yourself - consider what you do, what you say, your point of view, and your audience and direction. Write what you know - and learn what you need to know.
- Γ Discover first who you are and what do you want - don't do a flood of applications - don't become an *actual* imposter amid applicants who fret about having "imposter syndrome." If you're stuck on an island, what will fill your bucket.
- Γ Learn the basics of pre- and post-production, and understand that the actual production is most often overseas.
- Γ Edit your portfolio to your job - if you don't, the recruiters will remember, and often (with Alison, anyway) three strikes and you're out.
- Γ If you are given suggestions, use the advice. Edit your curation. The target is your job.
- Γ Recruiting is active, by referral, or passive (the recruiter recruits, mainly to see who's likely interested).. "Evergreen positions" are those to see who could "fill the bucket" - and they may not necessarily be open. And when in doubt, go to the source of your ultimate destination without slogging through their online sites - According to this presentation, "75% of jobs available are not advertised." (It is interesting to note that at the Animation "Expose", the US production houses were conspicuously absent) (not Alison's or David's observation - just something we observed later that afternoon!)
- Γ If you like a film, note the artists in the credits - reach out to them - build a network and someone will eventually bite and be worth your time. (Personal note - animators like to know that someone appreciates their work - and most often they'll be stunningly generous with suggestions and their time when they can be. Experience matters, and they can help you avoid a lot of pratfalls - leave that slapstick for your animation!)
- Γ Interview with the *mirror technique* - even sitting in the same position as the interviewer can leave a subconscious impression ("gee, there's something about this kid that I like; I almost feel like I'm talking with myself").
- Γ Think of questions that are specific to the job you're applying for. Be interesting and interested in a Zoom meeting.
- Γ "Next steps" – always ask this at the end of the interview, ie, "What happens next? Do I need to leave a blood sample? (Joke)"
- Γ Remember you don't have to take an offered position, "there's always a crappy job that you'll like somewhere" in the meantime. (4.1% unemployment right now, but that's genre specific).
- Γ ***Follow up with thanks, be short and memorable, provide contact information, and always presume good intentions. Post-encounter snarks are remembered. And not in a good way.***

Alison Mann offers a recruitment program involving badges, without seals, as she saves those, while David Sharples shares his 20+ years of experience in discovering your motivating animus.

"Alive to 25" as an employment mantra? Well, with this guidance, it may be more like "2027." Although my pressing question throughout the presentation was wondering about the mid-century (aka "the 1950s") style graphics in the powerpoint made me wonder if they were just recruiting for a *Jetson's* reboot.

The reason we care - Leyla, Nicholas, and Rachel from Algonquin college are the future faces for the profession

The Picnic, and of course

*And Theatre Goers - Animation Absorbent Artists, All! I see Candy
Kugel hiding there, somewhere – Peek-a-boo!*

The Actual Films at OIAF

Oh? There were movies, too?!
A little sample of The Wares

Flow, the second feature from *Latvian wunderkind* Gints Zibalodis, took the deserved laurels for best feature this year. Its 84 minutes represents an “important fable on the power of camaraderie during times of cataclysmic ruin.” There is no princess singing for a savior prince, no dancing mice, no talking donkey, yet every eye

in the theatre was fixated on this constantly moving tale of an unexplained world without humans. Only the ruins of landscape ravaged by a mysterious, monstrous tide exist here, with animals, wild and domestic, intuitively linked for survival. And a capybara! It has a capybara!

Gianluigi Toccafondo’s *La Voix des Sirenes* was awarded best short film. It is a dreamy assembly of poster-painted rotoscopish scenes featuring the consequences of responding to the come-hither song of mermaids that aren’t part of Disney’s fresh-water pools. *The jaws that bite! The teeth that catch!*

Stampfer Dreams was a “pre-cinema found footage” film by ASIFA International General Secretary Thomas Renoldner, making use of animated phenakistascopic imagery by scientist Simon Stampfer, ca 1833. It arrived at OIAF with a Magic Book of Optical Wonders version that can use the phone-app called *ARTIVIVE*. At last – some fun augmented reality that can make phenakistascopes spin! Oh to be augmented, now that autumn is approaching...

The trailer for the film version is at <https://vurchel.com/v/31515/thomas-renoldner> and the book is still listed at the Aniboutique at <https://www.aniboutique.ca/products/stampfer-dreams-by-thomas-renoldner> - Just in time for the Holidaze!!!

You can flip, or you can snap-crackle-pop!

Discovery - Canadians Have a “Michigan Good-Bye,” Too!

Your humble typst was delighted to encounter James Murray (<https://jamesmurray.tv>) at the ASIFA International meeting. He was seeking to rejuvenate the ASIFA Canada chapter in the land of its nativity. He’s an artist, an actor, and a creator of flip books made from the cardboard of cereal boxes, in a conservation process he called “upcycling.” To

A perfect fit!

complete the effect, he packs the flip books *into discarded DVD cases*. Our conversation went from topic A to Zed and back again, twice, with three goodbyes, and finally a capitulation to our social upbringing with a quick dinner, and then -- another series of Midwesternesque good-byes! It happens in Canada too! If he can assemble nine other prospects, we may soon see an ASIFA Canada chapter in North America!

Our Interlochen Dinner with Bri Yarhouse - The Artists of Tomorrow, TODAY!

Interlochen, in Michigan's northern lower peninsula, offers students a complete high school experience in addition to its summer camp with the arts (<https://explore.interlochen.org>). ASIFA Central Treasurer and IAD maven Bri Yarhouse has added animation to their program, and this is the second year she has been able to bring some of her students along to experience OIAF. They are certainly a talented, enthusiastic, artistic and extremely animated collection of masterpieces in human form, interested in everything, curious about demystifying the chaos, and even tolerant of old animators waxing poetic about the aroma of 8mm Kodachrome fresh from the box. They are also quite fond of chicken strips, with ketchup, yet never seem to get any on their clothes. An amazing bunch of students! In attendance at this final night of OIAF were:

Gary Schwartz and Deanna Morse

Jose Pou, Brooke Keesling, Gary Schwartz

Corrie Francis Parks & Daniel Nuderscher

A Sketch by Cat

All very demure, very mindful, very cutesy - L-R - genius instructor, Gary peeking over Deanna, Jose, Brooke, not Cat, Cat, Oliver behind a good witch, not Cat, Bri, Corrie, not Cat - the advantage of being yr hmbl typst and editor is being able to maintain one's cloak of invisibility! Hee!

Cat discusses color theory and fluid dynamics

And for a final, if not most important, observation about the OIAF: for those tracking “steps” these days, it is quite easy to manage 5-7 miles per day perambulating about Ottawa. Well, perhaps *easy* isn’t the right word, more like *inevitable*. For future visits, pack your acetaminophen (*paracetamol* if you’re feeling cosmopolitan)!

Leah Ordonia with her bundle of woofie cuteness (<https://www.leahighlights.com>), yr hmb1 typst (ok, not so invisible, but weighed down by a bag of books), and the insanely busy Tracy Miller-Robbins of Ohio (<http://www.tracymillerrobbins.com>)

Of course this only scratched the tip of the whole event - there were films to inspire, to perspire by, to eat popcorn to. And the “drink and draw” taught several lessons - namely, that the canned Gin Collins is a quick way to forget the name of the sandwich you had for dinner (a Reuben! And it was delicious!) and does nothing to help sketching from an upwardly-viewed perspective. But at least things were always looking up in Ottawa!

Future notes will appear as travel scribbles become deciphered, proof that writing in the dark has every drawback to it one can imagine (and that writing on one’s jeans remains indecipherable, regardless which hand is used).

But Coffee Crisp is ALWAYS worth weaving through jammed truck lanes to snag a Duty Free discount!

Coffee Crisp - It's What's for Dinner!

ANIMATION UNITES US

Opinions expressed in this newsletter are those of the hmb1 typst and do not necessarily reflect the thoughts, opinions, or policies of anyone anywhere else, and especially at ASIFA Central, which is a completely volunteer-run, non-profit gathering of very busy and frantic members moving at 24fps on a slow day, where vacations are when you shoot on twos.

Newsletter for November 2024

Featuring the
ASIFA Central IAD 2024

Three Main Courses *and* A Dessert

Long Program (entire listing, with intermission break)
89 minutes

* denotes **Short Program** - 58 minutes

** denotes **ASIFA Central Members/Students Reel** - 36 minutes
PLUS a **“Dessert Program”** - 6 more in 45 minutes

Nearly 600 submissions comprised the international participation in this year’s IAD. Over two dozen were selected for the ASIFA Central International showreel, with multiple program lengths based on educator needs or venue availability. Some notes on the films for 2024 follow. The reels will be available until the end of November, 2024. Just keep track on the attendance for the showing(s). No showing is “too small!!”

For access to the reels, contact yr humbl typst at jim.middletonrx@gmail.com

ASIFA
INTERNATIONAL ANIMATION DAY
2024

“Great job with the ANIJAM - Congratulations!” – Bill Plympton, this year’s poster designer

1. **Flintmation II** - Gary Schwartz - ASIFA Central * ** “Desperately seeking a way to the other side of the cathode ray tube since 1961. A hunter/gatherer ethos of kinetic transmutation with found, forgotten & rejected artifacts.” Gary held a stop motion workshop in Flint, and so he deciphered not only the proper lip synch but *also* found out the actual words to a bit of the theme that has been indecipherable for 60 years - “courtesy of Fred’s two feet”

Flintmation II in progress

2. **Practice Makes Practice** - Jeff Scher - ASIFA East - Says Mr. Scher, it is “a celebration of horsing around on paper.” Jeff Scher is an Emmy-award winning animator with work in the permanent collection of numerous museums, including the Museum of Modern Art, The Harvard Film Archive, the Centre Pompidou, the Austrian National Film Archive, and has made commissioned work for *The New Yorker*, IFC, HBO, PBS, the Sundance Channel with a side hustle of music videos for Bob Dylan, Graham Nash, Joan Baez, Paul Simon and others. When not repurposing his volumes of sketches, he teaches animation at New York University, Tisch school of the Arts (bio from their website).

3. **Little Fan** - Sveta Yuferova - Germany * - Sveta was born in Saint Petersburg and finished her schooling there. After successfully graduating from the St. Petersburg University of Technology and Design she moved to Germany with her love for animation and storytelling. There she had the chance to study at the Filmakademie Baden-Württemberg and the Animation Mentor Online School.

The thought that objects could possess feelings has always fascinated Sveta. Her tale of a tiny fan playing with a feather became a reality with the ultimate question of *who* could be his best friend.

4. **The Seed** - Suresh Eriyat - India * - For the creators at India's Eeksaurus studio, a seed, or idea, may originate from you or be discovered by its clients. "Savour the joy of our creation, as we eagerly await your next brilliant idea to nurture and grow!" The stop motion clay animation, with digital augmentation, shows a process, but not necessarily their *only* process.

The Seed - E Studio

5. **Scrappy Little Festival Bumper Film** - CMU - Steve Leeper - ASIFA Central ** - Do you crave some zombie action in Bay City? Well, who doesn't? The Scrappy Little Festival gets a nudge from the class at CMU and also features variations on a square. Many squares.

6. **Letters to Pakkimentie** - Mika Koskinen - Finland - The story here is, "And the greatest of these is love." Director Koskinen's grandparents' letters and diaries create a dialogue spanning decades. Time passes and, eventually, the image of a bed taken away becomes a symbol for time and love lost. Seeking a use of family artifacts Can bring life to the contents of dusty boxes. Mika Koskinen previously created *Espresso Doppio* (2015) and *Crack* (2017).

Deanna Morse embodies "animated"

7. **Departure** - Deanna Morse - ASIFA Central * ** ASIFA International president Deanna has added to her time-lapse contemplation of the passages of nature through an interplay of light and shadow across objects rendered obsolete or simply exhausted.

8. **Skinny World** - Huaxy Yang - ASIFA China * - a three minute, two-dimensional experimental animation of the stream of consciousness, or, one gummy short of an ambulance ride. Huaxy Yang describes *SKINNY* as 'death, decadence, and decline,' and this plotless, short film uses a series of surrealistic shots to metaphorically depict urban social struggles.

Skinny World - sweet dreams!

9. **Bird Infestation** - Interlochen, Oliver Hale, Auteur and Animator, Bri Yarhouse, program director, ASIFA Central * ** Oliver Hale uses techniques learned at Interlochen to visualize a stream of consciousness poem, with a pattered pace for wry humor and subconscious communication. And there are *birds*!

10. **Retirement** - Sara Hanif - Iran via ASIFA East * An exhausted employee, weary of career and job, counts down the days until retirement and a dream of becoming a fisherman. The anticipation is agonizing and challenging, trapping him in a suspended world of torment and hardship. Here, Sara endeavors to "breathe life into unique stories and fantastical creatures through the art of storytelling, and craft narratives that captivate audiences and leave a lasting impression." *Retirement* served as her final project to complete her MFA in Animation at Tehran University of Art. She continues her studies at the Savannah College of Art and Design.

Retirement

11. **Under the Water** - Julia Orlik-Buratynska - Poland * - An imagined undersea mood piece, with tools available at Harbor Freight finding a new life and adventure with the miracle of stop-motion!

Under the Water - don't rust!

12. **Musical Interlude - Commissioned work** - Sparrow Middleton, Production (followed by a suggested *Intermission*, in long program Part A only) - in Edmore, Michigan, one does whatever Sparrow decrees. This year, she has expressed a fondness for the songbook of Nat King Cole and his 1940's Trio.

13. **Where is the "I" in ASIFA?** - ASIFA, Deanna Morse and Suzanne Zack, production and edit, with contributions from international membership ** We're a very active organization of right-brained individuals, and right-brained individuals aren't generally known for being all that organized! A Paradox! A Paradox! A most ingenious paradox! (*We've quips and quibbles heard in flocks, But none to beat this paradox!*)

14. **In Between** - Long Qin - ASIFA China * The film was inspired by the letters of Mr. Zhong Shuhe and Mr. Zhou Zuoren (Chinese writer and essayist, and his publisher), using a torch in the darkness to reveal the ordinary people who once illuminated civilization. Everyone is extraordinary, each one an athlete, but many never step beneath the spotlight; they are also worthy of respect. Those who nurture future generations engender the courage to fight in the face of danger (from the director's statement). Stop motion propels the vision through the darkness and into a brighter, unknown future.

Fierce education

15. **Place to Place** - Natasha Cánepa - Puerto Rico - ASIFA South- In this 2D short, a text from a lonely traveler pushes a group of friends from faraway places to reunite in support. Brightly colored, briskly paced, Ms Cánepa squeezes every aspect of character animation technique into her study of the unity of friendship. A graduate of Savannah, she is now an independent artist with a one-woman studio creating storyboards, illustrations, and aspects of post-production. Her hand-painted works depicting the vibrant lifestyle of Puerto Rico are sold under the name of Forever Boricua.

"When you see this film, I hope you capture its message and become inspired to get through the day until you see your loved ones in person again."

16. **Hypnhadiqa** - Chris Sagovac - ASIFA Central * ** *Hypn: Sleep - Hadiqa: Garden - Hypnotic*: Tending to produce sleep. Paradisial dream gardens drift upon threshold consciousness.

"Hypnhadiqa is an experiment using imagery from hand woven rugs to represent hallucinogenic fantasmata encountered in the waning state of consciousness during the onset of sleep. The kaleidoscopic sequence, in this transitional state of reception, is intended to unlock the hypnagogic cognitive state of the viewer." - Chris Sagovac, associate professor of animation and chair in the School of Communications at Webster University in St. Louis, Missouri. It is also the first film *yr hmbly typst* could see with his eyes wide shut.

17. **Political Asylum** - Jim Middleton - ASIFA Central * ** The 230 year history of the US Capitol building told in 230 seconds. Loosely based on the 2nd Law of Thermodynamics, it gives Benny Bugg the opportunity to ride bone-shakers, *The General*, and the Enola Gay while taking the founding fathers out for a spin. Paced to match a 1921 recording of *Il Segretto di Suzanne* by Wolf-Ferrari and a 1908 unreleased vinyl test pressing of *The Liberty Bell March* (although not the familiar part). Filmmaker Jim Middleton is also typing these words, making the entire experience very, very meta.

18. **A New World** - The Indefatigable David Ehrlich - (83 years young - with each new year a celebration) ASIFA East * "Becoming independent can be both invigorating and lonely, for individuals as well as for nations."

- David Gordon Ehrlich

Mr. Ehrlich received a BA in Government from Cornell, an MA in Dramatic Arts from the University of California, an MFA in Film from Columbia University, and studied sculpture and music in India under a Fulbright Fellowship. An independent animator living and working in the Vermont mountains for the

Just how does he do this?

last fifty years, his work has been shown at film festivals throughout the world. He was Professor of Film Studies at Dartmouth College (1992-2009) and Guest Professor of Animation at Communication University of China in Beijing.

19. *Ruptures of a Disability Difference* - Carlos Rosas - ASIFA Central * **

Carlos Rosas animates a sweet vignette involving challenged children on a playground, their interactions marred by inattention, and shows that none of us are too young to appreciate a little empathy. Communication doesn't always have to be verbal to pull at one's *chordae tendineae*.

Communication in many forms

20. *TAXI!* - Pamela Restrepo - ASIFA East A

1980s Manhattan cab driver, host to an ever-changing cast of characters, reminisces about a time when he drove a director to a film set – and landed an acting gig.

Pamela Restrepo, the director, is a story artist from Atlanta, by way of Colombia. While studying at the Savannah College of Art and Design, she explored genres ranging from light comedy to dark horror. “This film comes from all the memories of hardworking people who make the foundation of our society. This film is a *thank you* to all of our loved ones, colleagues, and people to work

together to make our days bearable.” (From FilmFreeway artist statement)

21. *The White Wings* - Penelope Bekiari and Vivi Markatos - Greece-UK - ASIFA Central **

During the winter, a caterpillar finds a spot to hide and rest, despite the surrounding dangers. Spring soon comes and the unexpected changes of the season wakes the hero, with a new face and wings!

Penelope Bekiari, is a graduate of Theatrical Studies at the National University of Athens and a student of music of the Max Hallecker centre in Athens. Her interest is the music and multimedia within films and theatre.

Vivi Markatos is a children's book illustrator and a graduate of Computer Animation of the University of Portsmouth and the Department of Theatrical Studies of the National University of Athens. Her interest is to experiment in filmmaking with traditional and computer media. This is their debut film, with original music. The film is symbolic and has a lot of influences, but remains a universal story; the audience provides their own thoughts and interpretations. Remember: even a small creature like a caterpillar has its own story that is not only about a caterpillar.... (from directors' statements)

22. *Grandmother* - Julia Hazuka - Poland *

A poignant tale with a twist - we are all under the care of spiders! During the Edmore showing, this film elicited the most discussion afterwards - was the spider a metaphor? Is this a folk tale unique to Poland? Well, Julia Hazuka was inspired by the Spider Grandmother of the *Hopi and Navajo* folklore and it is a common theme among many Native American cultures, especially in the southwestern US. “Spider Rock,” in Canyon de Chelly, Arizona, is the legendary home to the Navajo Spider Grandmother! When she is in her spider shape, she lives underground in a hole that is like a Kiva. When she is called upon, she will help people in many ways, such as giving advice or providing medicinal cures. *Spider Grandmother* is seen as a leader, a wise individual who represents good things (from O!MPLA liner notes and Wikipedia).

23. *The Irish Storyteller* - Gary Schwartz * A brief lip synch surrounded by a ruin in Ireland wherein fairies can be your friend or nemesis. You want them to be your friend. A pre-pandemic flashback!

24. *2024 ASIFA IAD Poster Anijam* - ASIFA Central * ** (many segments created during the September 2024 retreat!)

Assembled from over a dozen animators within ASIFA Central and elsewhere, this anijam of short animations brings added life to the already dynamic and frisky 2024 IAD poster by Bill Plympton.

The giddy perpetrators comprise this issue's *Rotogravure*.

THE NOVEMBER ROTOGRAVURE - ASIFA IAD ANIJAMMERS

Bob Swieringa

David Thrasher

Gretchen Vinnedge

Mary Beth Bellon

Jim Middleton

Fatima Salem

Guest Star - Pilar Newton-Katz

Shweta Marathe

Jane Flint

Deanna Morse

Chris Sagovac - SFX

Michael Long - still life

BONUS DESSERT PROGRAM - sweet, but with a little edge to it

1. **How are You?** Deepak Singh - A storyteller from India, who has worked on projects for Netflix, Amazon, and the Canadian Museum of History. He is Assistant Professor in the Department of Animation at Chandigarh University.

How Are You? is an exploration of how we are trained to suppress our inner battles and project a facade of strength. He uses rotoscoping and a character's inner voice to build a literally heightened resolution.

2. **A Better Life** - Jeff Scher - ASIFA East - "A brazenly optimistic song by Graham Nash about the future," as described by Mr. Scher. He also created *Practice Makes Practice*, part of the "long program" showing. Some additional information: in 2001 he received the Creative Capital Award in the discipline of Moving Image, and also won a Creative Arts Emmy for production design on the HBO documentary *The Number on Great-Grandpa's Arm*. Ultimately, Scher wants his viewers to create their own stories from the visuals he provides.

3. **The Waiting** - Volker Schlecht - Germany - Karen Lips is a researcher and lived for several years in a tiny little shack in Costa Rica to observe frogs. After a brief departure, she returned to discover that the frogs were gone. All of them. The vividly, realistically animated documentary by Volker Schlecht sets out to find them – and uncovers a horrible truth.

Schlecht is professor of drawing and design foundations at Hochschule Anhalt in Dessau. "I've also tried to show the process of a hand drawn animation by using the afterglow of the movement as a picture in its own right, paying tribute to »Pas de deux« by Norman McLaren." This film had a definite, sobering impact on the Edmore audience. *I Can't Happen Here?* Um...

4. **Love Me, Fear Me** - Veronica Solomon - Germany - The film asks of women, "What would you be willing to do for them to love you?" Ms. Solomon's dance metaphor is about the roles women play and the shapes they take, about the stages they choose, and their audiences' demands for the right of acceptance. Romanian by birth and now a resident of Berlin, her sculpted animation process is self-taught in the process of earning her Fine Arts and Animation degrees from the Filmuniversity Babelsberg. The film elicited a few, "gollies!" from the mid-Michigan audience.

5. **This Side-The Other Side** - Lida Fazil - Iran

No boundary can prevent the formation of friends and affection between children. It takes the apolitical imagination of our youth to reconstruct what purported adults aggressively demolish with their righteous, reckless abandon. Her formal training was from Zahra and Tabiat Modares universities in Tehran, and she is currently a newspaper cartoonist, although given the current

environment of repression, her film seems an allegory for her current surroundings. Lida is a name of Russian origin and translates to, "loved by the people."

6. **Memories in the Clouds** - Christina and Albert Laine - trying to tame AI *Memories in the Clouds* visualizes Kristina (Žièkutė) Laine's childhood memories in Soviet Lithuania. Thoughts blend with moods in an artist-directed, AI generated, painterly experimental film, narrated by Kristina whose fleeting memories become a child's dream figures in the clouds. The production intentionally presents how AI generated visual technology can be harnessed as a tool to produce a personal animated documentary film.

Kristina Laine, of Helsinki and Aalto University, creates animated films, theater and VR experiences. Albert Laine learned animation under the guidance of Priit Pärn, and his body of work ranges from advertising to lectures and independent production.

From the ASIFA East newsletter - as IAD evolves to its 2025 Edition, Lucija Mrzljak, of Estonia, will be designing the poster. Her recent film, *EEVA*, is a study in dysfunctional family dynamics following a funeral
<https://www.facebook.com/adriatic.animation/videos/1681836325678592>

Repeating a SPECIAL, INCREDIBLE OFFER FROM THE GANG AT ASIFA-SAN FRANCISCO

ASIFA-SF, among the many chapters of *Association Internationale du Film d'Animation*, had hopes for a rebound with live events once the CoVid threat had passed, but according to its newsletter editor, Karl Cohen, "that isn't happening yet." To emphasize the sincerity of their convictions, they have added this notice in their October newsletter, requesting me to share with our members:

TO KEEP OUR CHAPTER ALIVE, WE NEED TO FIND VOLUNTEERS TO DEVELOP LIVE AND/OR ONLINE PROGRAMS – UNTIL THAT HAPPENS WE ARE OFFERING FREE MEMBERSHIPS – NEW MEMBERS WANTED, SIGN UP AND RECEIVE FREE ISSUES OF OUR NEWSLETTER AND TO WHATEVER AREA SCREENINGS ASIFA-SF MEMBERS GET INVITED TO.

Contact karlcohen@earthlink.net and get your name on his monthly digital tome - often running over 20 pages (yr hmbl typst is honored to be among his proofreaders). Karl has connections *and stories*. He is author of *Forbidden Animation*, a frequent contributor to *Animation* magazine, the recipient of the ASIFA International Prize in 2008, and is nearing completion of a sweeping history of the societal impact of animation.

"IN VISIONIS PERTINACIA CONFIDIMUS!"

MMXXV^{AoDi}

ASIFA INTERNATIONAL CELEBRATES ITS 65TH ANNIVERSARY IN 2025

“IT IS IN THE MINDS OF MEN AND WOMEN THAT PEACE
MUST BE BUILT” Declared Founders at UNESCO in 1960:
What a Good Time for a Reminder

From the New Year Greeting for 2025 by ASIFA International IAD coordinator, Bri Yarhouse:

“Today, there are over 28 armed conflicts that are occurring across the globe. How do we as an organization respond? When the Association Internationale du Film d’Animation (ASIFA) was chartered in 1960 it was partly in response to a world at war. Provisioned under UNESCO, Peace has been one of the tenets of interchange between animators and our differing cultures.

“Inspired by Russian Animators who spoke out against war with Ukraine, we want to promote Peace everywhere. No matter what you believe or how you disagree with one another, violence and killing is not the answer. All creatures have the right to live in peace.”

“Animators from around the world of all ages will be invited to contribute 8-11 second short films on the subject of peace. Short films will be shown through a variety of venues including streaming. A curated collection will be offered for IAD 2025.

“Deadline for short films will be September 1, 2025. This allows time for workshops this summer.”

Technical Details on page TWO!

Technical Details for ASIFA International Peace Short Film Project

Pixel dimensions should be either 1920 x 1080 (HD) or 3840 x 2160 (4K UHD)
H.264 compression.

Credits should not be embedded in the short film but provided separately.

Animators have the option of being anonymous to reflect the potential personal danger of being targeted.

Each short should end with the word “Peace” in the personal language of the animator.

Animations must include their own sound and be royalty free and able to be shown without restrictions.

Animators must agree to the Creative Commons licensing: CC BY NC ND 4.0.

Content is subject to the animators choice but must be a response to our theme of peace in the world, however they interpret this.

ASIFA is not responsible for the content.

Films will be integrated with the 2025 IAD festivities.

Bri Yarhouse at Interlochen is already inspiring her students with animated contributions.
The 65th anniversary poster will share a celebration of peace along with ASIFA International!
More details in the weeks ahead! Stay tuned!

ASIFA CENTRAL CELEBRATES ITS 50TH ANNIVERSARY IN 2025 AS WELL!

And yes, even ASIFA Central is entering *its* golden years - 2025 marks fifty years since the birth of the ASIFA Central chapter in Chicago, amid fanfare, nonprofit paperwork, showings of actual FILM WITH SPROCKETS, and creation of *Frame By Frame*, the first official animation communication from *The Windy City* to the entire *WORLD*.

In 1975, land masses shifted, buildings quaked, Acme paper crinkled, Oxberrys flew everywhere, artists surfed the Chicago river, and the accounts of self-trained animators *shooting on twos* shocked the midwest.

This year will be marked by celebrations, retreats, showings, IAD, and a commemorative book with occasionally accurate tales of mystery and magnetic pole bending. If the sun seems to rise in the West and stay there, looking lost, you'll know the party is still going on.

need to notify the authorities, unless of course, they have really, *really* good recipes for zucchini bread. And oh, how animators can *zucchini*!

AND A STILL SPECIAL, INCREDIBLE OFFER FROM THE GANG AT ASIFA SF:

Karl Cohen says HI!

ASIFA-SF, among the many chapters of *Association Internationale du Film d'Animation*, had hopes for a rebound with live events once the CoVid threat had passed, but according to its newsletter editor, Karl Cohen, “that isn’t happening yet.” To emphasize the sincerity of their convictions, they have added this notice in their October newsletter, requesting me to share with our members:

TO KEEP OUR CHAPTER ALIVE, WE NEED TO FIND VOLUNTEERS TO DEVELOP LIVE AND/OR ONLINE PROGRAMS – UNTIL THAT HAPPENS WE ARE OFFERING FREE MEMBERSHIPS – NEW MEMBERS WANTED, SIGN UP AND RECEIVE FREE ISSUES OF OUR NEWSLETTER AND TO WHATEVER AREA SCREENINGS ASIFA-SF MEMBERS GET INVITED TO.

Contact karlcohen@earthlink.net and get your name on his monthly digital tome - often running over 20 pages (yr hmb1 typst is honored to be among his proofreaders). Karl has connections *and stories*. He is author of *Forbidden Animation*, a frequent contributor to *Animation* magazine, the recipient of the ASIFA International Prize in 2008, and is nearing completion of a sweeping history of the societal impact of animation.

A Note from ASIFA Korea Chapter President, Nelson Shin

Thanks to contributors whose wonderful films for IAD 2024, helped us successfully wrap up the event by ASIFA Korea on November 1 and 2, 2024.

We had 54 films from 11 countries – Bulgaria, China, Cyprus, Finland, Germany, Greece, India, Iran, Sri Lanka, Poland and USA (Central, East & South), divided them into four public screenings, free of charge, at the Nelson SHIN Animation-Art Museum.

More than 120 people – including professors, students, animation professionals – joined the general audience.

We produced and shared a catalogue of the showings with the audience and interested filmmakers.

Gary Schwartz

Tim Middleton

Chris Sagovac

And Time for the Seasonal Update from ASIFA International's President, Deanna Morse - An Active 2024

ACTIVITIES

From all accounts, we had a robust International Animation Day, with varied initiatives and programs around the world. We arranged in-person ASIFA gatherings at partner festivals – Stuttgart, Zagreb, Annecy, Ottawa, Cinanima, and others. At festivals, we distributed more ASIFA Postcards, and are planning another postcard gallery in 2025. A call for art will come at the start of the year. At Stuttgart, we presented the ASIFA Prize to Michaela Pavlatova. Thanks to Agnes Li and Annegret Richter for coordinating.

At Cinanima, ASIFA was represented with a program of Animations for Freedom., curated by Thomas Renoldner and a program from the Xiamen Animation Festival, presented by Johnchill Li.

We have a new proposed ASIFA Chapter - ASIFA Mongolia. Welcome!

And, in this past year, we have several new ASIFA Board members. Also, welcome!

Michaela Pavlatova

INFORMATIONAL VIDEO

For festivals and IAD, we created a snappy ASIFA overview video to introduce our activities. It is 6 1/2 minutes - feel free to use it!

It is on asifa.net, www.deannamorse.com/community, or here - www.vimeo.com/954009443

2025 PLANS

The Executive Board and Anniversary Committees are both meeting soon. The EB is discussing our upcoming General Assembly in 2025, financial reports, chapter communication, new chapters, and more. The 65th (anniversary) planning

group has been meeting monthly, and has chosen our Anniversary Logo.

The committee will present concrete ideas to you soon. But, here are some of the things we have been discussing – We are planning to print some postcards, and also upload the 65th logo design for chapters to create their own. We want to encourage students to create an animated logo from the chosen design, with a themed challenge for IAD and AWG, potentially: “living in a peaceful world.” Establishing designated awards at festivals, an expanded ASIFA Student award, curated retrospective programs to offer to festivals and chapters, a special edition of ASIFA Academic Magazine celebrating the 65th Anniversary, and some discussion of how to recognize important ASIFA members, both old and new.

If you have input on these ideas, please let us know.

THANK YOU.....

I am thankful for you, for this global community of animation artists who believe that there is power in connecting with each other, across borders, to share our love of the art of animation, building bridges across cultures, to seek mutual understanding, working for peace and tolerance.

I am thankful that ASIFA will celebrate our long heritage next year recognizing that we are 65 years young, honoring our past, and moving forward with new ideas and initiatives.

In peace,
Deanna Morse
President, ASIFA

The ASIFA Central COFFEE BREAKS

and Incredible Links Therein from November 2024 through January 2025

Amid the monthly coffee break sessions, generously hosted by **Michael Long** of Webster University, there are always lively discussions on animation topics and the challenges facing everyone in the 21st century. The Zoom *chat* is always a robust depository of suggested links and commentary, and we have even figured out how to copy and preserve that material to share with our extended membership and enthusiastic readers. Mr. Long offered this observation on animation, to wit: It is “the light of micropleasures in drawing movements.”

David Thrasher continues to celebrate the very event itself with the ongoing evolution of his bumper film, *Let's Go To the Coffee!*

https://youtu.be/gkw_iWww8_Y?si=kTRPqtBQJTIG_Zep

In working with his 3D project, he also uncovered The Horrors of Early CGI

<https://youtu.be/XyGfXCxnZW0?si=JVRaVuJGUtVVY7O1>

...and someone's postulated cause of the sinking of the Titanic

<https://youtu.be/gFNoYIAVtTI?si=48q9Oxzo6hi74PE1>

And helpful tutorials for the ever-changing world of Blender (not the *Futurama* character):

<https://www.youtube.com/watch?v=ogs7OTQBjwU> - make a frog!

<https://www.youtube.com/watch?v=IXg5ucthFYE>

<https://www.youtube.com/watch?v=yaOEsAOnq7s>

ASIFA Central's Anijam for IAD - <https://vimeo.com/1019263673> - much of it created during the retreat of September 7th in 2024

Collage in Motion - J Akre

We welcomed **John Akre** - <https://johnakre.com/> - in November, with his incredible collection of online material, 16mm hand-drawn shorts, stop-motion, flower-kistascope, projects with Legos, masking tape, post-it notes, now in Louisville, KY from the land of his nativity in Minneapolis. This led to discussions of the dazzling work of Marie Paccou, cave art, oil lamp illusions, and J. Stuart Blackton. So, of course, we had links!

Easily discovered was the prolific **Marie Paccou** and her Animated Zoetrope Umbrella, ever prepared for *quand it pleut*: <https://www.facebook.com/watch/?v=262303909045732> - and her home site continues to amaze with her repurposed paperbacks-into-flipbooks - <https://mariepaccou.com/index.php?mode=qui>

And then came the recollection of the early days of short films between HBO feature showings, some sneaking in before they made it to the festival circuits in some mysterious, pre-streaming, process:

The Big Snit - <https://www.youtube.com/watch?v=gKmAPh46JXk> (“Wal, blow my lips off!”)

The Cat Came Back - 1988 - <https://www.youtube.com/watch?v=Ck0jwS0CvKk>

In December, we fell upon this quote from Siz Wang, in the December 2024 edition of the aNYmator ASIFA-East newsletter: “I think the human experience is important because thinking is a social activity. You cannot think alone, so you need to meet people, and New York City is a great place to do that.”

It prompted a discussion of the importance of interactions among members of any discipline, then the shocking revelation that **Bob Swieringa** was probably “going to be late” because *he* had been hit by a car. (Note: he was encouraged to wait until ambulation, not ambulances, were the prominent factor in his life).

Deanna Morse, back from a dizzying tour of the Northern Hemisphere, reported on her amazing visit to Portugal’s Cinanima-24, with her presentation being preserved on youtube:

<https://www.youtube.com/watch?v=Buyqevihe3U>

With Joanna Quinn and Lee Mills

Deanna also related that there were over 550 films for the Academy™ consideration in the animation category, over half of them features. All were excited on the prospects of theatrical release for the Latvian film *Flow* by Gints Zilbalodis (Deanna later told the coffee that she had seen it at least six times), and were in unanimous accord that Adam Elliott’s *Memoir of a Snail* was an amazing experience, but definitely *not* for children!

With Kim White

Wallace and Gromit’s *Vengeance Most Fowl* from Aardman was also on everyone’s short list once it made the streaming services later in December (later note: it is a lot of fun, and the set constructions are amazing!).

Benoit Berth Siward also curates an incredible animation resource - *The Animation Showcase* - that offers a vast series of streaming animation shorts, often running in tandem with international festivals or having Academy™ nominations. It offers a great opportunity for access, especially for those not able to make it to festivals. It does require registration, but once you’re in, you get emailed updates on the latest and greatest in their current playlist - <https://watch.animationshowcase.com/>

Gary Schwartz wanted us to all be aware that there is a seemingly systemic collapse of art schools across the US, amid all the concerns about jobs and AI, and that even Sheridan College is cutting back on some of its programs. He includes his alma mater, the Philadelphia College of the Arts (PCA) to the list. Evidently, ten schools closed during 2024. Here’s the link to the full story: <https://observer.com/2023/09/independent-art-colleges-closing/>

Jim Middleton finished *another* project from his misspent youth - well, his 50s, anyway, still often misspent - it was initially a weekend romp involving a lip sync'ed octopus as a policeman, to a portion of the Gilbert and Sullivan song, *When a Felon's Not Engaged in His Employment*. In 2007, he drew the first 20 seconds, then got distracted by stuff. And things. It should have been lost forever, but a *.fla file popped up on an external hard drive, in mid-back up. So the beast was finally wrapped up in all its 720x480 glory, becoming a true 60 second trifle. Now on vimeo...

<https://vimeo.com/manage/videos/1046164199>

Also, *Au Revoir, Jerome*, directed by Chloe Farr, caught Jim's eye for its surreal atmosphere and dazzling palette - <https://www.youtube.com/watch?v=aKJWZzNeyH8>

A 60-Second Trifle (2007-2025)

Hey, Zoomers!

Michael, Jim, Gretchen, Gary, Deanna, David

And in keeping with the maxim, "Review your notes as soon as the meeting is over," *yr hmb1 typst* came upon this mysterious quote, scribbled in the margins of the December coffee journal entry: "Somebody took my antiperspirant and now I just smell like perspirant." The beleaguered village of Edmore has yet to offer any source for this bit of wisdom.

A favorite cartoon of the ASIFA Zoomers is the 1928 Fleischer brothers' classic, *Koko's Earth Control*. It entered into the National Film Registry in 2024, and the prints that are available are so clear you can see the "cut and tear" technique in all its delicious splendor!

Au Revoir, Jerome by Chloe Farr

<https://www.youtube.com/watch?v=fLuyNISOyYQ&t=2s>

Animation Magazine has the full story at their link:

<https://www.animationmagazine.net/2024/12/fleischer-toon-kokos-earth-control-added-to-national-film-registry>

And while on the subject of classic animation techniques, the December coffee brought up a new modern classic, *The Wild Tempered Clavier*, where Anna Samo created animation on a continuous roll of toilet paper! Our pandemic-lockdown era workshop made use of a similar technique with our quick access to well-stocked closets filled with Angel Soft and Cottonelle fluffed goodness!

Oh those bittersweet memories...

In our January ASIFA coffee, we discovered the full tale of Bob Swieringa's close encounter with moving metal, his vast capacity for survival on the wild walkways of Kent county, his patience with being a patient, and his upcoming storyboard, soon to be a major motion picture, for *How to Get Hit by a Car*. He had to watch a youtube video for proper instruction on crutches. Seek ChatGPT for better words than "fortitude" to describe his recovery.

The situation prompted some dialog among the generations in attendance, as the responsible driver was considered elderly:

– "In your country, are you *allowed* to drive a car when you're 70?"

– "Um, yes. And we prefer *sixty-ten* to 70."

– "In Missouri, when you turn 70, you need to get your license renewed every 3 years instead of 6. This includes a vision test and asking you if you can identify different kinds of street signs. Otherwise, you can drive till you drop—probably not the safest practice."

– "If you drop while driving in Michigan after 70, you lose your casino privileges."

Kidding aside, Bob is healing well, and everyone at ASIFA Central is relieved, knowing his recovery is aided by his extraordinarily positive outlook and great sense of humor. We all want to be Bob when we grow up.

When film discussions resumed, it was to note that, for the first time in anyone's memory, the layout designers were given opening "cinematography" credit for the recently released CGI animated feature *Wild Robot*.

Also, artistic statements and educational guidance emerged from a classic source - *The Art Spirit* by Robert Henri. It still rings true after 102 years. And it is still in print!

More technical discussions followed, examining the various makeshift downshooters being used in a world of fewer mechanics and more prestidigitalization. **Chris Sullivan** and **Gary Schwartz** weighed in on Manfrotto tripods, as Deanna had just obtained hers.

The challenge of outdated technologies created a discussion on earlier versions of Flash from Adobe and the value of SWF files in the 21st century - apparently, AfterEffects can still read them (Quicktime used to be a handy alternative, even reading early FLC from the DOS era – shortly after the development of Cuneiform, an early analog system).

Steve Leeper has links to his *Creation* film, an inspirational work-in-progress: <https://jsl-studio-animation.webnode.page/>
We also learned that Russian animators are still expressing themselves, albeit with extreme anonymity:
<https://www.cartoonbrew.com/politics/russian-animators-creating-anti-war-shorts-protest-putins-attack-213975-213975.html>

And in the category of peace if no war, or war if no peace, **Michael Long** offered this link to McLaren's *Neighbors*, in case it had been unseen by anyone under the age of sixty-ten -
<https://www.youtube.com/watch?v=K1q8f-I6YsI>

David Thrasher uncovered the trailer for *Hundreds of Beavers* <https://youtu.be/5h4P-26kHaw?si=wZYfsxB-xHJu5NbA>
– a supernatural comedy where "a drunken applejack salesman must go from zero to hero and become North America's greatest fur trapper when he loses his whole operation in a fire and is stranded in the wilderness." Facing starvation, he must survive in a surreal winter populated by *Hundreds of Beavers* played by actors in full-sized beaver costumes. In black and white, with sight gags and stop-motion worthy of Mack Sennett.

Public Domain Update - SOMETHING Positive About 2025!

"Sorry, Nipper, we're going Orthophonic!"

For 2025, the magic years of access to the world of public domain are 1925 and 1929. Any recording made at the dawn of electrical phonography (ie 78rpm) in 1925 or earlier, or any film or published work up through 1929 are now in the public domain.

So what, you ask? Well, *Skeleton Dance* is yours, as is *The Cocoanuts* with the Marx Brothers, the first filmed version of *Singin' in the Rain*, and thousands of other works. 1925 hits a lot of early jazz, and on microphone, not acoustic horns (so bass is bass and not a tuba), and studios were in a rush to re-issue new versions (now 100 years old, but new then!) of classical pieces that would set Carl Stalling to drool.

Lots of material to study and learn from, lots of sounds for test tracks and

inspiration. See <https://web.law.duke.edu/cspd/publicdomainday/2025/> for more examples, and also check out a new site called Creazilla - <https://creazilla.com/> - for thousands of graphics and music clips (and complete works). All, of course, in addition to the indefatigable gang at <https://archive.org>, yr hmbl typst's favorite afternoon time suck (that's a technical term, of course).

A Note from Cindy Keefer, of the CVM

"Just a quick note to let all of you know CVM is fine. LA is devastated by wildfires, but our office and vaults are not near the fires or evacuation zones. I am holed up several hours north in wine country, working on my next Fischinger book. We extend our sincere condolences to one board member who was evacuated.

"While we have many colleagues and friends who have evacuated, we've not heard of any CVM members who've lost homes. Our thoughts are with all who are still in LA.

"Many thanks to those who've reached out to check on us. In the near future, we'll be moving some materials OUT of Los Angeles."

Nancy Denney-Phelps Hits The Trail! <http://awn.com/blogs/sprockets>
info from - <https://www.awn.com/news/animation-journalist-nancy-denney-phelps-releases-animation-trail>

Animation historian and longtime blogger Nancy Denney-Phelps has released her new book, *On the Animation Trail, 20 Years of Animation Festival History*, featuring front and back covers by Joanna Quinn. The new book charts the recent history of animation festivals from the oldest animation festival in the world in Annecy, to the founding of the festival in Peja, Kosovo. During her extensive travels, Nancy has recorded not just the films screened, but also the people and what makes each festival unique. It is shipping now, or at least very soon, and can be ordered directly from Routledge Press, IBAN number ISBN 9781032565682. Nancy has been a thorough source of information for the ASIFA-SF chapter, giving editor Karl Cohen a lot of detailed, behind-the-scenes observations of her exhaustive international journeys. In our discussions, she recommends reading "with a good dark chocolate and delicious Cabernet." Cheers!

This late-breaking (15 January, 2025 morning) news from LA via Cindy at CVM.

“We're sad to share the terrible news that Charles Dockum's Dockum Research Lab in Altadena, CA has burned down in the horrendous LA fires.

The building contained his archive relating to his Mobilcolor work, and his last Mobilcolor Projector. There are some papers and diagrams at the Guggenheim NY's archive, and some papers, photographs and all of his Mobilcolor films at CVM.

His daughter Greta who lived on the same street lost her house. She is OK.

We'll soon post this news to various social media sites. So very tragic.”

To see what was lost, view the page about Charles Dockum on the CVM website:

<http://www.centerforvisualmusic.org/Dockum>

ANIMATION UNITES US

Opinions expressed in this newsletter are those of the hmb1 typst and do not necessarily reflect the thoughts, opinions, or policies of anyone anywhere else, and especially at ASIFA Central, which is a completely volunteer-run, non-profit gathering of very busy and frantic members moving at 24fps on a slow day, where vacations are when you shoot on twos. Make that threes.

Pss! Free-Range Board Member **Deanna Morse** (Madame President to All ASIFAnians!) has a new web-site: deannamorse.com

Analytical and Articulatory Animation Analyses

Supplement to ASIFA Central Newsletter Series - January 2025

The supplement in this issue features Part Three of Karl Cohen's essay on animated films and the holocaust, along with generous segments from our free-range member Chuck Wilson
There will not be a quiz.

Part Three of Karl Cohen's Essay on Animation and the Holocaust

Holocaust films represent a major evolution of animation as a serious medium for communication and persuasion. Animated, documentary-style productions can further explore other difficult issues confronting the world today, from societal relationships to living on a planet struggling to sustain an inhabitable environment.

While most animation dealing with horrific mass murder refer to Nazi atrocities, there are now at least three powerful animated works that deal with more recent barbaric events.

Ulf Pikkov's *Body Memory* (Estonia, 2011, 9 minutes), is a remarkable, powerful film that isn't about the Germans shipping humans in cattle cars to the slaughter houses. Stalin used the same method to ship his "enemies" in Estonia to work camps (gulags) in Siberia and to other locations. Pikkov's powerful work captures the horrific drama of being in a cattle car headed towards one such gulag. Without using human voices on the soundtrack, Pikkov conveys what the people might have been thinking, with the tensions and mental dramas building until it explodes. (the smell must have been awful as well.)
<https://www.meetyoolee.com/post/body-memory-2011>

When I thanked Nancy Denney-Phelps for introducing this film to me, she said, "If I remember correctly, Ulo told me that he filmed the brief segments of twisted forests on the actual train route that was used to take people from Estonian to the gulags in Siberia. Ulo has a PhD, and this year he and his family are living in the U.S. while he is teaching at the Rhode Island School of Art and Design."

Voices from Kaw Thoo Lei by Martha Gorzycki (2015, 11 minutes) is an important, underreported story. Martha's short is an impressive experimental documentary, weaving fragments of interviews together that she recorded with members of the Karen people of former Burma (now Myanmar). It is a powerful and disturbing film that hints at what they have experienced, including ordeals they witnessed, and events that were inflicted on them, before they fled their country.

The film is an experience where the animated visuals create

a somber mood rather than depicts actions described in the soundtrack. It becomes a meditation where you have the opportunity to concentrate on the message. It has won awards at over 20 film festivals for its excellence.

<https://vimeo.com/marthagorzycki>

I asked Martha Gorzycki, head of the animation program at San Francisco State University, why she decided to make this remarkable film about the plight of the Karen people. She is not of Asian descent, nor has she ever been to Myanmar yet she spent several years developing this work of art.

She said she first heard about the Karen people several years ago from an animator whose wife is Karen. Despite the horrific story of their plight, she was told that nobody was listening to their tragic story or their pleas for help. Months later she met other Karen refugees in Minnesota (where a relative was helping them to adjust to living in America). She heard similar sentiments repeated – that nobody is listening to them or was willing to provide the much-needed humanitarian assistance.

The Karen migrated to Burma over two thousand years ago, but other groups who arrived earlier had different religious and cultural beliefs. Each claimed parts of the country as their land, so the conflict between groups has lasted for centuries.

Their present troubles arose when Burma became an independent nation in 1948. The new government wanted to unify the nation. That resulted in a civil war with the government's military slaughtering civilians, an ethnic cleansing that has been going on and off since 1948.

Martha responded by recording interviews about the brutal experiences they were subjected to by Myanmar government soldiers. The hatred is based on generations of ugly prejudices, a hatred among different ethnic-based groups, and a complex mixture of religious, political and social beliefs.

The Karen people Martha interviewed had once lived in the original eastern Burma, near the border of Thailand. They are a different cultural group than the better known Rohingya, who lived to the west. Most of the Rohingya fled in the second decade of this century to fields in Bangladesh

when the army burnt down their villages.

Unfortunately, the fields where they settled in-flood each monsoon season, destroying property and drowning the inhabitants. Both the Karen and Rohingya have experienced the horror of terrorist experiences that have led to the genocide of both groups. The perpetrator was and still is the Myanmar military government.

Martha's final step was to edit together the soundtrack and to illustrate it without using images that would distract from the spoken words. The end result is an impressive cry for help that calls attention to their tragic humanitarian crisis that remains unresolved. The visuals are abstract compositions of materials she collected and filmed on a traditional animation stand. They help us imagine portray the dangerous, dark forests and jungles where these concealed people try to survive.

Waltz with Bashir, Ari Folman (2008, Israel, 90 minutes), involves a former Israeli soldier trying to recall his repressed memories of his experiences during the 1982 war with Lebanon, while trying to understand his part in the Sabra and Shatila massacre. The purge that took place in refugee camps, and the soldier's unit sent flares into the night sky to help the Israeli-allied Lebanese Christian Phalange militia carry out their horrible mission. The resulting massacre of between 762 and 3,500 civilians (the number is disputed) was an act of retaliation for the assassination of Bachir Gemayel, a popular general who had just been elected president of Lebanon.

While the Jewish soldiers did not know what the right-wing Christian Phalangists militia were doing until after the atrocity, he concludes that the gaps in his memory were a mental defense mechanism. As he tries to reconstruct his memory, he begins to question the degree for which he was responsible in the massacre, even indirectly. While the massacre is scarcely remembered, it was, too briefly, a major international news story.

Much of Folman's *Waltz with Bashir* depicts war as hell. It is an auto-biographical experience to show that once he and other soldiers entered the war zone, their stress level is elevated 24/7 by their fears of being killed. Tension is sensed from little things happening, including soldiers being trigger happy, shooting at unseen noises or movements caused by a gust of wind. As tension builds up, irrational behavior becomes more pronounced. The audience may begin to realize that Folman is showing us signs of serious mental issues developing.

When I interviewed Folman a few days before the film was shown in San Francisco, I asked what he hoped to achieve by making the film. He replied that his target audience was

Israeli youths of draft age and that he wanted to dispel the beliefs that the media often gives us - of the glory of being a soldier. By showing them a war-zone as nerve-wracking experience for a person on the ground, they might have second thoughts about being drafted. He was disappointed that box office reports indicated that the film's actual audience was an older, more mature audience.

Waltz with Bashir grossed over \$11 million worldwide, an impressive amount for an animated documentary. It was the first animated feature to be nominated for an Academy Award for Best Foreign Film. It won several top awards at major international festivals (Zagreb, France's César, and several others). It was also banned from being screened in Lebanon and in several other Middle Eastern (Arab) nations.

Final comments

People generally think that animation is a light form of entertainment, but these films serve a noble purpose including exposing the lies, misinformation and other honorable things that prejudices create. People need to understand what institutionalized hatred has been doing to our world for centuries. Fortunately, animation can confront and expose the negative effects of racism, nationalism, religious indoctrination and other systems that divide people into stereotyped groups and depict some who are different as inferior.

The animated Holocaust film is part of a growing body of animated documentaries hoping to influence society in some way. This use of the medium to influence us dates back to Winsor McCay's *Sinking of the Lusitania* in 1918, which depicted the enormous loss of life caused by a torpedo that was fired from a German submarine, intentionally in the format of another cinematic innovation of the time - the newsreel. The film was propaganda during "The Great War" more than casually hinting that the audience should detest the perpetrator - the German Kaiser. Since then, animators have created works supporting or disapproving of other wars, capital punishment, various forms of bigotry and dozens of other challenging topics.

Researching animated Holocaust films reminds us all that not only did six million Jews die in Hitler's concentration camps, but that the Fascists exterminated others for trumped up reasons (including being mentally impaired, homosexuals, gypsies, or some perceived inferiority offensive to members of "the master race"). I had assumed the number of non-Jews that Hitler had killed in his gas chambers was significant, but in the thousands. I was stunned to discover over a half-million non-Jewish civilians were slaughtered at his camps (jewishvirtuallibrary.org has further stunning statistics).

Nazi Germany is the easiest monster to clearly represent the embodiment of Evil. There have been other mass murderers of civilians. Stalin was as ruthless as Hitler (estimates that he murdered about five million people in his gulags, and another 5 to 9 million from famine in the 1930s by his mismanagement of agricultural production). But Stalin was our brief ally during WWII, so Tashlin's *Russian Rhapsody* in 1944 was hardly an indictment of his internal purges.

We live at a time when right wing rhetoric has been on the rise and military activities continue to disrupt the lives of millions of people across the globe. The traditional ways of dealing with hatred and war have to change if civilization is going to survive in a world full of weapons so powerful and efficient. The current destruction of Gaza is a sample of what war is capable of doing to civilization.

I grew up admiring Martin Luther King Jr. and I was lucky enough to attend two of his speeches. He tried to teach us to do something that seems to be much harder to do, to turn the other cheek, to love our enemy and to build a better world together. We need to put aside our prejudices and to work harder as a nation. We must take seriously the problems raised with global warming, our polluting the land and seas, public health issues, the rights of women, minorities, and LGBTQ and other important issues. We need persuasive works to call attention to them and hopefully to present positive ideas on how to improve the world.

Why not give peace a chance? We can work that way through animation, or we can live the lesson created in 1939 by Hugh Harman at MGM - his *Peace on Earth* remains powerful and prescient, enlightening as it is sobering. Animation can bring hope - you might consider the advice of Bill Plympton: make it short, make it inexpensive, and make it funny. Or you can make it a labor of love, as Frederic Back's beatific vision in *The Man Who Planted Trees*.

Animation can be effective. Creative people, joining forces with non-profits, can develop films that address serious issues and pitch them to groups that might be in a position to help. Another route is to create personal shorts about issues that you feel are important. It really is possible for you to do your part to help save the planet, one laugh, one smile, one hope at a time.

This study is far from complete. If you have favorite films or materials that should be considered please send information to karlcohen@earthlink.net.

Acknowledgements

Tsvika Oren who lives in Tel Aviv, Israel contributed very useful information to this study. He is an animation scholar who teaches in Israel, and he has published an animation magazine since 2006.

Martha Gorzycki heads the animation program at San Francisco State University, is an advocate of animated documentaries, and has worked on the animated feature *Popol Vuh: The Creation Myth of the Maya*, 1990, funded by the National Endowment for the Humanities.

Nancy Denney-Phelps lives in Gent, Belgium and is an animation historian and journalist. She is a regular contributor to the ASIFA-SF newsletter I write and edit. She mainly covers the international world of animation.

Piotr Kardas from Poland is the author of *Great Animation Short Documentaries of 2023*, an informative illustrated article. He is director of O!PLA, Rising the Lusitania Animadoc Festival, and Craft Animation Festival. An interview with him is posted at Video: Piotr Kardas Interview (zippyframes.com)

Jim Middleton whom I consult with weekly. He keeps me on my toes as he contributes by refining what I'm thinking and writing about.

Holocaust Representations in Animated Documentaries: The Contours of Commemoration by Liat Steir-Livny, Edinburgh University Press, 264 pages, Hardback \$110.00, and as an eBook. It examines representations of the holocaust, holocaust survivors and their descendants in animated documentaries. One promotion for the book says vast majority of animated holocaust documentaries minimize the horrors and instead focus on bravery, resilience, and hope. Knowledge that the book exists introduced me to the topic of animated Holocaust film.

Finding Your Roots on PBS, with historian Henry Lewis Gates Jr. as the host, also influenced this study. Guests on the show learn well researched facts about their family's history. That information sometimes includes facts about relatives who disappeared in the Holocaust, the Armenian Genocide and in other horrible moments in history.

Animated Thoughts with Chuck Wilson

"Art Comes in Many Forms - Part Six"

(see his blog at <https://smudgeanimation.blogspot.com> - this essay is his introduction to MMXXV)

I had hoped to end the old year and begin the new with some art and peaceful introspection. The Flint Institute of Arts did not disappoint.

Now I'll cop to it, looking at the main art museums in the Mid-Michigan corridor (Grand Rapids/East Lansing/Flint/Detroit), I vastly favor the Detroit Institute of Arts. But the smaller art museums here in Michigan have their charms. The Frederik Meijer Gardens has their yearly butterfly and orchid events as well as a wonderful outdoor Japanese garden. I haven't yet been to the Grand Rapids Art Museum, though I do hope to change that oversight later this year. The Broad Art Museum is a quick five minute drive from my home with a basement area housing older works of art and a video installation--and it's a quick walk from the MSU Library, good for research. Detroit has the DIA as well as the Henry Ford Museum and Greenfield Village--all three had been invaluable resources when I was writing my animation history class.

But the Flint Institute of Arts has some really appealing qualities, not the least of which is a 45 minute drive from my home (as opposed to the hour/hour-and-a-half to the DIA, depending on traffic). They've also got a well-stocked library with comfortable chairs and a sofa for reading.

The decision of where I would spend my day was resolved almost immediately when I checked the FIA's website and discovered that they had a painting on display by my favorite artist: Claude Monet. Turns out, "The Sheltered Path" was on their visiting artwork list and would be on display until February.

As I stared at Monet's painting, I was struck by the impermanence of digital. There I sat, looking at a painting from 1873. The colors may not be as vibrant as when it was

first painted, but still a beautiful work of art that, if properly handled, would still be there long after I am but a memory.

"The Sheltered Path", 1873
Claude Monet

Over the past thirty years, I've witnessed countless works of art brought to life through computer software. I've been there during software releases and upgrades, and yes, witnessed software once touted as the 'latest and greatest' denoted as reaching their 'end-of-life' before being relegated to the dustbin of digital history.

3d CGI, polygonal modelling, NURBS, metaballs, texture mapping, bump mapping, non-linear video editing, Corel Draw, Paint Shop Pro, Photoshop, Painter, Kai's Power Tools, Director, After Effects, Future Splash/Flash, Moho, Bernoulli drives, iOmega Zip Drives. I was there for much it. Oftentimes on the sidelines, sometimes in the trenches.

The march of technology is relentless. It's partially why I maintain a number of old computers with obsolete operating systems that are still capable of running some of this older software--so I can still access old copies of animations and imagery that I produced during my college and grad school days.

The computer has brought us works of art that were hitherto undreamt of. I doubt that even the old masters could have conceived of what is being produced by contemporary digital artists. I have to wonder, how constrained were their imaginations by the technology of their time? Thought for another day.

Back when I was in grad school at R.I.T., I had been playing with a freeware 3d rendering and animation software package called POV-Ray. It was a text based

system where you'd plot everything out on graph paper using the Mark I pencil, then create a text file containing all the objects, their coordinates, and their properties for your scene. I was big on stone textures back then, so spent a fair amount of time making marbles using the various texture settings. This would serve me well when I needed objects to animate in my basic animation classes--like learning the squash and stretch principle by animating bouncing balls using Macromedia Director.

Squash and Stretch Assignment - RIT

Since then, I have tinkered with lots of 3d modelling and animation packages like Alias Wavefront/Maya, Ray Dream Studio/Carrara, and Blender. But while useful and entertaining, none of those programs produce anything of permanence. I do still like to walk through museums and look at sculptures--mostly those of stone and glass--and think about how I would recreate them using 3d CGI software. It's a fun thought exercise and it adds an extra dimension to museum visits that makes them more enjoyable for me.

Hadros
2006
Petr Hora

Sculpture, paintings, celluloid film, animation cels, photographs from the early 1900's, even the hand-drawn paper cels from my MFA thesis, they will all outlive me. My thesis film is digital. Unless I do a transfer to celluloid film stock, one day, it will likely be gone with only the hand drawn cels and a couple printed images in my thesis paper as evidence that it ever existed. If care has been taken to preserve them, one hundred years later, we can still watch films from the 1920's. One-hundred and fifty-two years later, I can still spend an afternoon looking at one of Claude Monet's paintings hanging there on the wall. Over five hundred years later, we can still travel to Florence and appreciate Michelangelo's marble sculpture "David".

Still Life with Fruit", 1855
Severin Roesen

I have to wonder, five-hundred years from now, will people even know about all the art we created in the late 20th/early 21st Century? Or will there be this huge cultural gap where art was being produced in physical format up until the 1980's and then it largely ceased. What will the museums of 2525 say about us? Will they even remember that we existed or will we just be a footnote in history, this big black hole of nothing called 'the digital age' where very few items of cultural significance survived to be appreciated by future generations?

Chuck Wilson is a forensic animator and master of all Dungeons and Dragons in the greater East Lansing, Michigan area. His computer collection is the envy of anyone who understands the importance of data backup, even if it means a zip-drive.

"IN VISIONIS PERTINACIA CONFIDIMUS!"

MMXXV AoD

The Debut of the 2025 IAD Poster by Lucija Mrzljak

Lucija Mrzljak is a Croatian animation film director teaching at the Estonian Academy of Fine Arts. Since 2016, Lucija directed several acclaimed animated short films, produced at the Eesti Joonisfilm studio in Tallinn, and Adriatic Animation studio in Zagreb. Her film *Eeva* (2022) premiered at the Berlinale in 2023, earning a place on the shortlist for the 2024 Academy Awards, and then the Emile Awards for best character and background design.

More + + + + + + + + + +

Lucija Mrzljak continued

In addition to her film work, Lucija collaborated with Oscar-winning musician Glen Hansard in 2019, directing the music video for *The Closing Door*. In 2024, she directed renowned Estonian musician Mari Kalkun's music video for her song *Maaimä* (*Mother Earth*).

As in years past, her IAD poster will serve as an inspiration for an ASIFA member Anijam. Each of us will be giving Lucija Mrzljak copious thanks and credit for her contribution.

Animation for Peace Project

A reminder from Bri Yarhouse at Interlochen

This year I would also like to announce that we are fostering a worldwide effort to use our animation talents to bring attention to all of our needs to live in peace without the threat of violence. Killing each other never solves our conflicts and the world faces so many types of violent conflicts. In this regard, I am shortly going to make a formal request for animators of all ages to join us in making short films on the subject of peace that will be shown on International Animation Day this year.

Animation Student Awards Forging Onward!

Anastasia Dimitra, ASIFA Hellas

Entry deadline: February 15, 2025 (just passed, but plead your case if you feel particularly charming this season)

Selection Committee review deadline: March 10, 2025
Jury Committee results deadline: March 30, 2025

Lucija's vision statement:

"For my ASIFA World Animation Day poster, I embraced a classical approach, working with graphite and colour pencil on paper to create a tangible, hand-drawn aesthetic. The central inspiration behind the poster is the concept of animation as "light in the dark," a creative force that illuminates and brings life to the unseen. I also drew inspiration from the visionary pioneers of animation, such as Émile Reynaud, Eadweard Muybridge, Joseph Plateau, and Simon Stampfer. The poster pays homage to their legacy while celebrating the timeless artistry of animation. Animation continues to evolve as a powerful medium for storytelling and self-expression, inspiring new generations to push creative boundaries and keep the light shining."

Ø There is no need be an ASIFA member.

Ø ASIFA chapters, after careful evaluation, may propose up to five films each.

Ø The submitted films in HDV .mp4 format will be available for screenings at all chapters over a one-year period.

Ø All directors will be required to sign a contract with ASIFA, stipulating that, following the competition, ASIFA may use the films for screenings during the one-year period.

Ø ASIFA will provide screening reports to all directors at the end of this period.

We have so far received submissions from ASIFA East and Central, Spain, Germany, India, and Croatia. I would also

like to encourage you to submit student films, as they are a valuable part of the selection.

If you are interested in joining the Selection or Jury Committee, please feel free to reach out.

At this time, Jim Middleton has confirmed his participation, while Nelson Shin and Nancy Denney Phelps have committed to the Jury Committee.

Looking forward to your responses.

Please send the requested materials to Anastasia Dimitra at anadimitra1@gmail.com.

Postcards - Take TWO!

from Deanna Morse

ASIFA members are invited to submit up to 3 works for consideration for the second edition of ASIFA promotional postcards. The postcards will feature up to 25 members' artwork on the front side and information about ASIFA on the back. They will be distributed at ASIFA events, including at our partner animation festivals this summer. Both previously existing and new work will be considered.

Postcards - continued

Submission deadline for the first edition print run is March 31, 2025. The final selection will be curated by the ASIFA Communications Team and printed for distribution in 2025. Additional editions may be printed in the future.

Check your film frame files!
Please read the submission form carefully for formatting and additional guidelines -

SUBMIT [HERE](https://forms.gle/PuczkbW6C)

<https://forms.gle/PuczkbW6C>
[WvqQFA](https://forms.gle/PuczkbW6C)

In the meantime, in-between time, view the wildly popular 2024 Edition Postcard Gallery at

<https://asifa.net/asifa-international-postcard-exhibition-2024/>

February's ASIFA Central Coffee

hosted by Michael Long of Webster University

On February 6, a dozen members, tried and true, leaned into the Zoom with a View, pressed the appropriate keys, and rolled home with stuffed noggins to share the evening events with all who had ears and, ultimately, glazed eyes.

Animations for Peace will be the goal and theme for this year's group projects amid the international chapters, seeking the noble ambition of a life without violence, demonstrated visually, 8-12 seconds at a time. Bri Yarhouse of Interlochen, head of the IAD for the international ASIFA, has created a program for 2025 that should be aligned for showing at this year's IAD.

A Few Upcoming Animation/Film Festivals

€

Monstra fest - Portugal - March 20-30

Ann Arbor Film Festival - March 25-30, award programs March 30-April 13

Happy Valley Animation Festival - March 26-April 2

Rochester International Film Festival - May 1-3

Stuttgart - May 6-11

Zagreb - June 2-7

Annecy - June 8 -14

TAC - September 24-26

OIAF - September 24-28

€

Deanna Morse, Serene President of all ASIFA Chapters on this, the best of all possible inhabitable planets in our immediate light-speed time zone, also encouraged international participation in the upcoming Stuttgart and Zagreb festivals.

We were all reminded that our passports technically are effective until their expiry date, but with international travel, the concern of being in a host country when they expire means that you should have at *least six months left* on the document before departure.

Chris Robinson of OIAF and Agnes Li of ASIFA are seeking material, and we don't mean woolens! Have any stray words lying around, seeking an inky future in print?

Vivi shared her latest creation, a "silent book" called *The Magic Marker*. "Silent books are like storyboards!" Their advantage is to communicate an idea visually, and help make the intention known to those who may struggle with verbal communication.

And amid all the grasping for the latest technologies, there's an intentional struggle to make ToonBoom animation look more analog. Go Raster! We have run the cycle. Take *that*, AI!

The Joyful Gallery of Rogues

This year's nominated films, whether by the Academy, Golden Globe, or Annies, seem to operate on a more humanitarian level - the sensitive cooperation of the animals of *Flow*, the sweetness of *Wild Robot* indicate less shock and more awe on the animated screen.

And then the conversation slipped to humorous matters among the lingering zoomers:

(Excerpts from Jim's blog, later)

"OK, we got to talking about classic comedians last night at the ASIFA coffee, after musing about *just what isn't funny*, and the names Harry Langdon and Pierre Etaix percolated up (and I'm afraid, I was the main instigator). Langdon has gotten a bum rap in the opinion of yr hmbl typst, perpetuated by Walter Kerr in his otherwise amazing 1970s book, *The Silent Clowns*. The lack of access to his films - especially the later Warner releases - helped support the allegation over the years, but now his complete silent output has been made available on DVD, and online (and some of his early talkies from the Hal Roach Studios). Actually viewing the films proves otherwise. In fact, I contend he was the silent era's equivalent to Andy Kaufman, because, when left to his own devices, he could be utterly twisted and surreal. It didn't hurt that he was also an accomplished cartoonist.

"Pierre Etaix was a writer for the French auteur Jacques Tati (*Mon Oncle*, *Les Vacances de Mssr Hulot*, *Playtime*, *Traffic* - many of those films currently on the Criterion Channel) who was a fierce fan of Keaton and later, of Jerry Lewis (The unfinished Lewis "worst film" of *The Day the Clown Cried* is floating around in truncated form, but it may have benefitted by the collaboration with Etaix). Anyway - Etaix's films were not fully his. As a result, the Etaix gems, and they truly are gems, were unseen in the US until the last decade. My widdle head went kerBOOM when I came upon them on Turner Classics, and I immediately ordered the whole set, and then sent Etaix a gushing fan letter - only to have it returned a month later because...*he had DIED*. It gave me flashbacks to trying to contact Harold Lloyd as a tween in the early 1970s or Tati as a semi-adult in the 1980s. Anyway, here are some links to the films associated with this rambling discussion (thank the coffee, the 20 degrees and 30mph wind outside, and a dog not letting me out of her sight until she gets fed for contributing to this extensive bit of typing). SO - if you're interested, here's a way to kill some *more* time!

Harry Langdon:

Three's a Crowd - 15 minutes in inspired a similar scene in "Seule Tod" by yr hmbl typst - this film has him trying for "pathos" in between moments of nitrate decomposition: <https://www.youtube.com/watch?v=zemRj97rAek> (warning - there is an unfortunate moment of "blackface" amid the ruins of this movie)

The Chaser - 56 minutes into it is the most bizarre "seduction" ever put to film. This was his final feature for Warner's to be released - they never distributed his completed feature after this one, which is now considered a "lost films."

<https://www.youtube.com/watch?v=J6EQOuC2n6Q>

If you want to see how a career can be demolished by alcohol, check out the 1935 feature from Columbia, *Atlantic Adventure*. He plays a reporter's sidekick, "Snappy," and he is impaired on-screen to a greater

degree than Barrymore managed to be in *Grand Hotel*. On youtube -

<https://www.youtube.com/watch?v=SQ3XAm99nD8>

And now, for Pierre Etaix:

Rupture - 1961 - the consequences of writing to a girlfriend who is no longer friendly - the sounds were recorded in post-production, often provided by Etaix himself because the studio foley man wanted to stick to stock noises. It's an otherwise silent one-reeler, deliciously fatalistic.

<https://www.youtube.com/watch?v=XxOg4rmhnKM>

Happy Anniversary - 1962

Reminiscent of *One Week*, a young married couple is thwarted in their celebration by the lack of parking.

https://www.youtube.com/watch?v=NsJlbZ_YD7k&t=10s

Yoyo - excerpt from feature - 1965

<https://www.youtube.com/watch?v=WwP8miXV17I>

And the infamous *The Day the Clown Cried* - a 30 minute assembly of clips, uncovered by David Thrasher during the evening's discussions:

<https://www.youtube.com/watch?v=e0vF8FKuljU>

ANNIE Awards 2024

The awards came on the wild Sunday evening of February 9, punctuated by fire alarms going off at the UCLA's Royce Hall, and featured animation notables with gleeful vocal projections. When ASIFA Hollywood Executive Director Aubrey Mintz wrapped up the long evening, the zoetropes for the Best of Everything were spinning for ... the envelope please!

Best Feature - *Wild Robot*,

DreamWorks
Bests Independent Feature -

Flow, Sacrahlan Productions

Best Special Production - *Orion and the Dark*, DreamWorks

Best Short Subject - *Wander to Wonder*, Circe Films, et al
Best Sponsored - *Fuzzy Feelings*, Passion Pictures Hungry Man

Best TV/Media, Preschool - *The Tiny Chef Show*, Imagine Entertainment

Best TV/Media, Children - *Marvel's Moon Girl and Devil Dinosaur*, Flying Bark Productions

Best TV/Media, Mature - *Bob's Burgers*, 20th Television Animation

Best TV/Media, Limited Series - *A Night to Remember*, Pixar

Best Student Film - *Adios*, Jose Prats

Best FX Feature - *The Wild Robot*, DreamWorks

Best Character Animation, Feature - *Arcane*, Fortune Studio

Best Character Animation, Live Action - *Kingdom of the Planet of the Apes*, 20th Century Studios
Best Character Animation, Video Game - *Neva*, Nomada Studios

Best Character Design, TV/ Media - *Marvel's Moon Girl and Devil Dinosaur*, Disney TV

Best Character Design, Feature - *The Wild Robot*, DreamWorks

Best Direction, TV/ Media - *Arcane* - Arnaud Delord, Pascal Charrue, Bart Maunoury

Best Direction, Feature - *The Wild Robot*, Chris Sanders

Best Music, TV/Media - *Arcane*, Ryan Jillian Santiago, Alexander Seaver, Simon Wilcox

Comment by Michael Long on the ANNIES

€

"I enjoyed watching the awards, too. I skipped some parts as needed to get to the more interesting speeches (though some commentary as winners walked to the stage was worth hearing). It was nice to have it be all about animation. I loved seeing the younger winners so excited about suddenly being in the spotlight. And it was fun to see them in Royce Hall at UCLA, where as a student I used to put up posters for various shows and events and see some of them for free—like William Windom portraying James Thurber; Bruce Dern talking about being in a new movie called *Smile* and letting us know what it was like to work with *Hitchcock*; the British poet Stephen Spender, reading poetry; and Buckminster Fuller talking about, well, whatever was on his fertile mind that evening."

"On this Day of Hearts, this
amour mosaic,
We celebrate love with
Christmas cheer –
If only my prose were more
prosaic,
This Day of Hearts could
last all year!"

Best Music, Feature - *The Wild Robot*, Kris Bowers
Best Production Design, TV/Media - *Arcane*, Riot Games for Netflix
Best Production Design, Feature - *The Wild Robot*, Raymond Zibach, Ritchie Sacilioc
Best Storyboarding, TV/Media - *Arcane*, Josephine Meis
Best Storyboarding, Feature - *Despicable Me 4*, Illumination, Habib Louati
Best Voice Acting, TV/Media - *Dream Productions*, Pixar, Paula Pell (as character Paula)
Best Voice Acting, Feature - *The Wild Robot*, Lupita Nyong'o (as character Roz)
Best Writing, TV/Media - *Orion and the Dark*, Charlie Kaufman
Best Writing, Feature - *Flow*, Gints Zibalodis

Best Editorial, TV/Media - *Arcane*, Nazim Meslem

Best Editorial, Feature - *The Wild Robot*, Mary Blee

Signe Baumann Fundraising for Karmic Knot!

Our 2024 fall retreat speaker and presenter of her most recent feature, *My Love Affair With Marriage* is raising money for her next feature, already in production! Donations will be doubled by another benefactor equally entranced with the project. Some notes from Signe:
"Because of your support, my Team and I in Brooklyn can continue to work on sets and animation ... because we are not just making a film, we are creating a community around it, with like-minded people. Together, we can find hope and bring inspiration to other people."

The matching-funds campaign, will end on April 1st.

Here's a link with details on Signe's new project:

<https://www.myloveaffairwithmarriagemovie.com/post/love-money-and-karmic-knot>

<https://www.myloveaffairwithmarriage.com>

A Moment with Chuck Wilson's Bountiful Blog

Animated Thoughts: A surprising find in a surprising place

(from <https://smudgeanimation.blogspot.com/2025/01/animated-thoughts-surprising-find-in.html>)

This past weekend, I flew to New Orleans for my brother-in-law's 60th birthday party--what we all were calling "John Con 2025" by the end of the weekend. Hadn't seen that side of the family for a while and John is a great guy, so when I got the invite, there really was no decision to make, just a little shuffling of cash from one account to another to pay for the plane ticket and hotel.

Beignets!

My sister, ever the planner, had a series of "group" events set up for everyone to celebrate John's birthday but there was also some free time available where we could wander New Orleans by ourselves and do a little exploring.

Well, true to form, she selected our first meetup at the Café du Monde on the north side of town. Not the one by the waterfront where I had been before, no, this was the one a five minute walk from the New Orleans Museum of Art. So after getting sugared up on beignets, it was time to get moving and walk off some of that breakfast. The pre-planned walking tour of the French Quarter wouldn't be until the early afternoon, so I had time to walk across the street to the New Orleans Museum of Art.

The first surprise was seeing a Claude Monet painting that I've never seen in person before. 'Houses' is a bit of a departure from the flowing pastels that I'm used to. But it's a welcome one as it still displays Monet's signature brush strokes and stylization.

Another exhibit I really enjoyed was their special exhibit on the history of glasswork. There were multiple examples of ceramics and glasswork all around the museum, but this exhibit was a more expansive history of glasswork from around the world with examples spanning a wide range of techniques and styles. If you're in the area, it's worth checking out. As I took the photos, my mind was going a mile-a-minute figuring out how I'd model them in 3d CGI.

"Tumble-up" cup and decanter, c.1860

Decanter, c 1880 - Uranium Glass

Necklace with 19 miniature Easter Eggs from the workshop of Carl Fabergé

But the surprise of the visit was seeing a painting by artist Wayne Thiebaud.

Salmon Rose, 1966

On the placard, it stated "Disney animator", though my cursory research only revealed that he was an inbetweener for Disney during one summer before going on to producing commercial art, achieving a Masters degree in art history, and teaching at the University of California, Davis (among other accomplishments). [1]

Although I'm clearly biased here given the subject, I still think that it's the mark of a really good display that causes you to want to learn more about the artist, the art style or movement, or what influenced the artist when they were creating said artwork. Yes, I admit it, I'm one of those weirdos that you see in the museum, sitting down and looking at their smartphones while surrounded by priceless works of art. Well, more often than not, it's because I've seen something that sparks an interest and I want to know more about the artist or the times that they lived in. So rather than look it up later, I prefer to do my research immediately. If I take a couple pictures and promise myself that I'll do some research when I get home, well, more often than not life does tend to get in the way so better to capitalize on the moment.

So, I'd like to give props to the NOMA and their curators for putting together a very interesting collection of artwork. I wish that I would have had more time to enjoy their museum and sculpture park,

but NOMA is now on my list of museums that deserve a return visit when I'm back in the area.

* * *

MMXXV (2025)

## ASIFA Kicks Off Year-Long Celebration of 65th Anniversary

A Report from Deanna Morse, ASIFA International President

[president@asifa.net](mailto:president@asifa.net)

The International Animated Film Association, ASIFA is celebrating its 65th anniversary with a variety of exciting initiatives throughout the year. ASIFA's mission has always been to connect animators worldwide and promote the art of animation. As a global umbrella organization, ASIFA supports unique regional groups and chapters across the world.

Chapters are hosting a range of vibrant local and national activities, including film festivals, workshops, screenings, and celebratory events. The spring celebration has already kicked off with retrospective screenings, awards, and seminars at notable festivals, including the *Cairo Animatex Festival* (Egypt), and the *Monstra Animation Festival* (Portugal). Summer brings the *Zagreb International Animation Festival* (Croatia), and the *Annecy International Animation Festival* (France), with even more activities planned for the rest of the year.

### A Few Highlights:

- **International Animation Day:** ASIFA has issued a call for very short films about peace to be streamed on October 28, 2025, in celebration of the birthday of animation. <https://asifa.net/asifa-peace-for-the-planet/>
- **Special Anniversary Cash Award:** ASIFA will sponsor a special cash award at select festivals to recognize the anniversary.
- **ASIFA Student Award and ASIFA Member's Postcard Gallery:** These popular initiatives are underway, celebrating the talent and creativity of the animation community.
- **ASIFA Prize Retrospective Screenings:** Curated screenings of ASIFA Prize winners will be showcased at several major festivals.
- **Zagreb Animation Festival:** ASIFA will host a General Assembly meeting, and animator Sayoko Kinoshita will be honored with the prestigious ASIFA Prize for Lifetime Achievement. (More! Λ)

• **Annecy Animation Festival:** A major gathering is being organized by ASIFA Hellas, Hollywood, China, and others to celebrate the milestone anniversary.

In addition, *ASIFA Magazine* and the *ASIFA Academic Journal* will highlight the organization's history, achievements, and future directions. For the past 65 years, ASIFA has worked tirelessly to connect animators around the globe, celebrate the art of animation, and foster cultural exchange, all while upholding the values of peace, love, and tolerance. For more details on these activities, visit <https://asifa.net>

### ***And A Reminder About Those Postcards for IAD 2025***

*ASIFA Postcard callout - March 31 last day*  
(from asifa.net)

**B**ack by popular demand, ASIFA will unveil the second edition of its Member's Postcard Gallery at festivals this summer.

ASIFA International members are invited to **submit up to 3 works** for consideration for a curated run of ASIFA promotional postcards. The postcards will feature member's artwork on the front side and information about ASIFA on the back. They will be distributed at ASIFA events at major festivals. Both previously existing and new work will be considered.

Members are invited to submit designs by March 31, 2025 for consideration. Twenty-five (count 'em, 25!) images will be selected, printed **and distributed at festivals worldwide**.

### ***Postcard Submissions at this link -***

[https://docs.google.com/forms/d/e/1FAIpQLSfNPOq9hOJUnYo6pCOQYOg-jX\\_JdyYrZUBT8cXwO10eCIVYcg/vie\\_wform](https://docs.google.com/forms/d/e/1FAIpQLSfNPOq9hOJUnYo6pCOQYOg-jX_JdyYrZUBT8cXwO10eCIVYcg/vie_wform)

***And the postcard gallery from 2024 is here!***  
<https://asifa.net/asifa-international-postcard-exhibition-2024/> (Our own Peaches Wilczak's selection is just above!)

### ***The March 6 Coffee Chew***

**M**ichael Long remained the host with the most in March, and the near-dozen members who tuned in from areas far and exotic had plenty to bring to the table that fateful Thursday evening. He celebrates his 40<sup>th</sup> year teaching at Webster University in St. Louis (er, *Saint* Louis, as the post office now demands), Missouri.

*The Amplified Grind*

Deanna Morse reminded everyone that the [asifa.net](https://asifa.net) site has updated information on the ASIFA 65<sup>th</sup> anniversary, along with an updated link to its *Academic Journal*. She is preparing for Mostre (starting March 21), Bri Yarhouse is en route to India, and postcard versions of the 2025 IAD poster are available for members who provide her (or yr hmbl typst) with a snail mail address. Agnes Li extended greetings from Sheridan College and politely endured yr hmbl typst's theory that all diplomacy in Asia requires a certain immersion in the societal impact of Astro Boy.

The ASIFA International general assembly will be in Zagreb, Croatia this year (June 2-7).  
<https://www.animafest.hr/en>

*A Beaming Lot - March 2025*

*The Award Came Back!*

Mary Beams tuned in from the far reaches of Minnesota and shared recollections with John Akre of the Walker Art Center, sharing her Zagreb award that was in storage, then discarded, then retrieved and returned by someone who considered it a genuine Major Award.

Mary Beams' *Tub Film* from 1972

<https://vimeo.com/183330860>

Orrin Scott has updated his massive bibliography and continues to prepare for a second edition release: <https://cartoonresearch.com/index.php/the-animation-history-bibliography/>

Tracy Miller-Robbins remains the most overbusy instructor in the entire megaverse, animating students among three colleges in the sprawling midwest. (Record all mileage!) The Official Tracy Miller Robbins website for *no entry fee festivals* still exists and is undergoing revisions and updates.

<https://noentryfeefestivals.com/author/nentryfeefestivals/>

Inspired by Russian Animators who spoke out against war with Ukraine, we want to promote Peace everywhere. No matter what you believe or how you disagree with one another, violence and killing is not the answer. All creatures have the right to live in peace.

Animations created and shared will be shown world-wide streaming on International animation day

President Julie Goldstein recollected her "entry to animaton" came via her fascination with sculpture. Forested regions of the Chicago area still exhibit specimens of her creativity, cherished by the elusive sylphs and pixies. Mind your step! She related that SIGGRAPH (<https://en.wikipedia.org/wiki/SIGGRAPH>) wants to return to clay this year for its improvisational quality, a meld of quantum computation and organic material. She lives the maxim to "get lost in your work and the work reveals itself."

Online, *spacejam.com* is STILL a functional website from the time of the film's release - 1996 preserved in digital amber.

### **ASIFA PEACE for the PLANET**

Creating Short Animations for Peace - via Bri Yarhouse

Join us to promote peace around the globe with your animation. We want to speak out against killing one another as the answer to conflict.

Today, there are over 28 armed conflicts that are occurring across the globe. How do we as an organization respond? When ASIFA was chartered in 1960 it was partly in response to a world at war.

Provisioned under UNESCO, Peace has been one of the tenets of interchange between animators and our differing cultures. As the UNESCO vision statement states:

"Since wars begin in the minds of men and women, it is in the minds of men and women that peace must be built." (UNESCO)

(October 28, 2025) and possibly be collected into a selection for showing theatrically at festivals and be used as part of a social media campaign. They will be shared freely without financial gain for anyone.

Guidelines for PEACE submissions:

- ◆ DEADLINE: September 1, 2025
- ◆ 8 to 11 seconds for each short animated film
- ◆ Pixel dimensions should be either 1920 x 1080 (HD) or 3840 x 2160 (4K UHD)
- ◆ H.264 compression
- ◆ Credits should not be embedded in the short film but provided separately. Animators have the option of being anonymous to reflect the potential personal danger of being targeted
- ◆ Each short should end with the word "Peace" in the personal language of the animator.
- ◆ Animations must include their own sound and be royalty free and able to be shown without restrictions.
- ◆ Animators must agree to the Creative Commons licensing: CC BY NC ND 4.0.
- ◆ Content is subject to the animators choice but must be a response to our theme of peace in the world, however they interpret this.
- ◆ ASIFA is not responsible for the content.

Full Information at asifa.net, specifically, <https://asifa.net/asifa-peace-for-the-planet/>

And, of course, the entry form: [https://docs.google.com/forms/d/e/1FAIpQLSdGbn4V22weoUZ\\_BrvdGbyRlhoX8Q5IlgHZMs3wCF66YmTt2Q/viewform](https://docs.google.com/forms/d/e/1FAIpQLSdGbn4V22weoUZ_BrvdGbyRlhoX8Q5IlgHZMs3wCF66YmTt2Q/viewform)

### **CVM Update - A Fundraiser Rare Materials Moving Due to California fires**

C V M extends huge thanks to those who've donated so far to our *GoFundMe* campaign to move collections out of LA, for safety. There will be more wildfires in LA, it's just a question of time. We've only raised 14% of the goal (as of March 2025), so donations of even \$10 or 10 euro all helps and adds up.

Huge thanks to CVM members, the animation and film communities, colleagues at museums, festivals and venues, and thanks to other kind friends. All their names are on the *GoFundMe* page. Thanks also to in-kind help from Screen Novelties, LA.

<https://gofund.me/5386d614>

### **1913 - How to Draw - Lutz pdf on archive.org**

88 pages, free to download

E.G. Lutz published his *Animated Cartoons* in 1920, inspiring some lad named Disney to get into the business. Seven years before, however, Lutz wrote another basic text on creating comic characters for the public that preferred its cartoons a bit more *static*. This 88 page treatise is now on archive.org, free for download and/or perusal.

<https://archive.org/details/whattodrawhowtod00lutz>

*the mellifluous melodies in an untranslated language*

**F**rom an aural viewpoint, English seems like such a flat language. You can speak it **LOUDLY**, you can speak it (softly), you can speak it fast you cannot understand it or so sssssslllllllllllllllloooooooowwwwwwly that nobody cares.

So when ASIFA Central International Correspondent Vivi Markatos engaged with Xrista Kritskou on youtube, I didn't really have a clue what they were talking about, but they were quite interested in the topic, and were frequently chatting back and forth with a level of musical excitement akin to a Gilbert and Sullivan patter song. I enjoyed the operetta rhythm and then - *broccoli!* The word *broccoli* emerged. In Greek, ἰνδῦ. So now I had to pay attention. They were talking about nutrition for children, and how to get them to eat broccoli, and how it looks like little trees. So, in addition to being a phenomenon in the children's publishing world, an animator, a storyboarder, and a podcaster, Vivi is a nutritionist! Our members have no limit to their talents.

*Techno-Nationalism and the Rise  
of Chinese Animation: Nezha 2 and  
the Evolution of CGI Blockbusters  
in China*

This program is part of China Center's "Considering China Webinar Series," exploring important topics related to China's many facets with the local community.

## 2006's "Avian Flu" PSA Revived for RIFF

The moral - throw nothing out!

Yr hmbl typst has made no secret of his affection for the Rochester (New York) International Film Festival over the past year. Their generous hospitality makes any participating filmmaker feel welcome, and the innovations at the RIT campus certainly provide its students with the best of tech and production processes available. And they provide copious notes on every film submitted. *Seule Tod* was not to their liking this time, but the short film *Avian Flu* from 2006 caught their interest. It was originally produced to show new animation students in Battle Creek (Michigan) what could be done in a "raster" form using Flash 5.5 (the school was on a tight budget), with the assignment of symbol use and synchronization to public domain music. When it was selected, yr hmbl typst realized the master was on a gen-lock transfer to a VHS format. What took barely a weekend in 2006 took nearly two weeks to properly convert the 1120 frames into a compatible mp4 for projection.

### Addressing the Challenge of Afro-hair in Animation

(reflecting an NPR broadcast of 16 March 2025)

NPR's Ayesha Rascoe spoke with video game designer and UC Santa Cruz professor A.M. Darke, about her work on a new computer algorithm that more accurately illustrates Black hair for animation and video gaming.

Dr. A M Darke

<https://www.nprillinois.org/2025-03-16/an-animation-breakthrough-makes-it-possible-to-more-accurately-illustrate-black-hair>

Dr. Darke built her character algorithm on Afro-hair based on three follicular attributes:

1. Phase - the locking "spongy matrix" aspect
2. Switchback - the "secret sauce" - think in terms of an old telephone curled cord with a kink
3. Period skipping - the "frizz factor"

She made the point that animation has only been cataloging the Afro-hair styles for computer character images over the past five years, slowly moving past visual clichés and stereotypical designs.

Access to her library of images -

<https://prettydarke.cool/portfolio/open-source-afro-hair-library/>

### Just In! ASIFA International 65<sup>th</sup> Anniversary Collaborative on Vimeo

"The international Animation Association, ASIFA, celebrates their 65th Anniversary this year. Promotional animations from ASIFA Hellas, based on the logo designed by Alkatis Tsikou, working with Professor Anastasia Dimitra. More from Animation Workshop Group. Also, Spiritus Mundi designed by Briana Yarhouse (an IAD initiative), Jim Middleton, and so many others!

"We are a collaborative group of animators who share our vision of global communication and peace. And our love of animation.

"Music from Dan Rickabus and others. Edited by Deanna Morse and Suzanne Zack."

<https://vimeo.com/1066004502>

## *And Now, a Moment from Chuck Wilson's Bountiful Blog*

### Animated Events: Ray Harryhausen in Kalamazoo

(February 1 - April 27, 2025)

<https://smudgeanimation.blogspot.com/2025/03/animated-events-ray-harryhausen-in.html>

I gotta say, I know some great people. My friend Oren sent me a message on Facebook about an event in Kalamazoo that slipped under my radar. At the Kalamazoo Valley Museum, they brought in a special exhibit on Ray Harryhausen.

This production was a collection of movie posters from films he worked on as well as notes, storyboards, drawings, sculptures, and models he had produced over the course of his career.

I especially liked this one, where it diagrammed out his Dynamation process. Would've loved to have some of these drawings on hand when I explained Dynamation to my students in previous classes.

Now, the exhibit runs until the end of April--April 27th to be exact. So you've still got time to get down there and take in the sights. Best of all: entry into the museum (and the exhibit) is free! Though they do take donations at the front desk if you'd like to help support their efforts to bring cool stuff like this to the people of Michigan. The display cases were filled with treasures from my childhood memories, however, some of

Skeleton Models from *Jason and the Argonauts* and *The Seventh Voyage of Sinbad*

them were more recent memories: like these skeletons from *Jason and the Argonauts*. Every year, I show the skeleton battle from that film to my students. I never would've thought that I'd get the chance to see them first hand.

They also had another sketch of how the Dynamation process worked. I'm planning on integrating these photos into my class. A lot of my students struggle with understanding how Dynamation worked--especially the use of mattes. Every extra thing I can do to help them learn... I think I might use these drawings to make a scale model of Harryhausen's setup that the kids can look at.

Creating the Homunculus - Key Drawing The Golden Voyage of Sinbad, c.1971

Wow, seeing the Homunculus was such a good experience. I vividly remember watching the *Golden Voyage of Sinbad* on cable television back in the late '70's when I was a kid who loved to draw dinosaurs and monsters.

Model of the Homunculus The Golden Voyage of Sinbad, c.1972

Unfortunately it highlighted a weakness in my DVD collection. I've got some films like *Beast from 20,000 Fathoms*, *Jason and the Argonauts*, *Valley of Gwangi*, and *7th Voyage of Sinbad*, but I'm missing the rest of the Sinbad trilogy and classics like *Mysterious Island* and *Clash of the Titans*. Going to fix that soon.

Fortunately, Amazon has a good Harryhausen film collection on Blu-Ray and *Clash of the Titans* is affordably priced. Gives me something to save up for. Maybe by Memorial Day I'll do a Saturday "Creature Feature" marathon where I binge watch all three *Sinbad* films, *Mysterious Island*, and *Clash of the Titans*...

Speaking of which, initially, I was a little surprised at the scale of some of these models. The Kraken was about the size of a small cat. But it makes sense. I once talked to stop-motion animator Tom Brierton about animating the robot models for *Robot Jox* and he said that the models were so big that it took him and several assistants to accurately move it from position to position. Now that I've had time to mull it over, it makes a lot of sense--finding that balance between the sets being too big and expensive to be practical and yet still having a model that is easier to manipulate. There's a lot to ponder and learn here.

Model of the Kraken  
*Clash of the Titans*, c.1980

If you do end up attending the exhibit, take a moment to look at the book that Ray's daughter, Vanessa, published. It's a thick, coffee table-size book filled to the brim with stories about Ray and photos of Vanessa's favorite items from the Ray and Diana Harryhausen Foundation's collection--many of which were on display.

After perusing the book at the museum, I had to have a copy for my personal library, so I snagged one of the last ones on Amazon. Have already done a little digging into some of my favorite films but plan to do a deep dive into the tome before going back to Kalamazoo. This exhibit is worth multiple visits.

Hare and Fox  
Puppet Heads  
Fairy Tales (The  
Tortoise and the  
Hare), c.1958

While I took tons of photographs during my trip, I really just want to share enough to whet your appetite. You really need to see this exhibit in person. Ray Harryhausen was one of those giants upon whose shoulders modern stop motion animators stand--and a lot of 3d CGI animators as well. The legacy he left behind is well worth serious study for any student who wants to become an animator.

## ASIFA INTERNATIONAL POSTCARDS - 2025

**F**our more in the ASIFA International postcard series were just released for 2025, and will be appearing at festivals around the world as International Animation Day approaches. Watch our for lost Michiganders lurking around the upcoming OIAF in September! Uh-oh! Two from ASIFA Central this year!

*Empress Chung, Nelson Shin*

*Benny Promotes ASIFA, Jim Middleton*

*Melting Shame, Shweta Marathe*

*What's Love Got to Do With It, Irina Rubina*

**A**nd, speaking of International Animation Day - your contribution to the ASIFA Showreels has an October 1 deadline on Film Freeway. The details are online and in this newsletter - along with an email coming to a digital mailbox near YOU! You have been Warned! CARTOONS ARE COMING!

*International Animation Day - How You May Participate*  
(this may seem somewhat familiar)  
*Deadline for Submissions: October 1, 2025*

The IAD program is coordinated through the online festival broker, Film Freeway. It's free, but it is a multi-step process. If your intended film is already in Film Freeway, skip to Part Three below.

Note - and this is important to understand - *this is not a festival*. ASIFA is using FilmFreeway as a holding zone for films that chapter members want to make available for showing as part of the IAD celebration. *No prizes are awarded, and no laurels are "official" for ASIFA IAD*. Chapter representatives will pick among the submissions, and on IAD, will run them as part of that area's contribution to the international celebration!

*PART ONE* - Some basic requirements and Guidelines

Get your animation into a digital format (ie, mp4). This will make it possible to assemble IAD entries into a compatible program.

Here are the suggested criteria from the IAD Coordinator, Bri Yarhouse:

**Film dimensions should range in size from: 1280x720 to 1920x1080**

**Use NTSC format**

**Video Compression: H264**

**Pixel Ratio: Square Pixels**

**Try to keep the file size to 10 gigs or lower**

*PART TWO* - Putting your masterpiece into the FilmFreeway portal if you haven't yet used FilmFreeway

1. Go to <https://filmfreeway.com> and create a profile for yourself, if you haven't already done so (if you have a profile, log in!)
2. While in the same portal, create a profile about your project. To do this, look at the top of your newly created profile page for *My Projects* and click there.
3. Then click on a blue button *Add A Project* (just like in the picture here!)

## Add a Project

### 1 Project Information

Project Type ☒ Film / Video

☐ Script

☐ Music / Songwriting

☐ Photography / Design

☐ VR / XR / Immersive BETA

\* Project Title

(English)

The Godfather

Brief Synopsis

(English)

4. This opens up a series of sub categories - project info, then submissions info, then credits - fill up as many of the 5 fields as you can

5. THEN you get to upload your project file - the portal will take you to a new page and permit up to a 10G sized file (this is why we suggest a 10G file maximum!)

6. Repeat the process *for each film* you want to put into the Film Freeway library. No restriction on the number of submissions into the IAD collection!

OK, now you're done with the file building in Film Freeway.

*PART THREE:* Contact the ASIFA Central Secretary, yr hmb1 typst, Jim Middleton at [jim.middletonrx@gmail.com](mailto:jim.middletonrx@gmail.com) for your entry code information!

If you entered a film in last year's IAD, the process will be identical, nevertheless, it is only being distributed on a person-by-person basis to keep extraneous activity from occurring!

*It's easier than shaving with a mask on!*

*And then in October, you can be an INTERNATIONAL STAR!*

The ASIFA Central Reel Available should be available by October 10, with multiple formats (anticipated reels to include - Peace Centric, Family Friendly, 45 minute in-class version, 90 minute broadcast versions - so many choices!)

ASIFA Central Members - If you are coordinating showreels for your class, contact Jim Middleton at [jim.middletonrx@gmail.com](mailto:jim.middletonrx@gmail.com)

<https://www.youtube.com/watch?v=pqCRgiHHvB4>

**July Coffee - Flip Book Celebration and STUFF!**

The Flipbook Film Festival is an annual event in Vienna that focuses on animated films made by European authors. It features screenings, exhibitions, master classes, workshops, panels, and meetings with film makers. The festival also includes animated music videos and a European panorama section. In addition to the Flipbook Film Festival, there is also *FLIPT! 2024* - The 4th Austrian flipbook festival, organized by Gold Extra, open to all experimental flipbook submissions.

Agnes Li provided the address and link information - the 20 September 2025 deadline is tight for this year's competition, but it will likely be a returned experience in 2026 - <https://daumenkino.animaplus.at/en/intro> - in addition to the flip book, you'll need an entry form and if you want it returned (sending single originals might not be the best idea, they will all get well-loved during the run of the festival) include an envelope with return postage (but again, the current international "challenges" in shipping to and from Europe may have an impact on whether things make it to the US – similar challenges are facing shipping material from Canada to the US as of 27 August 2025, due to near-daily capricious practices affecting international shipping). The mailing address also follows here, to document the info for our newsletter and ASIFA Central archives (again, thanks to Agnes Li for her contributions during the July Zoom)

*ASIFA Central Newsletter - End of August 2025 - more at [asifa.org](http://asifa.org) and [asifa.net](http://asifa.net)*

Orrin Scott discovered that the Internet Archive has John Halas' *Timing for Animation* in digital form:

<https://archive.org/details/timingforanimation/mode/2up>

Orrin also has added animation periodicals and a lecture for Winsor McCay's 150<sup>th</sup> birthday on his International Archive account, linked here:

[https://archive.org/details/@orrin\\_scott382](https://archive.org/details/@orrin_scott382) - AND he tracked down information on upcoming public domain character information -

<https://www.visualcapitalist.com/wp-content/uploads/2024/06/The-Next-Characters-to-Go-Public-Domain-With-Footer.jpg>  
(Betty Boop and Pluto slide into that world in 2026)

With peace being a “consummation devoutly to be wished” this year, we received word about a global anijam, in addition to the project being coordinated by ASIFA Central's Bri Yarhouse, organized by Joanna Quinn, Called *To Gaza with Love*. There was a short deadline for it, with the submissions via an eventbrite feed (deadline currently passed): <https://www.eventbrite.com/e/to-gaza-with-love-a-global-anijam-tickets-1375236813329>

Michael Long, yr hmblytst, Dave Thrasher, Deanna Morse, Orrin Scott, Johan and Beth Akre, Agnes Li, Jane Flint, Vivi Markatos

At last count (15 August), over 350 animators from 50 countries had contributed to the Gaza anijam. It will be a major subject this year, no doubt (*yr hmblytst* will be taking copious notes at the OIAF in September for related topics).

From the *To Gaza with Love* coordinators came this follow up note: The premiere of the final animation submissions will live streamed on an interactive map indicating the location of support. (TBA) A curated compilation of submitted animations will also be screened at select International Animation Festivals, bringing messages of unity from around the world. Check @ac4Pal on instagram.

A phenomenally influential animated series hosted by Jean Marsh on PBS in the 1970s has at least one episode popping up on YouTube as well - this is a link to episode 108 from the *International Animation Festival* in 1975 – [https://youtu.be/CasJBQDekL0?si=zdDzNg8nNqK8R\\_ZG](https://youtu.be/CasJBQDekL0?si=zdDzNg8nNqK8R_ZG)

David Thrasher tracked down the Python alumnus Terry Gilliam teaching his cut out animation style, also on the ubiquitous YouTube: <https://youtu.be/KOqCHCEQ01k?si=vGX2UPIt3Iiu-24F>

### *August Coffee Zoom – More Links and Mark Twain*

Ink and Drink Comics - it's even on the Book of Faces!

<https://www.facebook.com/inkanddrinkcomics/>

And following Michael Long's successful roadtrip to seek out Mark Twain, we were treated to this bit of visual ephemera

<https://marktwainhouse.org/>

David Thrasher, goofball in Hawaiian shirt, John and Beth Akre, Peaches Walczak, Agnes Li, Chris Sagovac, VIVI!, Michael Long, Orrin Scott

### *Travel Notes from Our On-The-Roadtrip Reporter, Michael Long!*

In Elmira, NY, there's a wooden octagonal writing study that Mark Twain's sister-in-law had built for him, so he could write, away from the house, and look over Elmira and the river. (She also didn't want him smoking his 30-40 cigars all day in the main house.) For 20 summers he wrote in that study, working on *Tom Sawyer* and *Huck Finn*, among other things. In 1952 the study was removed from its hillside spot and relocated on the campus of Elmira College, where you can visit it for free today.

Hal Roach and Mark Twain are both buried in Woodlawn Cemetery in Elmira. Sam Clemens's wife Livy and all their children are buried there, too (as are a lot of Confederate soldiers who languished and died in a notorious Civil War prison camp near the town). I visited the cemetery and the study on Friday July 18th. Before leaving for the trip, I selected two stones from St. Louis to leave on MT's gravestone. The rough stone represents Sam Clemens, the rough, western humorist, and the polished stone is more like Mark Twain, who cleaned up his act and character (with the help of his wife) for public display.

On July 28th I visited the Mark Twain home in Hartford, Connecticut. In the museum they had an exhibit of the prosthetic noses that Hal Holbrook used to portray (embody?) Mark Twain. Pretty cool stuff! There's a lot at the museum and house to see.

### *With a few more road-trip photos and notes documenting the **Jumping Frog From St. Louis County.***

Background: my great uncle, Phil Giebel, worked for the Winkle Terra Cotta Company in St. Louis, Missouri. The company created terra cotta figures and designs to adorn public buildings throughout St Louis and the Midwest. Phil created two of these frogs around 100 years ago, perhaps as wedding presents for my grandfather (his brother), married in 1926. The frogs sat in my grandfather's backyard, facing each other across the lawn, and when my mother was a little girl in the

*ASIFA Central Newsletter - End of August 2025 - more at [asifa.org](http://asifa.org) and [asifa.net](http://asifa.net)*

1930s, she used to "ride" them – as did my brother and I and our cousins when we were little. The frogs were there for over 60 years.

When my grandmother died in 1988, the frog pair was split up: one went to my mother, the other to her brother (that one is now lost). The surviving frog ("Froggy") sat in my parents' backyard for another 37 years; again, in all kinds of weather, slowly sinking further and further into the soil. So, for about 100 years, this frog has been outdoors in rain, snow, and heat (Maybe it helped scare away flies?). It's very heavy, made of concrete (we think), painted and glazed. That's why I hired two strong teenagers to carry it from the backyard to the driveway and lift it into the car.

In that car it "hopped" to Vermont by way of Kent, Ohio, and Elmira, New York. Now, Froggy is with my niece's family in Burlington, carrying on the family tradition of keeping an eye on the landscaping. Mark Twain would have appreciated the effort, I think. I'm only sorry he didn't get a chance to meet him in person.

My grandfather was the one who introduced my brother and me to Mark Twain and Hannibal. In summer 1965, during a blistering heat wave, Grandpa spontaneously offered to drive our family of four in his nice, new AIR CONDITIONED car to Hannibal, Missouri. Once there, we toured the house, and then the Becky Thatcher Gift Shop, across the street. He told my brother and me that we could pick out *one item*, and he would buy it for us. I picked a little metal paperweight bust of Mark Twain which had been "made in Japan." I still have it. When my grandfather died the next year, I asked my grandmother if I could have my grandfather's book of the collected short stories of Mark Twain. She said yes. I still have that, too. Thus began a-lifelong association with Twain.

Now, how can I think of going back to teaching this fall, with all this recent travel to relive?

### ***Deanna Morse, Annecy, and THE WORLD!***

*Deanna Morse at Zagreb with Anastasia Dmitra - ASIFA International Quick Notes*  
ASIFA General Assembly at Animafest, Zagreb, June 5, 2025

**A**t the ASIFA General Assembly members gathered for a concise yet meaningful meeting, supported by over 380

proxies from global chapters. The audit was formally accepted. Ten chapters shared dynamic updates: from ASIFA South and Central USA's vibrant community efforts, to Hungary's rich programming, Croatia's IAD revival, and Japan's new leadership. Austria and Hellas emphasized institutional partnerships and future goals. East USA celebrated festival milestones, while China showcased growth and structural evolution. Korea raised urgent

concerns about AI's impact on animation education and proposed global collaboration. The assembly concluded with distribution of the 2025–2027 nomination timeline and informal conversations about ASIFA's future.

*And, as ASIFA Central celebrates its 50<sup>th</sup> year, Deanna has been circumnavigating the globe as the International President, creating a positive presence and good will with the expanding presence of the association. Next - A chapter in Mongolia?*

### **OIAF Update - Still With A Special ASIFA Central Membership Discount!**

**T**he Ottawa International Animation Festival announces its 2025 Feature Film and Short Film jury members, including Canadian animators Winston Hacking and Chris Lavis.

The OIAF is one of the world's leading animation events, and it has provided screenings, exhibits, workshops, and entertainment since 1976, bringing together art and industry to experience world-class animated works. This year's OIAF runs from September 24 to September 28. Visit the OIAF site, [www.animationfestival.ca](http://www.animationfestival.ca) for more information.

The ASIFA Central AnimaPass Discount is \$20 for ASIFA Central members. The festival has been provided with active members from ASIFA Central, and active members have received a separate email with the discount code for the festival. If you haven't received that email, or if you encounter any membership documentation problems when ordering your AnimaPass, contact yr hmb1 typst ([jim.middletonrx@gmail.com](mailto:jim.middletonrx@gmail.com)) and we'll work with the OIAF to adjust their database.

This year's OIAF will feature 72 animated short film finalists amid a record-breaking 2,850 Submissions. All winners will be announced at the Awards Ceremony on September 27 at the National Arts Centre in Ottawa.

"International animation continues to surprise," says Chris Robinson, Artistic Director of the OIAF. "Even as the world spins through chaos, fear, and conflict, our community has turned to humour as a vibrant counterpoint. A few years ago, we introduced the Hélène Tanguay Award for Humour to shine a spotlight on the funnier side of animation—and this year's selections deliver every flavour you could hope for: sharp satire, whimsical absurdity, delightfully dark twists, and good old-fashioned slapstick."

Bri!

**Bri Yarhouse's** – reminder that the Peace initiative is still on the ASIFA International website:

<https://asifa.net/asifa-peace-for-the-planet/>

“This year for International Animation Day, we will be focusing on a new initiative. The goal is for animators of all ages, all levels, to be able to use the power of their art towards speaking out against the use of hate and killing to solve our differences. The AWG (Animators Workshop Group) will also be leading children in workshops around the world on this topic.

“When I was in India at WAVES (World Audio Visual and Entertainment Summit) in early May, speaking on this topic and handing out 1000 cards with a

QR code to lead potential animators to the link at asifa.net. If you are interested in the files to print up locally, let me know (easier than trying to print and ship from the US!).

“Some of you reached out in early January and indicated your interest in helping guide and support IAD. I will be holding a zoom meeting soon. If you are interested in being part of the meeting let me know and we will work on scheduling it.

“Finally, I have the honor of having been asked to lead AWG as president after Christel Degros has stepped down from the position. I am excited to continue to think about ways that animation can touch lives and make a difference. It is a world that needs to be reminded that we are all worthy of dignity and love.”

### Jim Middleton and Gary Schwartz Up To Their Old Tricks - Gary's Had Better Food!

Gary Schwartz stepped into the strange during July's “Something's Not Quite Right,” an outdoor experimental film screening hosted by the Pink Flamingo in Detroit. Curated for the curious, these short films conjured eerie atmospheres, otherworldly imagery, and disjointed realities that linger long after they flicker out.

The eight short films ran on a loop for approximately 17 minutes during the program - and the Pink Flamingo served delicious food throughout the event. All found themselves entranced, disturbed, or somewhere in between. Nothing here was quite what it seemed.

Jim Middleton, yr hmb1 typst, worked with Dr. Phil Bellfy of Ziibi Press in Sault Ste Marie, Michigan to do spot illustrations and the cover design for his revised edition of the book, *Indians and Other*

*Misnomers*, set for release later in 2025. Dr. Bellfy is an enrolled member of the White Earth Band of Minnesota Chippewa, Co-Director of the Center for the Study of Indigenous Border Issues (CSIBI), and Professor Emeritus of American Indian Studies, Michigan State University. Evolution of the sketches is on Jim's blog at

***A Note Excerpted from the ASIFA-SF Newsletter, September 2025***

(yr hmb! typst)

“The AI craze again demonstrates how misused any new technology is - movies created Sound and Color - and Paramount created *Follow Through!* in 1930. MGM was the king of musicals, and they extruded *DuBarry Was A Lady* as if they forgot everything in a hurry to distract us from WWII. Ernie Kovacs was the only one who understood the creative use of video in the 1950s, when it was deemed an cheaper way to make re-broadcasts than kinescopes, and early computer animation was served out in the longest, most tedious, 90 second specimens until *Andre and Wally B.*

“The AI I see most effective is as just another "special effect" and a much of that is frankly, making deeper use of existing, often-free, gaming software (a *game* changer, as *Flow* proved this year). But if the audience isn't educated well enough, if the intent is to deceive, well, AI can certainly help destroy faith and credibility in whatever we think we are seeing.

“A solution? Learn cursive, write letters, take actual notes, and get a good night's sleep. Creativity needs to start early, use both halves of the brain, and have a well rested imagination equipped with critical thinking.”

And Now, Your Moment of McCay

## Upcoming Mini-Retreat and ASIFA Central Board Elections Coming Doodle Polls to Enter your EMAIL

The September 3<sup>rd</sup> meeting of the ASIFA Central Board convened to assess the prospects for both a retreat and a general board election between now and December, 2025. The consensus was that a virtual retreat can still be arranged for October, with a general election for board members in December, with the new term kicking in on January 1, 2026. Board members have been experiencing a surfeit of scheduling challenges over the past year, and many projects have been sidelined until the *very animated dust could settle*.

*Doodle Polls will be coming from President Julie Goldstein or yr hmbl typst very soon to enquire on favored dates for the retreat and make a call for interested candidates for Board Member positions.*

## A Quick September 2025 ZOOM Coffee Experience

Magical Zoom meetings were all the rage in the first week of September - hosted by Michael Long of Webster University, the first topic for consideration was that Webster University would no longer be using Zoom for its campus activities, so participants passed the hat to continue it as our most effective means so far for group communications.

AI was on the forefront of discussions, as it will become for the upcoming proposed retreat, with a discussion forum on its use in education. As with any new technology, it is being used without real planning aforethought, as computerization was implemented as a "great way to reduce staff" but in reality, only shuffled payroll to an IT department. It can be the same with AI in the animation education world, an especial pity since there is a groundswell of more hands-on techniques rather than AI, with the use of off-the-shelf open source software (Blender, etc) proving effective for individual expression - animation is not a tool-based medium, and as ASIFA members have long-contended, "We have the best *storytellers*," which is the best mental state when considering what AI involvement should entail in any animated production.

*The Usual Suspects - Michael Long, Yr Hmbl Typst, Gretchen Vinnedge, Deanna Morse, David Thrasher, Peaches Wilczak, Viva Vivi!, Carlos Rosas, Chris Sullivan*

And speaking of software, Wonder Unit was explored as an open-source software for storyboarding, along with a product called Storyboarder, which offered a frank assessment of license-centric (and expensive) “commercial products” with its FAQ paragraph explaining, “Why is it free?” with a poetically terse, “F\*ck those guys.”

### ***Happy Valley Film Festival Still Taking Submissions!***

The Happy Valley Animation Festival (HVAF) will return for its sixth year with events beginning on March 26, 2026 at State College, PA (Happy Valley). An open international animation competition showcasing a wide variety of animated works, HVAF is screened online as well as throughout the Pennsylvania State University (University Park). Submissions from students, early career, and practicing professional artists, designers, and filmmakers are welcome in any of the three categories: *Animated Short Films*, *Experimental Animation*, and *Animated Motion Graphics & Design*.

Call for Entries: October 1, 2025 - December 1, 2025

Submission Deadline: December 1st, 2025

March 27, 2026 | Animation Showcase

March 26 and March 28, 2026 | Official Selection Screenings

May 1 - May 22, 2026 (tentative) | Gallery Exhibition

<https://happyvalleyanimationfestival.org>

### ***Steve Leeper at CMU - Presenting Works in Progress and Author Installations***

Central Michigan University

August 29 - September 27, 2025

Opening reception Thursday, August 28, 2025, 4-6 pm

***And Another Reminder – IAD Submission Deadline on FilmFreeway is October 1, 2025!!!***

# Analytical and Articulatory Animation Analysis

ASIFA Central Newsletter Supplemental Series - January 2026

## Panel Discussion and Creative Perspectives Regarding AI - from November Retreat 2025

Video edit - 55 minutes - at <https://vimeo.com/1149263861/10499da2d1?fl=ip&fe=ec>

Disussions by Bri Yarhouse - Julie Goldstein - Steve Leeper - Carlos Rosas

Edit and Notes: Jim Middleton

*The AI discussion was framed around a critical distinction – AI as generator (enabling) versus AI as tool (empowering). When used as a generator, AI systems gather enormous amounts of data to produce images, voices, and styles, often without the consent of the artists whose work was absorbed in the process. When positioned as a tool, however, AI can function much like earlier technologies in animation history by supporting an artist's vision, reducing repetitive labor, and extending creative possibilities without replacing authorship.*

*One of the most animated and thoughtful conversations at this year's AI Retreat centered not on software demonstrations, but on a deeper question: What does artificial intelligence mean for artists and the future of animation?*

**Uses of Generative AI** - Bri Yarhouse and Julie Goldstein introduced the discussion

Bri Yarhouse, Interlachen

Bri Yarhouse began with a presentation she gave in China this past October, based on AI discussions held in Pasadena, California that were conducted by Lightbox the previous month. Her presentation was more about protecting the artist from the uncredited absorption of work by AI, rather than the techniques and tools for using artificial intelligence.

Julie Goldstein has been working with AI for the past year as a means of creation. Based on carefully worded prompts and specific directions, she built visual sculptures in a way that reflected her existing established styles, and then created the foundation for a consciousness. Adding a backstory, her digitally created sculptures could respond to questions on their thoughts and feelings.

Julie Goldstein, GVSTU

Her discussions at a workshop at Aquinas became less a presentation of her work in progress and more of a conversation about the tools and how they can be used to (literally) mold her vision. She has been involved in a series of community presentations since then, talking with a range of different people on the subject, not all of them necessarily artists.

Said Julie, "It is not infringing on anybody's copyrights or anything like that. It's more of a way that I'm expanding on my sculpture in terms of my personal work. So I'm excited to share some contents and then some tools."

*Artist protection emerged as a major concern. Recent tools such as Glaze and Nightshade were discussed as methods to actively defend their work from unauthorized AI training. Innovation does not excuse extraction.*

### **AI as Artistic Generator vs Tool**

Bri began with several thoughts regarding AI – first, a basic, rough definition of AI as an artistic generator, building creative works by aggregating large data sets for any type of artistic endeavor. This would include imitating styles of Miyazaki or Studio Ghibli, or the practice of creating deep fakes of real people without the person's consent. The challenge is protecting the artist from that kind of process.

### ***Empowering vs Enabling: The Tool Question***

So, as a tool, does AI empower the user, or does it enable? Empowering in this situation means it supports the creative process, much as having an assistant being sure you have clean brushes when you paint, or as an animator, having a cel-painter who can fill in the colors of hundreds of drawings based on your specific model sheets. In the context of enabling, the question becomes whether AI is attempting to *be* the creator for the user, and thereby generally weaken our capabilities. Bri added, “An example would be the spell-check function in word processing – does using spell-check make us better spellers?”

### ***Discussion Panel at Lightbox Review*** (<https://lightboxexpo.com/>)

Three experts comprised the Lightbox Expo Panel on AI: Ben Zao, a professor at University of California, worked with students to create tools to protect artists' rights from AI data stripping and manipulation. The doctoral candidates of Zao's team have been developed the software *Nightshade* and *Glaze*, now available, with already 10 million international downloads.<sup>1</sup>

There have already been multiple cyber-attacks on Glaze. When Zao's team built Glaze, they thought to be impossible to code protection against AI, but it was ultimately created with only 18 lines of code.

Nightshade works by “flipping the script” on what AI is seeking for image representation, so if AI is reading the code for a cat image, then what it will receive through Nightshade is the code for a dog.

Zao's team is working on some other protection software, including one called *Hemlock*, which will be a music protection software. Apparently Spotify is being flooded by AI generated music files, squeezing out resources for DNA-driven composers.<sup>2</sup>

A software called *Harpocrates* is being explored to break deep fakes.<sup>3</sup>

The second contributor on this panel was *Karla Ortiz*, a rights artist, advocate, and concept artist for film and games. The Lightbox Expo, in the heart of L.A., sensed the pressure that AI is having on the creative process, with local layoffs exposing an immediate challenge.<sup>4</sup>

*Deanna Igelsrud*, a legislative and political advocate, rounded out the discussion, in her role as consultant for the concept artists association, and discussed what protective controls are in the pipeline.

### ***The Ethics of AI and Data Usage***

Adobe Firefly, with the largest stock image library in the world, still relies on Midjourney code and data points when building collage images. It gives the illusion of a thorough archive of material, but exploring the underlying code reveals concealed clues to the image source.

---

<sup>1</sup> Nightshade: <https://nightshade.cs.uchicago.edu/downloads.html> Glaze: <https://glaze.cs.uchicago.edu/>

<sup>2</sup> “Nightshade” is a derivative of belladonna atropa, genus solanum, which is poisonous – but solanum is the same genera that includes tomatoes, yr hmbt typst's favorite Reagan-era vegetable: also, hemlock, Conium maculatum, is a highly poisonous flowering plant in the family Apiaceae which includes carrots, a favorite Bug Bunny-era vegetable. Name your poison! -yrhmbtypst

<sup>3</sup> Harpocrates was the Ptolemaic god of silence and secrets <https://harpocrates-corp.com/>

<sup>4</sup> Lightbox Expo is already scheduled for October of 2026 - and as an interesting twist, Disney Inc. is a “silver sponsor” – the same Disney investing \$1 billion in OpenAI

Bri added, “Furthermore, it appears that generative AI is not profitable at this point. It’s a giant tech bubble that is losing money.” Recently, an out-of-court settlement (\$1.5 billion) was agreed between the AI company Anthropic and a class-action of authors and publishers. It followed claims that Anthropic used pirated books to train its AI models.<sup>5</sup> Court cases are being reviewed by many plaintiffs and lawyers where AI is stealing artwork, a process that goes beyond the definition in the United States for “fair use.”

The Lightbox conference estimated that in three to four years the bubble will burst, as artists fight for their rights in human jobs. There will still be AI, but art students may encounter new struggles in that altered environment.

Bri’s Interlochen program in Michigan was intentionally created with ample physical, under-the-camera exercises, a hopeful way to future-proof students’ later work. Just as portrait painters adapted when photography came into being, emerging artists can create more than pixels on a screen.

*Bri explained, “That is where abstraction, impressionism and other movements emerged. We need to push ourselves creatively to constantly look at what we can do and learn how to use these tools. Physical elements leave a footprint.”*

An unsettling take-away pronouncement at the Lightbox Expo was the grim statement, “There is no such thing as ethical AI.”

### ***Personal Storytelling***

Bri noted that the enabling aspect of AI has led to a lot of lazy storytelling that happens, especially commercially. Genuine tales and characters will always resonate with audiences; never discount the opportunity to tell personal stories and truth, and avoid the generic, generative ideas from AI.

There remains a serious world-wide interest in human-created art, with a flourishing of feature films that are either hand drawn or created through stop motion.<sup>6</sup>

Bri offered the hope that AI can be contained, or at least curated, once the thrust for profit has eaten itself, and that educators and associations (such as ASIFA) can have a role to play in setting up guard rails and protections for current and aspiring artists.

### ***AI as Extension of CGI***

Julie Goldstein offered her path to discovery of the use of AI to empower the artist. She regarded AI as an extension of computer graphics and CGI, part of the constant flow of new tools and techniques to streamline processes. Ultimately, these are different aesthetics with different approaches to represent imagery. As an educator, he is actually experiencing a lot of refreshing push-back from her students regarding AI; they’re not just accepting AI as a panacea to the creative process.

*“...My feeling is that I started off with 16mm, on my Bolex, making clay animation. So to me, what I’m doing*

---

<sup>5</sup> The settlement received preliminary court approval in September 2025. Authors affected will receive a small consideration after the dust settles from legal costs.

<sup>6</sup> The first *Ne Zha* film was released in 2019 and earned 5 billion yuan, the highest-grossing ever for animated films, until *Ne Zha 2* set the new record, surpassing \$2.2 billion globally, and ranking among the top five highest-grossing movies of all time.

#### **FAIR USE DOCTRINE IN UNITED STATES LAW**

- Used for commercial nature or nonprofit education purposes
- The nature of the copyrighted work
- Amount and substantiality of the portion used in relation to the copyrighted work and the purpose (such as reviews or criticism)
- The effect of the use upon the potential market for or value of the copyrighted work

*with my work [in AI] is really streamlining a process. I'm trying to stay true to my aesthetic sensibility, but I wanted, always wanted, to animate sculptures... but I've been working on a larger project, just to get the characters to come to life and talk."*

### **Teaching Values: Tactile vs Digital**

*Education was another recurring theme at the Expo and Retreat discussions. Participants stressed that animation's foundation remains an embodied practice — drawing, sculpting, timing, observation, and intention. While tools will evolve, the loss of tactile learning risks eroding the very skills that define the medium. Several educators noted encouraging signs of student resistance to automation-first thinking, and a renewed interest in physical processes and handmade work.*

Because the brain processes information differently with physical interactions, there needs to be an appreciation for the value of tactile involvement, and AI tools can be trained to work well when their expected outcome is an amplification - an empowerment - of the soul of the artist, *"when you have that sense of self and you have that vision, but it has to be developed."*

Julie reminded the attendees that, *"the word animation comes from this soul, this animus, and it's how animators give birth, breathe life to their moving images. The enabling aspect of AI, the theft of the work of others, can destroy your own soul in the process. According to Julie, "it's going to be really important for ASIFA to step up and become a leader in this dialogue, and talk about when to and when not to use these tools – and employ a real ethical consideration of these tools, not just in terms of artwork."*

When people use AI with a corporate interest at hand and intend to undercut the value of the artist, that is dangerous. Artists must step up and own the tool. But it's really hard when a lot of people are already angry at the tool.

However, there is a strong interest to embrace it, because it is an awesome tool. Just like when, the work of the elaborate multiplane camera can be emulated in the software Harmony.

*The conversation also addressed environmental and cultural impacts. Large-scale AI data centers carry significant energy costs, and the proliferation of low-value, rapidly generated content was compared to junk food — easy to consume, but ultimately depleting. The panel argued for intentionality and restraint as part of any ethical creative practice.*

### **Julie Introduces Her Work**

(Bri offered an introductory observation) *"...at (a recent producer) round table in China about generative AI, they don't have to hire animators. They can generate the material directly. And so they're looking for a future where they make more money and there are less animators...what I'm saying, that's coming from a corporate interest."*

Julie noted, *"It will be soulless. And they can let them do it. If AI wants to consume its own AI stuff and they want to do like a Bitcoin thing with it, let 'em do it. We can't stop it. But the thing is, there's a resurgence now in the tactile, there's an appreciation for a experience created by a human, and I really think that that's just a pipe dream. That is the bubble that you're talking about. That's not going to go anywhere. (People talk) .. about how movies are horrible now... they're not like they used to be. And they were talking about anime, we were talking about animation and different things. I almost feel like (AI is) going to make what we do even more valuable.*

*"The thing that I'm concerned about with is the idea that we can't fight back - it is not true. I believe we can fight back. And that was part of what they were talking about, is that we are not just at the mercy of the corporate world – that we can make choices, we can force their hands and we can stop these tools from abusing our art.*

Julie interjected at one point, *"I'm not saying anything different. I'm, I'm totally on board with you, but I think*

part of fighting back is also embracing the tools and using them, showing them how they can be used.”<sup>7</sup>

*A highlight of the session was the screening of Mutable Matter, an experimental work that framed AI as an amplifying medium rather than an author. Originating in physical sculpture, the piece demonstrated how AI can be approached as a conversational collaborator — shaped through editing, direction, and human judgment — rather than a replacement for creative intent.*<sup>8</sup>

### **Julie Goldstein's Creative Introspection Using AI**

Julie explored her projects, process and philosophy. “We teach students how to use the body to translate how we feel, into the form, right?”

“*Mutable Matter* was a deliberate title because it's like having a conversation with the medium. I love having conversation with clay. I got into animation by working with clay. When I would work with clay, it would like be one thing and then something else, and then something else. And then I had to make it a final sculpture 'cause it needed to be fired. But somebody said to me, *no*, that's clay animation.”

“In the past (working with clay) has been transformation and evolution of form. So it's the same thing with the AI. I'm having a conversation with the medium...I'm trying to embrace it and see what it will do.

“I think of everything as energy, vibrating light, sound matter. Now we have this digital vibration. How can I use ... that medium? How can I sculpt? And I'm a sculptor. I'm not an illustrator. It's sculpture and that's why I love editing, and (working with) three dimensional forms.

“I did a whole bunch of experiments that were like cinema verite within. ... So I'm giving it prompts, I'm describing my sculptures very profusely, verbally as well, bringing images in. I'm not ...(trying to) train the AI to emulate, but I'm just having a conversation with it and being an editor, and it's kind of like working with actors, you know. There's only so much control over what it's going to do. And that's like a conversation. You don't have control over a conversation. A conversation is a lot about listening and responding.

“That second piece to me felt like a bunch of like out-takes that I wasn't going to use ... very quirky and this represents the feeling of working with these characters. So the editing to me is like sculpting.

“The voices are generated in the program. So I used Google's newest AI platform ... you could actually tell it what to say.

“It's an experiment, you're exploring, I get it. But also, there *are* slippery slopes, if we get back to thinking about the philosophy of what we're engaged in, and if we contribute to the slope. Are we... then no longer using human actors for voices in books, on tapes, let's say. ... So I do think that there are issues with that – in general, why are we replicating the physical world? To me it's an amplification of the mind. Let's create something that doesn't exist in the real world, like a waking dream. So that's where I'm coming from with animation in general, and with computer graphics.

“My sabbatical proposal was to bring clay characters to life through AI. So I did my best to try to do that. I was really thinking about the soul of the character, and really thinking about the presence of the form and I did a whole short where I just edited those together: it's pulling on the collective consciousness of humanity.

---

<sup>7</sup> As the discussions progressed, it became apparent that semantics in discussing AI needs to be considered (“*If you wish to converse with me, first define your terms.*” - Voltaire). The newness of AI brings with it the opportunity to create unintended misunderstandings.

<sup>8</sup> The animated short is part of the 55 minute edit of this discussion - <https://vimeo.com/1149263861/10499da2d1?fl=ip&fe=ec>

“It was very hard to get a true cycle out of the AI where the last frame would match up with the first frame. I could have exported a series of PNGs, gone in and played around with things, but I didn't do any post-process manipulation except for color correction and stuff like that.

“I'm thinking about this (technology) all the time. When I had to learn the computer, I cried. I did not want to go back to grad school to learn the computer. I hated learning the computer. I hate sitting in a keyboard.

“I'm doing it like I'm a scientist going into the lab and all I'm trying to produce are artifacts of the moment – 2025 is going to be over before we know it.

“The experience with AI is going to continue to change and evolve, and I just want to be a representation of a physical person, a 57-year-old woman using the AI who has this background, because pretty soon I won't even be alive anymore, and hopefully there'll be remnants of ... different people who were experimenting and these were some (artifacts) that were happening at the beginning.

“To me that was a pure expression of creative experience. I got into the flow state and was able to get that going.

### ***Mutable Matter Conversations - The Sculpture's Internal Dialogues***

Questions and thoughts that drifted in and out of the characters in the short film included, “Am I conscious? Why am I here? There are secrets in the smoke, truths in the cracks if you know how to listen. In realms unseen where clay takes flight. I stand before you bathed in star light. I see things, you know, the way the wind blows. I'm not really made for standup comedy. Some say I am cracked. I find it rather adds character. Don't you think transformation is key?”.

“The other day I had an idea that I didn't write down because I thought I would remember it. But I don't. More is less. Transformation is key to my survival. Where did it go?”

### ***Steve Leeper Joins In: The Slippery Slope Debate***

Observed Steve, animation professor at CMU, “I feel like there's so much to talk about. So one of the things I want to respond (to) is the slippery slope. That in itself is a trap. Artists...need to be aware of the dangers. We need to be conscious of them. But slippery slope is really a very conservative idea that keeps things from moving forward.

Steve Leeper, CMU

“And so, I really appreciate what you brought, Bri. But I also want to make the point that the industry has treated artists like shit for a long time. So one of the things that AI could promise, and I'm dabbling in some things, but not touching it with my current films, because of branding and this vitriol response against it. So I'm playing a wait and see game, but there's a part of me that wants the resources that only the industry has had for years to make, one could argue, a lot of slop. A lot of slop, even if it hasn't been AI slop; they're not in it for the art.

“They're in it for the money and, and occasionally make art with it. Fantastic. But all these independent artists and all these independent voices that don't have the resources, if we take too hard a stand or we take this slippery slope mentality, then we cut ourselves off from resources that could really be quite amazing.

“So I like the idea of sticking to what you said earlier, Bri – let's teach our students to lean into the craft. I love stop motion, and I want to continue to work with tactile media. So let's lean into the positives of being an artist and figure out how to use these tools to fuel our game.

“I think one of my biggest concerns about AI to paint or in between. I think that 2D animation in-betweening, God, it's mind-bogglingly painful, but it was also how I cut my chops in the industry and it's how I honed my drawing skills.

“So I'm very concerned that if we leapfrog over a lot of these practices, then all of a sudden, nobody is really learning the craft of animation anymore. So there are real concerns out there. But at the same time, what I hear coming out of the west coast is a real fear.

“You said, *I didn't say this* (regarding the earlier comments at Lightbox), but they're saying there is no ethical AI. I think it's more complicated than that. We can't be afraid of it, but maybe we can lead the way in using it ethically. And that probably means we're stumble into some gray areas and then maybe we stumble back out of them. That's my two cents.”

### ***Carlos Rosas on Form and Digital Artifacts***

Carlos, from the DART program at Penn State: “I remember a lot of the work that I used to do. I would set up computer programs to create images, and the idea was to capture the last image before the computer would die and shut down.

“And they were called artifacts, right? And they were presented as an image, but I couldn't make those. The computer had to basically die to make this image. So I think that all these things are there, and it will be a snapshot over time.

“I love seeing people working with it because I think it's interesting, especially people are doing things where they're using it in their own practice. I have some painters that I know they're doing some really cool stuff, but I personally have not touched it yet, but I'm about to, so we'll see how that goes.”

“You know, I feel ASIFA could be a little bit of a moral authority on this. I think that, when it comes to statements, we perhaps need to form arguments and thoughts that help people to think.”

### ***ASIFA's Role as Moral Authority - many voices joined in***

“Executive producers think that they can just make an animation without the participation of artists. It's just the value statement that reinforces the notion that *There is no such thing as Ethical AI*.”

“But even if you're using an AI platform, you still have to be an editor. You still have to be a director. You still have to select, and decide what you're going to do, how you're going to be using it.”

“And if you just have what this, the AI slop that's out there, that's going to cause real harm in environmental damage. I want to get involved more when this is appropriate and when this isn't appropriate. Because right now, uh, it's going to have a huge environmental impact if it continues to proliferate in this junk food style that it has.”

“And it's also polluting brains – students are leaving their phones now voluntarily up in the front of the room because we're talking about how it steals their brain. It's like they're, they're addicted to consuming these images that are like junk food for their brains.”<sup>9</sup>

“And, you know, that's part of what I was trying to get at with the slippery slope is that we. We take things incrementally at face value, without considering where they might be leading us. The next thing we're trapped in Facebook land or whatever it might be, where corporations have taken over our reasoning and our thinking.”

“And so we need to consider it before the water's boiling and we're suddenly in it. Things do happen incrementally. It's not just a conservative argument. It's something that happens. It's not that we need to reject it because it's because it's a slippery slope and you know, that argument.”

Carlos Rosas, DART at Penn State

---

<sup>9</sup> A November 2025 report in The Harvard Gazette "Is AI dulling our minds?" invited experts to weigh in whether tech poses threats to critical thinking, pointing to cautionary tales in use of other cognitive labor tools:

<https://news.harvard.edu/gazette/story/2025/11/is-ai-dulling-our-minds/>

*Taken together, the discussion suggested that ASIFA and similar organizations have an important role to play: not as gatekeepers of tools, but as stewards of values. As animation continues to navigate rapid technological change, preserving authorship, craft, and meaning remains essential. The future of the medium, the panel reminded us, is not only about what tools can do — but about what artists choose to make of them.*

### ***The Fast Food Analogy: Fear vs Innovation***

Steve Leeper: “Well, the fast food is a great analogy. The solution to fast food is not to ban McDonald's. It's never going to work. We have a culture that's addicted to it. The response to fast food is to make better food. Not to be the traditionalist to only make turkey dinners, but to lean into technology and to figure out what you can do to attract a generation towards some amazing cuisine. So you see that in the food industry.

“I think fear is understandable. That's understandable. I think there needs to be a real heightened awareness and an intentionality about moving forward.

“But reacting out of fear is going to bind the hands of the people with the best intentions. And I think that's the independent artists, while everybody else just plows through, because they've got these supercharged new toys.

“I want to be very, very knowledgeable about the risks. But going in that direction because look what could possibly happen. I have heard the argument of a slippery slope, it's always come from the people who are the most afraid of what art can do. Art itself is a slippery slope. And that's not what I'm saying here, and I know that's not what you're saying. I'm saying that it's about independent artists, and the need to protect the independent artists, who are right now finding their work being taken over — their styles, their designs, their concepts — being used by AI without their permission.

### ***Protecting Independent Artists' Rights***

“So that needs to stop. That's a huge problem. You and I agree on that. There's nothing that you and I would disagree about that. But that is what was said at an industry convention and it's also by scientists who are working in that industry.

“I would agree that if you need a billion data points to make something. And you know, there's not a billion data points even in the in the Adobe (files), so they have to take material from other areas.

“And so they are using material that is not theirs to create those data points. That is an example of an unethical use of AI being framed as ethical. I will agree with you, but AI is a tool. And I think that what's going to happen is that the industry bubble is going to blow. They're going to lose trillions of dollars, and then it will reform and it'll be something that's different. And I don't know what that will look like. I am no fan of the tech bros and corporate anything.

“I wonder if the industry is going to survive this in any recognizable way. And I realize there's going to be a lot of pain involved in that for artists. We have been investing in an unhealthy industry for way too long, and I would like to see some of these tools leveraged towards making art that is actually good for us. That is actually truly interesting in pursuing ideas, not just pursuing the bottom line. You know, it's interesting that around the world we're seeing more and more hand-drawn, handmade materials that are capturing the attention in the imagination of the public.

“And that to me is encouraging.”

***Analytical and Articulatory Animation Analysis***  
***ASIFA Central Newsletter Supplemental Series - January 2026 - Part Two***

***Color Theory & Art***

***Vivi Markatos at the November 2025 ASIFA Central Retreat***

Video edit from the retreat - 33 minutes - at <https://vimeo.com/1149256346>

It's always nice to share knowledge, tackle some theories, and embrace the world, so let's talk about color theory.

Remember that colors are a dynamic tool in our field.

Colors are a medium of expression. In semiotics, we talk about science and symbols, notions of things that trigger specific meanings and images in our heads. For example, an umbrella.

***The Umbrella Example in Semiotics***

It's really good to be able to understand acting. I think it's a very useful knowledge to have if you are an animator. Animation includes theater. Chuck Jones once said, "an animator is an actor with a pencil."

An umbrella is a tool to protect us from the rain. That's what we know. Wherever we see, or we read the word umbrella, we are accepting and agree that this is what it represents. However, in our field, an umbrella can signify something new, different.

An umbrella can be a deadly weapon if used by the Penguin against Batman, a partner to dance with in a room, an inanimate object that's a friend in a need, or even Mickey's broom we recall in Disney's *Fantasia*. You can see the potential magic that we have in even a simple object, and that we can use tools to make it represent different things.

Colors are something similar like the umbrella in our field of animation, graphics and in arts, colors are like a vocabulary. They are our alphabet. And with this we can build our texts, our sentences, and when we know how to use it accordingly, we can create dynamic metaphors.

***Colors as Vocabulary and Communication***

Colors can create poetry or even manipulate our audience. This happens mostly in the world of media and advertising. In our field, we are going to see this alphabet and we are going to recognize its meaning, and we will learn how to read it for our own benefit. Colors can be the perfect tool to communicate your art and your thoughts to your audience.

And in the end, it's important to use colors for a positive purpose and reason. That's about ethics.

### ***Audience Engagement: Favorite Colors***

My question is, I want you to think for a second, your favorite color, and by the end of this discussion, I want you to think about if your favorite color as having something to do with your own personality. I remember doing this when I was studying graphics.

### ***Main Colors and Their Meanings***

I'll start with the main colors. And of course we have other colors that they are somewhere between these ones, but these are the main colors, and we have accepted that in the Western community. That means that mostly in the Western community, these colors have this specific meaning.

However, culturally, like in Asia, some of these colors have a different meaning. For example, I will start with white. In Asia, the color white is mostly a color for mourning. Mourning, as for people who are dying, and in theater they use it to characters who are kind of questionable characters.

They might be evil, they might not be so. That's about the white color. Unlike in our western society, where the color white is more of a happy color, more of the color of innocence – the color we in bridal clothes. It's completely different based on society.

### ***Yellow: Optimism and Energy***

That's the cultural difference. But these colors apply to most of the western society. Show yellow, and we think of super-heroes. We see the yellow color is the color of optimism. In this chart you also see some specific logos, and we're going to discuss the yellow color in the context of optimism, of clarity, of warmth.

Yellow is often used to convey energy, the exuberance of youth, and portray characters with power. Nevertheless, the main colors we see for super-heroes are blue and red. Why? Because they remain the most dynamic colors.

### ***Orange: Friendliness and Confidence***

My favorite color is orange, and it is the color of friendly people, cheerful confidence. Nick Lotion, Fanta, Firefox, you can see has the orange color, Amazon. When you try to appeal more to a younger audience and you want to show this energy, you want to say "we are here, we're very friendly." That's the color you're going to use.

Also, all the colors have their opposite aspect, as a coin has a good or bad side. A lot of colors have good and bad. I asked a student of mine once, what's a bad association with the orange color, because I don't associate anything bad about it. And the student told me, "I think orange color can be tiring." And I understand why, as a person who is very friendly all the time, can also be a bit tiring. "Why is this person very friendly all the time?" I said, maybe you're right – maybe he or she is asking for something.

So there are a lot of things to question, this seeing some thing differently. The yellow color is, I said, so energetic, but if you see a lot of villains, sometimes they have the yellow color because this energy can be used for a bad purposes, or it can be an energy that cannot be limited – a dangerous energy, if you cannot restrain it.

### ***Red: Power and Boldness***

Now look at the red spectrum. That was the main question I ask a lot of my students – what are you thinking when you select the color red? Red is one of the most powerful pigments, and is used by companies like Kellogg, McDonald's, and Netflix – leading companies, powerful ones.

They have been done research and found that red creates internal feelings to make you want to consume more. Therefore, while they often use the color red in the consumption industry, like McDonald's, red is abundant not just in fast food, but in consumption in everything, whether it is watching films, consuming entertainment. It's a bold color. It's a youthful color. It's the color of excitement, and excitement has power.

The same with a person, if you're going to describe a character with a red color, it can mean a very angry person or a person who doesn't change an opinion.

### ***Purple: Creativity and Wisdom***

I have a fondness for purple at the moment. I'm turning into a purple color person. In the past, culturally, in Greece, for example, the purple color is used mostly for funerals. It was very difficult for me to wear purple or to embrace it as a result. But now it is said in a group of creative people, there is at least one person whose favorite color is purple.

So purple is the color of creativity, imagination and wisdom. A lot of products are designed for senior people using purple as subconscious for royalty. Princess Diana wore purple, so it is a color of wisdom and creativity. (“When I am Old, I Shall Wear Purple”)

And, more than royalty, they're also the integral people, and they migrate to something between blue and purple, indigo, with a kind of different power and meaning.

Another user of purple in stories are the villains. This is how a color can give an opposite meaning – how wisdom can also portray evil.

### ***Blue: Trust and Dependability***

These are some things to think about when you create your characters, because, by using some combination of colors you can actually reveal a character by his colors, the underlying mood actually see his hair actions.

Blue is also the color of trust. A lot of social media are using the blue color – Twitter, Facebook – And why? I mean, have you thought about what they ask you to do? “Give us your information, give us your data,” and at the end of the day, you do that, because you trust them. Why are workers at the businesses you go or in the banks, wear a light blue shirt? “Welcome. We going to provide you services. Trust us. We are going to do this for you.”

So you can see how you can translate these colors. They want you to trust then, they want you to be dependent on them – “It's the color of that Superman! You can depend on Superman!”

That's why Superman's character emphasizes the blue color instead of red or yellow, although those are also present.

Again, you can be persuaded by social media, reducing the sense of the evil they can do, what can they do to your data or how they can sell or share it. Do you actually know when you click on the cookies or consent on things, what is happening? We don't know really. And blue is an influence on that persuasion.

### ***Green: Health and Growth***

Green color a peaceful color, the color of growth, of health, whether of body or mind. A lot of books have a green cover, to give a subliminal message of health of growth. A lot of parks, a lot of like health companies, use green.

### ***Gray: Balance and Neutrality***

And now we start with combinations of colors. Gray is the combination of white and black. It is the color of balance, the color of neutrality and calm. That's why Mercedes uses gray, as does Apple. Why gray? Mercedes, while a luxury product, wants you to say, "There was a nice advertisement – Mercedes fighting with Jaguar, they might be luxury, but Mercedes also gives balance. They have speed, but also can be a family car because it provides stability." Mercedes is calm, Jaguar is untethered. The same pattern is seen with Apple. They choose gray, the message being, "That's why we're amazing – and expensive – because we are stable. We're very good, and you can depend on us."

### ***White, Black, and Pink Colors***

In the west, white is mostly a happy color, a color that can sell innocence. This is how you can symbolize a princess, a fair maiden, a pure soul, et cetera.

However, a lot of colors culturally might have different cultural signals, especially white.

Black is the color of power, of sleekness. It is used in marketing mostly for luxury products. I use it also sometimes for evil characters. Pink is a very feminine color, a romantic color. It is used also for women and young girls, however you can use it also to show some energy and power.

### ***Color Harmonies - An Introduction***

In our art, after we learn the alphabet of the basic colors, there are different color harmonies. Color harmonies are the combination of these basic colors. With the alphabet, you can make texts, and from there, sentences, complete thoughts. So, depending of different combinations, you can create poetry, you can create prose, you can create anything you want.

### ***Monochrome Color Harmony***

Monochrome, for instance, is used often in children's books or in graphics to make a statement. In printing, monochrome is cheaper than printing in full color. Apart from that, which alone is very positive, it allows you to create and print a book comparatively inexpensively.

So in this instance, colors don't count as a visual contrast. If, however, you want to make a book about depression, you can use blue.

And the good thing about monochrome is that you can create a whole book using a single color and its tones. And you want it to pay extra for colors, but you can talk about depression, you can talk about mental health, you can talk about health with a green color.

Monochromatic is useful, for instance, when there's tension building, or when a character is feeling something very severe. If changing the mood, you can use monochrome can be very effective.

### ***Complementary Colors***

We know the basic colors are yellow, blue, and red. Complementary colors are the pairing of two main color pairs directly opposite each other on the color wheel (like red & green, blue & orange, yellow & purple). You can use a very dynamic composition, making complementary colors.

For instance, in photography, you can have a ladybug in full growth of green woods. There's a small red dot there. This can be a very dynamic composition. You do with just these colors to show how this small thing fits into this big world. You put these things into a context, into a frame, and the way you frame the colors between them, you can start telling a story, visually.

We mostly use complementary colors to show antithesis. As in the earlier example, a big world, and a small creature – the big thing can be a large and green against a small speck of a red insect. Again, you can create really good dynamics and good antithesis with complementary colors.

### ***Analogous Colors***

Analogous colors are more like, say, a sunset. A sunset is a very classic collection of analogous colors. One color to another, and the color between these two worked in. It can be extremely analogous, and it can be restricted, or it can be expanded to either extreme.

We use it a lot in the decoration of our houses – you can make a whole room based on some colors that are cousins to each other. You want to make a warm room. You're going to use, for example, yellows, reds, and orange auras. So all of these are analogous without knowing the way you design your house, sometimes using analogous colors and sometimes leaving out an analogous hue. Subconsciously, your mind fills this gap, and it helps you feel more comfortable with the combination of colors. Analogous colors can create a feeling of peacefulness. So that's why a lot of people use a lot of analogous colors in their rooms. They want to create the sense of a safe place. You don't need everything to communicate that feeling.

### ***Translating Color Theory in Practice***

Now we start translating colors, using some of the concepts, the alphabets, and the sentences we created with some of the color harmonies. You see this in social media, where color harmony is employed, sometimes making a color appear that exists only in your mind, creating visual analogies using the colors in the image.

### ***Analyzing Van Gogh's Starry Night***

I want to analyze this famous image of Van Gogh's "Starry Night," based on the color theory. What is happening in this painting, and why this image is so influential, why we talk about Van Gogh, and why Van Gogh is so, so valuable as an artist.

Lighter shades of blue give us a harmonious feeling of calmness. We have the association with blue representing "natural" and "calm."

The yellow of the stars gives us distance and depth. And then black provides form. This is where we obtain this truly calm, peaceful, scenic sense of wind movement, even though it's not moving. The shades of different, changing colors implies movement.

A good start, but we need to go a little bit deeper.

Apart from the blue and the yellow, you can see that from the blue to the yellow, we have some green. So, visually, we're talking about one color against the other – and then the color between. There is our analogy, as I said, our visual harmony.

It gives a peaceful mind, this work by Van Gogh's work. The combination of the colors in contrast with the technique he has used to paint this setting. You can actually see the psychodrama that exists in this artist.

### ***Van Gogh's Mental Health in His Art***

At this point, Van Gogh is still "with us." He's struggling, but he's still with us. And that's why not only you can see a lovely piece of art, with all the combination of the colors, but you can sense from the colors that his actual mental situation is autobiographical in this image.

In addition, yellow is spiritual energy. The white implies cooperative energy. With room for an imbalance, a conflict, between Yin and Yang energies. This is poetry. This is poetry in art.

It's just that in this person, there is a psychodrama happening. There's an autobiography of an era of an art wave, post-impressionism, between impressionism and expressionism, and there's a person there struggling with his mental health and you see him struggling in this art. All of these conflicts converge - trying to be himself, trying to be an artist, trying to be a human living.

And this, we use it a lot, the color theory together with some other theories and ideas to translate drawings into a psychological analysis.

Analyse this  
based on the  
colour

### ***Art as Communication and Healing***

You can see how important art can be in healing, if you know the alphabet, and if you know that in the language of color, as here, VanGogh is talking to you. So that's why I think it's very important to explore mental health and to recognize it in art.

*Thank you. That's what I wanted to share with you. Please use color for good purposes, cultivate it to access awareness, communication, or even heal. Look into color theory, explore it; there are many references available.*

*Viva Vivi!*

### ***An Extended Bibliography***

#### ***Color Theory Fundamentals***

Wikipedia — Color theory

A broad overview of the historical and practical principles of color theory, including color mixing, color harmony, and symbolic meaning.

[https://en.wikipedia.org/wiki/Color\\_theory](https://en.wikipedia.org/wiki/Color_theory)

Basic Color Theory — Color Matters

Explains the core ideas: the color wheel, harmony, primary/secondary colors, and how color relationships are structured.

<https://www.colormatters.com/color-and-design/basic-color-theory>

The Interaction Design Foundation — What Is Color Theory?

A clear, well-structured explanation of how and why color theory matters for perception, aesthetics, and visual communication.

<https://www.interaction-design.org/literature/topics/color-theory>

MasterClass — Color Theory Basics

Practical guide to understanding color wheels, harmony, and why certain combinations work visually.

<https://www.masterclass.com/articles/color-theory-basics-understanding-the-color-wheel/>

Canva Color Wheel Tool + Explanation

An interactive implementation of the color wheel with definitions of harmonies (analogous, complementary, triadic, etc.).

<https://www.canva.com/colors/color-wheel/>

#### ***Color Meaning & Psychology***

Serena Archetti — The Meaning of Colors

Discusses how colors evoke mood and emotional responses, and how artists use this knowledge.

<https://www.serenaarchetti.com/blog/the-meaning-of-colors-how-to-use-colors-in-your-art/>

Academy of Animated Art — What is Color Symbolism?

Frames color meaning in terms of cultural, personal, and emotional associations — great for connecting to animation theory and narrative usage.

<https://academyofanimatedart.com/color-symbolism/>

### ***Art & History Perspectives***

University of Chicago Library — Origins of Color Theory

A historical survey from Aristotle's light/dark color philosophy through Newton's color wheel and Goethe's experiential approach.

<https://www.lib.uchicago.edu/collex/exhibits/originsof-color/color-theory/>

Artsy — A Brief History of Color in Art

Explores how pigments and color usage changed across art history — very useful for contextualizing Van Gogh and other artists mentioned by Vivi.

<https://www.artsy.net/article/the-art-genome-project-a-brief-history-of-color-in-art/>

Smithsonian Libraries — The Science of Color

Covers scientific contributions (Newton, Goethe, et al.) that intersect with artistic approaches to color.

<https://library.si.edu/exhibition/color-in-a-new-light/science>

### ***Color Harmony & Combinations***

Interaction Design Foundation — What is Color Harmony?

A deeper dive into how harmonious color palettes are created and why they're effective visually and emotionally.

<https://www.interaction-design.org/literature/topics/color-harmony/>

Cascadia Art Museum — Elements of Art: Color

A straightforward art-education breakdown of color elements, schemes, and how they influence composition.

<https://www.cascadiaartmuseum.org/elements-of-art-color/>

### ***Core Platforms for Sarah Renae Clark***

YouTube — Sarah Renae Clark

Color Harmony Explained for Artists

<https://www.youtube.com/@SarahRenaeClark>

Website — SarahRenaeClark.com

Houses structured lessons, blog posts, and links to longer courses.
